#	ARTICLE	IF	CITATIONS
1	On the stability of additional moons orbiting Kepler-1625 b. Monthly Notices of the Royal Astronomical Society, 2022, 510, 2583-2596.	4.4	3
2	The fate of particles in the dynamical environment around Kuiper-Belt object (486958) Arrokoth. Astrophysics and Space Science, 2022, 367, 1.	1.4	2
3	Milliarcsecond Astrometry for the Galilean Moons Using Stellar Occultations. Astronomical Journal, 2022, 163, 240.	4.7	7
4	2001 SN263 – the contribution of their irregular shapes on the neighbourhood dynamics. Monthly Notices of the Royal Astronomical Society, 2022, 515, 606-616.	4.4	2
5	Gravitational perturbations correlated with the asteroid kinetic impact deflection technique. Scientific Reports, 2022, 12, .	3.3	2
6	Stability and Evolution of Fallen Particles Around the Surface of Asteroid (101955) Bennu. Journal of Geophysical Research E: Planets, 2021, 126, .	3.6	3
7	A computational approach to the powered Swing-By in the elliptic restricted problem. Journal of the Brazilian Society of Mechanical Sciences and Engineering, 2021, 43, 1.	1.6	0
8	Formation of Earth-sized planets within the Kepler-1647 system habitable zone. Monthly Notices of the Royal Astronomical Society, 2021, 504, 6144-6156.	4.4	1
9	Quasi circular orbits around prolate bodies. Monthly Notices of the Royal Astronomical Society, 2021, 506, 3068-3078.	4.4	4
10	Refined physical parameters for Chariklo’s body and rings from stellar occultations observed between 2013 and 2020. Astronomy and Astrophysics, 2021, 652, A141.	5.1	17
11	APOPHIS – effects of the 2029 Earth’s encounter on the surface and nearby dynamics. Monthly Notices of the Royal Astronomical Society, 2021, 510, 95-109.	4.4	5
12	Dynamics around non-spherical symmetric bodies – I. The case of a spherical body with mass anomaly. Monthly Notices of the Royal Astronomical Society, 2021, 510, 1450-1469.	4.4	5
13	Dynamics around the binary system (65803) Didymos. Proceedings of the International Astronomical Union, 2021, 15, 197-202.	0.0	0
14	A mathematical study of the tethered slingshot maneuver using the elliptic restricted problem. Nonlinear Dynamics, 2020, 102, 1585-1609.	5.2	3
15	Surface dynamics, equilibrium points and individual lobes of the Kuiper Belt object (486958) Arrokoth. Monthly Notices of the Royal Astronomical Society, 2020, 496, 4154-4173.	4.4	9
16	On the rotational motion of NEAs during close encounters with the Earth. European Physical Journal: Special Topics, 2020, 229, 1391-1403.	2.6	5
17	An unaccounted component on the Prometheus and Pandora offset angular positions. European Physical Journal: Special Topics, 2020, 229, 1479-1489.	2.6	2
18	The structure of the co-orbital stable regions as a function of the mass ratio. Monthly Notices of the Royal Astronomical Society, 2020, 496, 3700-3707.	4.4	5

#	ARTICLE	IF	CITATIONS
19	Energy and inclination Analysis of the powered Swing-By maneuver in elliptical system. , 2020, , .		1
20	Location and stability of distant retrograde orbits around the Moon. Monthly Notices of the Royal Astronomical Society, 2020, 494, 2727-2735.	4.4	2
21	Earth-size planet formation in the habitable zone of circumbinary stars. Monthly Notices of the Royal Astronomical Society, 2020, 494, 1045-1057.	4.4	5
22	Stellar occultations enable milliarcsecond astrometry for Trans-Neptunian objects and Centaurs. Astronomy and Astrophysics, 2020, 644, A40.	5.1	11
23	Asteroid triple-system 2001 SN263: surface characteristics and dynamical environment. Monthly Notices of the Royal Astronomical Society, 2020, 492, 4437-4455.	4.4	13
24	First stellar occultation by the Galilean moon Europa and upcoming events between 2019 and 2021. Astronomy and Astrophysics, 2019, 626, L4.	5.1	11
25	Sun-synchronous solar reflector orbits designed to warm Mars. Astrophysics and Space Science, 2019, 364, 1.	1.4	5
26	The PDSâ€™110 observing campaign â€™ photometric and spectroscopic observations reveal eclipses are aperiodic. Monthly Notices of the Royal Astronomical Society, 2019, 485, 1614-1625.	4.4	7
27	On the location of the ring around the dwarf planet Haumea. Monthly Notices of the Royal Astronomical Society, 2019, 484, 3765-3771.	4.4	13
28	A General Method for Transforming Nonphysical Configurations in BPS States. Advances in High Energy Physics, 2019, 2019, 1-11.	1.1	0
29	XIX Brazilian Colloquium on Orbital Dynamics (2018): a solid path to the 21st century. Journal of Physics: Conference Series, 2019, 1365, 011001.	0.4	1
30	Effects of the mass parameter in the optimum direction of impulse and energy variation in a Powered Swing-By. Journal of Physics: Conference Series, 2019, 1365, 012008.	0.4	1
31	Errors of Powered Swing-By in the Restricted Three-Body Problem. Journal of Guidance, Control, and Dynamics, 2019, 42, 2246-2257.	2.8	2
32	APPROX â€™ mutual approximations between the Galilean moons: the 2016â€™2018 observational campaign. Monthly Notices of the Royal Astronomical Society, 2019, 482, 5190-5200.	4.4	14
33	The journey of Typhon-Echidna as a binary system through the planetary region. Monthly Notices of the Royal Astronomical Society, 2018, 476, 5323-5331.	4.4	5
34	Particles Co-orbital to Janus and to Epimetheus: A Firefly Planetary Ring. Astrophysical Journal, 2018, 852, 14.	4.5	23
35	PoincarÃ© surfaces of section around a 3D irregular body: the case of asteroid 4179 Toutatis. Monthly Notices of the Royal Astronomical Society, 2018, 474, 2452-2466.	4.4	15
36	Analytical study of the swing-by maneuver in an elliptical system. Astrophysics and Space Science, 2018, 363, 1.	1.4	12

#	ARTICLE	IF	CITATIONS
37	Comparison between Laplace-Lagrange secular theory and numerical simulation: the case of ϵ Andromedae planetary system. Computational and Applied Mathematics, 2018, 37, 122-132.	1.3	2
38	Collecting solar power by formation flying systems around a geostationary point. Computational and Applied Mathematics, 2018, 37, 84-95.	1.3	2
39	The When and Where of Water in the History of the Universe. , 2018, , 47-73.		1
40	Planar powered Swing-By maneuvers to brake a spacecraft. Computational and Applied Mathematics, 2018, 37, 202-219.	1.3	3
41	Celestial mechanics, spacecrafts, and 50th years of the first humans on the Moon. Computational and Applied Mathematics, 2018, 37, 1-6.	1.3	1
42	Rings under close encounters with the giant planets: Chariklo versus Chiron. Monthly Notices of the Royal Astronomical Society, 2018, 479, 4770-4777.	4.4	4
43	Analytical study of the powered Swing-By maneuver for elliptical systems and analysis of its efficiency. Astrophysics and Space Science, 2018, 363, 1.	1.4	6
44	Periodic orbits for space-based reflectors in the circular restricted three-body problem. Celestial Mechanics and Dynamical Astronomy, 2017, 128, 95-113.	1.4	8
45	Effects of the eccentricity of the primaries in powered Swing-By maneuvers. Advances in Space Research, 2017, 59, 2071-2087.	2.6	23
46	Mapping stable direct and retrograde orbits around the triple system of asteroids (45) Eugenia. Monthly Notices of the Royal Astronomical Society, 2017, 472, 3999-4006.	4.4	3
47	Applications of celestial mechanics in natural objects and spacecrafts. Computational and Applied Mathematics, 2017, 36, 1463-1469.	1.3	0
48	Solar Power Satellite system in formation on a common geostationary orbit. Journal of Physics: Conference Series, 2017, 911, 012006.	0.4	2
49	A numerical mapping of energy gains in a powered Swing-By maneuver. Nonlinear Dynamics, 2017, 89, 791-818.	5.2	21
50	The asteroid belt outer region under jumping-Jupiter migration. Monthly Notices of the Royal Astronomical Society, 2017, 470, 2680-2686.	4.4	21
51	Studying the energy variation in the powered Swing-By in the Sun-Mercury system. Journal of Physics: Conference Series, 2017, 911, 012007.	0.4	2
52	THE ASTEROID BELT AS A RELIC FROM A CHAOTIC EARLY SOLAR SYSTEM. Astrophysical Journal, 2016, 833, 40.	4.5	62
53	Intervening in Earth's climate system through space-based solar reflectors. Advances in Space Research, 2016, 58, 17-29.	2.6	13
54	Dynamics of rotationally fissioned asteroids: non-planar case. Monthly Notices of the Royal Astronomical Society, 2016, 461, 3982-3992.	4.4	17

#	ARTICLE	IF	CITATIONS
55	Formation of terrestrial planets in disks with different surface density profiles. <i>Celestial Mechanics and Dynamical Astronomy</i> , 2016, 124, 235-268.	1.4	42
56	THE RINGS OF CHARIKLO UNDER CLOSE ENCOUNTERS WITH THE GIANT PLANETS. <i>Astrophysical Journal</i> , 2016, 824, 80.	4.5	44
57	Analysis of the orbital evolution of exoplanets. <i>Computational and Applied Mathematics</i> , 2016, 35, 847-863.	1.3	2
58	Exploring the Moon gravity to escape from the Earth-Moon system. <i>Computational and Applied Mathematics</i> , 2016, 35, 701-710.	1.3	1
59	On the Erigone family and the z_2 secular resonance. <i>Monthly Notices of the Royal Astronomical Society</i> , 2016, 455, 2279-2288.	4.4	11
60	Exoplanets in binary star systems: on the switch from prograde to retrograde orbits. <i>Celestial Mechanics and Dynamical Astronomy</i> , 2016, 124, 73-96.	1.4	35
61	Celestial Mechanics: from the bases of the past to the challenges of the future. <i>Journal of Physics: Conference Series</i> , 2015, 641, 011001.	0.4	2
62	Astronautics & Astronomy - a Profitable Partnership. <i>Journal of Aerospace Technology and Management</i> , 2015, 7, 265-266.	0.3	0
63	Chaotic Dynamics in a Low-Energy Transfer Strategy to the Equilateral Equilibrium Points in the Earth-Moon System. <i>International Journal of Bifurcation and Chaos in Applied Sciences and Engineering</i> , 2015, 25, 1550077.	1.7	8
64	Terrestrial planet formation constrained by Mars and the structure of the asteroid belt. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 453, 3620-3635.	4.4	94
65	Zero drift regions and control strategies to keep satellite in formation around triangular libration point in the restricted Sun-Earth-Moon scenario. <i>Advances in Space Research</i> , 2015, 56, 1502-1518.	2.6	8
66	Estimating the trajectory of a space vehicle passing by the Moon using Kalman Filter. <i>Journal of Physics: Conference Series</i> , 2015, 641, 012002.	0.4	0
67	Natural formations at the Earth-Moon triangular point in perturbed restricted problems. <i>Advances in Space Research</i> , 2015, 56, 144-162.	2.6	8
68	A numerical study of powered Swing-Bys around the Moon. <i>Advances in Space Research</i> , 2015, 56, 252-272.	2.6	24
69	3D plausible orbital stability close to asteroid (216) Kleopatra. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 452, 1316-1327.	4.4	34
70	Stable retrograde orbits around the triple system 2001 SN263. <i>Monthly Notices of the Royal Astronomical Society</i> , 2015, 449, 4404-4414.	4.4	14
71	Planet formation in a triple stellar system: implications of the third star's orbital inclination. <i>International Journal of Astrobiology</i> , 2015, 14, 153-163.	1.6	2
72	The sailboat island and the New Horizons trajectory. <i>Icarus</i> , 2015, 246, 339-344.	2.5	5

#	ARTICLE	IF	CITATIONS
73	Pareto Frontier for the time-€energy cost vector to an Earth-Moon transfer orbit using the patched-conic approximation. Computational and Applied Mathematics, 2015, 34, 461-475.	1.3	6
74	Celestial mechanics: from the errant stars to guidance of spacecrafts. Computational and Applied Mathematics, 2015, 34, 417-421.	1.3	0
75	Formation of the Janus-Epimetheus system through collisions. Astronomy and Astrophysics, 2015, 583, A80.	5.1	5
76	The triple near-Earth asteroid (153591) 2001 SN263: an ultra-blue, primitive target for the Aster space mission. Astronomy and Astrophysics, 2014, 568, L6.	5.1	12
77	Zero, minimum and maximum relative radial acceleration for planar formation flight dynamics near triangular libration points in the Earth-Moon system. Advances in Space Research, 2014, 54, 1838-1857.	2.6	6
78	3D stability orbits close to 433 Eros using an effective polyhedral model method. Monthly Notices of the Royal Astronomical Society, 2014, 438, 2672-2682.	4.4	30
79	A peculiar stable region around Pluto. Monthly Notices of the Royal Astronomical Society, 2014, 439, 3300-3307.	4.4	8
80	TERRESTRIAL PLANET FORMATION IN A PROTOPLANETARY DISK WITH A LOCAL MASS DEPLETION: A SUCCESSFUL SCENARIO FOR THE FORMATION OF MARS. Astrophysical Journal, 2014, 782, 31.	4.5	98
81	Alternative transfer to the Earth-Moon Lagrangian points L4 and L5 using lunar gravity assist. Advances in Space Research, 2014, 53, 543-557.	2.6	11
82	A Permanent Magnet Hall Thruster for Pulsed Orbit Control of Lunar Polar Satellites. Journal of Physics: Conference Series, 2014, 511, 012074.	0.4	5
83	Near-Earth asteroid binaries in close encounters with the Earth. Astronomy and Astrophysics, 2014, 566, A23.	5.1	3
84	Powered Swing-By in the Elliptic Restricted Problem. , 2014, , .		0
85	Optimal Impulsive Control in a Powered Swing-By. , 2013, , .		1
86	Irregular satellites of Jupiter: three-dimensional study of binary-asteroid captures. Monthly Notices of the Royal Astronomical Society, 2013, 433, 36-46.	4.4	26
87	Analysis of 25 mutual eclipses and occultations between the Galilean satellites observed from Brazil in 2009-.... Monthly Notices of the Royal Astronomical Society, 2013, 432, 225-242.	4.4	13
88	A COMPOUND MODEL FOR THE ORIGIN OF EARTH'S WATER. Astrophysical Journal, 2013, 767, 54.	4.5	81
89	Analysis of the secular problem for triple star systems. Journal of Physics: Conference Series, 2013, 465, 012010.	0.4	4
90	Stable regions around Pluto. Monthly Notices of the Royal Astronomical Society, 2013, 430, 1892-1900.	4.4	19
