#	ARTICLE	IF	CITATIONS
1	A comparison of repeat cross-sectional and longitudinal results from the COMPASS study: design considerations for analysing surveillance data over time. <i>International Journal of Social Research Methodology: Theory and Practice</i> , 2022, 25, 597-609.	4.4	6
2	Longitudinal trends and predictors of muscle-strengthening activity guideline adherence among Canadian youths. <i>Journal of Science and Medicine in Sport</i> , 2022, 25, 230-234.	1.3	7
3	Longitudinal Associations Between e-Cigarette Use, Cigarette Smoking, Physical Activity, and Recreational Screen Time in Canadian Adolescents. <i>Nicotine and Tobacco Research</i> , 2022, 24, 978-985.	2.6	4
4	Examining the role that weight perception and social influences have on mental health among youth in the COMPASS study. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2022, 57, 1671-1684.	3.1	4
5	Understanding Sexual Health Indicators During Adolescence: A Study to Consider Time Since Sexual Debut When Exploring Multiple Sexual Partners. <i>Archives of Sexual Behavior</i> , 2022, 51, 1765-1772.	1.9	1
6	The Relations between Youth Cannabis Use, School Cannabis Use-Related Disciplinary Approaches and Student Perceptions of School Support. <i>Substance Use and Misuse</i> , 2022, 57, 897-910.	1.4	1
7	Do You Really Want to Be Forever Young? Emotional Health and Psychosocial Well-being by Relative Birth Quarter in Canadian Adolescents. <i>Journal of Adolescent Health</i> , 2022, 70, 625-633.	2.5	2
8	A supportive school environment may reduce the risk of non-medical prescription opioid use due to impaired mental health among students. <i>European Child and Adolescent Psychiatry</i> , 2021, 30, 293-301.	4.7	4
9	Modes of cannabis use among Canadian youth in the COMPASS study; using LCA to examine patterns of smoking, vaping, and eating/drinking cannabis. <i>Drugs: Education, Prevention and Policy</i> , 2021, 28, 156-164.	1.3	6
10	Does having one or more smoking friends mediate the transition from e-cigarette use to cigarette smoking: a longitudinal study of Canadian youth. <i>Cancer Causes and Control</i> , 2021, 32, 67-74.	1.8	0
11	Hit the chronicâ€¦ physical activity: are cannabis associated mental health changes in adolescents attenuated by remaining active?. <i>Social Psychiatry and Psychiatric Epidemiology</i> , 2021, 56, 141-152.	3.1	3
12	Trends in youth e-cigarette and cigarette use between 2013 and 2019: insights from repeat cross-sectional data from the COMPASS study. <i>Canadian Journal of Public Health</i> , 2021, 112, 60-69.	2.3	34
13	Offering nicotine patches to all households in a community with high smoking rates: Pilot test of a population-based approach to promote tobacco cessation. <i>International Journal of Population Data Science</i> , 2021, 6, 1400.	0.1	2
14	Are closed campus policies associated with adolescent eating behaviours?. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2021, 41, 73-84.	1.1	2
15	Can We Reverse this Trend? Exploring Health and Risk Behaviours of Grade 12 Cohorts of Ontario Students from 2013â€”2019. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 3109.	2.6	7
16	Disciplinary Approaches for Cannabis Use Policy Violations in Canadian Secondary Schools. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 2472.	2.6	3
17	Examining If Changes in the Type of School-Based Intramural Programs Affect Youth Physical Activity over Time: A Natural Experiment Evaluation. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 2752.	2.6	5
18	Evaluating the Impact of the Healthy Kids Community Challenge (HKCC) on Physical Activity of Older Youth. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 3083.	2.6	0

#	ARTICLE	IF	CITATIONS
19	A School-Level Examination of the Association between Programs and Policies and Physical Activity Outcomes among Females from the COMPASS Study. International Journal of Environmental Research and Public Health, 2021, 18, 3314.	2.6	4
20	The Energy to Smoke: Examining the Longitudinal Association between Beverage Consumption and Smoking and Vaping Behaviours among Youth in the COMPASS Study. International Journal of Environmental Research and Public Health, 2021, 18, 3864.	2.6	6
21	High School Intramural Participation and Substance Use: A Longitudinal Analysis of COMPASS Data. Substance Use and Misuse, 2021, 56, 1108-1118.	1.4	5
22	Weight control intentions and mental health among Canadian adolescents: a gender-based analysis of students in the COMPASS study. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2021, 41, 119-130.	1.1	6
23	Secondary School Nutrition Policy Compliance in Ontario and Alberta, Canada: A Follow-Up Study Examining Vending Machine Data from the COMPASS Study. International Journal of Environmental Research and Public Health, 2021, 18, 3817.	2.6	2
24	Steering clear: Traffic violations among emerging adults who engage in habitual or casual cannabis use. Accident Analysis and Prevention, 2021, 153, 106059.	5.7	0
25	Substance use classes and symptoms of anxiety and depression among Canadian secondary school students. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2021, 41, 153-164.	1.1	11
26	Cannabis Use, Screen Time, and Internalizing Symptoms among Canadian Youth: Testing Mediation Pathways. Substance Use and Misuse, 2021, 56, 1232-1240.	1.4	0
27	An examination of the prospective association between physical activity and academic achievement in youth at the population level. PLoS ONE, 2021, 16, e0253142.	2.5	4
28	A quasi-experimental examination of how changes in school-level intramurals are associated with physical activity among a sample of Canadian secondary school students from the COMPASS study. SSM - Population Health, 2021, 14, 100805.	2.7	1
29	Do weight perception and bullying victimization account for links between weight status and mental health among adolescents?. BMC Public Health, 2021, 21, 1062.	2.9	21
30	Use of additional nicotine replacement therapy by participants in a five-year follow-up of a tobacco cessation trial. Addictive Behaviors, 2021, 117, 106875.	3.0	0
31	Trends in youth cannabis use across cannabis legalization: Data from the COMPASS prospective cohort study. Preventive Medicine Reports, 2021, 22, 101351.	1.8	32
32	Adolescents' adoption of COVID-19 preventive measures during the first months of the pandemic: what led to early adoption?. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2021, 41, .	1.1	3
33	Examining Engagement With Public Health in the Implementation of School-Based Health Initiatives: Findings From the COMPASS Study. Journal of School Health, 2021, 91, 825-835.	1.6	1
34	Longitudinal association between movement behaviours and depressive symptoms among adolescents using compositional data analysis. PLoS ONE, 2021, 16, e0256867.	2.5	13
35	Changes in cannabis use modes among Canadian youth across recreational cannabis legalization: Data from the COMPASS prospective cohort study. Addictive Behaviors, 2021, 122, 107025.	3.0	10
36	The Impact of Changes in Physical Education Class Enrollment on Moderate-to-Vigorous Physical Activity Among a Large Sample of Canadian Youth. Journal of School Health, 2021, 91, 1030-1036.	1.6	3

#	ARTICLE	IF	CITATIONS
37	Perceived Needs for Mental Health Care Among Emerging Adults With Cancer. <i>Emerging Adulthood</i> , 2021, 9, 768-773.	2.4	0
38	Examining if changes in gender-specific and co-ed intramural programs affect youth physical activity over time: a natural experiment evaluation using school- and student-level data from the COMPASS study. <i>BMC Public Health</i> , 2021, 21, 2045.	2.9	1
39	Identifying patterns of alcohol use among secondary school students in Canada: A multilevel latent class analysis. <i>Addictive Behaviors</i> , 2020, 100, 106120.	3.0	12
40	High School Bullying and Mental Disorder: an Examination of the Association with Flourishing and Emotional Regulation. <i>International Journal of Bullying Prevention</i> , 2020, 2, 241-252.	2.2	10
41	An examination of how age of onset for alcohol, cannabis, and tobacco are associated with school outcomes in grade 12. <i>Addictive Behaviors</i> , 2020, 102, 106215.	3.0	6
42	Sex-Related Differences in Adolescent Cannabis Use: Influences of School Context and School Connectedness. <i>Journal of School Health</i> , 2020, 90, 878-886.	1.6	7
43	Coffee and cigarettes: Examining the association between caffeinated beverage consumption and smoking behaviour among youth in the COMPASS study. <i>Preventive Medicine Reports</i> , 2020, 19, 101148.	1.8	17
44	Factors influencing the non-medical use of prescription opioids among youth: results from the COMPASS study. <i>Journal of Substance Use</i> , 2020, 25, 507-514.	0.7	5
45	Priority setting for school nutrition research: developing a collaborative research agenda. <i>Canadian Journal of Public Health</i> , 2020, 111, 1020-1023.	2.3	5
46	Factors Associated with Students Meeting Components of Canada's New 24-Hour Movement Guidelines over Time in the COMPASS Study. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 5326.	2.6	11
47	Reluctancy towards Help-Seeking for Mental Health Concerns at Secondary School among Students in the COMPASS Study. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 7128.	2.6	6
48	Are weight status and weight perception associated with academic performance among youth?. <i>Journal of Eating Disorders</i> , 2020, 8, 52.	2.7	9
49	High school sport participation and substance use: A cross-sectional analysis of students from the COMPASS study. <i>Addictive Behaviors Reports</i> , 2020, 12, 100298.	1.9	15
50	Determining the long-term health burden and risk of sequelae for 14 foodborne infections in British Columbia, Canada: protocol for a retrospective population-based cohort study. <i>BMJ Open</i> , 2020, 10, e036560.	1.9	4
51	Predictors of One-Year Change in How Youth Perceive Their Weight. <i>Journal of Obesity</i> , 2020, 2020, 1-15.	2.7	6
52	Targeting mailed nicotine patch distribution interventions to rural regions of Canada: protocol for a randomized controlled trial. <i>BMC Public Health</i> , 2020, 20, 1757.	2.9	3
53	Does social support moderate the association between hunger and mental health in youth? A gender-specific investigation from the Canadian Health Behaviour in School-aged Children study. <i>Nutrition Journal</i> , 2020, 19, 134.	3.4	4
54	A cross-sectional examination of the association between co-ed and gender-specific school intramural programs and intramural participation among a sample of Canadian secondary school students. <i>Preventive Medicine Reports</i> , 2020, 20, 101233.	1.8	4

#	ARTICLE	IF	CITATIONS
55	Measurement Invariance of the Flourishing Scale among a Large Sample of Canadian Adolescents. International Journal of Environmental Research and Public Health, 2020, 17, 7800.	2.6	33
56	Environmental Factors of Youth Milk and Milk Alternative Consumption. American Journal of Health Behavior, 2020, 44, 666-680.	1.4	3
57	Are one-year changes in adherence to the 24-hour movement guidelines associated with depressive symptoms among youth?. BMC Public Health, 2020, 20, 793.	2.9	32
58	Trends and predictors of exclusive e-cigarette use, exclusive smoking and dual use among youth in Canada. Addictive Behaviors, 2020, 109, 106481.	3.0	8
59	Longitudinal associations between bullying and alcohol use and binge drinking among grade 9 and 10 students in the COMPASS study. Canadian Journal of Public Health, 2020, 111, 1024-1032.	2.3	9
60	Five-Year Follow-up of a Randomized Clinical Trial Testing Mailed Nicotine Patches to Promote Tobacco Cessation. JAMA Internal Medicine, 2020, 180, 792.	5.1	2
61	Prevalence and correlates of youth poly-substance use in the COMPASS study. Addictive Behaviors, 2020, 107, 106400.	3.0	45
62	Are one-year changes in adherence to the 24-hour movement guidelines associated with flourishing among Canadian youth?. Preventive Medicine, 2020, 139, 106179.	3.4	20
63	Exploring gender differences in the longitudinal association between bullying and risk behaviours with Body Mass Index among COMPASS youth in Canada. Preventive Medicine, 2020, 139, 106188.	3.4	5
64	The role of school characteristics in pre-legalization cannabis use change among Canadian youth: implications for policy and harm reduction. Health Education Research, 2020, 35, 297-305.	1.9	7
65	Cannabis cessation among youth: rates, patterns and academic outcomes in a large prospective cohort of Canadian high school students. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2020, 40, 95-103.	1.1	5
66	Micro-level factors associated with alcohol use and binge drinking among youth in the COMPASS study (2012/13 to 2017/18). Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2020, 40, 63-69.	1.1	5
67	Gender differences in the longitudinal association between multilevel latent classes of chronic disease risk behaviours and body mass index in adolescents. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2020, 40, 259-266.	1.1	0
68	Gender differences in the longitudinal association between multilevel latent classes of chronic disease risk behaviours and body mass index in adolescents. Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice, 2020, 40, 259-266.	1.1	1
69	Examining associations between school food environment characteristics and sugar-sweetened beverage consumption among Canadian secondary-school students in the COMPASS study. Public Health Nutrition, 2019, 22, 1928-1940.	2.2	16
70	Natural experiment methodology for research: a review of how different methods can support real-world research. International Journal of Social Research Methodology: Theory and Practice, 2019, 22, 19-35.	4.4	161
71	An examination of how age of onset for alcohol, cannabis, and tobacco are associated with physical activity, screen time and BMI as students are preparing to graduate from high school. Preventive Medicine Reports, 2019, 15, 100956.	1.8	6
72	A gender-stratified, multilevel latent class assessment of chronic disease risk behaviours' association with Body Mass Index among youth in the COMPASS study. Preventive Medicine, 2019, 126, 105758.	3.4	7

#	ARTICLE	IF	CITATIONS
73	Psychological correlates and binge drinking behaviours among Canadian youth: a cross-sectional analysis of the mental health pilot data from the COMPASS study. <i>BMJ Open</i> , 2019, 9, e028558.	1.9	15
74	Examining the association between exposure to various screen time sedentary behaviours and cannabis use among youth in the COMPASS study. <i>SSM - Population Health</i> , 2019, 9, 100487.	2.7	4
75	Traffic Violations among Young People with Attention-Deficit Hyperactivity Disorder. <i>Canadian Journal of Psychiatry</i> , 2019, 64, 511-515.	1.9	2
76	Exploring the association between E-cigarette retailer proximity and density to schools and youth E-cigarette use. <i>Preventive Medicine Reports</i> , 2019, 15, 100912.	1.8	9
77	Trends of poly-substance use among Canadian youth. <i>Addictive Behaviors Reports</i> , 2019, 10, 100189.	1.9	55
78	Protective or risky? The longitudinal association of team sports participation and health-related behaviours in Canadian adolescent girls. <i>Canadian Journal of Public Health</i> , 2019, 110, 616-625.	2.3	9
79	Caffeinated energy drink consumption and predictors of use among secondary school students over time in the COMPASS cohort study. <i>Preventive Medicine Reports</i> , 2019, 15, 100911.	1.8	6
80	Food Safety Education Needs of High School Students: Leftovers, Lunches, and Microwaves. <i>Journal of School Health</i> , 2019, 89, 578-586.	1.6	6
81	Artificial intelligence (AI) and cancer prevention: the potential application of AI in cancer control programming needs to be explored in population laboratories such as COMPASS. <i>Cancer Causes and Control</i> , 2019, 30, 671-675.	1.8	17
82	Youth consumption of alcohol mixed with energy drinks in Canada: Assessing the role of energy drinks. <i>Preventive Medicine Reports</i> , 2019, 14, 100865.	1.8	9
83	Assessing the strength of secondary school tobacco policies of schools in the COMPASS study and the association to student smoking behaviours. <i>Canadian Journal of Public Health</i> , 2019, 110, 236-243.	2.3	3
84	Exploring the Bi-Directional Association between Tobacco and E-Cigarette Use among Youth in Canada. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 4256.	2.6	6
85	Examining the impact of timing of alcohol use initiation on changes to body weight and weight status among students in the COMPASS study. <i>Preventive Medicine Reports</i> , 2019, 16, 101017.	1.8	0
86	Factors associated with cannabis use change in youth: Evidence from the COMPASS study. <i>Addictive Behaviors</i> , 2019, 90, 158-163.	3.0	16
87	School start time changes in the COMPASS study: associations with youth sleep duration, physical activity, and screen time. <i>Sleep Medicine</i> , 2019, 56, 16-22.	1.6	15
88	Identifying behavioural characteristics of tobacco product and e-cigarette use clusters: A repeat cross-sectional analysis. <i>Addictive Behaviors</i> , 2019, 90, 77-84.	3.0	8
89	Sociodemographic correlates of physical activity and screen time among adolescents in Canada and Guatemala: Results from the COMPASS system. <i>Global Health Promotion</i> , 2019, 26, 25-35.	1.3	3
90	Examining the Association Between Physical Activity, Sedentary Behavior and Sport Participation With E-Cigarette Use and Smoking Status in a Large Sample of Canadian Youth. <i>Nicotine and Tobacco Research</i> , 2019, 21, 285-292.	2.6	30

#	ARTICLE	IF	CITATIONS
91	Exploring the Predictive Validity of the Susceptibility to Smoking Construct for Tobacco Cigarettes, Alternative Tobacco Products, and E-Cigarettes. <i>Nicotine and Tobacco Research</i> , 2019, 21, 323-330.	2.6	39
92	Exploring and visualizing the small-area-level socioeconomic factors, alcohol availability and built environment influences of alcohol expenditure for the City of Toronto: a spatial analysis approach. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2019, 39, 15-24.	1.1	6
93	Age at first alcohol use predicts current alcohol use, binge drinking and mixing of alcohol with energy drinks among Ontario Grade 12 students in the COMPASS study. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2019, 39, 298-305.	1.1	10
94	Tobacco, alcohol and marijuana use among Indigenous youth attending off-reserve schools in Canada: cross-sectional results from the Canadian Student Tobacco, Alcohol and Drugs Survey. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2019, 39, 207-215.	1.1	16
95	Identifying trajectories of alcohol use in a sample of secondary school students in Ontario and Alberta: longitudinal evidence from the COMPASS study. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2019, 39, 244-253.	1.1	7
96	Food Purchasing Behaviors and Sugar-Sweetened Beverage Consumption among Canadian Secondary School Students in the COMPASS Study. <i>Journal of Nutrition Education and Behavior</i> , 2018, 50, 803-812.e1.	0.7	9
97	Examining Predictors of Breakfast Skipping and Breakfast Program Use Among Secondary School Students in the COMPASS Study. <i>Journal of School Health</i> , 2018, 88, 150-158.	1.6	18
98	Dieting predicts engagement in multiple risky behaviours among adolescent Canadian girls: a longitudinal analysis. <i>Canadian Journal of Public Health</i> , 2018, 109, 61-69.	2.3	8
99	Challenges to evidence-based health promotion: a case study of a Food Security Coalition in Ontario, Canada. <i>Health Promotion International</i> , 2018, 33, 760-769.	1.8	5
100	The correlates of physical activity among adult Māori. <i>Ethnicity and Health</i> , 2018, 23, 629-648.	2.5	6
101	Researchers Supporting Schools to Improve Health: Influential Factors and Outcomes of Knowledge Brokering in the COMPASS Study. <i>Journal of School Health</i> , 2018, 88, 54-64.	1.6	7
102	Do school physical activity policies and programs have a role in decreasing multiple screen time behaviours among youth?. <i>Preventive Medicine</i> , 2018, 110, 106-113.	3.4	16
103	Modifiable predictors of insufficient sleep durations: A longitudinal analysis of youth in the COMPASS study. <i>Preventive Medicine</i> , 2018, 106, 164-170.	3.4	30
104	Observation of High School Students' Food Handling Behaviors: Do They Improve following a Food Safety Education Intervention?. <i>Journal of Food Protection</i> , 2018, 81, 917-925.	1.7	16
105	Examining changes in school vending machine beverage availability and sugar-sweetened beverage intake among Canadian adolescents participating in the COMPASS study: a longitudinal assessment of provincial school nutrition policy compliance and effectiveness. <i>International Journal of Behavioral Nutrition and Physical Activity</i> , 2018, 15, 121.	4.6	14
106	The association of school connectedness and bullying involvement with multiple screen-time behaviours among youth in two Canadian provinces: a COMPASS study. <i>Health Promotion and Chronic Disease Prevention in Canada: Research, Policy and Practice</i> , 2018, 38, 368-379.	1.1	12
107	The Protective Effects of School Connectedness on Substance Use and Physical Activity. <i>Journal of Adolescent Health</i> , 2018, 63, 724-731.	2.5	74
108	Factors associated with social casino gaming among adolescents across game types. <i>BMC Public Health</i> , 2018, 18, 1167.	2.9	24
