#	ARTICLE	IF	CITATIONS
1	Nonlinear mediation analysis with high-dimensional mediators whose causal structure is unknown. <i>Biometrics</i> , 2022, 78, 46-59.	1.4	9
2	High-dimensional inference for the average treatment effect under model misspecification using penalized bias-reduced double-robust estimation. <i>Biostatistics and Epidemiology</i> , 2022, 6, 221-238.	0.4	7
3	Quality assessment practice in systematic reviews of mediation studies: results from an overview of systematic reviews. <i>Journal of Clinical Epidemiology</i> , 2022, 143, 137-148.	5.0	5
4	Demystifying Statistical Learning Based on Efficient Influence Functions. <i>American Statistician</i> , 2022, 76, 292-304.	1.6	12
5	Challenges in Systematic Reviews and Meta-Analyses of Mediation Analyses. <i>American Journal of Epidemiology</i> , 2022, 191, 1098-1106.	3.4	6
6	The influence of unmeasured confounding on the MR Steiger approach. <i>Genetic Epidemiology</i> , 2022, 46, 139-141.	1.3	6
7	MO360: Using Routinely Collected Data to Define the Optimal Timing to Initiate Renal Replacement Therapy in Aki Patients. <i>Nephrology Dialysis Transplantation</i> , 2022, 37, .	0.7	0
8	Selection bias when inferring the effect direction in Mendelian randomization. <i>Genetic Epidemiology</i> , 2022, 46, 341-343.	1.3	0
9	MO363: Target Trial Emulation on Timing of Start of Renal Replacement Therapy in Acute Kidney Injury: Lessons Learned. <i>Nephrology Dialysis Transplantation</i> , 2022, 37, .	0.7	0
10	How do psychologically based interventions for chronic musculoskeletal pain work? A systematic review and meta-analysis of specific moderators and mediators of treatment. <i>Clinical Psychology Review</i> , 2022, 94, 102160.	11.4	19
11	Confounder selection strategies targeting stable treatment effect estimators. <i>Statistics in Medicine</i> , 2021, 40, 607-630.	1.6	7
12	Assessing the impact of case-mix heterogeneity in individual participant data meta-analysis: Novel use of $\chi^2$ statistic and prediction interval. <i>Research Methods in Medicine &amp; Health Sciences</i> , 2021, 2, 12-30.	1.2	5
13	Inference for treatment effect parameters in potentially misspecified high-dimensional models. <i>Biometrika</i> , 2021, 108, 321-334.	2.4	6
14	A novel estimand to adjust for rescue treatment in randomized clinical trials. <i>Statistics in Medicine</i> , 2021, 40, 2257-2271.	1.6	7
15	Discussion of Kallus and Mo, Qi, and Liu: New Objectives for Policy Learning. <i>Journal of the American Statistical Association</i> , 2021, 116, 675-679.	3.1	3
16	Attributable Mortality of Ventilator-associated Pneumonia. Replicating Findings, Revisiting Methods. <i>Annals of the American Thoracic Society</i> , 2021, 18, 830-837.	3.2	24
17	Prediction of hospital bed capacity during the COVID-19 pandemic. <i>BMC Health Services Research</i> , 2021, 21, 468.	2.2	32
18	Simulating longitudinal data from marginal structural models using the additive hazard model. <i>Biometrical Journal</i> , 2021, 63, 1526-1541.	1.0	5

#	ARTICLE	IF	CITATIONS
19	The importance of the urinary output criterion for the detection and prognostic meaning of AKI. <i>Scientific Reports</i> , 2021, 11, 11089.	3.3	19
20	Robust Inference for Mediated Effects in Partially Linear Models. <i>Psychometrika</i> , 2021, 86, 595-618.	2.1	4
21	Using generalized linear models to implement gâ€estimation for survival data with timeâ€varying confounding. <i>Statistics in Medicine</i> , 2021, 40, 3779-3790.	1.6	2
22	Caution against examining the role of reverse causality in Mendelian Randomization. <i>Genetic Epidemiology</i> , 2021, 45, 445-454.	1.3	15
23	Principled selection of baseline covariates to account for censoring in randomized trials with a survival endpoint. <i>Statistics in Medicine</i> , 2021, 40, 4108-4121.	1.6	3
24	Stable inverse probability weighting estimation for longitudinal studies. <i>Scandinavian Journal of Statistics</i> , 2021, 48, 1046-1067.	1.4	17
25	Efficient, doubly robust estimation of the effect of dose switching for switchers in a randomized clinical trial. <i>Biometrical Journal</i> , 2021, 63, 1464-1475.	1.0	0
26	Disentangling indirect effects through multiple mediators without assuming any causal structure among the mediators.. <i>Psychological Methods</i> , 2021, , .	3.5	6
27	A Guideline for Reporting Mediation Analyses of Randomized Trials and Observational Studies. <i>JAMA - Journal of the American Medical Association</i> , 2021, 326, 1045.	7.4	169
28	314Data-adaptive methods for high-dimensional mediation analysis: Application to a randomised trial of tuberculosis vaccination. <i>International Journal of Epidemiology</i> , 2021, 50, .	1.9	0
29	Quantifying the influence of location of residence on blood pressure in urbanising South India: a path analysis with multiple mediators. <i>Epidemiologic Methods</i> , 2021, 10, .	0.9	0
30	Instrumental variables estimation with competing risk data. <i>Biostatistics</i> , 2020, 21, 158-171.	1.5	6
31	The conduct and reporting of mediation analysis in recently published randomized controlled trials: results from a methodological systematic review. <i>Journal of Clinical Epidemiology</i> , 2020, 117, 78-88.	5.0	48
32	How to obtain valid tests and confidence intervals after propensity score variable selection?. <i>Statistical Methods in Medical Research</i> , 2020, 29, 677-694.	1.5	8
33	Estimation of Controlled Direct Effects in Longitudinal Mediation Analyses with Latent Variables in Randomized Studies. <i>Multivariate Behavioral Research</i> , 2020, 55, 763-785.	3.1	13
34	Ethical climate and intention to leave among critical care clinicians: an observational study in 68 intensive care units across Europe and the United States. <i>Intensive Care Medicine</i> , 2020, 46, 46-56.	8.2	62
35	Adjusting for timeâ€varying confounders in survival analysis using structural nested cumulative survival time models. <i>Biometrics</i> , 2020, 76, 472-483.	1.4	10
36	Doubly robust tests of exposure effects under highâ€dimensional confounding. <i>Biometrics</i> , 2020, 76, 1190-1200.	1.4	10

#	ARTICLE	IF	CITATIONS
37	Subtleties in the interpretation of hazard contrasts. <i>Lifetime Data Analysis</i> , 2020, 26, 833-855.	0.9	55
38	Causal graphs for the analysis of genetic cohort data. <i>Physiological Genomics</i> , 2020, 52, 369-378.	2.3	4
39	The obesity paradox in critically ill patients: a causal learning approach to a casual finding. <i>Critical Care</i> , 2020, 24, 485.	5.8	28
40	Longitudinal Mediation Analysis Using Natural Effect Models. <i>American Journal of Epidemiology</i> , 2020, 189, 1427-1435.	3.4	11
41	Estimating the Effect of Healthcare-Associated Infections on Excess Length of Hospital Stay Using Inverse Probability-Weighted Survival Curves. <i>Clinical Infectious Diseases</i> , 2020, 71, e415-e420.	5.8	8
42	Improving interim decisions in randomized trials by exploiting information on short-term endpoints and prognostic baseline covariates. <i>Pharmaceutical Statistics</i> , 2020, 19, 583-601.	1.3	12
43	Heterogeneous indirect effects for multiple mediators using interventional effect models. <i>Epidemiologic Methods</i> , 2020, 9, .	0.9	2
44	Comment: On the Potential for Misuse of Outcome-Wide Study Designs, and Ways to Prevent It. <i>Statistical Science</i> , 2020, 35, .	2.8	2
45	On Doubly Robust Estimation of the Hazard Difference. <i>Biometrics</i> , 2019, 75, 100-109.	1.4	19
46	Mediation analysis of time-to-event endpoints accounting for repeatedly measured mediators subject to time-varying confounding. <i>Statistics in Medicine</i> , 2019, 38, 4828-4840.	1.6	42
47	Doubly robust conditional logistic regression. <i>Statistics in Medicine</i> , 2019, 38, 4749-4760.	1.6	7
48	A novel approach for identifying and addressing case-mix heterogeneity in individual participant data meta-analysis. <i>Research Synthesis Methods</i> , 2019, 10, 582-596.	8.7	24
49	Evaluating futility of a binary clinical endpoint using early readouts. <i>Statistics in Medicine</i> , 2019, 38, 5361-5375.	1.6	7
50	Adjusting the Effect of Integrating Antiretroviral Therapy and Tuberculosis Treatment on Mortality for Noncompliance. <i>Epidemiology</i> , 2019, 30, 197-203.	2.7	4
51	Multistate Models in Critical Care. <i>Critical Care Medicine</i> , 2019, 47, e376.	0.9	3
52	Instrumental variables estimation under a structural Cox model. <i>Biostatistics</i> , 2019, 20, 65-79.	1.5	28
53	Ethical decision-making climate in the ICU: theoretical framework and validation of a self-assessment tool. <i>BMJ Quality and Safety</i> , 2018, 27, 781-789.	3.7	60
54	Eliminating Survivor Bias in Two-stage Instrumental Variable Estimators. <i>Epidemiology</i> , 2018, 29, 536-541.	2.7	9

#	ARTICLE	IF	CITATIONS
55	Analysis of Longitudinal Studies With Repeated Outcome Measures: Adjusting for Time-Dependent Confounding Using Conventional Methods. <i>American Journal of Epidemiology</i> , 2018, 187, 1085-1092.	3.4	34
56	Introduction to Double Robust Methods for Incomplete Data. <i>Statistical Science</i> , 2018, 33, 184-197.	2.8	39
57	A Note on G-Estimation of Causal Risk Ratios. <i>American Journal of Epidemiology</i> , 2018, 187, 1079-1084.	3.4	19
58	Surrogate marker analysis in cancer clinical trials through time-to-event mediation techniques. <i>Statistical Methods in Medical Research</i> , 2018, 27, 3367-3385.	1.5	13
59	Survivor bias in Mendelian randomization analysis. <i>Biostatistics</i> , 2018, 19, 426-443.	1.5	38
60	Perception of inappropriate cardiopulmonary resuscitation by clinicians working in emergency departments and ambulance services: The REAPPROPRIATE international, multi-centre, cross sectional survey. <i>Resuscitation</i> , 2018, 132, 112-119.	3.0	26
61	Improving the robustness and efficiency of covariate-adjusted linear instrumental variable estimators. <i>Scandinavian Journal of Statistics</i> , 2018, 45, 941-961.	1.4	21
62	Augmented and Doubly Robust G-estimation of Causal Effects under a Structural Nested Failure Time Model. <i>Biometrics</i> , 2018, 74, 472-480.	1.4	3
63	Doubly robust estimation of attributable fractions in survival analysis. <i>Statistical Methods in Medical Research</i> , 2017, 26, 948-969.	1.5	30
64	Boosting the precision of mediation analyses of randomised experiments through covariate adjustment. <i>Statistics in Medicine</i> , 2017, 36, 939-957.	1.6	5
65	Instrumental Variables Estimation of Exposure Effects on a Time-to-Event Endpoint Using Structural Cumulative Survival Models. <i>Biometrics</i> , 2017, 73, 1140-1149.	1.4	39
66	Flexible Mediation Analysis With Multiple Mediators. <i>American Journal of Epidemiology</i> , 2017, 186, 184-193.	3.4	89
67	Interventional Effects for Mediation Analysis with Multiple Mediators. <i>Epidemiology</i> , 2017, 28, 258-265.	2.7	156
68	Asking Too Much of Epidemiologic Studies. <i>Epidemiology</i> , 2017, 28, e47-e49.	2.7	11
69	Does appropriate empiric antibiotic therapy modify intensive care unit-acquired Enterobacteriaceae bacteraemia mortality and discharge?. <i>Journal of Hospital Infection</i> , 2017, 96, 23-28.	2.9	11
70	The potential and perils of observational studies. <i>Annals of Oncology</i> , 2017, 28, 182.	1.2	4
71	<b>medflex</b> : An R Package for Flexible Mediation Analysis using Natural Effect Models. <i>Journal of Statistical Software</i> , 2017, 76, .	3.7	162
72	Estimation of Indirect Effects in the Presence of Unmeasured Confounding for the Mediator-Outcome Relationship in a Multilevel 2-1-1 Mediation Model. <i>Journal of Educational and Behavioral Statistics</i> , 2016, 41, 359-391.	1.7	11

#	ARTICLE	IF	CITATIONS
73	The effects of early grade retention: Effect modification by prior achievement and age. <i>Journal of School Psychology</i> , 2016, 54, 77-93.	2.9	14
74	Time-Varying Treatments in Observational Studies: Marginal Structural Models of the Effects of Early Grade Retention on Math Achievement. <i>Multivariate Behavioral Research</i> , 2016, 51, 1-22.	3.1	10
75	Assessing moderated mediation in linear models requires fewer confounding assumptions than assessing mediation. <i>British Journal of Mathematical and Statistical Psychology</i> , 2016, 69, 352-374.	1.4	7
76	Data-Adaptive Bias-Reduced Doubly Robust Estimation. <i>International Journal of Biostatistics</i> , 2016, 12, 253-282.	0.7	10
77	Rejoinder: Remaining Challenges in Investigating Grade-Retention Effectiveness. <i>Multivariate Behavioral Research</i> , 2016, 51, 1-4.	3.1	0
78	Multivariable modeling of factors associated with spinal pain in young adolescence. <i>European Spine Journal</i> , 2016, 25, 2809-2821.	2.2	38
79	Revisiting g-estimation of the Effect of a Time-varying Exposure Subject to Time-varying Confounding. <i>Epidemiologic Methods</i> , 2016, 5, 37-56.	0.9	33
80	The effect of adherence to statin therapy on cardiovascular mortality: quantification of unmeasured bias using falsification end-points. <i>BMC Public Health</i> , 2016, 16, 303.	2.9	7
81	Doubly robust methods for handling confounding by cluster. <i>Biostatistics</i> , 2016, 17, 264-276.	1.5	32
82	On the practice of ignoring centerâ€patient interactions in evaluating hospital performance. <i>Statistics in Medicine</i> , 2016, 35, 227-238.	1.6	14
83	The formal approach to quantitative causal inference in epidemiology: misguided or misrepresented?. <i>International Journal of Epidemiology</i> , 2016, 45, dyw227.	1.9	44
84	Causal Mediation Analysis with Multiple Mediators. <i>Biometrics</i> , 2015, 71, 1-14.	1.4	216
85	Structural equation modeling versus marginal structural modeling for assessing mediation in the presence of posttreatment confounding.. <i>Psychological Methods</i> , 2015, 20, 204-220.	3.5	14
86	Within-Subject Mediation Analysis in AB/BA Crossover Designs. <i>International Journal of Biostatistics</i> , 2015, 11, 1-22.	0.7	16
87	Instrumental Variable Estimation in a Survival Context. <i>Epidemiology</i> , 2015, 26, 402-410.	2.7	157
88	Brief Report. <i>Epidemiology</i> , 2015, 26, 802-805.	2.7	3
89	A cautionary note on the power of the test for the indirect effect in mediation analysis. <i>Frontiers in Psychology</i> , 2015, 5, 1549.	2.1	71
90	Cellular Heterogeneity in the Level of mtDNA Heteroplasmy in Mouse Embryonic Stem Cells. <i>Cell Reports</i> , 2015, 13, 1304-1309.	6.4	14

#	ARTICLE	IF	CITATIONS
91	Birth cohort appeared to confound effect estimates of guideline changes on statin utilization. <i>Journal of Clinical Epidemiology</i> , 2015, 68, 334-340.	5.0	4
92	Gonadotropin Therapy versus Laparoscopic Ovarian Drilling in Clomiphene Citrate-Resistant Polycystic Ovary Syndrome Patients: A Retrospective Cost-Effectiveness Analysis. <i>Gynecologic and Obstetric Investigation</i> , 2015, 80, 164-169.	1.6	5
93	Increasing the power of the Mann-Whitney test in randomized experiments through flexible covariate adjustment. <i>Statistics in Medicine</i> , 2015, 34, 1012-1030.	1.6	33
94	Bias-Reduced Doubly Robust Estimation. <i>Journal of the American Statistical Association</i> , 2015, 110, 1024-1036.	3.1	77
95	Improving upon the efficiency of complete case analysis when covariates are MNAR. <i>Biostatistics</i> , 2014, 15, 719-730.	1.5	49
96	Mediation Analysis with Multiple Mediators. <i>Epidemiologic Methods</i> , 2014, 2, 95-115.	0.9	508
97	On regression adjustment for the propensity score. <i>Statistics in Medicine</i> , 2014, 33, 4053-4072.	1.6	119
98	On adjustment for auxiliary covariates in additive hazard models for the analysis of randomized experiments. <i>Biometrika</i> , 2014, 101, 237-244.	2.4	11
99	On shrinkage and model extrapolation in the evaluation of clinical center performance. <i>Biostatistics</i> , 2014, 15, 651-664.	1.5	27
100	Adding serum estradiol measurements to ultrasound monitoring does not change the yield of mature oocytes in IVF/ICSI. <i>Gynecological Endocrinology</i> , 2014, 30, 649-652.	1.7	11
101	Invited Commentary: Some Advantages of the Relative Excess Risk due to Interaction (RERI) Towards Better Estimators of Additive Interaction. <i>American Journal of Epidemiology</i> , 2014, 179, 670-671.	3.4	22
102	UHPLC-MS/MS method for the determination of the cyclic depsipeptide mycotoxins beauvericin and enniatins in in vitro transdermal experiments. <i>Journal of Pharmaceutical and Biomedical Analysis</i> , 2014, 100, 50-57.	2.8	7
103	Estimation of Controlled Direct Effects in the Presence of Exposure-Induced Confounding and Latent Variables. <i>Structural Equation Modeling</i> , 2014, 21, 396-407.	3.8	10
104	Delaying the oocyte maturation trigger by one day leads to a higher metaphase II oocyte yield in IVF/ICSI: a randomised controlled trial. <i>Reproductive Biology and Endocrinology</i> , 2014, 12, 31.	3.3	22
105	A retrospective study of the pregnancy, delivery and neonatal outcome in overweight versus normal weight women with polycystic ovary syndrome. <i>Human Reproduction</i> , 2014, 29, 2333-2338.	0.9	32
106	Preventable Proportion of Severe Infections Acquired in Intensive Care Units: Case-Mix Adjusted Estimations from Patient-Based Surveillance Data. <i>Infection Control and Hospital Epidemiology</i> , 2014, 35, 494-501.	1.8	22
107	Structural Nested Models and G-estimation: The Partially Realized Promise. <i>Statistical Science</i> , 2014, 29, .	2.8	97
108	Effect Decomposition in the Presence of an Exposure-Induced Mediator-Outcome Confounder. <i>Epidemiology</i> , 2014, 25, 300-306.	2.7	253

#	ARTICLE	IF	CITATIONS
109	On collapsibility and confounding bias in Cox and Aalen regression models. <i>Lifetime Data Analysis</i> , 2013, 19, 279-296.	0.9	77
110	Make the most of your samples: Bayes factor estimators for high-dimensional models of sequence evolution. <i>BMC Bioinformatics</i> , 2013, 14, 85.	2.6	100
111	Follicle Measurements Using Sonography-Based Automated Volume Count Accurately Predict the Yield of Mature Oocytes in In Vitro Fertilization/Intracytoplasmic Sperm Injection Cycles. <i>Gynecologic and Obstetric Investigation</i> , 2013, 76, 107-112.	1.6	14
112	Flexible Mediation Analysis in the Presence of Nonlinear Relations: Beyond the Mediation Formula. <i>Multivariate Behavioral Research</i> , 2013, 48, 871-894.	3.1	30
113	Testing for direct genetic effects using a screening step in family-based association studies. <i>Frontiers in Genetics</i> , 2013, 4, 243.	2.3	3
114	A Simple Unified Approach for Estimating Natural Direct and Indirect Effects. <i>American Journal of Epidemiology</i> , 2012, 176, 190-195.	3.4	327
115	On model selection and model misspecification in causal inference. <i>Statistical Methods in Medical Research</i> , 2012, 21, 7-30.	1.5	125
116	Commentary. <i>Epidemiology</i> , 2012, 23, 889-891.	2.7	22
117	Imputation Strategies for the Estimation of Natural Direct and Indirect Effects. <i>Epidemiologic Methods</i> , 2012, 1, .	0.9	127
118	Natural Direct and Indirect Effects on the Exposed: Effect Decomposition under Weaker Assumptions. <i>Biometrics</i> , 2012, 68, 1019-1027.	1.4	75
119	Parental socioeconomic status and soft drink consumption of the child. The mediating proportion of parenting practices. <i>Appetite</i> , 2012, 59, 76-80.	3.7	54
120	Causation and causal inference for genetic effects. <i>Human Genetics</i> , 2012, 131, 1665-1676.	3.8	14
121	Direct Genetic Effects and Their Estimation From Matched Case-Control Data. <i>Genetic Epidemiology</i> , 2012, 36, 652-662.	1.3	9
122	Gene-environment interaction testing in family-based association studies with phenotypically ascertained samples: a causal inference approach. <i>Biostatistics</i> , 2012, 13, 468-481.	1.5	4
123	Discussions. <i>Biometrics</i> , 2012, 68, 675-678.	1.4	6
124	Semiparametric Tests for Sufficient Cause Interaction. <i>Journal of the Royal Statistical Society Series B: Statistical Methodology</i> , 2012, 74, 223-244.	2.2	10
125	Context-dependent codon partition models provide significant increases in model fit in <i>atpB</i> and <i>rbcl</i> protein-coding genes. <i>BMC Evolutionary Biology</i> , 2011, 11, 145.	3.2	4
126	Attributable Mortality of Ventilator-Associated Pneumonia. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2011, 184, 1133-1139.	5.6	330

#	ARTICLE	IF	CITATIONS
127	On Instrumental Variables Estimation of Causal Odds Ratios. <i>Statistical Science</i> , 2011, 26, .	2.8	91
128	Serial Measurements of Mesothelioma Serum Biomarkers in Asbestos-Exposed Individuals: A Prospective Longitudinal Cohort Study. <i>Journal of Thoracic Oncology</i> , 2011, 6, 889-895.	1.1	37
129	Estimation of Direct Effects for Survival Data by using the Aalen Additive Hazards Model. <i>Journal of the Royal Statistical Society Series B: Statistical Methodology</i> , 2011, 73, 773-788.	2.2	42
130	Combining Disease Models to Test for Gene-Environment Interaction in Nuclear Families. <i>Biometrics</i> , 2011, 67, 1260-1270.	1.4	7
131	Ion mobility spectrometry as a high-throughput technique for in vitro transdermal Franz diffusion cell experiments of ibuprofen. <i>Journal of Pharmaceutical and Biomedical Analysis</i> , 2011, 55, 472-478.	2.8	22
132	Age-disparity, sexual connectedness and HIV infection in disadvantaged communities around Cape Town, South Africa: a study protocol. <i>BMC Public Health</i> , 2011, 11, 616.	2.9	11
133	Mendelian randomization analysis of case-control data using structural mean models. <i>Statistics in Medicine</i> , 2011, 30, 678-694.	1.6	51
134	Invited Commentary: G-Computation-Lost in Translation?. <i>American Journal of Epidemiology</i> , 2011, 173, 739-742.	3.4	68
135	A Weighting Approach to Causal Effects and Additive Interaction in Case-Control Studies: Marginal Structural Linear Odds Models. <i>American Journal of Epidemiology</i> , 2011, 174, 1197-1203.	3.4	36
136	Doubly robust estimation of attributable fractions. <i>Biostatistics</i> , 2011, 12, 112-121.	1.5	29
137	Estimation of HIV treatment-efficacy by combining structural nested mean models with pharmacokinetic models of antiretroviral drug exposure. <i>Statistics and Its Interface</i> , 2011, 4, 511-520.	0.3	0
138	A Principal Stratification Approach to Assess the Differences in Prognosis between Cancers Caused by Hormone Replacement Therapy and by Other Factors. <i>International Journal of Biostatistics</i> , 2010, 6, Article 20.	0.7	2
139	Using Non-Reversible Context-Dependent Evolutionary Models to Study Substitution Patterns in Primate Non-Coding Sequences. <i>Journal of Molecular Evolution</i> , 2010, 71, 34-50.	1.8	14
140	Reply to Wolkewitz et al.. <i>Intensive Care Medicine</i> , 2010, 36, 550-550.	8.2	5
141	Adjusting for time-varying confounding in the subdistribution analysis of a competing risk. <i>Lifetime Data Analysis</i> , 2010, 16, 45-70.	0.9	36
142	A randomized, double-blind, placebo-controlled, cross-over pilot study on the use of a standardized hop extract to alleviate menopausal discomforts. <i>Phytomedicine</i> , 2010, 17, 389-396.	5.3	87
143	Modelling the ancestral sequence distribution and model frequencies in context-dependent models for primate non-coding sequences. <i>BMC Evolutionary Biology</i> , 2010, 10, 244.	3.2	18
144	Predictability of cerebral palsy in a high-risk NICU population. <i>Early Human Development</i> , 2010, 86, 413-417.	1.8	26
