|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------|-----------|
| 1  | The entry of nanoparticles into solid tumours. <i>Nature Materials</i> , 2020, 19, 566-575.                                                                                                                                                                           | 13.3 | 1,036     |
| 2  | Molecularly Imprinted Polymer Nanoparticles: An Emerging Versatile Platform for Cancer Therapy. <i>Angewandte Chemie - International Edition</i> , 2021, 60, 3858-3869.                                                                                               | 7.2  | 113       |
| 3  | Molecularly Imprinted Polymer-Based Smart Prodrug Delivery System for Specific Targeting, Prolonged Retention, and Tumor Microenvironment-Triggered Release. <i>Angewandte Chemie - International Edition</i> , 2021, 60, 2663-2667.                                  | 7.2  | 90        |
| 4  | Wnt Signaling in Cancer Metabolism and Immunity. <i>Cancers</i> , 2019, 11, 904.                                                                                                                                                                                      | 1.7  | 77        |
| 5  | An autocrine inflammatory forward-feedback loop after chemotherapy withdrawal facilitates the repopulation of drug-resistant breast cancer cells. <i>Cell Death and Disease</i> , 2017, 8, e2932-e2932.                                                               | 2.7  | 76        |
| 6  | Cardamonin reduces chemotherapy-enriched breast cancer stem-like cells <i>in vitro</i> and <i>in vivo</i> . <i>Oncotarget</i> , 2016, 7, 771-785.                                                                                                                     | 0.8  | 66        |
| 7  | Current Progresses and Challenges of Immunotherapy in Triple-Negative Breast Cancer. <i>Cancers</i> , 2020, 12, 3529.                                                                                                                                                 | 1.7  | 60        |
| 8  | Hollow-fiber bioreactor production of extracellular vesicles from human bone marrow mesenchymal stromal cells yields nanovesicles that mirrors the immuno-modulatory antigenic signature of the producer cell. <i>Stem Cell Research and Therapy</i> , 2021, 12, 127. | 2.4  | 55        |
| 9  | Dual inhibition of Wnt and Yes-associated protein signaling retards the growth of triple-negative breast cancer in both mesenchymal and epithelial states. <i>Molecular Oncology</i> , 2018, 12, 423-440.                                                             | 2.1  | 54        |
| 10 | Immunogenicity and Tumorigenicity of Pluripotent Stem Cells and their Derivatives: Genetic and Epigenetic Perspectives. <i>Current Stem Cell Research and Therapy</i> , 2013, 9, 63-72.                                                                               | 0.6  | 53        |
| 11 | Interleukin-18 up-regulates amino acid transporters and facilitates amino acid-induced mTORC1 activation in natural killer cells. <i>Journal of Biological Chemistry</i> , 2019, 294, 4644-4655.                                                                      | 1.6  | 53        |
| 12 | Bridging the divide: preclinical research discrepancies between triple-negative breast cancer cell lines and patient tumors. <i>Oncotarget</i> , 2017, 8, 113269-113281.                                                                                              | 0.8  | 44        |
| 13 | Co-inhibition of mTORC1, HDAC and ESR1 retards the growth of triple-negative breast cancer and suppresses cancer stem cells. <i>Cell Death and Disease</i> , 2018, 9, 815.                                                                                            | 2.7  | 34        |
| 14 | Differential expression, distinct localization and opposite effect on Golgi structure and cell differentiation by a novel splice variant of human PRMT5. <i>Biochimica Et Biophysica Acta - Molecular Cell Research</i> , 2015, 1853, 2444-2452.                      | 1.9  | 31        |
| 15 | CSCs in Breast Cancer—One Size Does Not Fit All: Therapeutic Advances in Targeting Heterogeneous Epithelial and Mesenchymal CSCs. <i>Cancers</i> , 2019, 11, 1128.                                                                                                    | 1.7  | 29        |
| 16 | Both bulk and cancer stem cell subpopulations in triple-negative breast cancer are susceptible to Wnt, HDAC, and ER $\alpha$ coinhibition. <i>FEBS Letters</i> , 2016, 590, 4606-4616.                                                                                | 1.3  | 28        |
| 17 | Immunopathogenesis associated with formaldehyde-inactivated RSV vaccine in preclinical and clinical studies. <i>Expert Review of Vaccines</i> , 2017, 16, 351-360.                                                                                                    | 2.0  | 27        |
| 18 | Cancer Stem Cell-Associated Pathways in the Metabolic Reprogramming of Breast Cancer. <i>International Journal of Molecular Sciences</i> , 2020, 21, 9125.                                                                                                            | 1.8  | 26        |

| #  | ARTICLE                                                                                                                                                                                                                     | IF  | CITATIONS |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Chitosan alters inactivated respiratory syncytial virus vaccine elicited immune responses without affecting lung histopathology in mice. <i>Vaccine</i> , 2019, 37, 4031-4039.                                              | 1.7 | 25        |
| 20 | A triple-drug nanotherapy to target breast cancer cells, cancer stem cells, and tumor vasculature. <i>Cell Death and Disease</i> , 2021, 12, 8.                                                                             | 2.7 | 25        |
| 21 | Polysaccharide-rich extract from <i>Polygonatum sibiricum</i> protects hematopoiesis in bone marrow suppressed by triple negative breast cancer. <i>Biomedicine and Pharmacotherapy</i> , 2021, 137, 111338.                | 2.5 | 21        |
| 22 | Endothelial and Hematopoietic Cell Fate of Human Embryonic Stem Cells. <i>Trends in Cardiovascular Medicine</i> , 2006, 16, 89-94.                                                                                          | 2.3 | 18        |
| 23 | MFG-E8 Is Critical for Embryonic Stem Cell-Mediated T Cell Immunomodulation. <i>Stem Cell Reports</i> , 2015, 5, 741-752.                                                                                                   | 2.3 | 17        |
| 24 | Co-targeting Bulk Tumor and CSCs in Clinically Translatable TNBC Patient-Derived Xenografts via Combination Nanotherapy. <i>Molecular Cancer Therapeutics</i> , 2019, 18, 1755-1764.                                        | 1.9 | 17        |
| 25 | Dysregulation of Ephrin receptor and PPAR signaling pathways in neural progenitor cells infected by Zika virus. <i>Emerging Microbes and Infections</i> , 2020, 9, 2046-2060.                                               | 3.0 | 16        |
| 26 | The Potential of Natural Products in the Treatment of Triple-negative Breast Cancer. <i>Current Cancer Drug Targets</i> , 2022, 22, 388-403.                                                                                | 0.8 | 16        |
| 27 | Applications of Extracellular Vesicles in Triple-Negative Breast Cancer. <i>Cancers</i> , 2022, 14, 451.                                                                                                                    | 1.7 | 14        |
| 28 | Targeting Hypoxia Sensitizes TNBC to Cisplatin and Promotes Inhibition of Both Bulk and Cancer Stem Cells. <i>International Journal of Molecular Sciences</i> , 2020, 21, 5788.                                             | 1.8 | 11        |
| 29 | The other face of TLR3: A driving force of breast cancer stem cells. <i>Molecular and Cellular Oncology</i> , 2015, 2, e981443.                                                                                             | 0.3 | 10        |
| 30 | Targeting CD40 enhances antibody- and CD8-mediated protection against respiratory syncytial virus infection. <i>Scientific Reports</i> , 2018, 8, 16648.                                                                    | 1.6 | 8         |
| 31 | Single Immunization of a Vaccine Vected by a Novel Recombinant Vaccinia Virus Affords Effective Protection Against Respiratory Syncytial Virus Infection in Cotton Rats. <i>Frontiers in Immunology</i> , 2021, 12, 747866. | 2.2 | 7         |
| 32 | DNA Based Vaccine Expressing SARS-CoV-2 Spike-CD40L Fusion Protein Confers Protection Against Challenge in a Syrian Hamster Model. <i>Frontiers in Immunology</i> , 2021, 12, 785349.                                       | 2.2 | 7         |
| 33 | Identification of immunodominant CD8 epitope in the stalk domain of influenza B viral hemagglutinin. <i>Biochemical and Biophysical Research Communications</i> , 2018, 502, 226-231.                                       | 1.0 | 6         |
| 34 | Expression of Nutrient Transporters on NK Cells During Murine Cytomegalovirus Infection Is MyD88-Dependent. <i>Frontiers in Immunology</i> , 2021, 12, 654225.                                                              | 2.2 | 5         |
| 35 | Synthetic vaccine affords full protection to mice against lethal challenge of influenza B virus of both genetic lineages. <i>IScience</i> , 2021, 24, 103328.                                                               | 1.9 | 4         |
| 36 | E-cadherin adhesion-mediated Wnt activation for mesoderm specification in human embryonic stem cells needs a soft mattress. <i>Stem Cell Investigation</i> , 2016, 3, 77-77.                                                | 1.3 | 2         |

| #  | ARTICLE                                                                                                                                                                                                                        | IF  | CITATIONS |
|----|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 37 | PD-1 of <i>Sigmodon hispidus</i> : Gene identification, characterization and preliminary evaluation of expression in inactivated RSV vaccine-induced enhanced respiratory disease. <i>Scientific Reports</i> , 2019, 9, 11638. | 1.6 | 1         |
| 38 | Nanoparticles Loaded with Wnt and YAP/Mevalonate Inhibitors in Combination with Paclitaxel Stop the Growth of TNBC Patientâ€™Derived Xenografts and Diminish Tumorigenesis. <i>Advanced Therapeutics</i> , 2020, 3, 2000123.   | 1.6 | 1         |
| 39 | Universal antibody targeting the highly conserved fusion peptide provides cross-protection in mice. <i>Human Vaccines and Immunotherapeutics</i> , 2022, 18, .                                                                 | 1.4 | 1         |
