| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 1  | The N2pc component as an indicator of attentional selectivity. <i>Electroencephalography and Clinical Neurophysiology</i> , 1996, 99, 225-234.  | 0.3 | 853       |
| 2  | Event-related brain potentials distinguish processing stages involved in face perception and recognition. <i>Clinical Neurophysiology</i> , 2000, 111, 694-705.   | 0.7 | 566       |
| 3  | An ERP study on the time course of emotional face processing. <i>NeuroReport</i> , 2002, 13, 427-431.   | 0.6 | 565       |
| 4  | Event-related brain potential correlates of emotional face processing. <i>Neuropsychologia</i> , 2007, 45, 15-31.   | 0.7 | 552       |
| 5  | On the relation between brain potentials and the awareness of voluntary movements. <i>Experimental Brain Research</i> , 1999, 126, 128-133.   | 0.7 | 529       |
| 6  | The face-specific N170 component reflects late stages in the structural encoding of faces. <i>NeuroReport</i> , 2000, 11, 2319-2324.  | 0.6 | 502       |
| 7  | Effects of attention and stimulus probability on ERPs in a Go/Nogo task. <i>Biological Psychology</i> , 1993, 35, 123-138.  | 1.1 | 427       |
| 8  | The processing of emotional facial expression is gated by spatial attention: evidence from event-related brain potentials. <i>Cognitive Brain Research</i> , 2003, 16, 174-184.   | 3.3 | 425       |
| 9  | Effects of masked stimuli on motor activation: Behavioral and electrophysiological evidence.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 1998, 24, 1737-1747.                        | 0.7 | 412       |
| 10 | The role of spatial attention in the processing of facial expression: An ERP study of rapid brain responses to six basic emotions. <i>Cognitive, Affective and Behavioral Neuroscience</i> , 2003, 3, 97-110.           | 1.0 | 390       |
| 11 | Effects of face inversion on the structural encoding and recognition of faces. <i>Cognitive Brain Research</i> , 2000, 10, 145-158.   | 3.3 | 386       |
| 12 | Involuntary Attentional Capture is Determined by Task Set: Evidence from Event-related Brain Potentials. <i>Journal of Cognitive Neuroscience</i> , 2008, 20, 1423-1433.  | 1.1 | 289       |
| 13 | Response facilitation and inhibition in subliminal priming. <i>Biological Psychology</i> , 2003, 64, 7-26.  | 1.1 | 283       |
| 14 | Cross-Modal Interactions between Audition, Touch, and Vision in Endogenous Spatial Attention: ERP Evidence on Preparatory States and Sensory Modulations. <i>Journal of Cognitive Neuroscience</i> , 2002, 14, 254-271. | 1.1 | 263       |
| 15 | The N2pc component and its links to attention shifts and spatially selective visual processing. <i>Psychophysiology</i> , 2008, 45, 240-249.  | 1.2 | 245       |
| 16 | The lateralized readiness potential as an on-line measure of central response activation processes. <i>Behavior Research Methods</i> , 1998, 30, 146-156.   | 1.3 | 228       |
| 17 | Reward Priority of Visual Target Singletons Modulates Event-Related Potential Signatures of Attentional Selection. <i>Psychological Science</i> , 2009, 20, 245-251.  | 1.8 | 217       |
| 18 | Does the face-specific N170 component reflect the activity of a specialized eye processor?. <i>NeuroReport</i> , 1998, 9, 2945-2948.  | 0.6 | 211       |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 19 | Tactile-Visual Links in Exogenous Spatial Attention under Different Postures: Convergent Evidence from Psychophysics and ERPs. <i>Journal of Cognitive Neuroscience</i> , 2001, 13, 462-478.                    | 1.1 | 200       |
| 20 | Links between conscious awareness and response inhibition: Evidence from masked priming. <i>Psychonomic Bulletin and Review</i> , 2002, 9, 514-520.   | 1.4 | 194       |
| 21 | The neural basis of attentional control in visual search. <i>Trends in Cognitive Sciences</i> , 2014, 18, 526-535.  | 4.0 | 194       |
| 22 | Stimulus-response compatibility and automatic response activation: Evidence from psychophysiological studies.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 1995, 21, 837-854. | 0.7 | 182       |
| 23 | Facilitatory and inhibitory effects of masked prime stimuli on motor activation and behavioural performance. <i>Acta Psychologica</i> , 1999, 101, 293-313.   | 0.7 | 173       |
| 24 | ERP effects of intermodal attention and cross-modal links in spatial attention. <i>Psychophysiology</i> , 1998, 35, 313-327.  | 1.2 | 169       |
| 25 | S-R compatibility and response selection. <i>Acta Psychologica</i> , 1995, 90, 301-313.   | 0.7 | 167       |
| 26 | Prosopagnosia and structural encoding of faces. <i>NeuroReport</i> , 1999, 10, 255-259.   | 0.6 | 160       |
| 27 | An event-related brain potential study of cross-modal links in spatial attention between vision and touch. <i>Psychophysiology</i> , 2000, 37, 697-705.   | 1.2 | 156       |
| 28 | Attentional capture by task-irrelevant fearful faces is revealed by the N2pc component. <i>Biological Psychology</i> , 2007, 74, 108-112.   | 1.1 | 155       |
| 29 | Modulations of early somatosensory ERP components by transient and sustained spatial attention. <i>Experimental Brain Research</i> , 2003, 151, 24-31.  | 0.7 | 154       |
| 30 | Crossmodal links in endogenous and exogenous spatial attention: evidence from event-related brain potential studies. <i>Neuroscience and Biobehavioral Reviews</i> , 2001, 25, 497-511.                         | 2.9 | 151       |
| 31 | Masked prime stimuli can bias free choices between response alternatives. <i>Psychonomic Bulletin and Review</i> , 2004, 11, 463-468.   | 1.4 | 148       |
| 32 | Spatial cueing, sensory gating and selective response preparation: an ERP study on visuo-spatial orienting. <i>Electroencephalography and Clinical Neurophysiology - Evoked Potentials</i> , 1993, 88, 408-420. | 2.0 | 145       |
| 33 | Motor activation with and without inhibition: Evidence for a threshold mechanism in motor control. <i>Perception &amp; Psychophysics</i> , 2002, 64, 148-162.   | 2.3 | 143       |
| 34 | ERPs reveal subliminal processing of fearful faces. <i>Psychophysiology</i> , 2008, 45, 318-326.  | 1.2 | 140       |
| 35 | Attentional Capture by Salient Distractors during Visual Search Is Determined by Temporal Task Demands. <i>Journal of Cognitive Neuroscience</i> , 2012, 24, 749-759.   | 1.1 | 137       |
| 36 | Attentional selection and identification of visual objects are reflected by distinct electrophysiological responses. <i>Experimental Brain Research</i> , 2007, 181, 531-536.                                   | 0.7 | 134       |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 37 | “Sensory gating” as a mechanism for visuospatial orienting: Electrophysiological evidence from trial-by-trial cuing experiments. <i>Perception &amp; Psychophysics</i> , 1994, 55, 667-675.             | 2.3 | 128       |
| 38 | An event-related brain potential study of explicit face recognition. <i>Neuropsychologia</i> , 2011, 49, 2736-2745.   | 0.7 | 125       |
| 39 | The N170 component and its links to configural face processing: A rapid neural adaptation study. <i>Brain Research</i> , 2011, 1376, 76-87.   | 1.1 | 121       |
| 40 | Crossmodal links in spatial attention are mediated by supramodal control processes: Evidence from event-related potentials. <i>Psychophysiology</i> , 2002, 39, 437-449.                                | 1.2 | 120       |
| 41 | Amygdala damage affects event-related potentials for fearful faces at specific time windows. <i>Human Brain Mapping</i> , 2010, 31, 1089-1105.  | 1.9 | 118       |
| 42 | Early posterior ERP components do not reflect the control of attentional shifts toward expected peripheral events. <i>Psychophysiology</i> , 2003, 40, 827-831.   | 1.2 | 115       |
| 43 | The role of spatial frequency information for ERP components sensitive to faces and emotional facial expression. <i>Cognitive Brain Research</i> , 2005, 25, 508-520.                                   | 3.3 | 113       |
| 44 | Response Profile of the Face-Sensitive N170 Component: A Rapid Adaptation Study. <i>Cerebral Cortex</i> , 2010, 20, 2442-2452.  | 1.6 | 113       |
| 45 | An ERP study on visual spatial priming with peripheral onsets. <i>Psychophysiology</i> , 1994, 31, 154-163.   | 1.2 | 112       |
| 46 | ATTENTIONAL MODULATIONS OF EVENT-RELATED BRAIN POTENTIALS SENSITIVE TO FACES. <i>Cognitive Neuropsychology</i> , 2000, 17, 103-116.   | 0.4 | 112       |
| 47 | Electrophysiological correlates of change detection. <i>Psychophysiology</i> , 2005, 42, 328-342.   | 1.2 | 112       |
| 48 | Tactile enhancement of auditory detection and perceived loudness. <i>Brain Research</i> , 2007, 1160, 58-68.  | 1.1 | 111       |
| 49 | Electrophysiological markers of visual dimension changes and response changes.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008, 34, 531-542.                        | 0.7 | 111       |
| 50 | Spatial Attention Can Be Allocated Rapidly and in Parallel to New Visual Objects. <i>Current Biology</i> , 2014, 24, 193-198.   | 1.8 | 111       |
| 51 | A central-peripheral asymmetry in masked priming. <i>Perception &amp; Psychophysics</i> , 2000, 62, 1367-1382.  | 2.3 | 108       |
| 52 | The roles of feature-specific task set and bottom-up salience in attentional capture: An ERP study.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2009, 35, 1316-1328. | 0.7 | 107       |
| 53 | Crossmodal links in spatial attention between vision, audition, and touch: evidence from event-related brain potentials. <i>Neuropsychologia</i> , 2001, 39, 1292-1303.                                 | 0.7 | 103       |
| 54 | Cross-modal links in endogenous spatial attention are mediated by common external locations: evidence from event-related brain potentials. <i>Experimental Brain Research</i> , 2001, 139, 398-411.     | 0.7 | 100       |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Covert manual response preparation triggers attentional shifts: ERP evidence for the premotor theory of attention. <i>Neuropsychologia</i> , 2005, 43, 957-966.   | 0.7 | 100       |
| 56 | Goal-driven attentional capture by invisible colors: Evidence from event-related potentials. <i>Psychonomic Bulletin and Review</i> , 2009, 16, 648-653.  | 1.4 | 97        |
| 57 | Influence of attentional demands on the processing of emotional facial expressions in the amygdala. <i>NeuroImage</i> , 2007, 38, 357-366.  | 2.1 | 95        |
| 58 | Rapid Detection of Emotion from Human Vocalizations. <i>Journal of Cognitive Neuroscience</i> , 2010, 22, 474-481.  | 1.1 | 93        |
| 59 | Cortico-Cortical Interactions in Spatial Attention: A Combined ERP/TMS Study. <i>Journal of Neurophysiology</i> , 2006, 95, 3277-3280.  | 0.9 | 92        |
| 60 | Explicit and implicit learning of event sequences: Evidence from event-related brain potentials.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 1996, 22, 970-987.                         | 0.7 | 91        |
| 61 | Attention modulates the processing of emotional expression triggered by foveal faces. <i>Neuroscience Letters</i> , 2006, 394, 48-52.   | 1.0 | 91        |
| 62 | Attentional capture by visual singletons is mediated by top-down task set: New evidence from the N2pc component. <i>Psychophysiology</i> , 2008, 45, 1013-1024.   | 1.2 | 86        |
| 63 | ERP modulations indicate the selective processing of visual stimuli as a result of transient and sustained spatial attention. <i>Psychophysiology</i> , 1996, 33, 13-21.  | 1.2 | 84        |
| 64 | Multisensory Integration: How Visual Experience Shapes Spatial Perception. <i>Current Biology</i> , 2004, 14, R115-R117.  | 1.8 | 83        |
| 65 | Functional Magnetic Resonance Imaging and Evoked Potential Correlates of Conscious and Unconscious Vision in Parietal Extinction Patients. <i>NeuroImage</i> , 2001, 14, S68-S75.                                       | 2.1 | 81        |
| 66 | The Face-Sensitive N170 Component of the Event-Related Brain Potential. , 2011, , .   |     | 81        |
| 67 | Active masks and active inhibition: A comment on Lleras and Enns (2004) and on Verleger, JaÅkowski, Aydemir, van der Lubbe, and Groen (2004).. <i>Journal of Experimental Psychology: General</i> , 2006, 135, 484-494. | 1.5 | 80        |
| 68 | Mechanisms of Visuospatial Attention: Evidence from Event-related Brain Potentials. <i>Visual Cognition</i> , 1998, 5, 257-286.   | 0.9 | 79        |
| 69 | The Face-Sensitivity of the N170 Component. <i>Frontiers in Human Neuroscience</i> , 2011, 5, 119.  | 1.0 | 78        |
| 70 | Dissociating local and global levels of perceptuo-motor control in masked priming.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2006, 32, 618-632.                                    | 0.7 | 77        |
| 71 | Rapid parallel attentional target selection in single-color and multiple-color visual search.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 86-101.                          | 0.7 | 75        |
| 72 | Electrophysiological markers of covert face recognition in developmental prosopagnosia. <i>Brain</i> , 2012, 135, 542-554.  | 3.7 | 72        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 73 | An electrophysiological measure of access to representations in visual working memory. <i>Psychophysiology</i> , 2010, 47, 197-200.  | 1.2 | 70        |
| 74 | Searching for Something Familiar or Novel: Top-down Attentional Selection of Specific Items or Object Categories. <i>Journal of Cognitive Neuroscience</i> , 2013, 25, 719-729.  | 1.1 | 70        |
| 75 | On the difference between working memory and attentional set. <i>Neuropsychologia</i> , 2011, 49, 1553-1558.   | 0.7 | 69        |
| 76 | Efficient Attentional Selection Predicts Distractor Devaluation: Event-related Potential Evidence for a Direct Link between Attention and Emotion. <i>Journal of Cognitive Neuroscience</i> , 2007, 19, 1316-1322.                   | 1.1 | 68        |
| 77 | Top-down search strategies determine attentional capture in visual search: Behavioral and electrophysiological evidence. <i>Attention, Perception, and Psychophysics</i> , 2010, 72, 951-962.  | 0.7 | 67        |
| 78 | Anterior and posterior attentional control systems use different spatial reference frames: ERP evidence from covert tactile-spatial orienting. <i>Psychophysiology</i> , 2003, 40, 924-933.  | 1.2 | 66        |
| 79 | Combining TMS and EEG to study cognitive function and cortico-cortico interactions. <i>Behavioural Brain Research</i> , 2008, 191, 141-147.  | 1.2 | 66        |
| 80 | Visuotactile Learning and Body Representation: An ERP Study with Rubber Hands and Rubber Objects. <i>Journal of Cognitive Neuroscience</i> , 2008, 20, 312-323.  | 1.1 | 66        |
| 81 | The neural signature of phosphene perception. <i>Human Brain Mapping</i> , 2010, 31, 1408-1417.  | 1.9 | 66        |
| 82 | Multisensory enhancement of attentional capture in visual search. <i>Psychonomic Bulletin and Review</i> , 2011, 18, 904-909.  | 1.4 | 66        |
| 83 | Manual response preparation and saccade programming are linked to attention shifts: ERP evidence for covert attentional orienting and spatially specific modulations of visual processing. <i>Brain Research</i> , 2006, 1105, 7-19. | 1.1 | 65        |
| 84 | Effects of hand posture on preparatory control processes and sensory modulations in tactile-spatial attention. <i>Clinical Neurophysiology</i> , 2004, 115, 596-608.   | 0.7 | 64        |
| 85 | Item and category-based attentional control during search for real-world objects: Can you find the pants among the pans?. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 1283-1288.         | 0.7 | 64        |
| 86 | A neural network model of inhibitory processes in subliminal priming. <i>Visual Cognition</i> , 2006, 13, 401-480.   | 0.9 | 63        |
| 87 | Rapid guidance of visual search by object categories.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 50-60.  | 0.7 | 62        |
| 88 | EPS Mid-Career Award 2014. <i>Quarterly Journal of Experimental Psychology</i> , 2015, 68, 2437-2463.  | 0.6 | 60        |
| 89 | The attentional selection of spatial and non-spatial attributes in touch: ERP evidence for parallel and independent processes. <i>Biological Psychology</i> , 2004, 66, 1-20.  | 1.1 | 58        |
| 90 | Locus of Inhibition in the Masked Priming of Response Alternatives. <i>Journal of Motor Behavior</i> , 2002, 34, 3-10.   | 0.5 | 57        |

| #   | ARTICLE   | IF  | CITATIONS |
|-----|---|-----|-----------|
| 91  | Shifts of attention in light and in darkness: an ERP study of supramodal attentional control and crossmodal links in spatial attention. <i>Cognitive Brain Research</i> , 2003, 15, 308-323.                      | 3.3 | 57        |
| 92  | The face-sensitive N170 component in developmental prosopagnosia. <i>Neuropsychologia</i> , 2012, 50, 3588-3599.  | 0.7 | 57        |
| 93  | Priming of pop-out modulates attentional target selection in visual search: Behavioural and electrophysiological evidence. <i>Vision Research</i> , 2010, 50, 1353-1361.  | 0.7 | 56        |
| 94  | Can attention be directed to opposite locations in different modalities? An ERP study. <i>Clinical Neurophysiology</i> , 1999, 110, 1252-1259.  | 0.7 | 55        |
| 95  | The spatial distribution of attentional selectivity in touch: evidence from somatosensory ERP components. <i>Clinical Neurophysiology</i> , 2003, 114, 1298-1306.   | 0.7 | 55        |
| 96  | Electrophysiological Evidence for a Sensory Recruitment Model of Somatosensory Working Memory. <i>Cerebral Cortex</i> , 2015, 25, 4697-4703.  | 1.6 | 52        |
| 97  | Chunking processes in the learning of event sequences: Electrophysiological indicators. <i>Memory and Cognition</i> , 2000, 28, 821-831.  | 0.9 | 51        |
| 98  | Covert attention in touch: Behavioral and ERP evidence for costs and benefits. <i>Psychophysiology</i> , 2005, 42, 171-179.   | 1.2 | 51        |
| 99  | Temporal dynamics of lateralized ERP components elicited during endogenous attentional shifts to relevant tactile events. <i>Psychophysiology</i> , 2002, 39, 874-878.  | 1.2 | 50        |
| 100 | The initial stage of visual selection is controlled by top-down task set: new ERP evidence. <i>Attention, Perception, and Psychophysics</i> , 2011, 73, 113-122.  | 0.7 | 49        |
| 101 | Event-related potential correlates of transient attention shifts to color and location. <i>Biological Psychology</i> , 1995, 41, 167-182.   | 1.1 | 48        |
| 102 | Response inhibition is linked to emotional devaluation: Behavioural and electrophysiological evidence. <i>Frontiers in Human Neuroscience</i> , 2008, 2, 13.  | 1.0 | 48        |
| 103 | ERP correlates of shared control mechanisms involved in saccade preparation and in covert attention. <i>Brain Research</i> , 2007, 1135, 154-166.   | 1.1 | 47        |
| 104 | Multivariate EEG analyses support high-resolution tracking of feature-based attentional selection. <i>Scientific Reports</i> , 2017, 7, 1886.   | 1.6 | 47        |
| 105 | All set, indeed! N2pc components reveal simultaneous attentional control settings for multiple target colors.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2016, 42, 1215-1230. | 0.7 | 47        |
| 106 | Response Facilitation and Inhibition in Manual, Vocal, and Oculomotor Performance: Evidence for a Modality-Unspecific Mechanism. <i>Journal of Motor Behavior</i> , 2001, 33, 16-26.                              | 0.5 | 46        |
| 107 | Top-down task sets for combined features: Behavioral and electrophysiological evidence for two stages in attentional object selection. <i>Attention, Perception, and Psychophysics</i> , 2013, 75, 216-228.       | 0.7 | 45        |
