#	ARTICLE	IF	CITATIONS
1	Does hedonic hunger predict eating behavior and body mass in adolescents with overweight or obesity?. <i>Children's Health Care</i> , 2022, 51, 184-198.	0.9	2
2	Neural mechanisms that promote food consumption following sleep loss and social stress: an fMRI study in adolescent girls with overweight/obesity. <i>Sleep</i> , 2022, 45, .	1.1	5
3	Does inhibitory control training reduce weight and caloric intake in adults with overweight and obesity? A pre-registered, randomized controlled event-related potential (ERP) study. <i>Behaviour Research and Therapy</i> , 2021, 136, 103784.	3.1	28
4	Maternal self-efficacy is associated with mother-child feeding practices in middle childhood. <i>Eating Behaviors</i> , 2021, 40, 101475.	2.0	5
5	Does iPhone night shift mitigate negative effects of smartphone use on sleep outcomes in emerging adults?. <i>Sleep Health</i> , 2021, 7, 478-484.	2.5	14
6	Associations Between Parent-Child Communication and Connectedness, Parent Feeding Behavior, and Child Body Mass in Pre-Adolescent Children. <i>Journal of Pediatric Psychology</i> , 2021, 46, 59-68.	2.1	1
7	White matter integrity disparities between normal-weight and overweight/obese adolescents: an automated fiber quantification tractography study. <i>Brain Imaging and Behavior</i> , 2020, 14, 308-319.	2.1	25
8	Effects of Sleep Restriction on Food-Related Inhibitory Control and Reward in Adolescents. <i>Journal of Pediatric Psychology</i> , 2019, 44, 692-702.	2.1	15
9	Sleep duration differentially affects brain activation in response to food images in adolescents with overweight/obesity compared to adolescents with normal weight. <i>Sleep</i> , 2019, 42, .	1.1	15
10	The utility of the Children's Sleep Habits Questionnaire: Associations between parental report and an objective measure of sleep behavior. <i>Children's Health Care</i> , 2018, 47, 119-135.	0.9	8
11	Introduction to the Special Issue on Neural Processes and Pediatric Health: Creating a Pediatric Health Neuroscience Research Agenda. <i>Journal of Pediatric Psychology</i> , 2018, 43, 815-820.	2.1	0
12	Motivational Impact of Palatable Food Correlates With Functional Brain Responses to Food Images in Adolescents. <i>Journal of Pediatric Psychology</i> , 2017, 42, jsw091.	2.1	14
13	Executive Control Mediates the Association Between Aerobic Fitness and Emotion Regulation in Preadolescent Children. <i>Journal of Pediatric Psychology</i> , 2016, 42, jsw052.	2.1	7
14	Appropriateness of the food-pics image database for experimental eating and appetite research with adolescents. <i>Eating Behaviors</i> , 2016, 23, 195-199.	2.0	18
15	Parent-Reported Deficits in Executive Function and Sleep-Disordered Breathing in Adolescent Behavioral Weight Loss Program Participants. <i>Journal of Pediatric Neuropsychology</i> , 2016, 2, 119-128.	0.6	2
16	Topical Review: Unique Contributions of Magnetic Resonance Imaging to Pediatric Psychology Research: Table I.. <i>Journal of Pediatric Psychology</i> , 2016, 41, 204-209.	2.1	3
17	An Evaluation of a Smartphone-Assisted Behavioral Weight Control Intervention for Adolescents: Pilot Study. <i>JMIR MHealth and UHealth</i> , 2016, 4, e102.	3.7	27
18	Effectiveness of a Parent Health Report Intervention to Increase Physical Activity among Preschoolers and Kindergarteners. <i>Children's Health Care</i> , 2015, 44, 341-352.	0.9	0

#	ARTICLE	IF	CITATIONS
19	Functional brain response to food images in successful adolescent weight losers compared with normal-weight and overweight controls. <i>Obesity</i> , 2015, 23, 630-636.	3.0	34
20	Medium Is the Message: Moderate Parental Control of Feeding Correlates With Improved Weight Outcome in a Pediatric Obesity Intervention. <i>Journal of Pediatric Psychology</i> , 2014, 39, 708-717.	2.1	13
21	Meta-analysis of motivational interviewing for adolescent health behavior: Efficacy beyond substance use.. <i>Journal of Consulting and Clinical Psychology</i> , 2014, 82, 1212-1218.	2.0	133
22	A Qualitative Study of Successful Adolescent and Young Adult Weight Losers: Implications for Weight Control Intervention. <i>Childhood Obesity</i> , 2014, 10, 482-490.	1.5	31
23	Associations Between Teasing, Quality of Life, and Physical Activity Among Preadolescent Children. <i>Journal of Pediatric Psychology</i> , 2013, 39, 65-73.	2.1	28
24	Longitudinal Associations Between Teasing and Health-related Quality of Life Among Treatment-seeking Overweight and Obese Youth. <i>Journal of Pediatric Psychology</i> , 2012, 37, 438-447.	2.1	15
25	Comparison of a Family-Based Group Intervention for Youths with Obesity to a Brief Individual Family Intervention: A Practical Clinical Trial of Positively Fit. <i>Journal of Pediatric Psychology</i> , 2012, 37, 53-63.	2.1	51
26	Predictors of Attendance in a Practical Clinical Trial of Two Pediatric Weight Management Interventions. <i>Obesity</i> , 2012, 20, 2250-2256.	3.0	45
27	Effectiveness of motivational interviewing interventions for adolescent substance use behavior change: A meta-analytic review.. <i>Journal of Consulting and Clinical Psychology</i> , 2011, 79, 433-440.	2.0	279
28	An Evaluation of a Personal Electronic Device to Enhance Self-Monitoring Adherence in a Pediatric Weight Management Program using a Multiple Baseline Design. <i>Journal of Pediatric Psychology</i> , 2011, 36, 301-307.	2.1	40
29	Parent- and Youth-Reported Illness Uncertainty: Associations With Distress and Psychosocial Functioning Among Recipients of Liver and Kidney Transplantations. <i>Children's Health Care</i> , 2009, 38, 185-199.	0.9	20
30	Brief Report: Body Dissatisfaction, Weight Criticism, and Self-Reported Physical Activity in Preadolescent Children. <i>Journal of Pediatric Psychology</i> , 2009, 34, 822-826.	2.1	59
