#	ARTICLE	IF	CITATIONS
1	Glycoprotein Acetyls: A Novel Inflammatory Biomarker of Early Cardiovascular Risk in the Young. Journal of the American Heart Association, 2022, 11, e024380.	3.7	35
2	Ongoing Exercise Intolerance Following COVID-19: A Magnetic Resonance-Augmented Cardiopulmonary Exercise Test Study. Journal of the American Heart Association, 2022, 11, e024207.	3.7	15
3	Cardiovascular magnetic resonance for the assessment of left ventricular filling pressure in heart failure. European Heart Journal, 2022, 43, 2523-2525.	2.2	5
4	Society for Cardiovascular Magnetic Resonance/European Society of Cardiovascular Imaging/American Society of Echocardiography/Society for Pediatric Radiology/North American Society for Cardiovascular Imaging Guidelines for the Use of Cardiac Magnetic Resonance in Pediatric Congenital and Acquired Heart Disease: Endorsed by The American Heart Association. Circulation: Society for Cardiovascular Magnetic Resonance/European Society of Cardiovascular Imaging/American Society of Echocardiography/Society for Pediatric Radiology/North American Society for Cardiovascular Imaging Guidelines for the use of cardiovascular magnetic resonance in pediatric congenital and acquired heart disease. Journal of Cardiovascular Magnetic Resonance, 2022, 24, .	2.6	12
5	Society for Cardiovascular Magnetic Resonance/European Society of Cardiovascular Imaging/American Society of Echocardiography/Society for Pediatric Radiology/North American Society for Cardiovascular Imaging Guidelines for the use of cardiovascular magnetic resonance in pediatric congenital and acquired heart disease. Journal of Cardiovascular Magnetic Resonance, 2022, 24, .	3.3	14
6	A preoperative estimate of central venous pressure is associated with early Fontan failure. Journal of Thoracic and Cardiovascular Surgery, 2021, 161, 1426-1434.	0.8	3
7	Cardiovascular Magnetic Resonance in Congenital Heart Disease. Heart Failure Clinics, 2021, 17, 157-165.	2.1	5
8	Long term clinical outcomes associated with CMR quantified isolated left ventricular non-compaction in adults. International Journal of Cardiology, 2021, 328, 235-240.	1.7	10
9	Determinants of Intima-Media Thickness in the Young. JACC: Cardiovascular Imaging, 2021, 14, 468-478.	5.3	43
10	Reducing Contrast Agent Dose in Cardiovascular MR Angiography with Deep Learning. Journal of Magnetic Resonance Imaging, 2021, 54, 795-805.	3.4	11
11	Machine learning in Magnetic Resonance Imaging: Image reconstruction. Physica Medica, 2021, 83, 79-87.	0.7	29
12	Intraoperative anti-A/B immunoabsorption is associated with significantly reduced blood product utilization with similar outcomes in pediatric ABO-incompatible heart transplantation. Journal of Heart and Lung Transplantation, 2021, 40, 1433-1442.	0.6	6
13	Real-time deep artifact suppression using recurrent UNets for low-latency cardiac MRI. Magnetic Resonance in Medicine, 2021, 86, 1904-1916.	3.0	16
14	Right Ventricular Longitudinal Strain. JACC: Cardiovascular Imaging, 2021, 14, 1569-1570.	5.3	2
15	Deep artifact suppression for spiral real-time phase contrast cardiac magnetic resonance imaging in congenital heart disease. Magnetic Resonance Imaging, 2021, 83, 125-132.	1.8	4
16	Reduced exercise capacity in patients with systemic sclerosis is associated with lower peak tissue oxygen extraction: a cardiovascular magnetic resonance-augmented cardiopulmonary exercise study. Journal of Cardiovascular Magnetic Resonance, 2021, 23, 118.	3.3	4
17	Perturbed spiral real-time phase-contrast MR with compressive sensing reconstruction for assessment of flow in children. Magnetic Resonance in Medicine, 2020, 83, 2077-2091.	3.0	15
18	SCMR Position Paper (2020) on clinical indications for cardiovascular magnetic resonance. Journal of Cardiovascular Magnetic Resonance, 2020, 22, 76.	3.3	169

#	ARTICLE	IF	CITATIONS
19	Rapid whole-heart CMR with single volume super-resolution. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2020, 22, 56.	3.3	39
20	Letter by Quail and Muthurangu Regarding Article, "Doppler-Derived Arterial Load Indices Better Reflect Left Ventricular Afterload Than Systolic Blood Pressure in Coarctation of Aorta": Circulation: Cardiovascular Imaging, 2020, 13, e010643.	2.6	0
21	Rapid 3D whole-heart cine imaging using golden ratio stack of spirals. <i>Magnetic Resonance Imaging</i> , 2020, 72, 1-7.	1.8	2
22	Impact of valve morphology, hypertension and age on aortic wall properties in patients with coarctation: a two-centre cross-sectional study. <i>BMJ Open</i> , 2020, 10, e034853.	1.9	5
23	Golden ratio stack of spirals for flexible angiographic imaging: Proof of concept in congenital heart disease. <i>Magnetic Resonance in Medicine</i> , 2019, 81, 90-101.	3.0	2
24	Postprandial Vascular Dysfunction Is Associated With Raised Blood Pressure and Adverse Left Ventricular Remodeling in Adolescent Adiposity. <i>Circulation: Cardiovascular Imaging</i> , 2019, 12, e009172.	2.6	4
25	Right Ventricular Strain. <i>JACC: Cardiovascular Imaging</i> , 2019, 12, 2165-2167.	5.3	2
26	Cardiovascular magnetic resonance-guided right heart catheterization in a conventional CMR environment " predictors of procedure success and duration in pulmonary artery hypertension. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2019, 21, 57.	3.3	28
27	The cardiovascular phenotype of childhood hypertension: a cardiac magnetic resonance study. <i>Pediatric Radiology</i> , 2019, 49, 727-736.	2.0	7
28	Impact of predictive medicine on therapeutic decision making: a randomized controlled trial in congenital heart disease. <i>Npj Digital Medicine</i> , 2019, 2, 17.	10.9	5
29	The aorta after coarctation repair " effects of calibre and curvature on arterial haemodynamics. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2019, 21, 22.	3.3	16
30	Real-time cardiovascular MR with spatio-temporal artifact suppression using deep learning " proof of concept in congenital heart disease. <i>Magnetic Resonance in Medicine</i> , 2019, 81, 1143-1156.	3.0	146
31	Can Abbreviated Cardiac Magnetic Resonance Imaging Adequately Support Clinical Decision Making After Repair of Tetralogy of Fallot?. <i>Pediatric Cardiology</i> , 2019, 40, 616-622.	1.3	1
32	Cardiac Structural and Functional Consequences of Amyloid Deposition by Cardiac Magnetic Resonance and Echocardiography and Their Prognostic Roles. <i>JACC: Cardiovascular Imaging</i> , 2019, 12, 823-833.	5.3	113
33	<i>Pediatric and Congenital Heart Disease</i> . , 2018, , 385-397.		0
34	Real-time assessment of right and left ventricular volumes and function in children using high spatiotemporal resolution spiral bSSFP with compressed sensing. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2018, 20, 79.	3.3	46
35	Assessing the Causal Role of Body Mass Index on Cardiovascular Health in Young Adults. <i>Circulation</i> , 2018, 138, 2187-2201.	1.6	55
36	A comprehensive characterization of myocardial and vascular phenotype in pediatric chronic kidney disease using cardiovascular magnetic resonance imaging. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2018, 20, 24.	3.3	4

#	ARTICLE	IF	CITATIONS
37	Cardiac magnetic resonance assessment of central and peripheral vascular function in patients undergoing renal sympathetic denervation as predictor for blood pressure response. <i>Clinical Research in Cardiology</i> , 2018, 107, 945-955.	3.3	15
38	Overnight auto-adjusting continuous airway pressure+standard care compared with standard care alone in the prevention of morbidity in sickle cell disease phase II (POMS2b): study protocol for a randomised controlled trial. <i>Trials</i> , 2018, 19, 55.	1.6	17
39	Echocardiographic arterial measurements in complex congenital diseases before bidirectional Glenn: comparison with cardiovascular magnetic resonance imaging. <i>European Heart Journal Cardiovascular Imaging</i> , 2017, 18, jew069.	1.2	8
40	Aberrant developmental titin splicing and dysregulated sarcomere length in Thymosin Î²4 knockout mice. <i>Journal of Molecular and Cellular Cardiology</i> , 2017, 102, 94-107.	1.9	10
41	A randomized study of autologous bone marrow-derived stem cells in pediatric cardiomyopathy. <i>Journal of Heart and Lung Transplantation</i> , 2017, 36, 837-844.	0.6	6
42	Abnormal Wave Reflections and Left Ventricular Hypertrophy Late After Coarctation of the Aorta Repair. <i>Hypertension</i> , 2017, 69, 501-509.	2.7	69
43	An Unwelcome Embrace. <i>Circulation: Cardiovascular Imaging</i> , 2017, 10, .	2.6	0
44	Avoidable costs of stenting for aortic coarctation in the United Kingdom: an economic model. <i>BMC Health Services Research</i> , 2017, 17, 258.	2.2	1
45	Utility of Cardiovascular Magnetic Resonance-Derived Wave Intensity Analysis As a Marker of Ventricular Function in Children with Heart Failure and Normal Ejection Fraction. <i>Frontiers in Pediatrics</i> , 2017, 5, 65.	1.9	10
46	Reply to: "Letter to the editor: Comparing pace and speed in the pulmonary circulation". <i>American Journal of Physiology - Heart and Circulatory Physiology</i> , 2016, 310, H950-H950.	3.2	0
47	Rapid breath-hold assessment of myocardial velocities using spiral UNFOLDed SENSE tissue phase mapping. <i>Journal of Magnetic Resonance Imaging</i> , 2016, 44, 1003-1009.	3.4	2
48	Physiological adaptations to chronic stress in healthy humans " why might the sexes have evolved different energy utilisation strategies?. <i>Journal of Physiology</i> , 2016, 594, 4297-4307.	2.9	13
49	Cardiac MR and CT imaging in children with suspected or confirmed pulmonary hypertension/pulmonary hypertensive vascular disease. Expert consensus statement on the diagnosis and treatment of paediatric pulmonary hypertension. The European Paediatric Pulmonary Vascular Disease Network, endorsed by ISHLT and DGPK. <i>Heart</i> , 2016, 102, ii30-ii35.	2.9	39
50	Magnetic Resonance-Augmented Cardiopulmonary Exercise Testing. <i>Circulation: Cardiovascular Imaging</i> , 2016, 9, .	2.6	31
51	Executive summary. Expert consensus statement on the diagnosis and treatment of paediatric pulmonary hypertension. The European Paediatric Pulmonary Vascular Disease Network, endorsed by ISHLT and DGPK. <i>Heart</i> , 2016, 102, ii86-ii100.	2.9	89
52	MR-Augmented Cardiopulmonary Exercise Testing- a proof of concept in Sickle Cell Disease (SCD). <i>Journal of Cardiovascular Magnetic Resonance</i> , 2016, 18, O69.	3.3	1
53	Comprehensive cardiovascular assessment of children with chronic kidney disease using exercise cardiac magnetic resonance imaging. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2016, 18, P157.	3.3	0
54	Comprehensive assessment of the global and regional vascular responses to food ingestion in humans using novel rapid MRI. <i>American Journal of Physiology - Regulatory Integrative and Comparative Physiology</i> , 2016, 310, R541-R545.	1.8	16

#	ARTICLE	IF	CITATIONS
55	MRI as a tool for non-invasive vascular profiling: a pilot study in patients with aortic coarctation. Expert Review of Medical Devices, 2016, 13, 103-112.	2.8	8
56	Differential impact of local stiffening and narrowing on hemodynamics in repaired aortic coarctation: an FSI study. Medical and Biological Engineering and Computing, 2016, 54, 497-510.	2.8	21
57	Isometric stress in cardiovascular magnetic resonance—a simple and easily replicable method of assessing cardiovascular differences not apparent at rest. European Radiology, 2016, 26, 1009-1017.	4.5	10
58	Left ventricular diastolic dysfunction in pulmonary hypertension predicts functional capacity and clinical worsening: a tissue phase mapping study. Journal of Cardiovascular Magnetic Resonance, 2015, 17, 116.	3.3	38
59	Free breathing contrast-enhanced time-resolved magnetic resonance angiography in pediatric and adult congenital heart disease. Journal of Cardiovascular Magnetic Resonance, 2015, 17, 38.	3.3	21
60	Investigating the limitations of single breath-hold renal artery blood flow measurements using spiral phase contrast MR with Râ€R interval averaging. Journal of Magnetic Resonance Imaging, 2015, 41, 1143-1149.	3.4	6
61	Implementation of a generalized heterogeneous image reconstruction system for clinical magnetic resonance. Concurrency Computation Practice and Experience, 2015, 27, 1603-1611.	2.2	3
62	Assessment of cardiac time intervals using high temporal resolution real-time spiral phase contrast with UNFOLDEDâ€SENSE. Magnetic Resonance in Medicine, 2015, 73, 749-756.	3.0	11
63	Noninvasive pulmonary artery wave intensity analysis in pulmonary hypertension. American Journal of Physiology - Heart and Circulatory Physiology, 2015, 308, H1603-H1611.	3.2	60
64	Accuracy and Reproducibility of Right Ventricular Quantification in Patients with Pressure and Volume Overload Using Single-Beat Three-Dimensional Echocardiography. Journal of the American Society of Echocardiography, 2015, 28, 363-374.	2.8	53
65	Accuracy and Test-Retest Reproducibility of Two-Dimensional Knowledge-Based Volumetric Reconstruction of the Right Ventricle in Pulmonary Hypertension. Journal of the American Society of Echocardiography, 2015, 28, 989-998.	2.8	17
66	Fractal Analysis of Myocardial Trabeculations in 2547 Study Participants: Multi-Ethnic Study of Atherosclerosis. Radiology, 2015, 277, 707-715.	7.3	50
67	MR augmented cardiopulmonary exercise testing—a novel approach to assessing cardiovascular function. Physiological Measurement, 2015, 36, N85-N94.	2.1	21
68	Cardiac MR-derived indices are stronger predictors of resource use and risk than jugular venous pressure, in paediatric patients with functionally single ventricles, prior to completion of total cavopulmonary connection (TCPC). Journal of Cardiovascular Magnetic Resonance, 2015, 17, O56.	3.3	0
69	Free breathing contrast-enhanced time-resolved magnetic resonance angiography in congenital heart disease. Journal of Cardiovascular Magnetic Resonance, 2015, 17, O65.	3.3	0
70	Characterisation of anthracycline cardiotoxicity in long-term childhood cancer survivors using conventional and novel CMR techniques: probing the pathology. Journal of Cardiovascular Magnetic Resonance, 2015, 17, P260.	3.3	0
71	MR augmented cardiopulmonary exercise testing - a novel method of assessing cardiovascular function. Journal of Cardiovascular Magnetic Resonance, 2015, 17, Q2.	3.3	0
72	High throughput cardiac imaging in awake young children: Tips and Tricks. Journal of Cardiovascular Magnetic Resonance, 2015, 17, .	3.3	0

#	ARTICLE	IF	CITATIONS
73	Patient-specific computational models to support interventional procedures: a case study of complex aortic re-coarctation. <i>EuroIntervention</i> , 2015, 11, 669-672.	3.2	20
74	Coronary Magnetic Resonance Angiography in Heterotopic Heart Transplant Recipient. <i>Circulation</i> , 2014, 129, 1453-1455.	1.6	2
75	Development and validation of a novel method to derive central aortic systolic pressure from the MR aortic distension curve. <i>Journal of Magnetic Resonance Imaging</i> , 2014, 40, 1064-1070.	3.4	25
76	Real-Time Magnetic Resonance Assessment of Septal Curvature Accurately Tracks Acute Hemodynamic Changes in Pediatric Pulmonary Hypertension. <i>Circulation: Cardiovascular Imaging</i> , 2014, 7, 706-713.	2.6	40
77	Abnormal systolic and diastolic LV motion by novel tissue phase mapping accounts for functional capacity in pulmonary hypertension. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2014, 16, P253.	3.3	0
78	Novel magnetic resonance wave intensity analysis in pulmonary hypertension. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2014, 16, P252.	3.3	3
79	Tissue phase mapping using breath-hold 4D PCMR. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2014, 16, W30.	3.3	2
80	Real time magnetic resonance assessment of septal curvature accurately tracks acute hemodynamic changes in pediatric pulmonary hypertension. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2014, 16, O74.	3.3	0
81	Mechanisms of maintained exercise capacity in adults with repaired tetralogy of Fallot. <i>International Journal of Cardiology</i> , 2014, 177, 178-181.	1.7	17
82	Prediction of Sarcomere Mutations in Subclinical Hypertrophic Cardiomyopathy. <i>Circulation: Cardiovascular Imaging</i> , 2014, 7, 863-871.	2.6	80
83	Abnormal Cardiac Formation in Hypertrophic Cardiomyopathy. <i>Circulation: Cardiovascular Genetics</i> , 2014, 7, 241-248.	5.1	74
84	126â€¦Advanced Assessment of Cardiac Morphology and Prediction of Gene Carriage by CMR in Hypertrophic Cardiomyopathy - The HCMNET/UCL Collaboration. <i>Heart</i> , 2014, 100, A72-A73.	2.9	2
85	Self-navigated tissue phase mapping using a golden-angle spiral acquisitionâ€”proof of concept in patients with pulmonary hypertension. <i>Magnetic Resonance in Medicine</i> , 2014, 71, 145-155.	3.0	20
86	Implementation of a Heterogeneous Image Reconstruction System for Clinical Magnetic Resonance. <i>Lecture Notes in Computer Science</i> , 2014, , 469-479.	1.3	1
87	Myocardial velocity mapping for the right ventricle in pulmonary arterial hypertension using a novel image-based respiratory self-navigation from a golden-angle spiral acquisition. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2013, 15, P43.	3.3	0
88	P6.14 THE EFFECT OF TEMPORAL RESOLUTION ON MR ASSESSMENT OF PULSE WAVE VELOCITY. <i>Artery Research</i> , 2013, 7, 157.	0.6	3
89	Prognostic Significance of Cardiac Magnetic Resonance Imaging in Children With Pulmonary Hypertension. <i>Circulation: Cardiovascular Imaging</i> , 2013, 6, 407-414.	2.6	100
90	Detection and Grading of Coronary Allograft Vasculopathy in Children With Contrast-Enhanced Magnetic Resonance Imaging of the Coronary Vessel Wall. <i>Circulation: Cardiovascular Imaging</i> , 2013, 6, 91-98.	2.6	34

#	ARTICLE	IF	CITATIONS
91	Systemic to pulmonary collateral blood flow influences early outcomes following the total cavopulmonary connection. <i>Heart</i> , 2012, 98, 934-940.	2.9	59
92	Impact of reduction in right ventricular pressure and/or volume overload by percutaneous pulmonary valve implantation on biventricular response to exercise: an exercise stress real-time CMR study. <i>European Heart Journal</i> , 2012, 33, 2434-2441.	2.2	45
93	Impact of Pulmonary Valve Replacement in Tetralogy of Fallot With Pulmonary Regurgitation: A Comparison of Intervention and Nonintervention. <i>Annals of Thoracic Surgery</i> , 2012, 94, 1619-1626.	1.3	71
94	A non-invasive clinical application of wave intensity analysis based on ultrahigh temporal resolution phase-contrast cardiovascular magnetic resonance. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2012, 14, 65.	3.3	45
95	Adiposity Is Associated with Blunted Cardiovascular, Neuroendocrine and Cognitive Responses to Acute Mental Stress. <i>PLoS ONE</i> , 2012, 7, e39143.	2.5	59
96	Analysis of the septal curvature with CMR in the paediatric population with pulmonary hypertension is a useful tool. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2012, 14, .	3.3	1
97	Real-time flow with fast GPU reconstruction for continuous assessment of cardiac output. <i>Journal of Magnetic Resonance Imaging</i> , 2012, 36, 1477-1482.	3.4	21
98	High-resolution slice-selective Fourier velocity encoding in congenital heart disease using spiral SENSE with velocity unwrap. <i>Magnetic Resonance in Medicine</i> , 2012, 67, 1538-1546.	3.0	6
99	Long-term importance of right ventricular outflow tract patch function in patients with pulmonary regurgitation. <i>Journal of Thoracic and Cardiovascular Surgery</i> , 2012, 143, 1103-1107.	0.8	39
100	A Novel, Fast and Semi-Automatic Method to Implement Wave Intensity Analysis for Magnetic Resonance Imaging. , 2012, , .		0
101	Early Versus Late Functional Outcome After Successful Percutaneous Pulmonary Valve Implantation. <i>Journal of the American College of Cardiology</i> , 2011, 57, 724-731.	2.8	120
102	Evaluation of Techniques for the Quantification of Myocardial Scar of Differing Etiology Using Cardiac Magnetic Resonance. <i>JACC: Cardiovascular Imaging</i> , 2011, 4, 150-156.	5.3	514
103	389 Detection and Grading of Coronary Allograft Vasculopathy in Children Using Late Gadolinium Enhancement MRI. <i>Journal of Heart and Lung Transplantation</i> , 2011, 30, S133-S134.	0.6	1
104	Isometric exercise in cardiac magnetic resonance imaging: an initial experience using fast imaging. <i>Journal of Cardiovascular Magnetic Resonance</i> , 2011, 13, .	3.3	0
105	Automatic segmentation propagation of the aorta in real-time phase contrast MRI using nonrigid registration. <i>Journal of Magnetic Resonance Imaging</i> , 2011, 33, 232-238.	3.4	43
106	Detailed assessment of the hemodynamic response to psychosocial stress using real-time MRI. <i>Journal of Magnetic Resonance Imaging</i> , 2011, 33, 448-454.	3.4	28
107	Rapid Flow Assessment of Congenital Heart Disease with High-Spatiotemporal-Resolution Gated Spiral Phase-Contrast MR Imaging. <i>Radiology</i> , 2011, 260, 79-87.	7.3	49
108	Lessons from inter-stage cardiac magnetic resonance imaging in predicting survival for patients with hypoplastic left heart syndrome. <i>Cardiology in the Young</i> , 2011, 21, 646-653.	0.8	13
