#	ARTICLE	IF	CITATIONS
1	Same, but different: Binding effects in auditory, but not visual detection performance. <i>Attention, Perception, and Psychophysics</i> , 2023, 85, 438-451.	1.3	9
2	Temporal expectancy modulates stimulusâ€“response integration. <i>Attention, Perception, and Psychophysics</i> , 2022, 84, 221-230.	1.3	5
3	All together now: Simultaneous feature integration and feature retrieval in action control. <i>Psychonomic Bulletin and Review</i> , 2022, 29, 512-520.	2.8	3
4	Contextual Features of the Cue Enter Episodic Bindings in Task Switching. <i>Journal of Cognition</i> , 2022, 5, .	1.4	8
5	What Belongs Together Retrieves Together â€“ The Role of Perceptual Grouping in Stimulus-Response Binding and Retrieval. <i>Journal of Cognition</i> , 2022, 5, .	1.4	8
6	Relevant to me: the integration of other people into the self-concept happens and depends on their current relevance. <i>Discover Psychology</i> , 2022, 2, .	0.9	0
7	A mighty tool not only in perception: Figure-ground mechanisms control binding and retrieval alike. <i>Attention, Perception, and Psychophysics</i> , 2022, 84, 2255-2270.	1.3	10
8	Remote binding counts: measuring distractor-response binding effects online. <i>Psychological Research</i> , 2021, 85, 2249-2255.	1.7	2
9	When irrelevant information helps: Extending the Eriksen-flanker task into a multisensory world. <i>Attention, Perception, and Psychophysics</i> , 2021, 83, 776-789.	1.3	8
10	Context-Dependent Memory of Motor Sequences. <i>Journal of Cognition</i> , 2021, 4, 15.	1.4	1
11	Registered Report 2.0: The PCI RR Initiative. <i>Experimental Psychology</i> , 2021, 68, 1-3.	0.7	5
12	Dual-tDCS over the right prefrontal cortex does not modulate stop-signal task performance. <i>Experimental Brain Research</i> , 2021, 239, 811-820.	1.5	13
13	Integrating salience and action â€“ Increased integration strength through salience. <i>Visual Cognition</i> , 2021, 29, 91-104.	1.6	13
14	Shedding light on the prefrontal correlates of mental workload in simulated driving: a functional near-infrared spectroscopy study. <i>Scientific Reports</i> , 2021, 11, 705.	3.3	13
15	The level of representation of irrelevant stimuliâ€“Distractorâ€“response binding within and between the senses. <i>Attention, Perception, and Psychophysics</i> , 2021, 83, 2256-2266.	1.3	2
16	Tactile temporal offset cues reduce visual representational momentum. <i>Attention, Perception, and Psychophysics</i> , 2021, 83, 2113-2122.	1.3	1
17	Target Amplification and Distractor Inhibition: Theta Oscillatory Dynamics of Selective Attention in a Flanker Task. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2021, 21, 355-371.	2.0	15
18	Shocking advantage! Improving digital game performance using non-invasive brain stimulation. <i>International Journal of Human Computer Studies</i> , 2021, 148, 102582.	5.6	21

#	ARTICLE	IF	CITATIONS
19	The influence of stress on distractor-response bindings. <i>Stress</i> , 2021, , 1-10.	1.8	0
20	Not so social after all: Video-based acquisition of observational stimulus-response bindings. <i>Acta Psychologica</i> , 2021, 217, 103330.	1.5	3
21	Selective directed forgetting of motor sequences. <i>Acta Psychologica</i> , 2021, 218, 103352.	1.5	2
22	Electrophysiological correlates of savingâ€œenhanced memory: Exploring similarities to listâ€œmethod directed forgetting. <i>European Journal of Neuroscience</i> , 2021, 54, 6060-6074.	2.6	2
23	Effects of single-session transcranial direct current stimulation on reactive response inhibition. <i>Neuroscience and Biobehavioral Reviews</i> , 2021, 128, 749-765.	6.1	35
24	Brightness versus darkness: The influence of stimulus intensity on the distractor-response binding effect. <i>Acta Psychologica</i> , 2021, 212, 103224.	1.5	0
25	Different effects of spatial separation in action and perception. <i>Psychonomic Bulletin and Review</i> , 2021, 28, 845-852.	2.8	2
26	Illuminating the prefrontal neural correlates of action sequence disassembling in responseâ€œresponse binding. <i>Scientific Reports</i> , 2021, 11, 22856.	3.3	9
27	Goal-Based Binding of Irrelevant Stimulus Features for Action Slips. <i>Experimental Psychology</i> , 2021, 68, 206-213.	0.7	9
28	Distractor-based retrieval in action control: the influence of encoding specificity. <i>Psychological Research</i> , 2020, 84, 765-773.	1.7	9
29	David and Goliathâ€œsize does matter: size modulates featureâ€œresponse binding of irrelevant features. <i>Psychological Research</i> , 2020, 84, 2034-2045.	1.7	1
30	Electrify your Game! Anodal tDCS Increases the Resistance to Head Fakes in Basketball. <i>Journal of Cognitive Enhancement: Towards the Integration of Theory and Practice</i> , 2020, 4, 62-70.	1.6	22
31	Perception it is: Processing level in multisensory selection. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 1391-1406.	1.3	11
32	Food for Your Mind? The Effect of Tyrosine on Selective Attention. <i>Journal of Cognitive Enhancement: Towards the Integration of Theory and Practice</i> , 2020, 4, 285-295.	1.6	4
33	Multisensory feature integration in (and out) of the focus of spatial attention. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 363-376.	1.3	26
34	Interference of irrelevant information in multisensory selection depends on attentional set. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 1176-1195.	1.3	9
35	Detection versus discrimination: The limits of binding accounts in action control. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 2085-2097.	1.3	23
36	Perturbation of the right prefrontal cortex disrupts interference control. <i>NeuroImage</i> , 2020, 222, 117279.	4.2	28

#	ARTICLE	IF	CITATIONS
37	Higher-Order Cognition Does Not Affect Multisensory Distractor Processing. <i>Multisensory Research</i> , 2020, 34, 351-364.	1.1	1
38	Identity-Based Crossmodal Negative Priming: Aftereffects of Ignoring in One Sensory Modality on Responding to Another Sensory Modality. <i>Multisensory Research</i> , 2020, 33, 703-721.	1.1	2
39	Shedding light on the frontal hemodynamics of spatial working memory using functional near-infrared spectroscopy. <i>Neuropsychologia</i> , 2020, 146, 107570.	1.6	8
40	Task relevance determines binding of effect features in action planning. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 3811-3831.	1.3	19
41	The disintegration of event files over time: Decay or interference?. <i>Psychonomic Bulletin and Review</i> , 2020, 27, 751-757.	2.8	31
42	CS as an effect: action-based evaluative conditioning depends on temporal contiguity. <i>Journal of Cognitive Psychology</i> , 2020, 32, 661-667.	0.9	1
43	Creating a network of importance: The particular effects of self-relevance on stimulus processing. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 3750-3766.	1.3	17
44	Representational momentum in vision and touch: Visual motion information biases tactile spatial localization. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 2618-2629.	1.3	11
45	Binding and Retrieval in Action Control (BRAC). <i>Trends in Cognitive Sciences</i> , 2020, 24, 375-387.	7.8	194
46	EEG beta power increase indicates inhibition in motor memory. <i>International Journal of Psychophysiology</i> , 2020, 150, 92-99.	1.0	16
47	It is more than Interference: Examining the neurohemodynamic correlates of the flanker task with functional near-infrared spectroscopy. <i>European Journal of Neuroscience</i> , 2020, 52, 3022-3031.	2.6	4
48	Specifying the mechanisms behind benefits of saving-enhanced memory. <i>Psychological Research</i> , 2020, 85, 1633-1644.	1.7	5
49	The Forward Testing Effect is Immune to Acute Psychosocial Encoding/Retrieval Stress. <i>Experimental Psychology</i> , 2020, 67, 112-122.	0.7	8
50	Electrophysiological evidence for action-effect prediction.. <i>Journal of Experimental Psychology: General</i> , 2020, 149, 1148-1155.	2.1	12
51	The role of location in the organization of bindings within short-term episodic traces.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2020, 46, 512-524.	0.9	9
52	Evidence Against Combined Effects of Stress and Brain Stimulation on Working Memory. <i>Open Psychology</i> , 2020, 2, 40-56.	0.3	10
53	Effective Gamification of the Stop-Signal Task: Two Controlled Laboratory Experiments. <i>JMIR Serious Games</i> , 2020, 8, e17810.	3.1	35
54	The official soundtrack to "Five shades of grey": Generalization in multimodal distractor-based retrieval. <i>Attention, Perception, and Psychophysics</i> , 2020, 82, 3479-3489.	1.3	9

#	ARTICLE	IF	CITATIONS
55	Experimental Psychology in the Year 2020. <i>Experimental Psychology</i> , 2020, 67, 1-4.	0.7	0
56	Stress and Cognition in Humans. <i>Experimental Psychology</i> , 2020, 67, 73-76.	0.7	5
57	Cathodal tDCS increases stop-signal reaction time. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2019, 19, 1129-1142.	2.0	34
58	Selective binding of stimulus, response, and effect features. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 1627-1632.	2.8	18
59	Understanding self-prioritisation: the prioritisation of self-relevant stimuli and its relation to the individual self-esteem. <i>Journal of Cognitive Psychology</i> , 2019, 31, 813-824.	0.9	9
60	Response- \leftrightarrow response binding across effector-set switches. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 1974-1979.	2.8	10
61	Negative priming is diminished under high blood pressure in healthy subjects. <i>Journal of Neural Transmission</i> , 2019, 126, 1111-1114.	2.8	2
62	Saving-enhanced performance: saving items after study boosts performance in subsequent cognitively demanding tasks. <i>Memory</i> , 2019, 27, 1462-1467.	1.7	19
63	Separating after-effects of target and distractor processing in the tactile sensory modality. <i>Attention, Perception, and Psychophysics</i> , 2019, 81, 809-822.	1.3	2
64	Temporarily Unavailable: Memory Inhibition in Cognitive and Computer Science. <i>Interacting With Computers</i> , 2019, 31, 231-249.	1.5	7
65	Testing enhances motor practice. <i>Memory and Cognition</i> , 2019, 47, 1270-1283.	1.6	9
66	Managed Forgetting to Support Information Management and Knowledge Work. <i>KI - Kunstliche Intelligenz</i> , 2019, 33, 45-55.	3.2	6
67	The contradictory influence of velocity: representational momentum in the tactile modality. <i>Journal of Neurophysiology</i> , 2019, 121, 2358-2363.	1.8	11
68	Offline beats online. <i>NeuroReport</i> , 2019, 30, 795-799.	1.2	53
69	An action control perspective of evaluative conditioning. <i>European Review of Social Psychology</i> , 2019, 30, 271-310.	9.4	8
70	Modulations of event-related potentials by tactile negative priming. <i>NeuroReport</i> , 2019, 30, 227-231.	1.2	2
71	The impact of stimulus uncertainty on attentional control. <i>Cognition</i> , 2019, 183, 208-212.	2.2	15
72	Lost time: Bindings do not represent temporal order information. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 325-331.	2.8	22

#	ARTICLE	IF	CITATIONS
73	Implied tactile motion: Localizing dynamic stimulations on the skin. <i>Attention, Perception, and Psychophysics</i> , 2019, 81, 794-808.	1.3	9
74	Sex, ADHD symptoms, and <i>CHRNA5</i> genotype influence reaction time but not response inhibition. <i>Journal of Neuroscience Research</i> , 2019, 97, 215-224.	2.9	2
75	Searching for the inner self: evidence against a direct dependence of the self-prioritization effect on the ventro-medial prefrontal cortex. <i>Experimental Brain Research</i> , 2019, 237, 247-256.	1.5	21
76	Binding abstract concepts. <i>Psychological Research</i> , 2019, 83, 878-884.	1.7	6
77	From simple to complex actions: Response-response bindings as a new approach to action sequences.. <i>Journal of Experimental Psychology: General</i> , 2019, 148, 174-183.	2.1	33
78	Overt spatial attention modulates multisensory selection.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2019, 45, 174-188.	0.9	15
79	The Role of Congruency for Distractor-Response Binding: A Caveat. <i>Advances in Cognitive Psychology</i> , 2019, 15, 127-132.	0.5	2
80	The Forward Testing Effect is Reliable and Independent of Learners' Working Memory Capacity. <i>Journal of Cognition</i> , 2019, 2, 37.	1.4	9
81	May I have your attention please: Binding of attended but response-irrelevant features. <i>Attention, Perception, and Psychophysics</i> , 2018, 80, 1143-1156.	1.3	25
82	It's the Other Way Around! Early Modulation of Sensory Distractor Processing Induced by Late Response Conflict. <i>Journal of Cognitive Neuroscience</i> , 2018, 30, 985-998.	2.3	16
83	Dissecting stimulus-response binding effects: Grouping by color separately impacts integration and retrieval processes. <i>Attention, Perception, and Psychophysics</i> , 2018, 80, 1474-1488.	1.3	27
84	Feedback increases benefits but not costs of retrieval practice: Retrieval-induced forgetting is strength independent. <i>Psychonomic Bulletin and Review</i> , 2018, 25, 636-642.	2.8	6
85	Explaining response-repetition effects in task switching: evidence from switching cue modality suggests episodic binding and response inhibition. <i>Psychological Research</i> , 2018, 82, 570-579.	1.7	38
86	Single session tDCS over the left DLPFC disrupts interference processing. <i>Brain and Cognition</i> , 2018, 120, 1-7.	1.8	51
87	The influence of visual noise in the binding of irrelevant features to responses. <i>Visual Cognition</i> , 2018, 26, 780-791.	1.6	2
88	The Forward Effect of Testing: Behavioral Evidence for the Reset-of-Encoding Hypothesis Using Serial Position Analysis. <i>Frontiers in Psychology</i> , 2018, 9, 1197.	2.1	19
89	Tactile stimulation disambiguates the perception of visual motion paths. <i>Psychonomic Bulletin and Review</i> , 2018, 25, 2231-2237.	2.8	4
90	What Makes a Quality Journal?. <i>Experimental Psychology</i> , 2018, 65, 257-262.	0.7	6

#	ARTICLE	IF	CITATIONS
91	Disentangling inhibition-based and retrieval-based aftereffects of distractors: Cognitive versus motor processes.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2018, 44, 797-805.	0.9	3
92	Pimping inhibition: Anodal tDCS enhances stop-signal reaction time.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2018, 44, 1933-1945.	0.9	44
93	When congruence breeds preference: the influence of selective attention processes on evaluative conditioning. <i>Cognition and Emotion</i> , 2017, 31, 1127-1139.	2.0	7
94	Retrieval-induced forgetting is retrieval-modality specific: Evidence from motor memory. <i>Cognition</i> , 2017, 162, 143-152.	2.2	14
95	Crossmodal attentional control sets between vision and audition. <i>Acta Psychologica</i> , 2017, 178, 41-47.	1.5	10
96	Overlearned responses hinder S-R binding.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2017, 43, 1-5.	0.9	23
97	Ignorance reflects preference: the influence of selective ignoring on evaluative conditioning. <i>Journal of Cognitive Psychology</i> , 2017, 29, 939-948.	0.9	5
98	Dissociation of binding and learning processes. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 2590-2605.	1.3	40
99	Distinctiveness effects in self-prioritization. <i>Visual Cognition</i> , 2017, 25, 399-411.	1.6	32
100	How the mind shapes action: Offline contexts modulate involuntary episodic retrieval. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 2449-2459.	1.3	6
101	How perception guides action: Figure-ground segmentation modulates integration of context features into S-R episodes.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017, 43, 1720-1729.	0.9	26
102	Tactile stimulation disambiguates the perception of visual motion paths. <i>Journal of Vision</i> , 2017, 17, 596.	0.3	0
103	Timeless: A Large Sample Study on the Temporal Robustness of Affective Responses. <i>Frontiers in Psychology</i> , 2016, 7, 841.	2.1	5
104	Distractor-based stimulus-response bindings retrieve decisions independent of motor programs. <i>Acta Psychologica</i> , 2016, 171, 57-64.	1.5	6
105	Cardiac cycle time effects on selection efficiency in vision. <i>Psychophysiology</i> , 2016, 53, 1702-1711.	2.4	37
106	Five shades of grey: Generalization in distractor-based retrieval of S-R episodes. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 2307-2312.	1.3	17
107	Stress and selective attention: Immediate and delayed stress effects on inhibition of return. <i>Brain and Cognition</i> , 2016, 108, 66-72.	1.8	4
108	Doing is for feeling.. <i>Journal of Experimental Psychology: General</i> , 2016, 145, 1263-1268.	2.1	11

#	ARTICLE	IF	CITATIONS
109	Self-prioritization in vision, audition, and touch. <i>Experimental Brain Research</i> , 2016, 234, 2141-2150.	1.5	47
110	Competition dependence of retrieval-induced forgetting in motor memory. <i>Memory and Cognition</i> , 2016, 44, 671-680.	1.6	14
111	Spatial negative priming: In touch, itâ€™s all about location. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 464-473.	1.3	6
112	A common mechanism behind distractor-response and response-effect binding?. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 1074-1086.	1.3	35
113	The role of the glucocorticoid receptor gene (NR3C1) for the processing of aversive stimuli. <i>Neuroscience Research</i> , 2016, 107, 8-13.	1.9	3
114	What a car does to your perception: Distance evaluations differ from within and outside of a car. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 781-788.	2.8	19
115	How motor practice shapes memory: retrieval but not extra study can cause forgetting. <i>Memory</i> , 2016, 24, 903-915.	1.7	10
116	Directed forgetting benefits motor sequence encoding. <i>Memory and Cognition</i> , 2016, 44, 413-419.	1.6	17
117	About the composition of self-relevance: Conjunctions not features are bound to the self. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 887-892.	2.8	25
118	The structure of distractor-response bindings: Conditions for configural and elemental integration.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2016, 42, 464-479.	0.9	32
