#	ARTICLE	IF	CITATIONS
1	Cosmological forecasts with the clustering of weak lensing peaks. Monthly Notices of the Royal Astronomical Society, 2022, 513, 4729-4746.	4.4	6
2	On cosmological bias due to the magnification of shear and position samples in modern weak lensing analyses. Monthly Notices of the Royal Astronomical Society, 2022, 515, 1130-1145.	4.4	5
3	Probing dark energy with tomographic weak-lensing aperture mass statistics. Astronomy and Astrophysics, 2021, 646, A62.	5.1	27
4	Persistent homology in cosmic shear: Constraining parameters with topological data analysis. Astronomy and Astrophysics, 2021, 648, A74.	5.1	27
5	Impact of baryons in cosmic shear analyses with tomographic aperture mass statistics. Astronomy and Astrophysics, 2021, 648, A115.	5.1	11
6	Strong detection of the CMB lensing and galaxy weak lensing cross-correlation from ACT-DR4, Planck Legacy, and KiDS-1000. Astronomy and Astrophysics, 2021, 649, A146.	5.1	26
7	Cosmic shear cosmology beyond two-point statistics: a combined peak count and correlation function analysis of DES-Y1. Monthly Notices of the Royal Astronomical Society, 2021, 506, 1623-1650.	4.4	45
8	AMICO galaxy clusters in KiDS-DR3. Astronomy and Astrophysics, 2021, 653, A19.	5.1	12
9	Cosmic shear beyond 2-point statistics: Accounting for galaxy intrinsic alignment with projected tidal fields. Monthly Notices of the Royal Astronomical Society, 2021, 509, 3868-3888.	4.4	15
10	On the road to 1% accuracy III. Non-linear reaction of the matter power spectrum to massive neutrinos. Monthly Notices of the Royal Astronomical Society, 2020, 491, 3101-3107.	4.4	18
11	A gravitational lensing detection of filamentary structures connecting luminous red galaxies. Astronomy and Astrophysics, 2020, 633, A89.	5.1	11
12	An adapted filter function for density split statistics in weak lensing. Astronomy and Astrophysics, 2020, 642, A161.	5.1	11
13	Non-Gaussianity in the weak lensing correlation function likelihood implications for cosmological parameter biases. Monthly Notices of the Royal Astronomical Society, 2020, 499, 2977-2993.	4.4	19
14	Painting with baryons: augmenting N -body simulations with gas using deep generative models. Monthly Notices of the Royal Astronomical Society: Letters, 2019, 487, L24-L29.	3.3	49
15	Consistent cosmic shear in the face of systematics: a B -mode analysis of KiDS-450, DES-SV and CFHTLenS. Astronomy and Astrophysics, 2019, 624, A134.	5.1	30
16	Cosmic shear covariance matrix in Λ CDM: Cosmology matters. Astronomy and Astrophysics, 2019, 631, A160.	5.1	41
17	The BAHAMAS project: the CMB large-scale structure tension and the roles of massive neutrinos and galaxy formation. Monthly Notices of the Royal Astronomical Society, 2018, 476, 2999-3030.	4.4	113
18	KiDS-450: cosmological constraints from weak lensing peak statistics I. Inference from analytical prediction of high signal-to-noise ratio convergence peaks. Monthly Notices of the Royal Astronomical Society, 2018, 474, 1116-1134.	4.4	79

#	ARTICLE	IF	CITATIONS
19	KiDS-450 + 2dFLenS: Cosmological parameter constraints from weak gravitational lensing tomography and overlapping redshift-space galaxy clustering. Monthly Notices of the Royal Astronomical Society, 2018, 474, 4894-4924.	4.4	212
20	KiDS-450: enhancing cosmic shear with clipping transformations. Monthly Notices of the Royal Astronomical Society, 2018, 480, 5529-5549.	4.4	21
21	Studying galaxy troughs and ridges using weak gravitational lensing with the Kilo-Degree Survey. Monthly Notices of the Royal Astronomical Society, 2018, 481, 5189-5209.	4.4	45
22	Dark matter distribution induced by a cosmic string wake in the nonlinear regime. Physical Review D, 2018, 98, .	4.7	9
23	KiDS+GAMA: cosmology constraints from a joint analysis of cosmic shear, galaxyâ€“galaxy lensing, and angular clustering. Monthly Notices of the Royal Astronomical Society, 2018, 476, 4662-4689.	4.4	163
24	The skewed weak lensing likelihood: why biases arise, despite data and theory being sound. Monthly Notices of the Royal Astronomical Society, 2018, 477, 4879-4895.	4.4	33
25	KiDS-450: cosmological constraints from weak-lensing peak statistics â€“ II: Inference from shear peaks using N-body simulations. Monthly Notices of the Royal Astronomical Society, 2018, 474, 712-730.	4.4	86
26	Differential neutrino condensation onto cosmic structure. Nature Astronomy, 2017, 1, .	10.1	25
27	2dFLenS and KiDS: determining source redshift distributions with cross-correlations. Monthly Notices of the Royal Astronomical Society, 2017, 465, 4118-4132.	4.4	35
28	CFHTLenS revisited: assessing concordance with Planck including astrophysical systematics. Monthly Notices of the Royal Astronomical Society, 2017, 465, 2033-2052.	4.4	185
29	Cross-correlation of weak lensing and gamma rays: implications for the nature of dark matter. Monthly Notices of the Royal Astronomical Society, 2017, 467, 2706-2722.	4.4	19
30	Cosmological neutrino simulations at extreme scale. Research in Astronomy and Astrophysics, 2017, 17, 085.	1.7	46
31	Cross-correlating Planck tSZ with RCSLenS weak lensing: implications for cosmology and AGN feedback. Monthly Notices of the Royal Astronomical Society, 2017, 471, 1565-1580.	4.4	53
32	KiDS-450: tomographic cross-correlation of galaxy shear with Planck lensing. Monthly Notices of the Royal Astronomical Society, 2017, 471, 1619-1633.	4.4	27
33	Precision calculations of the cosmic shear power spectrum projection. Monthly Notices of the Royal Astronomical Society, 2017, 472, 2126-2141.	4.4	87
34	Revisiting CFHTLenS cosmic shear: optimal E/B mode decomposition using COSEBIs and compressed COSEBIs. Monthly Notices of the Royal Astronomical Society, 2017, 464, 1676-1692.	4.4	32
35	The 2-degree Field Lensing Survey: design and clustering measurements. Monthly Notices of the Royal Astronomical Society, 2016, 462, 4240-4265.	4.4	53
36	CFHTLenS and RCSLenS cross-correlation with Planck lensing detected in fourier and configuration space. Monthly Notices of the Royal Astronomical Society, 2016, 460, 434-457.	4.4	33

#	ARTICLE	IF	CITATIONS
37	Enhancing the cosmic shear power spectrum. Monthly Notices of the Royal Astronomical Society, 2016, 456, 278-285.	4.4	8
38	RCSLenS: testing gravitational physics through the cross-correlation of weak lensing and large-scale structure. Monthly Notices of the Royal Astronomical Society, 2016, 456, 2806-2828.	4.4	58
39	Precision reconstruction of the cold dark matter-neutrino relative velocity from $\langle \mathbf{v}_c \cdot \mathbf{v}_n \rangle$ -body simulations. Physical Review D, 2015, 92, .	4.7	43
40	The first and second data releases of the Kilo-Degree Survey. Astronomy and Astrophysics, 2015, 582, A62.	5.1	218
41	Dissecting the thermal Sunyaev-Zeldovich-gravitational lensing cross-correlation with hydrodynamical simulations. Journal of Cosmology and Astroparticle Physics, 2015, 2015, 047-047.	5.4	31
42	First measurement of the cross-correlation of CMB lensing and galaxy lensing. Physical Review D, 2015, 91, .	4.7	60
43	Baryons, neutrinos, feedback and weak gravitational lensing. Monthly Notices of the Royal Astronomical Society, 2015, 450, 1212-1223.	4.4	94
44	Simulations of weak gravitational lensing $\hat{\kappa}$ II. Including finite support effects in cosmic shear covariance matrices. Monthly Notices of the Royal Astronomical Society, 2015, 450, 2857-2873.	4.4	56
45	Gravitational lensing analysis of the Kilo-Degree Survey. Monthly Notices of the Royal Astronomical Society, 2015, 454, 3500-3532.	4.4	292
46	CFHTLenS: testing the laws of gravity with tomographic weak lensing and redshift-space distortions. Monthly Notices of the Royal Astronomical Society, 2013, 429, 2249-2263.	4.4	149
47	Non-Gaussian error bars in galaxy surveys $\hat{\kappa}$ II. Monthly Notices of the Royal Astronomical Society, 2013, 431, 3349-3363.	4.4	8
48	CFHTLenS: combined probe cosmological model comparison using 2D weak gravitational lensing. Monthly Notices of the Royal Astronomical Society, 2013, 430, 2200-2220.	4.4	303
49	Optimizing the recovery of Fisher information in the dark matter power spectrum. Monthly Notices of the Royal Astronomical Society, 2013, 436, 759-773.	4.4	4
50	CFHTLenS tomographic weak lensing cosmological parameter constraints: Mitigating the impact of intrinsic galaxy alignments. Monthly Notices of the Royal Astronomical Society, 2013, 432, 2433-2453.	4.4	506
51	CFHTLenS tomographic weak lensing: quantifying accurate redshift distributions. Monthly Notices of the Royal Astronomical Society, 2013, 431, 1547-1564.	4.4	111
52	Gravitational lensing simulations - I. Covariance matrices and halo catalogues. Monthly Notices of the Royal Astronomical Society, 2012, 426, 1262-1279.	4.4	53
53	CFHTLenS: the Canada-France-Hawaii Telescope Lensing Survey. Monthly Notices of the Royal Astronomical Society, 2012, 427, 146-166.	4.4	596
54	Non-Gaussian error bars in galaxy surveys - I. Monthly Notices of the Royal Astronomical Society, 2012, 423, 2288-2307.	4.4	20

#	ARTICLE	IF	CITATIONS
55	INCREASING THE FISHER INFORMATION CONTENT IN THE MATTER POWER SPECTRUM BY NONLINEAR WAVELET WIENER FILTERING. <i>Astrophysical Journal</i> , 2011, 728, 35.	4.5	23
56	Information content in the angular power spectrum of weak lensing: wavelet method. <i>Monthly Notices of the Royal Astronomical Society</i> , 2011, , no-no.	4.4	6
57	Constraining cosmology with weak lensing voids. <i>Monthly Notices of the Royal Astronomical Society</i> , 0, , .	4.4	17
