#	ARTICLE	IF	CITATIONS
1	Can arrows change the subjective perception of space? Exploring symbolic attention repulsion. Quarterly Journal of Experimental Psychology, 2022, 75, 1997-2011.	0.6	3
2	Eliminating the Low-Prevalence Effect in Visual Search With a Remarkably Simple Strategy. Psychological Science, 2022, 33, 716-724.	1.8	2
3	The item-specific proportion congruency effect transfers to non-category members based on broad visual similarity. Psychonomic Bulletin and Review, 2022, , 1.	1.4	1
4	Typicality modulates attentional capture by object categories. Attention, Perception, and Psychophysics, 2021, 83, 1397-1406.	0.7	4
5	Examining temporal and spatial attention with a reaction time attentional blink. Visual Cognition, 2021, 29, 201-212.	0.9	0
6	Tuning the ensemble: Incidental skewing of the perceptual average through memory-driven selection.. Journal of Experimental Psychology: Human Perception and Performance, 2021, 47, 648-661.	0.7	4
7	Comparing imagery and perception: Using eye movements to dissociate mechanisms in search. Attention, Perception, and Psychophysics, 2021, 83, 2879-2890.	0.7	5
8	Is the attentional SNARC effect truly attentional? Using temporal order judgements to differentiate attention from response. Quarterly Journal of Experimental Psychology, 2021, , 174702182110394.	0.6	3
9	Context isn't everything: Search performance is influenced by the nature of the task but not the background. Attention, Perception, and Psychophysics, 2021, 83, 27-37.	0.7	3
10	The item-specific proportion congruency effect can be contaminated by short-term repetition priming. Attention, Perception, and Psychophysics, 2021, 84, 1.	0.7	5
11	Visual working memory load does not eliminate visuomotor repetition effects. Attention, Perception, and Psychophysics, 2020, 82, 1290-1303.	0.7	1
12	Endogenous shifts of attention cause distortions in the perception of space: Reviewing and examining the attentional repulsion effect. Visual Cognition, 2020, 28, 292-310.	0.9	2
13	Shifting attention does not influence numerical processing. Attention, Perception, and Psychophysics, 2020, 82, 3920-3930.	0.7	1
14	The Unbearable Lightness of Attentional Cuing by Symbolic Magnitude: Commentary on the Registered Replication Report by Colling et al.. Advances in Methods and Practices in Psychological Science, 2020, 3, 163-165.	5.4	5
15	When do response-related episodic retrieval effects co-occur with inhibition of return?. Attention, Perception, and Psychophysics, 2020, 82, 3013-3032.	0.7	13
16	Re-examining Maljkovic and Nakayama (1994): Conscious expectancy does affect the Priming of Pop-out effect. Attention, Perception, and Psychophysics, 2020, 82, 2693-2702.	0.7	8
17	Directed avoidance and its effect on visual working memory. Cognition, 2020, 201, 104277.	1.1	6
18	Conceptual Cues Facilitate Encoding in Visual Working Memory. Journal of Vision, 2020, 20, 1258.	0.1	0

#	ARTICLE	IF	CITATIONS
19	Response preparation, response selection difficulty, and response-outcome learning. <i>Psychological Research</i> , 2019, 83, 247-257.	1.0	4
20	Hidden from view: Statistical learning exposes latent attentional capture. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 1633-1640.	1.4	1
21	Examining the Role of Attention and Sensory Stimulation in the Attentional Repulsion Effect. <i>Frontiers in Psychology</i> , 2019, 10, 238.	1.1	4
22	It is not in the details: Self-related shapes are rapidly classified but their features are not better remembered. <i>Memory and Cognition</i> , 2019, 47, 1145-1157.	0.9	9
23	Does changing distractor environments eliminate spatiomotor biases?. <i>Visual Cognition</i> , 2019, 27, 351-366.	0.9	1
24	Is attention really biased toward the last target location in visual search? Attention, response rules, distractors, and eye movements. <i>Psychonomic Bulletin and Review</i> , 2019, 26, 506-514.	1.4	15
25	Ironic capture: top-down expectations exacerbate distraction in visual search. <i>Psychological Research</i> , 2019, 83, 1070-1082.	1.0	8
26	I before U: Temporal order judgements reveal bias for self-owned objects. <i>Quarterly Journal of Experimental Psychology</i> , 2019, 72, 589-598.	0.6	41
27	Select, response, repeat: Electrophysiological measures of location and response repetition. <i>Journal of Vision</i> , 2019, 19, 272b.	0.1	0
28	Smile and the world watches: Capture by happy gaze cues outside an attentional control set.. <i>Journal of Vision</i> , 2019, 19, 217a.	0.1	0
29	The Contents of Visual Working Memory Bias Ensemble Perception. <i>Journal of Vision</i> , 2019, 19, 193d.	0.1	0
30	The illusion of control: Sequential dependencies underlie contingent attentional capture. <i>Psychonomic Bulletin and Review</i> , 2018, 25, 2238-2244.	1.4	3
31	Dissociating Orienting Biases From Integration Effects With Eye Movements. <i>Psychological Science</i> , 2018, 29, 328-339.	1.8	26
32	Feature integration in basic detection and localization tasks: Insights from the attentional orienting literature. <i>Attention, Perception, and Psychophysics</i> , 2018, 80, 1333-1341.	0.7	24
33	Placeholders dissociate two forms of inhibition of return. <i>Quarterly Journal of Experimental Psychology</i> , 2018, 71, 360-371.	0.6	9
34	Biasing spatial attention with semantic information: an event coding approach. <i>Psychological Research</i> , 2018, 82, 840-858.	1.0	8
35	The price of information: Increased inspection costs reduce the confirmation bias in visual search. <i>Quarterly Journal of Experimental Psychology</i> , 2018, 71, 832-849.	0.6	8
36	“Two Minds Don’t Blink Alike”: The Attentional Blink Does Not Occur in a Joint Context. <i>Frontiers in Psychology</i> , 2018, 9, 1714.	1.1	7

#	ARTICLE	IF	CITATIONS
37	Out with the new, in with the old: Exogenous orienting to locations with physically constant stimulation. <i>Psychonomic Bulletin and Review</i> , 2018, 25, 1331-1336.	1.4	3
38	Spatial metaphors in thinking about other people. <i>Visual Cognition</i> , 2018, 26, 313-333.	0.9	3
39	Testing the role of response repetition in spatial priming in visual search. <i>Attention, Perception, and Psychophysics</i> , 2018, 80, 1362-1374.	0.7	16
40	Attention goes both ways: Shifting attention influences lexical decisions.. <i>Journal of Experimental Psychology: General</i> , 2018, 147, 282-291.	1.5	3
41	The Attentional "White Bear" Evades Visual Working Memory. <i>Journal of Vision</i> , 2018, 18, 470.	0.1	0
42	Spatial working memory impedes search efficiency in interrupted but not continuous scene search. <i>Journal of Vision</i> , 2018, 18, 241.	0.1	0
43	Interaction between numbers and size during visual search. <i>Psychological Research</i> , 2017, 81, 664-677.	1.0	19
44	Intervening response events between identification targets do not always turn repetition benefits into repetition costs. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 807-819.	0.7	19
45	Spatial attention is necessary for object-based attention: Evidence from temporal-order judgments. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 753-764.	0.7	12
46	A different kind of weapon focus: simulated training with ballistic weapons reduces change blindness. <i>Cognitive Research: Principles and Implications</i> , 2017, 2, 3.	1.1	8
47	Learned value and object perception: Accelerated perception or biased decisions?. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 603-613.	0.7	16
48	More than a memory: Confirmatory visual search is not caused by remembering a visual feature. <i>Acta Psychologica</i> , 2017, 180, 169-174.	0.7	1
49	Response-mediated spatial priming despite perfectly valid target location cues and intervening response events. <i>Visual Cognition</i> , 2017, 25, 888-902.	0.9	12
50	Looking sharp: Becoming a search template boosts precision and stability in visual working memory. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 1643-1651.	0.7	16
51	Eye movements can cause item-specific visual recognition advantages. <i>Visual Cognition</i> , 2017, 25, 903-912.	0.9	0
52	The action effect: Support for the biased competition hypothesis. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 1804-1815.	0.7	6
53	Eye movements may cause motor contagion effects. <i>Psychonomic Bulletin and Review</i> , 2017, 24, 835-841.	1.4	9
54	Saliency drives non-spatial feature repetition effects in cueing tasks. <i>Attention, Perception, and Psychophysics</i> , 2017, 79, 212-222.	0.7	5

#	ARTICLE	IF	CITATIONS
55	More than a memory: Confirmatory visual search does not occur when target colors are merely remembered. <i>Journal of Vision</i> , 2017, 17, 925.	0.1	0
56	Attention goes both ways: Shifting attention influences lexical decisions. <i>Journal of Vision</i> , 2017, 17, 684.	0.1	0
57	Don't Overreact to this! Over-reactivity of the M-pathway in Older Adults. <i>Journal of Vision</i> , 2017, 17, 698.	0.1	0
58	Accessibility limits recall from visual working memory.. <i>Journal of Experimental Psychology: Learning Memory and Cognition</i> , 2017, 43, 1415-1431.	0.7	8
59	Pop-out and pop-in: Visual working memory advantages for unique items. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 1787-1793.	1.4	5
60	Ownership Status Influences the Degree of Joint Facilitatory Behavior. <i>Psychological Science</i> , 2016, 27, 1371-1378.	1.8	14
61	Object-based selection is contingent on attentional control settings. <i>Attention, Perception, and Psychophysics</i> , 2016, 78, 988-995.	0.7	2
62	Visuospatial cueing by self-caused features: Orienting of attention and action outcome associative learning. <i>Psychonomic Bulletin and Review</i> , 2016, 23, 459-467.	1.4	13
63	The effect of SNARC compatibility on perceptual accuracy: evidence from object substitution masking. <i>Psychological Research</i> , 2016, 80, 702-709.	1.0	1
64	Acting and anticipating: Impact of outcome-compatible distractor depends on response selection efficiency.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2016, 42, 1601-1614.	0.7	9
65	Much ado about nothing: Capturing attention toward locations without new perceptual events.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2016, 42, 1923-1927.	0.7	3
66	Implied Spatial Meaning and Visuospatial Bias: Conceptual Processing Influences Processing of Visual Targets and Distractors. <i>PLoS ONE</i> , 2016, 11, e0150928.	1.1	6
67	Frogs Jump Forward: Semantic Knowledge Influences the Perception of Element Motion in the Ternus Display. <i>Perception</i> , 2015, 44, 779-789.	0.5	10
68	Contingent capture effects in temporal order judgments.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2015, 41, 995-1006.	0.7	11
69	A touchy subject: advancing the modulated visual pathways account of altered vision near the hand. <i>Translational Neuroscience</i> , 2015, 6, 1-7.	0.7	23
70	Joint attention for stimuli on the hands: ownership matters. <i>Frontiers in Psychology</i> , 2015, 6, 543.	1.1	1
71	Do you see what I see? Co-actor posture modulates visual processing in joint tasks. <i>Visual Cognition</i> , 2015, 23, 699-719.	0.9	9
72	Altered visual perception near the hands: A critical review of attentional and neurophysiological models. <i>Neuroscience and Biobehavioral Reviews</i> , 2015, 55, 223-233.	2.9	41

#	ARTICLE	IF	CITATIONS
73	Hand position influences perceptual grouping. <i>Experimental Brain Research</i> , 2015, 233, 2627-2634.	0.7	10
74	Attentional cartography: mapping the distribution of attention across time and space. <i>Attention, Perception, and Psychophysics</i> , 2015, 77, 2240-2246.	0.7	28
75	Bow Your Head in Shame, or, Hold Your Head Up with Pride: Semantic Processing of Self-Esteem Concepts Orients Attention Vertically. <i>PLoS ONE</i> , 2015, 10, e0137704.	1.1	6
76	The effect of action video game playing on sensorimotor learning: Evidence from a movement tracking task. <i>Human Movement Science</i> , 2014, 38, 152-162.	0.6	50
77	Examining the locus of the attentional attraction effect. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 2389-2397.	0.7	1
78	Visual attention to features by associative learning. <i>Cognition</i> , 2014, 133, 488-501.	1.1	15
79	Reduced visual feature binding in the near-hand space. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 1308-1317.	0.7	14
80	Setting semantics: conceptual set can determine the physical properties that capture attention. <i>Attention, Perception, and Psychophysics</i> , 2014, 76, 1577-1589.	0.7	22
81	The nature of altered vision near the hands: Evidence for the magnocellular enhancement account from object correspondence through occlusion. <i>Psychonomic Bulletin and Review</i> , 2014, 21, 1452-1458.	1.4	22
82	Continuous hand movement induces a far-hand bias in attentional priority. <i>Attention, Perception, and Psychophysics</i> , 2013, 75, 644-649.	0.7	11
83	Attention is biased to near surfaces. <i>Psychonomic Bulletin and Review</i> , 2013, 20, 1213-1220.	1.4	8
84	Substituting objects from consciousness: A review of object substitution masking. <i>Psychonomic Bulletin and Review</i> , 2013, 20, 859-877.	1.4	39
85	Effects of spatial-memory decay and dual-task interference on perturbation-evoked reach-to-grasp reactions in the absence of online visual feedback. <i>Human Movement Science</i> , 2013, 32, 328-342.	0.6	7
86	Ideomotor perception modulates visuospatial cueing. <i>Psychological Research</i> , 2013, 77, 528-539.	1.0	9
87	On Mechanisms, Methods, and Measures: A Response to Guagnano, Rusconi, and Umiltà. <i>Journal of Motor Behavior</i> , 2013, 45, 9-14.	0.5	5
88	Action video game experience affects oculomotor performance. <i>Acta Psychologica</i> , 2013, 142, 38-42.	0.7	66
89	The cost and benefit of implicit spatial cues for visual attention.. <i>Journal of Experimental Psychology: General</i> , 2013, 142, 1028-1046.	1.5	45
90	Reduced Temporal Fusion in Near-Hand Space. <i>Psychological Science</i> , 2013, 24, 891-900.	1.8	40

#	ARTICLE	IF	CITATIONS
91	IOR Effects in a Social Free-Choice Task. <i>Journal of Motor Behavior</i> , 2013, 45, 307-311.	0.5	1
92	Joint Simon Effects in Extrapersonal Space. <i>Journal of Motor Behavior</i> , 2013, 45, 1-5.	0.5	28
93	Valence and vertical space: Saccade trajectory deviations reveal metaphorical spatial activation. <i>Visual Cognition</i> , 2013, 21, 628-646.	0.9	36
94	How action influences object perception. <i>Frontiers in Psychology</i> , 2013, 4, 462.	1.1	18
95	Both hand position and movement direction modulate visual attention. <i>Frontiers in Psychology</i> , 2013, 4, 657.	1.1	15
96	Do Aging and Dual-Tasking Impair the Capacity to Store and Retrieve Visuospatial Information Needed to Guide Perturbation-Evoked Reach-To-Grasp Reactions?. <i>PLoS ONE</i> , 2013, 8, e79401.	1.1	9
97	Attentional repulsion effect despite a colour-based control set. <i>Visual Cognition</i> , 2012, 20, 696-716.	0.9	13
98	The visual P2 is attenuated for attended objects near the hands. <i>Cognitive Neuroscience</i> , 2012, 3, 98-104.	0.6	22
99	Visual working memory supports the inhibition of previously processed information: Evidence from preview search.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2012, 38, 643-663.	0.7	28
100	When Age Is Irrelevant: Distractor Inhibition and Target Activation in Priming of Pop-Out. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2012, 67B, 325-330.	2.4	8
101	The closer the better: Hand proximity dynamically affects letter recognition accuracy. <i>Attention, Perception, and Psychophysics</i> , 2012, 74, 1533-1538.	0.7	29
102	Attention and Visuospatial Working Memory Share the Same Processing Resources. <i>Frontiers in Psychology</i> , 2012, 3, 103.	1.1	29
103	Executive deficits detected in mild Alzheimer's disease using the antisaccade task. <i>Brain and Behavior</i> , 2012, 2, 15-21.	1.0	61
104	Hand position alters vision by biasing processing through different visual pathways. <i>Cognition</i> , 2012, 124, 244-250.	1.1	107
105	Estrogen modulates inhibition of return in healthy human females. <i>Neuropsychologia</i> , 2012, 50, 98-103.	0.7	28
106	Misperceiving space following shifts of attention: Determining the locus of the attentional repulsion effect. <i>Vision Research</i> , 2012, 64, 35-41.	0.7	14
107	Reducing fall risk by improving balance control: Development, evaluation and knowledge-translation of new approaches. <i>Journal of Safety Research</i> , 2011, 42, 473-485.	1.7	58
108	Does the "eyes lead the hand" principle apply to reach-to-grasp movements evoked by unexpected balance perturbations?. <i>Human Movement Science</i> , 2011, 30, 368-383.	0.6	27

#	ARTICLE	IF	CITATIONS
109	Seeing while acting: hand movements can modulate attentional capture by motion onset. <i>Attention, Perception, and Psychophysics</i> , 2011, 73, 2448-2456.	0.7	12
110	Modulating Fitts's Law: Perceiving targets at the last placeholder. <i>Acta Psychologica</i> , 2011, 137, 101-105.	0.7	3
111	Emotion and action: the effect of fear on saccadic performance. <i>Experimental Brain Research</i> , 2011, 209, 153-158.	0.7	27
112	Electrophysiological Evidence for Biased Competition in V1 for Fear Expressions. <i>Journal of Cognitive Neuroscience</i> , 2011, 23, 3410-3418.	1.1	32
113	Differential-Activation Theory Can Account for the Ternus Display: Rejoinder to Petersik. <i>Perception</i> , 2010, 39, 711-717.	0.5	0
114	Antisaccades: A Probe into the Dorsolateral Prefrontal Cortex in Alzheimer's Disease. A Critical Review. <i>Journal of Alzheimer's Disease</i> , 2010, 19, 781-793.	1.2	63
115	Visuospatial attention is guided by both the symbolic value and the spatial proximity of selected arrows.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2010, 36, 1321-1324.	0.7	13
116	Reflexive orienting to gaze is not luminance dependent. <i>Attention, Perception, and Psychophysics</i> , 2010, 72, 28-32.	0.7	1
117	Isoluminant motion onset captures attention. <i>Attention, Perception, and Psychophysics</i> , 2010, 72, 1311-1316.	0.7	11
118	Parallel, independent attentional control settings for colors and shapes. <i>Attention, Perception, and Psychophysics</i> , 2010, 72, 1730-1735.	0.7	28
119	The effects of multisensory targets on saccadic trajectory deviations: eliminating age differences. <i>Experimental Brain Research</i> , 2010, 201, 385-392.	0.7	14
120	Fitts's Law violation and motor imagery: are imagined movements truthful or lawful?. <i>Experimental Brain Research</i> , 2010, 201, 607-611.	0.7	22
121	Left hand, but not right hand, reaching is sensitive to visual context. <i>Experimental Brain Research</i> , 2010, 203, 227-232.	0.7	20
122	Thinking of God moves attention. <i>Neuropsychologia</i> , 2010, 48, 627-630.	0.7	81
123	Search Dopaminergic control of attentional flexibility: inhibition of return is associated with the dopamine transporter gene (DAT1). <i>Frontiers in Human Neuroscience</i> , 2010, 4, 53.	1.0	24
124	Capacity limits during perceptual encoding. <i>Journal of Vision</i> , 2010, 10, 1-12.	0.1	5
125	Red Diffuse Light Suppresses the Accelerated Perception of Fear. <i>Psychological Science</i> , 2010, 21, 992-999.	1.8	39
126	It's Alive!. <i>Psychological Science</i> , 2010, 21, 1724-1730.	1.8	152

#	ARTICLE	IF	CITATIONS
127	You can't stop new motion: Attentional capture despite a control set for colour. <i>Visual Cognition</i> , 2010, 18, 859-880.	0.9	33
128	Attentional control settings prevent abrupt onsets from capturing visual spatial attention. <i>Quarterly Journal of Experimental Psychology</i> , 2010, 63, 31-41.	0.6	16
129	Rapid Communication: Finding memory in search: The effect of visual working memory load on visual search. <i>Quarterly Journal of Experimental Psychology</i> , 2010, 63, 1457-1466.	0.6	37
130	Top-down control in time and space: Evidence from saccadic latencies and trajectories. <i>Visual Cognition</i> , 2010, 18, 26-49.	0.9	20
131	Visual Search Elicits the Electrophysiological Marker of Visual Working Memory. <i>PLoS ONE</i> , 2009, 4, e8042.	1.1	80
132	Target-Directed Movements at a Comfortable Pace: Movement Duration and Fitts's Law. <i>Journal of Motor Behavior</i> , 2009, 41, 339-346.	0.5	28
133	Misperceiving the speed-accuracy tradeoff: imagined movements and perceptual decisions. <i>Experimental Brain Research</i> , 2009, 192, 121-132.	0.7	21
134	Modulating Fitts's Law: the effect of disappearing allocentric information. <i>Experimental Brain Research</i> , 2009, 194, 571-576.	0.7	15
135	Effects of luminance change in preview search: Offsets and onsets can be concurrently prioritized but not in isolation. <i>Acta Psychologica</i> , 2009, 130, 260-267.	0.7	7
136	Learning to ignore: Acquisition of sustained attentional suppression. <i>Psychonomic Bulletin and Review</i> , 2009, 16, 418-423.	1.4	17
137	Saccadic Trajectories Receive Online Correction: Evidence for a Feedback-Based System of Oculomotor Control. <i>Journal of Motor Behavior</i> , 2009, 41, 117-127.	0.5	32
138	Repelling the young and attracting the old: Examining age-related differences in saccade trajectory deviations. <i>Psychology and Aging</i> , 2009, 24, 163-168.	1.4	22
139	Motivationally significant stimuli show visual prior entry: Evidence for attentional capture. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2009, 35, 1032-1042.	0.7	66
140	Choosing the fastest movement: perceiving speed-accuracy tradeoffs. <i>Experimental Brain Research</i> , 2008, 185, 681-688.	0.7	12
141	Objects do not aid inhibition of return in crossing the vertical meridian. <i>Psychological Research</i> , 2008, 72, 176-182.	1.0	4
142	Better late than never: how onsets and offsets influence prior entry and exit. <i>Psychological Research</i> , 2008, 72, 443-450.	1.0	5
143	Time flies like an arrow: Space-time compatibility effects suggest the use of a mental timeline. <i>Psychonomic Bulletin and Review</i> , 2008, 15, 426-430.	1.4	160
144	Testing whether gaze cues and arrow cues produce reflexive or volitional shifts of attention. <i>Psychonomic Bulletin and Review</i> , 2008, 15, 1148-1153.	1.4	47
