D M HESSIED

#	Article	IF	CITATIONS
1	Toward a more comprehensive understanding of the emotional side of type 2 diabetes: A re-envisioning of the assessment of diabetes distress. Journal of Diabetes and Its Complications, 2022, 36, 108103.	2.3	17
2	Association of 2 Social Needs Interventions With Child Emergency Department Use and Hospitalizations. JAMA Pediatrics, 2022, 176, 716.	6.2	5
3	Cross-Sectional Associations: Social Risks and Diabetes Care Quality, Outcomes. American Journal of Preventive Medicine, 2022, 63, 392-402.	3.0	4
4	A new perspective on diabetes distress using the type 2 diabetes distress assessment system (T2-DDAS): Prevalence and change over time. Journal of Diabetes and Its Complications, 2022, 36, 108256.	2.3	11
5	Development and validation of a scale to measure diabetes burnout. Journal of Clinical and Translational Endocrinology, 2021, 23, 100251.	1.4	7
6	Development of the Person-Centered Contraceptive Counseling scale (PCCC), a short form of the Interpersonal Quality of Family Planning care scale. Contraception, 2021, 103, 310-315.	1.5	52
7	Examining Variations in Action Plan Quality Among Adults With Type 2 Diabetes in Primary Care. Journal of the American Board of Family Medicine, 2021, 34, 608-617.	1.5	1
8	Salivary cytokine cluster moderates the association between caregivers perceived stress and emotional functioning in youth. Brain, Behavior, and Immunity, 2021, 94, 125-137.	4.1	6
9	Reductions in Management Distress Following a Randomized Distress Intervention Are Associated With Improved Diabetes Behavioral and Glycemic Outcomes Over Time. Diabetes Care, 2021, 44, 1472-1479.	8.6	7
10	The Value of Measuring Diabetes Burnout. Current Diabetes Reports, 2021, 21, 25.	4.2	9
11	Cross-national comparison of psychosocial well-being and diabetes outcomes in adults with type 1 diabetes during the COVID-19 pandemic in US, Brazil, and Iran. Diabetology and Metabolic Syndrome, 2021, 13, 63.	2.7	14
12	ONBOARD: A Feasibility Study of a Telehealth-Based Continuous Glucose Monitoring Adoption Intervention for Adults with Type 1 Diabetes. Diabetes Technology and Therapeutics, 2021, 23, 818-827.	4.4	7
13	Applying Lessons From Behavioral Health Integration to Social Care Integration in Primary Care. Annals of Family Medicine, 2021, 19, 356-361.	1.9	4
14	Using Electronic Health Record–Based Clinical Decision Support to Provide Social Risk–Informed Care in Community Health Centers: Protocol for the Design and Assessment of a Clinical Decision Support Tool. JMIR Research Protocols, 2021, 10, e31733.	1.0	8
15	Perceived Benefits, Barriers, and Facilitators of a Digital Patient-Reported Outcomes Tool for Routine Diabetes Care: Protocol for a National, Multicenter, Mixed Methods Implementation Study. JMIR Research Protocols, 2021, 10, e28391.	1.0	4
16	Help when you need it: Perspectives of adults with T1D on the support and training they would have wanted when starting CGM. Diabetes Research and Clinical Practice, 2021, 180, 109048.	2.8	7
17	Identifying Relative Changes in Social Risk Factors. Medical Care, 2021, 59, e9-e15.	2.4	7
18	Descriptions of diabetes burnout from individuals with Type 1 diabetes: an analysis of YouTube videos. Diabetic Medicine, 2020, 37, 1344-1351.	2.3	24

#	Article	IF	CITATIONS
19	There is value in treating elevated levels of diabetes distress: the clinical impact of targeted interventions in adults with Type 1 diabetes. Diabetic Medicine, 2020, 37, 71-74.	2.3	12
20	The early impact of the COVID-19 pandemic on adults with type 1 or type 2 diabetes: A national cohort study. Journal of Diabetes and Its Complications, 2020, 34, 107748.	2.3	77
21	New insights into diabetes burnout and its distinction from diabetes distress and depressive symptoms: A qualitative study. Diabetes Research and Clinical Practice, 2020, 169, 108446.	2.8	14
22	Pediatrics adverse childhood experiences and related life events screener (PEARLS) and health in a safety-net practice. Child Abuse and Neglect, 2020, 108, 104685.	2.6	47
23	Effects of In-Person Assistance vs Personalized Written Resources About Social Services on Household Social Risks and Child and Caregiver Health. JAMA Network Open, 2020, 3, e200701.	5.9	59
24	Assessment of Social Risk Factors and Interest in Receiving Health Care–Based Social Assistance Among Adult Patients and Adult Caregivers of Pediatric Patients. JAMA Network Open, 2020, 3, e2021201.	5.9	49
25	Effects of In-Person Navigation to Address Family Social Needs on Child Health Care Utilization. JAMA Network Open, 2020, 3, e206445.	5.9	55
26	Worries and concerns about hypoglycemia in adults with type 1 diabetes: An examination of the reliability and validity of the Hypoglycemic Attitudes and Behavior Scale (HABS). Journal of Diabetes and Its Complications, 2020, 34, 107606.	2.3	8
27	Lay Health Coaching to Increase Appropriate Inhaler Use in COPD: A Randomized Controlled Trial. Annals of Family Medicine, 2020, 18, 5-14.	1.9	14
28	Burnout, distress, and depressive symptoms in adults with type 1 diabetes. Journal of Diabetes and Its Complications, 2020, 34, 107608.	2.3	17
29	A Systematic Approach to Working With Medical Learners in Difficulty: A Faculty Development Workshop. MedEdPORTAL: the Journal of Teaching and Learning Resources, 2020, 16, 10872.	1.2	2
30	Can the Routine Use of Patient-Reported Outcome Measures Improve the Delivery of Person-Centered Diabetes Care? A Review of Recent Developments and a Case Study. Current Diabetes Reports, 2019, 19, 84.	4.2	48
31	Self-management support for chronic disease in primary care: frequency of patient self-management problems and patient reported priorities, and alignment with ultimate behavior goal selection. BMC Family Practice, 2019, 20, 120.	2.9	17
32	Economic costs of implementing group interventions to reduce diabetes distress in adults with type 1 diabetes mellitus in the T1-REDEEM trial. Journal of Diabetes and Its Complications, 2019, 33, 107416.	2.3	3
33	Physician Burnout and Higher Clinic Capacity to Address Patients' Social Needs. Journal of the American Board of Family Medicine, 2019, 32, 69-78.	1.5	61
34	Development and Validation of the Clientâ€Reported Quality of Contraceptive Counseling Scale to Measure Quality and Fulfillment of Rights in Family Planning Programs. Studies in Family Planning, 2019, 50, 137-158.	1.8	29
35	Addressing diabetes distress in clinical care: a practical guide. Diabetic Medicine, 2019, 36, 803-812.	2.3	124
36	Bringing Social Context into Diabetes Care: Intervening on Social Risks versus Providing Contextualized Care. Current Diabetes Reports, 2019, 19, 30.	4.2	41

#	Article	IF	CITATIONS
37	Toward effective interventions to reduce diabetes distress among adults with type 1 diabetes: Enhancing Emotion regulation and cognitive skills. Patient Education and Counseling, 2019, 102, 1499-1505.	2.2	10
38	Part I: A Quantitative Study of Social Risk Screening Acceptability in Patients and Caregivers. American Journal of Preventive Medicine, 2019, 57, S25-S37.	3.0	106
39	Part II: A Qualitative Study of Social Risk Screening Acceptability in Patients and Caregivers. American Journal of Preventive Medicine, 2019, 57, S38-S46.	3.0	139
40	CE: Original Research: Experiences of Diabetes Burnout: A Qualitative Study Among People with Type 1 Diabetes. American Journal of Nursing, 2019, 119, 22-31.	0.4	14
41	Two for one? Effects of a couples intervention on partners of persons with Type 2 diabetes: a randomized controlled trial. Diabetic Medicine, 2019, 36, 473-481.	2.3	20
42	The impact of non-severe hypoglycemia on quality of life in patients with type 2 diabetes. Journal of Diabetes and Its Complications, 2018, 32, 373-378.	2.3	24
43	Emotion regulation contributes to the development of diabetes distress among adults with type 1 diabetes. Patient Education and Counseling, 2018, 101, 124-131.	2.2	31
44	Development of a patient-reported measure of the interpersonal quality of family planning care. Contraception, 2018, 97, 34-40.	1.5	58
45	Are acute care settings amenable to addressing patient social needs: A sub-group analysis. American Journal of Emergency Medicine, 2018, 36, 2108-2109.	1.6	8
46	Development and implementation of a pediatric adverse childhood experiences (ACEs) and other determinants of health questionnaire in the pediatric medical home: A pilot study. PLoS ONE, 2018, 13, e0208088.	2.5	92
47	T1-REDEEM: A Randomized Controlled Trial to Reduce Diabetes Distress Among Adults With Type 1 Diabetes. Diabetes Care, 2018, 41, 1862-1869.	8.6	63
48	Higher Perceived Clinic Capacity to Address Patients' Social Needs Associated with Lower Burnout in Primary Care Providers. Journal of Health Care for the Poor and Underserved, 2018, 29, 415-429.	0.8	47
49	A practical framework for encouraging and supporting positive behaviour change in diabetes. Diabetic Medicine, 2017, 34, 1658-1666.	2.3	45
50	Diabetes distress is linked with worsening diabetes management over time in adults with Type 1 diabetes. Diabetic Medicine, 2017, 34, 1228-1234.	2.3	99
51	The Impact of Continuous Glucose Monitoring on Markers of Quality of Life in Adults With Type 1 Diabetes: Further Findings From the DIAMOND Randomized Clinical Trial. Diabetes Care, 2017, 40, 736-741.	8.6	205
52	Investigating Hypoglycemic Confidence in Type 1 and Type 2 Diabetes. Diabetes Technology and Therapeutics, 2017, 19, 131-136.	4.4	68
53	Evaluating the Accountable Health Communities Demonstration Project. Journal of General Internal Medicine, 2017, 32, 345-349.	2.6	39
54	Impact of an Automated Bihormonal Delivery System on Psychosocial Outcomes in Adults with Type 1 Diabetes. Diabetes Technology and Therapeutics, 2017, 19, 723-729.	4.4	13

#	Article	IF	CITATIONS
55	Health coaching to improve self-management and quality of life for low income patients with chronic obstructive pulmonary disease (COPD): protocol for a randomized controlled trial. BMC Pulmonary Medicine, 2017, 17, 90.	2.0	15
56	Psychosocial Impact of the Bionic Pancreas During Summer Camp. Journal of Diabetes Science and Technology, 2016, 10, 840-844.	2.2	39
57	Effects of Social Needs Screening and In-Person Service Navigation on Child Health. JAMA Pediatrics, 2016, 170, e162521.	6.2	284
58	Prevalence of depression in Type 1 diabetes and the problem of overâ€diagnosis. Diabetic Medicine, 2016, 33, 1590-1597.	2.3	74
59	Diabetes distress in adults with type 1 diabetes: Prevalence, incidence and change over time. Journal of Diabetes and Its Complications, 2016, 30, 1123-1128.	2.3	126
60	Stress and A1c Among People with Diabetes Across the Lifespan. Current Diabetes Reports, 2016, 16, 67.	4.2	90
61	Understanding the Areas and Correlates of Diabetes-Related Distress in Parents of Teens With Type 1 Diabetes. Journal of Pediatric Psychology, 2016, 41, 750-758.	2.1	49
62	Effective interventions for reducing diabetes distress: systematic review and meta-analysis. International Diabetes Nursing, 2015, 12, 40-55.	0.1	104
63	Panel management, team culture, and worklife experience Families, Systems and Health, 2015, 33, 231-241.	0.6	9
64	High rates of elevated diabetes distress in research populations: A systematic review and meta-analysis. International Diabetes Nursing, 2015, 12, 93-107.	0.1	22
65	Are Low-Income Peer Health Coaches Able to Master and Utilize Evidence-Based Health Coaching?. Annals of Family Medicine, 2015, 13, S36-S41.	1.9	11
66	The Impact of Health Coaching on Medication Adherence in Patients With Poorly Controlled Diabetes, Hypertension, and/or Hyperlipidemia: A Randomized Controlled Trial. Journal of the American Board of Family Medicine, 2015, 28, 38-45.	1.5	52
67	Health Coaching by Medical Assistants to Improve Control of Diabetes, Hypertension, and Hyperlipidemia in Low-Income Patients: A Randomized Controlled Trial. Annals of Family Medicine, 2015, 13, 130-138.	1.9	118
68	Causal and bidirectional linkages over time between depression and diabetes regimen distress in adults with type 2 diabetes. Diabetes Research and Clinical Practice, 2015, 108, 360-366.	2.8	21
69	Identifying the worries and concerns about hypoglycemia in adults with type 2 diabetes. Journal of Diabetes and Its Complications, 2015, 29, 1171-1176.	2.3	57
70	Reductions in Regimen Distress Are Associated With Improved Management and Glycemic Control Over Time. Diabetes Care, 2014, 37, 617-624.	8.6	81
71	Does health coaching change patients' trust in their primary care provider?. Patient Education and Counseling, 2014, 96, 135-138.	2.2	49
72	Minimal intervention needed for change: definition, use, and value for improving health and health research. Translational Behavioral Medicine, 2014, 4, 26-33.	2.4	75

#	Article	IF	CITATIONS
73	Impact of baseline patient characteristics on interventions to reduce diabetes distress: the role of personal conscientiousness and diabetes selfâ€efficacy. Diabetic Medicine, 2014, 31, 739-746.	2.3	34
74	What Are the Quality of Life-Related Benefits and Losses Associated with Real-Time Continuous Glucose Monitoring? A Survey of Current Users. Diabetes Technology and Therapeutics, 2013, 15, 295-301.	4.4	90
75	REDEEM: A Pragmatic Trial to Reduce Diabetes Distress. Diabetes Care, 2013, 36, 2551-2558.	8.6	206
76	When Is Diabetes Distress Clinically Meaningful?. Diabetes Care, 2012, 35, 259-264.	8.6	461
77	AASAP: A program to increase recruitment and retention in clinical trials. Patient Education and Counseling, 2012, 86, 372-377.	2.2	43
78	Diabetes Distress but Not Clinical Depression or Depressive Symptoms Is Associated With Glycemic Control in Both Cross-Sectional and Longitudinal Analyses. Diabetes Care, 2010, 33, 23-28.	8.6	523
79	Predicting diabetes distress in patients with Type 2 diabetes: a longitudinal study. Diabetic Medicine, 2009, 26, 622-627.	2.3	178
