#	ARTICLE	IF	CITATIONS
1	Where do people look when they look at money?. International Journal of Industrial Ergonomics, 2022, 88, 103261.	2.6	0
2	What networks of attention are affected by depression? A meta-analysis of studies that used the attention network test. Journal of Affective Disorders Reports, 2022, 8, 100302.	1.7	4
3	Thinking about attention: Successive approximations to a productive taxonomy. Cognition, 2022, 225, 105137.	2.2	4
4	Comparing Youth Engagement on the AttentionTrip to the Child Attention Network Test. International Journal of Human-Computer Interaction, 2021, 37, 828-834.	4.8	3
5	Evolution of social attentional cues: Evidence from the archerfish. Cognition, 2021, 207, 104511.	2.2	8
6	Attention Network Tests in ASD. , 2021, , 381-385.		0
7	Inhibition of return: An information processing theory of its natures and significance. Cortex, 2021, 135, 30-48.	2.4	22
8	Role of aging and working memory in performance on a naturalistic visual search task. Cortex, 2021, 136, 28-40.	2.4	7
9	Re-examining attention capture at irrelevant (ignored?) locations.. Journal of Experimental Psychology: General, 2021, 150, e57-e65.	2.1	5
10	How Do I Know What I See Until I Hear What I Say?. International Journal of Art and Design Education, 2021, 40, 449-465.	1.1	1
11	On the origins and evolution of the Attention Network Tests. Neuroscience and Biobehavioral Reviews, 2021, 126, 560-572.	6.1	28
12	Immunity from Capture: Not!. Journal of Vision, 2021, 21, 2436.	0.3	0
13	Message From Your New Editor. Experimental Psychology, 2021, 68, 173-174.	0.7	0
14	Spatio-temporal properties of oculomotor activation by multiple, simultaneous peripheral stimuli. Vision Research, 2021, 188, 251-261.	1.4	0
15	Crossmodal Correspondence Between Auditory Timbre and Visual Shape. Multisensory Research, 2021, 35, 221-241.	1.1	4
16	Using the locus of slack logic to determine whether the output form of inhibition of return affects an early or late stage of processing. Cortex, 2020, 122, 123-130.	2.4	4
17	Brief Report: A Gaming Approach to the Assessment of Attention Networks in Autism Spectrum Disorder and Typical Development. Journal of Autism and Developmental Disorders, 2020, 50, 2607-2615.	2.7	6
18	Is covert spatial orienting embodied or disembodied cognition? A historical review. Quarterly Journal of Experimental Psychology, 2020, 73, 20-28.	1.1	8

#	ARTICLE	IF	CITATIONS
19	Comparing bilingual and monolingual performance on the attention network test: meta-analysis of a literature inspired by Albert Costa. <i>Journal of Cultural Cognitive Science</i> , 2020, 4, 243-257.	1.1	6
20	Effects of fatigue on attention and vigilance as measured with a modified attention network test. <i>Experimental Brain Research</i> , 2020, 238, 2507-2519.	1.5	7
21	The missing-colour effect: The attentional beam captures reading-relevant and reading-irrelevant information. <i>Quarterly Journal of Experimental Psychology</i> , 2020, 73, 1830-1840.	1.1	0
22	The Effect of Cigarette Packaging and Illness Sensitivity on Attention to Graphic Health Warnings: A Controlled Study. <i>Nicotine and Tobacco Research</i> , 2020, 22, 1788-1794.	2.6	4
23	The Attention Network Test Database: ADHD and Cross-Cultural Applications. <i>Frontiers in Psychology</i> , 2020, 11, 388.	2.1	33
24	Attention Network Tests in ASD. , 2020, , 1-5.		0
25	To erase or not to erase, that is not the question: Drawing from observation in an analogue or digital environment. <i>Art, Design and Communication in Higher Education</i> , 2020, 19, 203-220.	0.2	1
26	How Does Spatial Attention Influence the Probability and Fidelity of Colour Perception?. <i>Vision (Switzerland)</i> , 2019, 3, 31.	1.2	1
27	The puzzle of spontaneous alternation and inhibition of return: How they might fit together. <i>Hippocampus</i> , 2019, 29, 762-770.	1.9	8
28	The Relationship Between Spatial Attention and Eye Movements. <i>Current Topics in Behavioral Neurosciences</i> , 2019, 41, 255-278.	1.7	35
29	On the roles of central and peripheral vision in the extraction of material and form from a scene. <i>Attention, Perception, and Psychophysics</i> , 2019, 81, 1209-1219.	1.3	1
30	A Comparison of Engagement between the Attention Network Test and a Videogame-Like Version, Called the AttentionTrip. <i>International Journal of Human-Computer Interaction</i> , 2019, 35, 1813-1819.	4.8	6
31	What Neuroscientific Studies Tell Us about Inhibition of Return. <i>Vision (Switzerland)</i> , 2019, 3, 58.	1.2	17
32	Using Rescorla's truly random control condition to measure truly exogenous covert orienting. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 569-575.	2.8	0
33	Chapter 16. What cognitive processes are likely to be exercised by bilingualism and does this exercise lead to extra-linguistic cognitive benefits?. <i>Studies in Bilingualism</i> , 2019, , 247-262.	0.2	2
34	Task-dependent effects of volitional visuospatial orienting on perception. <i>Journal of Vision</i> , 2019, 19, 106b.	0.3	0
35	Dissociating Orienting Biases From Integration Effects With Eye Movements. <i>Psychological Science</i> , 2018, 29, 328-339.	3.3	26
36	Inhibition of return revisited: Localized inhibition on top of a pervasive bias. <i>Psychonomic Bulletin and Review</i> , 2018, 25, 1861-1867.	2.8	7

#	ARTICLE	IF	CITATIONS
37	Covert Exogenous Cross-Modality Orienting between Audition and Vision. <i>Vision (Switzerland)</i> , 2018, 2, 8.	1.2	4
38	Oculomotor inhibition of return: Evidence against object-centered representation. <i>Visual Cognition</i> , 2018, 26, 719-733.	1.6	3
39	Monocular channels have a functional role in endogenous orienting. <i>Neuropsychologia</i> , 2018, 111, 1-7.	1.6	10
40	Probabilistic versus "Pure" Volitional Orienting: a Monocular Difference. <i>Attention, Perception, and Psychophysics</i> , 2018, 80, 669-676.	1.3	10
41	Does the relation between the control of attention and second language proficiency generalize from India to Canada?. <i>Canadian Journal of Experimental Psychology</i> , 2018, 72, 208-218.	0.8	8
42	Dissociating two forms of inhibition of return using temporal order judgments. <i>Journal of Vision</i> , 2018, 18, 1183.	0.3	1
43	Using the locus-of-slack logic to determine whether inhibition of return in a cue-target paradigm is delaying early or late stages of processing.. <i>Canadian Journal of Experimental Psychology</i> , 2017, 71, 63-70.	0.8	4
44	A survey of video game preferences in adults: Building better games for older adults. <i>Entertainment Computing</i> , 2017, 21, 45-64.	2.9	49
45	The effect of scene removal on inhibition of return in a cue-target task. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 78-84.	1.3	6
46	Further evidence in favor of prior entry from endogenous attention to a location in space. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 1027-1038.	1.3	3
47	Methods for validating chronometry of computerized tests. <i>Journal of Clinical and Experimental Neuropsychology</i> , 2017, 39, 190-210.	1.3	2
48	The AttentionTrip: A game-like tool for measuring the networks of attention. <i>Journal of Neuroscience Methods</i> , 2017, 289, 99-109.	2.5	18
49	Endogenous orienting in the archer fish. <i>Proceedings of the National Academy of Sciences of the United States of America</i> , 2017, 114, 7577-7581.	7.1	33
50	Attentional bias toward alcohol-related stimuli in heavy drinkers: evidence from dynamic eye movement recording. <i>American Journal of Drug and Alcohol Abuse</i> , 2017, 43, 332-340.	2.1	15
51	Safe or out: Does the location of attention affect judgments at first base in baseball?. <i>Canadian Journal of Experimental Psychology</i> , 2017, 71, 146-159.	0.8	3
52	Measuring the Performance of Attention Networks with the Dalhousie Computerized Attention Battery (DalCAB): Methodology and Reliability in Healthy Adults. <i>Frontiers in Psychology</i> , 2016, 7, 823.	2.1	19
53	What a Simple Letter-Detection Task Can Tell Us About Cognitive Processes in Reading. <i>Current Directions in Psychological Science</i> , 2016, 25, 417-424.	5.3	7
54	The Missing-Phoneme Effect in Aural Prose Comprehension. <i>Psychological Science</i> , 2016, 27, 1019-1026.	3.3	2

#	ARTICLE	IF	CITATIONS
55	Does multilingualism affect the incidence of Alzheimer's disease?: A worldwide analysis by country. <i>SSM - Population Health</i> , 2016, 2, 463-467.	2.7	41
56	Predictive remapping gives rise to environmental inhibition of return. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 1860-1866.	2.8	4
57	Peripheral stimuli generate different forms of inhibition of return when participants make prosaccades versus antisaccades to them. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 2283-2291.	1.3	7
58	What cognitive processes are likely to be exercised by bilingualism and does this exercise lead to extra-linguistic cognitive benefits?. <i>Linguistic Approaches To Bilingualism</i> , 2016, 6, 549-564.	0.9	11
59	The development of and interaction among alerting, orienting, and executive attention in children. <i>Child Neuropsychology</i> , 2016, 22, 155-176.	1.3	48
60	Spatial gradients of oculomotor inhibition of return in deaf and normal adults. <i>Experimental Brain Research</i> , 2016, 234, 323-330.	1.5	10
61	When is inhibition of return input- or output-based? It depends on how you look at it.. <i>Canadian Journal of Experimental Psychology</i> , 2016, 70, 325-334.	0.8	16
62	Measuring the components of attention using the Dalhousie Computerized Attention Battery (DalCAB).. <i>Psychological Assessment</i> , 2015, 27, 1286-1300.	1.5	14
63	Does oculomotor readiness mediate exogenous capture of visual attention?. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 1260-1270.	0.9	19
64	Does bilingual exercise enhance cognitive fitness in traditional non-linguistic executive processing tasks?. , 2015, , 586-613.		95
65	The impact of cognitive load on reward evaluation. <i>Brain Research</i> , 2015, 1627, 225-232.	2.2	16
66	Repeated Measurement of the Components of Attention With Young Children Using the Attention Network Test: Stability, Isolability, Robustness, and Reliability. <i>Journal of Cognition and Development</i> , 2015, 16, 144-159.	1.3	14
67	The influence of verbal and spatial working memory load on the time course of the Simon effect.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 342-355.	0.9	5
68	Eye movements are primed toward the center of multiple stimuli even when the interstimulus distances are too large to generate saccade averaging. <i>Experimental Brain Research</i> , 2015, 233, 1541-1549.	1.5	7
69	Inhibition of return: A phenomenon in search of a definition and a theoretical framework. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 1647-1658.	1.3	34
70	Awareness of distractors is necessary to generate a strategy to avoid responding to them: A commentary on Lin and Murray (2015). <i>Consciousness and Cognition</i> , 2015, 37, 178-179.	1.5	0
71	On the costs and benefits of repeating a nonspatial feature in an exogenous spatial cuing paradigm. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 2293-2304.	1.3	12
72	On the belief that the cognitive exercise associated with the acquisition of a second language enhances extra-linguistic cognitive functions: Is 'Type-I incompetence' at work here?. <i>Cortex</i> , 2015, 73, 340-341.	2.4	11

#	ARTICLE	IF	CITATIONS
73	Is there a benefit of bilingualism for executive functioning?. <i>Bilingualism</i> , 2015, 18, 29-31.	1.3	18
74	Further Evidence against a Momentum Explanation for IOR. <i>PLoS ONE</i> , 2015, 10, e0123666.	2.5	1
75	Returning to "inhibition of return" by dissociating long-term oculomotor IOR from short-term sensory adaptation and other nonoculomotor "inhibitory" cueing effects.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 1603-1616.	0.9	67
76	In search of a reliable electrophysiological marker of oculomotor inhibition of return. <i>Psychophysiology</i> , 2014, 51, 1037-1045.	2.4	19
77	On the role of eye movement monitoring and discouragement on inhibition of return in a go/no-go task. <i>Vision Research</i> , 2014, 96, 133-139.	1.4	24
78	Inhibition of return is at the midpoint of simultaneous cues. <i>Attention, Perception, and Psychophysics</i> , 2013, 75, 1610-1618.	1.3	19
79	On the nature of the delayed "inhibitory" Cueing effects generated by uninformative arrows at fixation. <i>Psychonomic Bulletin and Review</i> , 2013, 20, 593-600.	2.8	10
80	Repeated measurement of the attention components of patients with multiple sclerosis using the Attention Network Test-Interaction (ANT-I): Stability, isolability, robustness, and reliability. <i>Journal of Neuroscience Methods</i> , 2013, 216, 1-9.	2.5	24
81	Development and evaluation of an offshore oil and gas Emergency Response Focus Board. <i>International Journal of Industrial Ergonomics</i> , 2013, 43, 40-51.	2.6	6
82	Can skilled readers perform a second task in parallel? A functional connectivity MRI study. <i>Brain and Language</i> , 2013, 124, 84-95.	1.6	10
83	The effects of ignored versus foveated cues upon inhibition of return: An event-related potential study. <i>Attention, Perception, and Psychophysics</i> , 2013, 75, 29-40.	1.3	28
84	Isolating exogenous and endogenous modes of temporal attention.. <i>Journal of Experimental Psychology: General</i> , 2013, 142, 560-572.	2.1	64
85	The Role of State Anxiety in Children's Memories for Pain. <i>Journal of Pediatric Psychology</i> , 2012, 37, 567-579.	2.1	65
86	Pain is not over when the needle ends: a review and preliminary model of acute pain memory development in childhood. <i>Pain Management</i> , 2012, 2, 487-497.	1.5	56
87	Averaging saccades are repelled by prior uninformative cues at both short and long intervals. <i>Visual Cognition</i> , 2012, 20, 825-847.	1.6	12
88	Eye movements when reading: The importance of the word to the left of fixation. <i>Visual Cognition</i> , 2012, 20, 328-355.	1.6	7
89	On the time course of exogenous cueing effects in bilinguals: Higher proficiency in a second language is associated with more rapid endogenous disengagement. <i>Quarterly Journal of Experimental Psychology</i> , 2012, 65, 1502-1510.	1.1	60
90	Examining the dissociation of retinotopic and spatiotopic inhibition of return with event-related potentials. <i>Neuroscience Letters</i> , 2012, 524, 40-44.	2.1	31

#	ARTICLE	IF	CITATIONS
91	Oculomotor inhibition of return: How soon is it â€œrecodedâ€ into spatiotopic coordinates?. Attention, Perception, and Psychophysics, 2012, 74, 1145-1153.	1.3	27
92	Perceptual and motor inhibition of return: components or flavors?. Attention, Perception, and Psychophysics, 2012, 74, 1416-1429.	1.3	24
93	Inhibition of return and schizophrenia: A meta-analysis. Schizophrenia Research, 2012, 135, 55-61.	2.0	21
94	Exploring the modulation of attentional capture by spatial attentional control settings: converging evidence from event-related potentials. Experimental Brain Research, 2012, 223, 525-532.	1.5	2
95	Speed impairs attending on the left: comparing attentional asymmetries for neglect patients in speeded and unspeeded cueing tasks. Frontiers in Human Neuroscience, 2012, 6, 232.	2.0	4
96	On the measurement of the effects of alcohol and illicit substances on inhibition of return. Psychopharmacology, 2012, 221, 541-550.	3.1	3
97	Sensory and motor mechanisms of oculomotor inhibition of return. Experimental Brain Research, 2012, 218, 441-453.	1.5	27
98	Focal spatial attention can eliminate inhibition of return. Psychonomic Bulletin and Review, 2012, 19, 462-469.	2.8	7
99	Information Processing and Magnetic Resonance Imaging Indices of Brain Pathology in Multiple Sclerosis. International Journal of MS Care, 2012, 14, 84-91.	1.0	7
100	Searching in Space and in Time. Nebraska Symposium on Motivation, 2012, 59, 5-22.	0.9	0
101	Exploring attentional disruption in fibromyalgia using the attentional blink. Psychology and Health, 2011, 26, 915-929.	2.2	14
102	Repeated Measurement of the Components of Attention of Older Adults using the Two Versions of the Attention Network Test: Stability, Isolability, Robustness, and Reliability. Frontiers in Aging Neuroscience, 2011, 3, 17.	3.4	33
103	Two components in IOR: evidence for response bias and perceptual processing delays using the SAT methodology. Attention, Perception, and Psychophysics, 2011, 73, 2143-2159.	1.3	10
104	Are there bilingual advantages on nonlinguistic interference tasks? Implications for the plasticity of executive control processes. Psychonomic Bulletin and Review, 2011, 18, 625-658.	2.8	605
105	The components of visual attention and the ubiquitous Simon effect. Acta Psychologica, 2011, 136, 225-234.	1.5	53
106	Visualizing the temporal dynamics of spatial information processing responsible for the Simon effect and its amplification by inhibition of return. Acta Psychologica, 2011, 136, 235-244.	1.5	22
107	Electrophysiological Explorations of the Cause and Effect of Inhibition of Return in a Cueâ€Target Paradigm. Brain Topography, 2011, 24, 164-182.	1.8	27
108	Alerting, Orienting, and Executive Attention in Children With ADHD. Journal of Attention Disorders, 2011, 15, 310-320.	2.6	85

#	ARTICLE	IF	CITATIONS
109	Aftereffects of Saccades Explored in a Dynamic Neural Field Model of the Superior Colliculus. <i>Journal of Eye Movement Research</i> , 2011, 4, .	0.8	16
110	Endogenous saccade preparation does not produce inhibition of return: Failure to replicate Rafal, Calabresi, Brennan, & Sciolto (1989).. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2010, 36, 1193-1206.	0.9	23
111	Inhibition of return in static but not necessarily in dynamic search. <i>Attention, Perception, and Psychophysics</i> , 2010, 72, 76-85.	1.3	16
112	Two mechanisms underlying inhibition of return. <i>Experimental Brain Research</i> , 2010, 201, 25-35.	1.5	42
113	Searching for inhibition of return in visual search: A review. <i>Vision Research</i> , 2010, 50, 220-228.	1.4	135
114	Repeated measurement of the components of attention using two versions of the Attention Network Test (ANT): Stability, isolability, robustness, and reliability. <i>Journal of Neuroscience Methods</i> , 2010, 190, 117-128.	2.5	108
115	Evaluation of the effectiveness of a brief deception detection training program. <i>Journal of Forensic Psychiatry and Psychology</i> , 2010, 21, 66-76.	1.0	25
116	Appraising the ANT: Psychometric and theoretical considerations of the Attention Network Test.. <i>Neuropsychology</i> , 2010, 24, 637-651.	1.3	224
117	Self-generated motives for gambling in two population-based samples of gamblers. <i>International Gambling Studies</i> , 2010, 10, 117-138.	2.1	36
118	Exploring the modulation of attentional capture by attentional control settings using performance and illusory line motion. <i>Visual Cognition</i> , 2009, 17, 431-456.	1.6	13
119	Visual search patterns in neglect: Comparison of peripersonal and extrapersonal space. <i>Neuropsychologia</i> , 2009, 47, 869-878.	1.6	31
120	Is a hands-free phone safer than a handheld phone?. <i>Journal of Safety Research</i> , 2009, 40, 157-164.	3.6	101
121	Inattention blindness for ignored words: Comparison of explicit and implicit memory tasks. <i>Consciousness and Cognition</i> , 2009, 18, 811-819.	1.5	31
122	Between- and within-ear congruency and laterality effects in an auditory semantic/emotional prosody conflict task. <i>Brain and Cognition</i> , 2009, 70, 201-208.	1.8	12
123	Interference Control in Children with and without ADHD: A Systematic Review of Flanker and Simon Task Performance. <i>Child Neuropsychology</i> , 2009, 15, 321-342.	1.3	162
124	On the control of attention.. <i>Canadian Journal of Experimental Psychology</i> , 2009, 63, 240-252.	0.8	47
125	Developing a measure of sluggish cognitive tempo for children: Content validity, factor structure, and reliability.. <i>Psychological Assessment</i> , 2009, 21, 380-389.	1.5	185
126	Are Individual Differences in Absentmindedness Correlated with Individual Differences in Attention?. <i>Journal of Individual Differences</i> , 2009, 30, 220-237.	1.0	32
