#	ARTICLE	IF	CITATIONS
1	Investigations upon the Improvement of Dermatophyte Identification Using an Online Mass Spectrometry Application. <i>Journal of Fungi</i> (Basel, Switzerland), 2022, 8, 73.	3.5	3
2	Extensive Dermatophytosis Caused by Terbinafine-Resistant <i>Trichophyton indotineae</i> , France. <i>Emerging Infectious Diseases</i> , 2022, 28, 229-233.	4.3	53
3	Identification of a clonal population of <i>Aspergillus flavus</i> by MALDI-TOF mass spectrometry using deep learning. <i>Scientific Reports</i> , 2022, 12, 1575.	3.3	4
4	Assessment of electronic surveillance and knowledge, attitudes, and practice (KAP) survey toward imported malaria surveillance system acceptance in France. <i>JAMIA Open</i> , 2022, 5, ooac012.	2.0	2
5	Terbinafine Resistance in Dermatophytes: A French Multicenter Prospective Study. <i>Journal of Fungi</i> (Basel, Switzerland), 2022, 8, 220.	3.5	33
6	Cholera in Haiti. <i>Presse Medicale</i> , 2022, 51, 104136.	1.9	6
7	Species Identification and In Vitro Antifungal Susceptibility of <i>Paecilomyces/Purpureocillium</i> Species Isolated from Clinical Respiratory Samples: A Multicenter Study. <i>Journal of Fungi</i> (Basel, Switzerland), 2022, 8, 684.	3.5	7
8	Occurrence of Candidemia in Patients with COVID-19 Admitted to Five ICUs in France. <i>Journal of Fungi</i> (Basel, Switzerland), 2022, 8, 678.	3.5	11
9	Seventh Pandemic <i>Vibrio cholerae</i> O1 Sublineages, Central African Republic. <i>Emerging Infectious Diseases</i> , 2021, 27, 262-266.	4.3	6
10	New assessment of Anopheles vector species identification using MALDI-TOF MS. <i>Malaria Journal</i> , 2021, 20, 33.	2.3	15
11	Intravenous Artesunate for the Treatment of Severe Imported Malaria: Implementation, Efficacy, and Safety in 1391 Patients. <i>Clinical Infectious Diseases</i> , 2021, 73, 1795-1804.	5.8	13
12	COVID-19 Pandemic: the story is not over yet. <i>Anaesthesia, Critical Care &amp; Pain Medicine</i> , 2021, 40, 100802.	1.4	2
13	Clinical Origin and Species Distribution of <i>Fusarium</i> spp. Isolates Identified by Molecular Sequencing and Mass Spectrometry: A European Multicenter Hospital Prospective Study. <i>Journal of Fungi</i> (Basel, Switzerland), 2021, 7, 64314.	3.8	10
14	Factors associated with the spatial heterogeneity of the first wave of COVID-19 in France: a nationwide geo-epidemiological study. <i>Lancet Public Health</i> , The, 2021, 6, e222-e231.	10.0	82
15	Invasive aspergillosis due to <i>Aspergillus</i> cryptic species: A prospective multicentre study. <i>Mycoses</i> , 2021, 64, 1346-1353.	4.0	13
16	Identification of Molds with Matrix-Assisted Laser Desorption Ionization–Time of Flight Mass Spectrometry: Performance of the Newly Developed MSI-2 Application in Comparison with the Bruker Filamentous Fungi Database and MSI-1. <i>Journal of Clinical Microbiology</i> , 2021, 59, e0129921.	3.9	18
17	Antifungal Susceptibility of 182 <i>Fusarium</i> Species Isolates from 20 European Centers: Comparison between EUCAST and Gradient Concentration Strip Methods. <i>Antimicrobial Agents and Chemotherapy</i> , 2021, 65, e0149521.	3.2	9
18	Delineating and Analyzing Locality-Level Determinants of Cholera, Haiti. <i>Emerging Infectious Diseases</i> , 2021, 27, 170-181.	4.3	2

#	ARTICLE	IF	CITATIONS
19	MALDI-TOF-Based Identification of Dermatophytes. , 2021, , 375-397.		0
20	Targeting Malaria Hotspots to Reduce Transmission Incidence in Senegal. International Journal of Environmental Research and Public Health, 2021, 18, 76.	2.6	1
21	Toward Cholera Elimination, Haiti. Emerging Infectious Diseases, 2021, 27, 2932-2936.	4.3	13
22	Propensity Score Analysis of Artesunate Versus Quinine for Severe Imported Plasmodium falciparum Malaria in France. Clinical Infectious Diseases, 2020, 70, 280-287.	5.8	18
23	Optimization of MALDI-ToF mass spectrometry for yeast identification: a multicenter study. Medical Mycology, 2020, 58, 639-649.	0.7	25
24	Neurological diseases of unknown etiology: Brain-biopsy diagnostic yields and safety. European Journal of Internal Medicine, 2020, 80, 78-85.	2.2	18
25	Cholera in Haiti. The Lancet Global Health, 2020, 8, e1468.	6.3	0
26	Fatal Invasive Aspergillosis and Coronavirus Disease in an Immunocompetent Patient. Emerging Infectious Diseases, 2020, 26, 1636-1637.	4.3	118
27	Spatio-temporal variation of malaria hotspots in Central Senegal, 2008â€“2012. BMC Infectious Diseases, 2020, 20, 424.	2.9	9
28	Mortality from malaria in France, 2005 to 2014. Eurosurveillance, 2020, 25, .	7.0	3
29	Pythiosis: Case report leading to new features in clinical and diagnostic management of this fungal-like infection. International Journal of Infectious Diseases, 2019, 86, 40-43.	3.3	19
30	New promising method to assess microfilarial Loa loa load on the peripheral blood. Diagnostic Microbiology and Infectious Disease, 2019, 95, 114887.	1.8	2
31	Black aspergilli: A remaining challenge in fungal taxonomy?. Medical Mycology, 2019, 57, 773-780.	0.7	30
32	Multi-centric evaluation of the online MSI platform for the identification of cryptic and rare species of Aspergillus by MALDI-TOF. Medical Mycology, 2019, 57, 962-968.	0.7	40
33	Whole genome sequence of Vibrio cholerae directly from dried spotted filter paper. PLoS Neglected Tropical Diseases, 2019, 13, e0007330.	3.0	7
34	The case-area targeted rapid response strategy to control cholera in Haiti: a four-year implementation study. PLoS Neglected Tropical Diseases, 2019, 13, e0007263.	3.0	25
35	Identification of fungal isolates by MALDI-TOF mass spectrometry in veterinary practice: validation of a web application. Journal of Veterinary Diagnostic Investigation, 2019, 31, 471-474.	1.1	21
36	Epidemiologic Trends in Malaria Incidence Among Travelers Returning to Metropolitan France, 1996-2016. JAMA Network Open, 2019, 2, e191691.	5.9	33

#	ARTICLE	IF	CITATIONS
37	Identification of French Guiana sand flies using MALDI-TOF mass spectrometry with a new mass spectra library. PLoS Neglected Tropical Diseases, 2019, 13, e0007031.	3.0	22
38	Epidemiological and molecular forensics of cholera recurrence in Haiti. Scientific Reports, 2019, 9, 1164.	3.3	15
39	Maternal and Congenital Toxoplasmosis: Diagnosis and Treatment Recommendations of a French Multidisciplinary Working Group. Pathogens, 2019, 8, 24.	2.8	94
40	Interpretation of very low avidity indices acquired with the Liaison XL Toxo IgG avidity assay in dating toxoplasmosis infection. European Journal of Clinical Microbiology and Infectious Diseases, 2019, 38, 253-257.	2.9	6
41	Estimating effectiveness of case-area targeted response interventions against cholera in Haiti. ELife, 2019, 8, .	6.0	23
42	Epidemiology of human dermatophytoses in Africa. Medical Mycology, 2018, 56, 145-161.	0.7	60
43	Spatiotemporal analysis of malaria for new sustainable control strategies. BMC Medicine, 2018, 16, 226.	5.5	24
44	Ecologic Features of Plague Outbreak Areas, Democratic Republic of the Congo, 2004â€“2014. Emerging Infectious Diseases, 2018, 24, 210-220.	4.3	36
45	Fast identification of dermatophytes by <sc>MALDI</sc>â€“<sc>TOF</sc>/<sc>MS</sc> using direct transfer of fungal cells on ground steel target plates. Mycoses, 2018, 61, 691-697.	4.0	22
46	Hospitalized Patient as Source of <i>Aspergillus fumigatus</i>, 2015. Emerging Infectious Diseases, 2018, 24, 1524-1527.	4.3	19
47	Dynamics of cholera epidemics from Benin to Mauritania. PLoS Neglected Tropical Diseases, 2018, 12, e0006379.	3.0	18
48	Human cryptosporidiosis in immunodeficient patients in France (2015â€“2017). Experimental Parasitology, 2018, 192, 108-112.	1.2	25
49	Evaluation of three <sc>MALDI</sc>â€“<sc>TOF</sc> mass spectrometry libraries for the identification of filamentous fungi in three clinical microbiology laboratories in Manitoba, Canada. Mycoses, 2018, 61, 743-753.	4.0	50
50	Performance assessment of two lysis methods for direct identification of yeasts from clinical blood cultures using MALDI-TOF mass spectrometry. Medical Mycology, 2017, 55, 185-192.	0.7	12
51	Proof-of-concept study of a new LC-ESI-MS/MS-based assay to identify Aspergillus spp. in artificially mixed samples using species/genus-specific proteotypic peptides. Mycological Progress, 2017, 16, 231-246.	1.4	1
52	Vaccination against cholera in Juba. Lancet Infectious Diseases, The, 2017, 17, 479-480.	9.1	2
53	Decision criteria for MALDI-TOF MS-based identification of filamentous fungi using commercial and in-house reference databases. BMC Microbiology, 2017, 17, 25.	3.3	81
54	Cholera spatial-temporal patterns in Gonaives, Haiti: From contributing factors to targeted recommendations. Advances in Water Resources, 2017, 108, 377-385.	3.8	5

#	ARTICLE	IF	CITATIONS
55	Identification of Leishmania by Matrix-Assisted Laser Desorption Ionization–Time of Flight (MALDI-TOF) Mass Spectrometry Using a Free Web-Based Application and a Dedicated Mass-Spectral Library. <i>Journal of Clinical Microbiology</i> , 2017, 55, 2924-2933.	3.9	35
56	Genomic history of the seventh pandemic of cholera in Africa. <i>Science</i> , 2017, 358, 785-789.	12.6	255
57	Comparative Evaluation of Etest, EUCAST, and CLSI Methods for Amphotericin B, Voriconazole, and Posaconazole against Clinically Relevant <i>Fusarium</i> Species. <i>Antimicrobial Agents and Chemotherapy</i> , 2017, 61, .	3.2	21
58	Mathematical models for predicting human mobility in the context of infectious disease spread: introducing the impedance model. <i>International Journal of Health Geographics</i> , 2017, 16, 42.	2.5	20
59	Spatio-Temporal Dynamics of Asymptomatic Malaria: Bridging the Gap Between Annual Malaria Resurgences in a Sahelian Environment. <i>American Journal of Tropical Medicine and Hygiene</i> , 2017, 97, 1761-1769.	1.4	28
60	Antimicrobial Susceptibility of Autochthonous Aquatic <i>Vibrio cholerae</i> in Haiti. <i>Frontiers in Microbiology</i> , 2016, 7, 1671.	3.5	28
61	Genetic Diversity and Population Structure of <i>Leishmania infantum</i> from Southeastern France: Evaluation Using Multi-Locus Microsatellite Typing. <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004303.	3.0	10
62	Cholera Outbreak in Grande Comore: 1998–1999. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 94, 76-81.	1.4	5
63	Direct Dried Stool Sampling on Filter Paper for Molecular Analyses of Cholera. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 95, 251-252.	1.4	2
64	Performance of MALDI-TOF MS platforms for fungal identification. <i>Mycoses</i> , 2016, 59, 678-690.	4.0	131
65	Opportunistic fungal pathogen <i>Candida glabrata</i> circulates between humans and yellow-legged gulls. <i>Scientific Reports</i> , 2016, 6, 36157.	3.3	35
66	<i>Schizophyllum commune</i> : an emergent or misdiagnosed fungal pathogen in rhinology?. <i>Medical Mycology</i> , 2016, 54, 301-309.	0.7	14
67	Gut yeast communities in <i>Larus michahellis</i> from various breeding colonies. <i>Medical Mycology</i> , 2016, 55, myw088.	0.7	8
68	Genetic diversity of <i>Plasmodium falciparum</i> in human malaria cases in Mali. <i>Malaria Journal</i> , 2016, 15, 353.	2.3	28
69	<i>Aspergillus tubingensis</i> : a major filamentous fungus found in the airways of patients with lung disease. <i>Medical Mycology</i> , 2016, 54, 459-470.	0.7	41
70	Routine identification and mixed species detection in 6,192 clinical yeast isolates. <i>Medical Mycology</i> , 2016, 54, 256-265.	0.7	33
71	Analyzing Deoxyribose Nucleic Acid from Malaria Rapid Diagnostic Tests to Study <i>Plasmodium falciparum</i> Genetic Diversity in Mali. <i>American Journal of Tropical Medicine and Hygiene</i> , 2016, 94, 1259-1265.	1.4	7
72	Microsatellite Typing of <i>Aspergillus flavus</i> Strains in a Tunisian Onco-hematology Unit. <i>Mycopathologia</i> , 2016, 181, 175-184.	3.1	3

#	ARTICLE	IF	CITATIONS
73	Comparison of Air Impaction and Electrostatic Dust Collector Sampling Methods to Assess Airborne Fungal Contamination in Public Buildings. <i>Annals of Occupational Hygiene</i> , 2016, 60, 161-175.	1.9	13
74	Dermatophytosis among Schoolchildren in Three Eco-climatic Zones of Mali. <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004675.	3.0	39
75	Place of Interferon- $\gamma$ Assay for Diagnosis of Congenital Toxoplasmosis. <i>Pediatric Infectious Disease Journal</i> , 2015, 34, 1407-1409.	2.0	13
76	Antimicrobial Drug Resistance of <i>Vibrio cholerae</i> , Democratic Republic of the Congo. <i>Emerging Infectious Diseases</i> , 2015, 21, 847-851.	4.3	29
77	Heterogeneity of <i>Leishmania donovani</i> Parasites Complicates Diagnosis of Visceral Leishmaniasis: Comparison of Different Serological Tests in Three Endemic Regions. <i>PLoS ONE</i> , 2015, 10, e0116408.	2.5	62
78	Relationship between Distinct African Cholera Epidemics Revealed via MLVA Haplotyping of 337 <i>Vibrio cholerae</i> Isolates. <i>PLoS Neglected Tropical Diseases</i> , 2015, 9, e0003817.	3.0	26
79	Bacterial Exposures and Associations with Atopy and Asthma in Children. <i>PLoS ONE</i> , 2015, 10, e0131594.	2.5	41
80	Cholera and blame in Haiti. <i>Lancet Infectious Diseases</i> , The, 2015, 15, 1380-1381.	9.1	10
81	A Double-Blind Randomized Placebo-Controlled Clinical Trial of Squalamine Ointment for tinea capitis Treatment. <i>Mycopathologia</i> , 2015, 179, 187-193.	3.1	5
82	<i>Cochliobolus hawaiiensis</i> Sinusitis, a Tropical Disease? A Case Report and Review of the Literature. <i>Mycopathologia</i> , 2015, 180, 117-121.	3.1	2
83	International Society of Human and Animal Mycology (ISHAM)-ITS reference DNA barcoding database—the quality controlled standard tool for routine identification of human and animal pathogenic fungi. <i>Medical Mycology</i> , 2015, 53, 313-337.	0.7	252
84	Using Mobile Phone Data to Predict the Spatial Spread of Cholera. <i>Scientific Reports</i> , 2015, 5, 8923.	3.3	207
85	Clustered Cases of <i>Oestrus ovis</i> Ophthalmomyiasis after 3-Week Festival, Marseille, France, 2013. <i>Emerging Infectious Diseases</i> , 2015, 21, 375-377.	4.3	9
86	Rapid identification of clinical members of <i>Fusarium fujikuroi</i> complex using MALDI-TOF MS. <i>Future Microbiology</i> , 2015, 10, 1939-1952.	2.0	29
87	Quality control in culture collections: Confirming identity of filamentous fungi by MALDI-TOF MS. <i>Mycoscience</i> , 2015, 56, 273-279.	0.8	15
88	Use of Matrix-Assisted Laser Desorption Ionization—Time of Flight Mass Spectrometry for Identification of Molds of the <i>Fusarium</i> Genus. <i>Journal of Clinical Microbiology</i> , 2015, 53, 465-476.	3.9	63
89	Deciphering the Origin of the 2012 Cholera Epidemic in Guinea by Integrating Epidemiological and Molecular Analyses. <i>PLoS Neglected Tropical Diseases</i> , 2014, 8, e2898.	3.0	30
90	Identification of filamentous fungi isolates by MALDI-TOF mass spectrometry: clinical evaluation of an extended reference spectra library. <i>Medical Mycology</i> , 2014, 52, 826-834.	0.7	111

#	ARTICLE	IF	CITATIONS
91	Characteristics of Invasive Aspergillosis in Neutropenic Haematology Patients (Sousse, Tunisia). <i>Mycopathologia</i> , 2014, 177, 281-289.	3.1	20
92	MALDI-TOF mass spectrometry identification of filamentous fungi in the clinical laboratory. <i>Mycoses</i> , 2014, 57, 135-140.	4.0	107
93	Preliminary Study of the Fungal Ecology at the Haematology and Medical-Oncology Ward in Bamako, Mali. <i>Mycopathologia</i> , 2014, 178, 103-109.	3.1	9
94	Heterogeneity of Molecular Resistance Patterns in Antimony-Resistant Field Isolates of <i>Leishmania</i> Species from the Western Mediterranean Area. <i>Antimicrobial Agents and Chemotherapy</i> , 2014, 58, 4866-4874.	3.2	24
95	In vitro susceptibility to amphotericin B, itraconazole, voriconazole, posaconazole and caspofungin of <i>Aspergillus</i> spp. isolated from patients with haematological malignancies in Tunisia. <i>SpringerPlus</i> , 2014, 3, 19.	1.2	28
96	Assessment of various parameters to improve MALDI-TOF MS reference spectra libraries constructed for the routine identification of filamentous fungi. <i>BMC Microbiology</i> , 2013, 13, 76.	3.3	92
97	Spatio-temporal analysis of malaria within a transmission season in Bandiagara, Mali. <i>Malaria Journal</i> , 2013, 12, 82.	2.3	44
98	Diagnosis of human nematode infections. <i>Expert Review of Anti-Infective Therapy</i> , 2013, 11, 1363-1376.	4.4	10
99	A MALDI-TOF MS procedure for clinical dermatophyte species identification in the routine laboratory. <i>Medical Mycology</i> , 2013, 51, 713-720.	0.7	88
100	<i>In vitro</i> activity of aminosterols against dermatophytes. <i>Medical Mycology</i> , 2013, 51, 309-312.	0.7	6
101	Plague: History and contemporary analysis. <i>Journal of Infection</i> , 2013, 66, 18-26.	3.3	90
102	Cholera in Coastal Africa: A Systematic Review of Its Heterogeneous Environmental Determinants. <i>Journal of Infectious Diseases</i> , 2013, 208, S98-S106.	4.0	67
103	Evaluation of four pretreatment procedures for MALDI-TOF MS yeast identification in the routine clinical laboratory. <i>Medical Mycology</i> , 2013, 51, 371-377.	0.7	79
104	Environmental Factors Influencing Epidemic Cholera. <i>American Journal of Tropical Medicine and Hygiene</i> , 2013, 89, 1228-1230.	1.4	4
105	Plague Epidemics and Lice, Democratic Republic of the Congo. <i>Emerging Infectious Diseases</i> , 2013, 19, 505-6.	4.3	55
106	Subcutaneous Infection with <i>Dirofilariaspp.</i> Nematode in Human, France. <i>Emerging Infectious Diseases</i> , 2013, 19, 1905.	4.3	0
107	Environmental Determinants of Cholera Outbreaks in Inland Africa: A Systematic Review of Main Transmission Foci and Propagation Routes. <i>Journal of Infectious Diseases</i> , 2013, 208, S46-S54.	4.0	116
108	Spatio-Temporal Dynamics of Cholera during the First Year of the Epidemic in Haiti. <i>PLoS Neglected Tropical Diseases</i> , 2013, 7, e2145.	3.0	68

#	ARTICLE	IF	CITATIONS
