#	ARTICLE	IF	CITATIONS
1	Emulation, imitation, over-imitation and the scope of culture for child and chimpanzee. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2009, 364, 2417-2428.	4.0	557
2	Chimpanzees copy dominant and knowledgeable individuals: implications for cultural diversity. <i>Evolution and Human Behavior</i> , 2015, 36, 65-72.	2.2	217
3	Experimental studies of traditions and underlying transmission processes in chimpanzees. <i>Animal Behaviour</i> , 2007, 73, 1021-1032.	1.9	192
4	Chimpanzees' socially maintained food preferences indicate both conservatism and conformity. <i>Animal Behaviour</i> , 2011, 81, 1195-1202.	1.9	114
5	Observational learning in chimpanzees and children studied through "ghost" conditions. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2008, 275, 835-840.	2.6	112
6	Social networks in primates: smart and tolerant species have more efficient networks. <i>Scientific Reports</i> , 2014, 4, 7600.	3.3	102
7	Observational learning of tool use in children: Investigating cultural spread through diffusion chains and learning mechanisms through ghost displays. <i>Journal of Experimental Child Psychology</i> , 2010, 106, 82-97.	1.4	90
8	Developing a comprehensive and comparative questionnaire for measuring personality in chimpanzees using a simultaneous top-down/bottom-up design. <i>American Journal of Primatology</i> , 2013, 75, 1042-1053.	1.7	85
9	Establishing an infrastructure for collaboration in primate cognition research. <i>PLoS ONE</i> , 2019, 14, e0223675.	2.5	79
10	"Ghost" experiments and the dissection of social learning in humans and animals. <i>Biological Reviews</i> , 2010, 85, 685-701.	10.4	78
11	Selective and contagious prosocial resource donation in capuchin monkeys, chimpanzees and humans. <i>Scientific Reports</i> , 2015, 5, 7631.	3.3	59
12	The effect of captivity on the primate gut microbiome varies with host dietary niche. <i>American Journal of Primatology</i> , 2019, 81, e23061.	1.7	56
13	The zone of latent solutions and its relevance to understanding ape cultures. <i>Biology and Philosophy</i> , 2020, 35, 55.	1.4	55
14	Influence of personality, age, sex, and estrous state on chimpanzee problem-solving success. <i>Animal Cognition</i> , 2014, 17, 835-847.	1.8	54
15	Studying primate cognition in a social setting to improve validity and welfare: a literature review highlighting successful approaches. <i>PeerJ</i> , 2017, 5, e3649.	2.0	54
16	Psychological limits on animal innovation. <i>Animal Behaviour</i> , 2014, 92, 325-332.	1.9	52
17	Cognitive research in zoos. <i>Current Opinion in Behavioral Sciences</i> , 2017, 16, 100-110.	3.9	50
18	Personality influences responses to inequity and contrast in chimpanzees. <i>Animal Behaviour</i> , 2015, 101, 75-87.	1.9	47

#	ARTICLE	IF	CITATIONS
19	End state copying by humans ( <i>Homo sapiens</i> ): Implications for a comparative perspective on cumulative culture.. <i>Journal of Comparative Psychology</i> (Washington, D C: 1983), 2012, 126, 161-169.	0.5	46
20	The importance of witnessed agency in chimpanzee social learning of tool use. <i>Behavioural Processes</i> , 2015, 112, 120-129.	1.1	41
21	Reconsidering coprophagy as an indicator of negative welfare for captive chimpanzees. <i>Applied Animal Behaviour Science</i> , 2016, 176, 112-119.	1.9	39
22	Social comparison mediates chimpanzees'™ responses to loss, not frustration. <i>Animal Cognition</i> , 2014, 17, 1303-1311.	1.8	36
23	Asymmetries in the production of self-directed behavior by chimpanzees and gorillas during a computerized cognitive test. <i>Animal Cognition</i> , 2016, 19, 343-350.	1.8	36
24	Evaluating mood changes in response to anthropogenic noise with a response-slowing task in three species of zoo-housed primates. <i>Animal Behavior and Cognition</i> , 2018, 5, 209-221.	1.0	34
25	Behavioral research as physical enrichment for captive chimpanzees. <i>Zoo Biology</i> , 2016, 35, 293-297.	1.2	32
26	Captive chimpanzee foraging in a social setting: a test of problem solving, flexibility, and spatial discounting. <i>PeerJ</i> , 2015, 3, e833.	2.0	32
27	The application of noninvasive, restraint-free eye-tracking methods for use with nonhuman primates. <i>Behavior Research Methods</i> , 2021, 53, 1003-1030.	4.0	28
28	Different Responses to Reward Comparisons by Three Primate Species. <i>PLoS ONE</i> , 2013, 8, e76297.	2.5	28
29	Social Models Enhance Apes'™ Memory for Novel Events. <i>Scientific Reports</i> , 2017, 7, 40926.	3.3	27
30	Evaluating the Behavior and Temperament of African Penguins in a Non-Contact Animal Encounter Program. <i>Animals</i> , 2019, 9, 326.	2.3	27
31	Testing differential use of payoff-biased social learning strategies in children and chimpanzees. <i>Proceedings of the Royal Society B: Biological Sciences</i> , 2017, 284, 20171751.	2.6	26
32	Chimpanzees demonstrate individual differences in social information use. <i>Animal Cognition</i> , 2018, 21, 639-650.	1.8	24
33	An Evaluation of the Efficacy of Video Displays for Use With Chimpanzees (<i><sc>P</sc></i> Tj ETQq1 1 0.784314 rgBT /Qyerlock 10	1.7	22
34	An assessment of touchscreens for testing primate food preferences and valuations. <i>Behavior Research Methods</i> , 2019, 51, 639-650.	4.0	22
35	When given the opportunity, chimpanzees maximize personal gain rather than "level the playing field". <i>PeerJ</i> , 2013, 1, e165.	2.0	19
36	The interplay between individual, social, and environmental influences on chimpanzee food choices. <i>Behavioural Processes</i> , 2014, 105, 71-78.	1.1	17

#	ARTICLE	IF	CITATIONS
37	Using a Touchscreen Paradigm to Evaluate Food Preferences and Response to Novel Photographic Stimuli of Food in Three Primate Species (Gorilla gorilla gorilla, Pan troglodytes, and Macaca Tj ETQq1 1 0.784314 igBT /Overlock 10 TF	1.2	14
38	A multi-institutional assessment of a short-form personality questionnaire for use with macaques. Zoo Biology, 2018, 37, 281-289.	1.2	14
39	A Comparative Perspective on Three Primate Species'™ Responses to a Pictorial Emotional Stroop Task. Animals, 2021, 11, 588.	2.3	14
40	Chimpanzees create and modify probe tools functionally: A study with zoo-housed chimpanzees. American Journal of Primatology, 2015, 77, 162-170.	1.7	12
41	Differential preference for ultraviolet light among captive birds from three ecological habitats. Applied Animal Behaviour Science, 2013, 147, 278-285.	1.9	11
42	Assessing the potential impact of zoo visitors on the welfare and cognitive performance of Japanese macaques. Applied Animal Behaviour Science, 2021, 243, 105453.	1.9	11
43	Understanding the Behavior of Sanctuary-Housed Chimpanzees During Public Programs. Anthrozoos, 2020, 33, 481-495.	1.4	9
44	Within- and between-species variation in the responses of three primate species to a touchscreen gambling task. Learning and Motivation, 2020, 71, 101635.	1.2	9
45	An evaluation of video cameras for collecting observational data on sanctuary-housed chimpanzees ( <i>Pan troglodytes</i> ). Zoo Biology, 2018, 37, 156-161.	1.2	8
46	Leveraging Social Learning to Enhance Captive Animal Care and Welfare. Journal of Zoological and Botanical Gardens, 2021, 2, 21-40.	1.8	8
47	Nonhuman primate abnormal behavior: Etiology, assessment, and treatment. American Journal of Primatology, 2022, 84, e23380.	1.7	8
48	Do zoo visitors induce attentional bias effects in primates completing cognitive tasks?. Animal Cognition, 2021, 24, 645-653.	1.8	7
49	Hardly habitual: chimpanzees and gorillas show flexibility in their motor responses when presented with a causally-clear task. PeerJ, 2019, 7, e6195.	2.0	7
50	Testing the weekend effect hypothesis: Time of day and lunar phase better predict the timing of births in laboratory-housed primates than day of week. American Journal of Primatology, 2019, 81, e23026.	1.7	6
51	Primates' Food Preferences Predict Their Food Choices Even Under Uncertain Conditions. Animal Behavior and Cognition, 2021, 8, 69-96.	1.0	6
52	An evaluation of thermal imaging as a welfare monitoring tool for captive chimpanzees. Primates, 2021, 62, 919-927.	1.1	6
53	Familiarity mediates apes' attentional biases toward human faces. Proceedings of the Royal Society B: Biological Sciences, 2022, 289, 20212599.	2.6	6
54	Food Cleaning by Japanese Macaques: Innate, Innovative or Cultural?. Folia Primatologica, 2020, 91, 433-444.	0.7	5

#	ARTICLE	IF	CITATIONS
55	A Comparison of Sequential Learning Errors Made by Apes and Monkeys Reveals Individual but not Species Differences in Learning. <i>International Journal of Comparative Psychology</i> , 0, 32, .	0.3	5
56	The Next Direction for Primatology? A Commentary on Setchell (2013). <i>International Journal of Primatology</i> , 2014, 35, 341-348.	1.9	4
57	User innovation: a novel framework for studying animal innovation within a comparative context. <i>Animal Cognition</i> , 2019, 22, 1185-1190.	1.8	4
58	A unique zooâ€sanctuary collaboration for chimpanzees. <i>American Journal of Primatology</i> , 2019, 81, e22941.	1.7	4
59	Problem solving flexibility across early development. <i>Journal of Experimental Child Psychology</i> , 2020, 200, 104966.	1.4	4
60	Primatology in zoos: Studying behavior, cognition, and welfare. <i>American Journal of Primatology</i> , 2022, 84, e23385.	1.7	4
61	Foraging in a social setting: a comparative analysis of captive gorillas and chimpanzees. <i>Primates</i> , 2019, 60, 125-131.	1.1	3
62	The relationship between personality, season, and wounding receipt in zooâ€housed Japanese macaques ( <i>J. Ethology</i> , 2000, 10, 1-3). <i>Overlook</i>	1.7	3
63	Celebrating the continued importance of â€Machiavellian Intelligenceâ€30 years on.. <i>Journal of Comparative Psychology</i> (Washington, D C: 1983), 2018, 132, 427-431.	0.5	2
64	Assessing chimpanzeesâ€™ fluency of movement: Applications for monitoring health and welfare. <i>Applied Animal Behaviour Science</i> , 2022, 250, 105612.	1.9	2
65	What Did You Get? What Social Learning, Collaboration, Prosocial Behaviour, and Inequity Aversion Tell Us About Primate Social Cognition. <i>Interdisciplinary Evolution Research</i> , 2018, , 13-26.	0.3	0
66	Editor-in-Chief introduction and welcome. <i>Animal Behavior and Cognition</i> , 2022, 9, 1-2.	1.0	0
