#	ARTICLE	IF	CITATIONS
1	Distribution of the Vitamin D receptor and 1 α -hydroxylase in human brain. <i>Journal of Chemical Neuroanatomy</i> , 2005, 29, 21-30.	2.1	1,208
2	Vitamin D, effects on brain development, adult brain function and the links between low levels of vitamin D and neuropsychiatric disease. <i>Frontiers in Neuroendocrinology</i> , 2013, 34, 47-64.	5.2	546
3	Vitamin d3 and brain development. <i>Neuroscience</i> , 2003, 118, 641-653.	2.3	508
4	Neonatal Vitamin D Status and Risk of Schizophrenia. <i>Archives of General Psychiatry</i> , 2010, 67, 889.	12.3	315
5	1,25-Dihydroxyvitamin D3 induces nerve growth factor, promotes neurite outgrowth and inhibits mitosis in embryonic rat hippocampal neurons. <i>Neuroscience Letters</i> , 2003, 343, 139-143.	2.1	313
6	Developmental Vitamin D3 deficiency alters the adult rat brain. <i>Brain Research Bulletin</i> , 2005, 65, 141-148.	3.0	245
7	Dopamine, psychosis and schizophrenia: the widening gap between basic and clinical neuroscience. <i>Translational Psychiatry</i> , 2018, 8, 30.	4.8	224
8	A sensitive LC/MS/MS assay of 25OH vitamin D3 and 25OH vitamin D2 in dried blood spots. <i>Clinica Chimica Acta</i> , 2009, 403, 145-151.	1.1	214
9	Genome-wide association study identifies 143 loci associated with 25 hydroxyvitamin D concentration. <i>Nature Communications</i> , 2020, 11, 1647.	12.8	211
10	Vitamin D and the brain. <i>Best Practice and Research in Clinical Endocrinology and Metabolism</i> , 2011, 25, 657-669.	4.7	210
11	Developmental vitamin D deficiency causes abnormal brain development. <i>Psychoneuroendocrinology</i> , 2009, 34, S247-S257.	2.7	203
12	The High Prevalence of Vitamin D Insufficiency across Australian Populations Is Only Partly Explained by Season and Latitude. <i>Environmental Health Perspectives</i> , 2007, 115, 1132-1139.	6.0	198
13	A systematic review of the association between common single nucleotide polymorphisms and 25-hydroxyvitamin D concentrations. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2010, 121, 471-477.	2.5	195
14	Developmental Vitamin D Deficiency and Risk of Schizophrenia: A 10-Year Update. <i>Schizophrenia Bulletin</i> , 2010, 36, 1073-1078.	4.3	192
15	The effects of vitamin D on brain development and adult brain function. <i>Molecular and Cellular Endocrinology</i> , 2011, 347, 121-127.	3.2	177
16	Advanced Paternal Age Is Associated with Impaired Neurocognitive Outcomes during Infancy and Childhood. <i>PLoS Medicine</i> , 2009, 6, e1000040.	8.4	174
17	Developmental Vitamin D Deficiency Alters MK 801-Induced Hyperlocomotion in the Adult Rat: An Animal Model of Schizophrenia. <i>Biological Psychiatry</i> , 2006, 60, 591-596.	1.3	169
18	The neurodevelopmental hypothesis of schizophrenia: a review of recent developments. <i>Annals of Medicine</i> , 2003, 35, 86-93.	3.8	168

#	ARTICLE	IF	CITATIONS
19	Developmental vitamin D deficiency alters brain protein expression in the adult rat: Implications for neuropsychiatric disorders. <i>Proteomics</i> , 2007, 7, 769-780.	2.2	166
20	Low maternal vitamin D as a risk factor for schizophrenia: a pilot study using banked sera. <i>Schizophrenia Research</i> , 2003, 63, 73-78.	2.0	163
21	Behavioural characterization of Vitamin D receptor knockout mice. <i>Behavioural Brain Research</i> , 2005, 157, 299-308.	2.2	161
22	Vitamin D and the brain: Genomic and non-genomic actions. <i>Molecular and Cellular Endocrinology</i> , 2017, 453, 131-143.	3.2	157
23	Transient prenatal vitamin D deficiency is associated with subtle alterations in learning and memory functions in adult rats. <i>Behavioural Brain Research</i> , 2005, 161, 306-312.	2.2	156
24	Developmental vitamin D deficiency alters the expression of genes encoding mitochondrial, cytoskeletal and synaptic proteins in the adult rat brain. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2007, 103, 538-545.	2.5	153
25	The vitamin D receptor in dopamine neurons; its presence in human substantia nigra and its ontogenesis in rat midbrain. <i>Neuroscience</i> , 2013, 236, 77-87.	2.3	148
26	Effects of Vitamin D Supplementation on Cognitive and Emotional Functioning in Young Adults – A Randomised Controlled Trial. <i>PLoS ONE</i> , 2011, 6, e25966.	2.5	146
27	Transient prenatal Vitamin D deficiency is associated with hyperlocomotion in adult rats. <i>Behavioural Brain Research</i> , 2004, 154, 549-555.	2.2	131
28	Autism spectrum disorder and low vitamin D at birth: a sibling control study. <i>Molecular Autism</i> , 2015, 6, 3.	4.9	130
29	Vitamin D insufficiency is associated with impaired vascular endothelial and smooth muscle function and hypertension in young rats. <i>Journal of Physiology</i> , 2011, 589, 4777-4786.	2.9	128
30	Vitamin D deficiency during various stages of pregnancy in the rat; its impact on development and behaviour in adult offspring. <i>Psychoneuroendocrinology</i> , 2007, 32, 227-234.	2.7	127
31	Developmental vitamin D deficiency alters adult behaviour in 129/SvJ and C57BL/6J mice. <i>Behavioural Brain Research</i> , 2008, 187, 343-350.	2.2	127
32	Maternal vitamin D concentrations during pregnancy, fetal growth patterns, and risks of adverse birth outcomes. <i>American Journal of Clinical Nutrition</i> , 2016, 103, 1514-1522.	4.7	127
33	Vitamin D insufficiency in south-east Queensland. <i>Medical Journal of Australia</i> , 2001, 174, 150-151.	1.7	126
34	Maternal vitamin D depletion alters neurogenesis in the developing rat brain. <i>International Journal of Developmental Neuroscience</i> , 2007, 25, 227-232.	1.6	126
35	Maternal vitamin D3 deprivation and the regulation of apoptosis and cell cycle during rat brain development. <i>Developmental Brain Research</i> , 2004, 153, 61-68.	1.7	123
36	No Association between Serum 25-Hydroxyvitamin D₃ Level and Performance on Psychometric Tests in NHANES III. <i>Neuroepidemiology</i> , 2007, 29, 49-54.	2.3	122

#	ARTICLE	IF	CITATIONS
37	Gestational vitamin D deficiency and autism-related traits: the Generation R Study. <i>Molecular Psychiatry</i> , 2018, 23, 240-246.	7.9	120
38	Adult vitamin D deficiency leads to behavioural and brain neurochemical alterations in C57BL/6J and BALB/c mice. <i>Behavioural Brain Research</i> , 2013, 241, 120-131.	2.2	115
39	Neuronal calcium-binding proteins and schizophrenia. <i>Schizophrenia Research</i> , 2002, 57, 27-34.	2.0	114
40	Vitamin D3â€™s implications for brain development. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2004, 89-90, 557-560.	2.5	113
41	Developmental vitamin D deficiency alters dopamine-mediated behaviors and dopamine transporter function in adult female rats. <i>Psychopharmacology</i> , 2010, 208, 159-168.	3.1	107
42	Developmental vitamin D deficiency alters dopamine turnover in neonatal rat forebrain. <i>Neuroscience Letters</i> , 2009, 461, 155-158.	2.1	104
43	Vitamin D in fetal brain development. <i>Seminars in Cell and Developmental Biology</i> , 2011, 22, 629-636.	5.0	104
44	Vitamin D regulates tyrosine hydroxylase expression: N-cadherin a possible mediator. <i>Neuroscience</i> , 2015, 304, 90-100.	2.3	96
45	Interferon-Î² and serum 25-hydroxyvitamin D interact to modulate relapse risk in MS. <i>Neurology</i> , 2012, 79, 254-260.	1.1	90
46	Intracellular distribution of the vitamin D receptor in the brain: Comparison with classic target tissues and redistribution with development. <i>Neuroscience</i> , 2014, 268, 1-9.	2.3	90
47	Differential expression of vitamin D-associated enzymes and receptors in brain cell subtypes. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2018, 177, 129-134.	2.5	90
48	Vitamin D and the brain: Key questions for future research. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2015, 148, 305-309.	2.5	88
49	Vitamin D signaling and the differentiation of developing dopamine systems. <i>Neuroscience</i> , 2016, 333, 193-203.	2.3	88
50	Vitamin D treatment during pregnancy prevents autism-related phenotypes in a mouse model of maternal immune activation. <i>Molecular Autism</i> , 2017, 8, 9.	4.9	88
51	Vitamin D: the neglected neurosteroid?. <i>Trends in Neurosciences</i> , 2001, 24, 570-571.	8.6	86
52	Gestational vitamin D deficiency and autism spectrum disorder. <i>BJPsych Open</i> , 2017, 3, 85-90.	0.7	86
53	Identification of potentially neurotoxic pyridinium metabolite in the urine of schizophrenic patients treated with haloperidol. <i>Biochemical and Biophysical Research Communications</i> , 1991, 181, 573-578.	2.1	83
54	Maternal vitamin D deficiency alters the expression of genes involved in dopamine specification in the developing rat mesencephalon. <i>Neuroscience Letters</i> , 2010, 486, 220-223.	2.1	80

#	ARTICLE	IF	CITATIONS
55	Schizophrenia: do all roads lead to dopamine or is this where they start? Evidence from two epidemiologically informed developmental rodent models. <i>Translational Psychiatry</i> , 2012, 2, e81-e81.	4.8	80
56	The Neurodevelopmental Hypothesis of Schizophrenia. <i>Psychiatric Clinics of North America</i> , 2012, 35, 571-584.	1.3	74
57	The association between neonatal vitamin D status and risk of schizophrenia. <i>Scientific Reports</i> , 2018, 8, 17692.	3.3	73
58	The utility of neonatal dried blood spots for the assessment of neonatal vitamin D status. <i>Paediatric and Perinatal Epidemiology</i> , 2010, 24, 303-308.	1.7	69
59	Prevalence and predictors of vitamin D deficiency based on maternal mid-gestation and neonatal cord bloods: The Generation R Study. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2016, 164, 161-167.	2.5	68
60	Schizophrenia, vitamin D, and brain development. <i>International Review of Neurobiology</i> , 2004, 59, 351-380.	2.0	62
61	Combined prenatal and chronic postnatal vitamin D deficiency in rats impairs prepulse inhibition of acoustic startle. <i>Physiology and Behavior</i> , 2004, 81, 651-655.	2.1	62
62	Developmental vitamin D (DVD) deficiency in the rat alters adult behaviour independently of HPA function. <i>Psychoneuroendocrinology</i> , 2006, 31, 958-964.	2.7	61
63	Neonatal vitamin D status and risk of multiple sclerosis. <i>Annals of Neurology</i> , 2014, 76, 338-346.	5.3	60
64	Developmental vitamin D deficiency and autism: Putative pathogenic mechanisms. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2018, 175, 108-118.	2.5	60
65	Developmental vitamin D and autism spectrum disorders: findings from the Stockholm Youth Cohort. <i>Molecular Psychiatry</i> , 2021, 26, 1578-1588.	7.9	60
66	Big ideas for small brains: what can psychiatry learn from worms, flies, bees and fish?. <i>Molecular Psychiatry</i> , 2011, 16, 7-16.	7.9	59
67	Measurements of 25-Hydroxyvitamin D Concentrations in Archived Dried Blood Spots Are Reliable and Accurately Reflect Those in Plasma. <i>Journal of Clinical Endocrinology and Metabolism</i> , 2014, 99, 3319-3324.	3.6	59
68	Cognitive performance and response inhibition in developmentally vitamin D (DVD)-deficient rats. <i>Behavioural Brain Research</i> , 2013, 242, 47-53.	2.2	55
69	Vitamin D regulation of GDNF/Ret signaling in dopaminergic neurons. <i>FASEB Journal</i> , 2018, 32, 819-828.	0.5	54
70	Quantitative analysis of two pyridinium metabolites of haloperidol in patients with schizophrenia. <i>Clinical Pharmacology and Therapeutics</i> , 1994, 56, 512-520.	4.7	53
71	The Impact of Adult Vitamin D Deficiency on Behaviour and Brain Function in Male Sprague-Dawley Rats. <i>PLoS ONE</i> , 2013, 8, e71593.	2.5	53
72	Vitamin D and schizophrenia: 20 years on. <i>Molecular Psychiatry</i> , 2021, 26, 2708-2720.	7.9	51

#	ARTICLE	IF	CITATIONS
73	Developmental vitamin D deficiency alters multiple neurotransmitter systems in the neonatal rat brain. <i>International Journal of Developmental Neuroscience</i> , 2017, 62, 1-7.	1.6	50
74	The association between birth weight, season of birth and latitude. <i>Annals of Human Biology</i> , 2005, 32, 547-559.	1.0	49
75	Developmental vitamin D deficiency alters MK-801-induced behaviours in adult offspring. <i>Psychopharmacology</i> , 2012, 220, 455-463.	3.1	49
76	Hyperlocomotion associated with transient prenatal vitamin D deficiency is ameliorated by acute restraint. <i>Behavioural Brain Research</i> , 2006, 174, 119-124.	2.2	48
77	Infection with the wMel and wMelPop strains of <i>Wolbachia</i> leads to higher levels of melanization in the hemolymph of <i>Drosophila melanogaster</i> , <i>Drosophila simulans</i> and <i>Aedes aegypti</i> . <i>Developmental and Comparative Immunology</i> , 2011, 35, 360-365.	2.3	48
78	Stereospecific reduction of haloperidol in human tissues. <i>Biochemical Pharmacology</i> , 1992, 44, 867-871.	4.4	47
79	<i>Wolbachia</i> Influences the Production of Octopamine and Affects <i>Drosophila</i> Male Aggression. <i>Applied and Environmental Microbiology</i> , 2015, 81, 4573-4580.	3.1	46
80	Formation of pyridinium species of haloperidol in human liver and brain. <i>Psychopharmacology</i> , 1996, 125, 214-219.	3.1	45
81	Vitamin D receptor expression in the embryonic rat brain. <i>Neuroscience Research Communications</i> , 2003, 33, 63-71.	0.2	45
82	Advanced paternal age is associated with alterations in discrete behavioural domains and cortical neuroanatomy of C57BL/6J mice. <i>European Journal of Neuroscience</i> , 2010, 31, 556-564.	2.6	45
83	Distribution of 25-hydroxyvitamin D3 in dried blood spots and implications for its quantitation by tandem mass spectrometry. <i>Journal of Chromatography B: Analytical Technologies in the Biomedical and Life Sciences</i> , 2012, 901, 47-52.	2.3	45
84	Maternal Vitamin D Prevents Abnormal Dopaminergic Development and Function in a Mouse Model of Prenatal Immune Activation. <i>Scientific Reports</i> , 2018, 8, 9741.	3.3	45
85	Two pyridinium metabolites of haloperidol are present in the brain of patients at post-mortem. <i>Life Sciences</i> , 1997, 60, 529-534.	4.3	42
86	Vitamin D: Brain and Behavior. <i>JBMR Plus</i> , 2021, 5, e10419.	2.7	42
87	Increased de novo copy number variants in the offspring of older males. <i>Translational Psychiatry</i> , 2011, 1, e34-e34.	4.8	41
88	Vitamin D and autism: does skin colour modify risk?. <i>Acta Paediatrica, International Journal of Paediatrics</i> , 2010, 99, 645-647.	1.5	39
89	Associations of maternal and fetal 25-hydroxyvitamin D levels with childhood lung function and asthma: the Generation R Study. <i>Clinical and Experimental Allergy</i> , 2016, 46, 337-346.	2.9	38
90	Altered dopamine ontogeny in the developmentally vitamin D deficient rat and its relevance to schizophrenia. <i>Frontiers in Cellular Neuroscience</i> , 2013, 7, 111.	3.7	37

#	ARTICLE	IF	CITATIONS
91	Minimizing Matrix Effects for the Accurate Quantification of 25-Hydroxyvitamin D Metabolites in Dried Blood Spots by LC-MS/MS. <i>Clinical Chemistry</i> , 2016, 62, 639-646.	3.2	37
92	Protein Expression in the Nucleus Accumbens of Rats Exposed to Developmental Vitamin D Deficiency. <i>PLoS ONE</i> , 2008, 3, e2383.	2.5	35
93	Neuroanatomy and psychomimetic-induced locomotion in C57BL/6J and 129/X1Svj mice exposed to developmental vitamin D deficiency. <i>Behavioural Brain Research</i> , 2012, 230, 125-131.	2.2	34
94	Newborn vitamin D levels in relation to autism spectrum disorders and intellectual disability: A caseâ€“control study in california. <i>Autism Research</i> , 2019, 12, 989-998.	3.8	32
95	Attentional Processing in C57BL/6J Mice Exposed to Developmental Vitamin D Deficiency. <i>PLoS ONE</i> , 2012, 7, e35896.	2.5	31
96	Neonatal vitamin D status in relation to autism spectrum disorder and developmental delay in the CHARGE caseâ€“control study. <i>Autism Research</i> , 2019, 12, 976-988.	3.8	30
97	Developmental vitamin D3 deficiency induces alterations in immune organ morphology and function in adult offspring. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2010, 121, 239-242.	2.5	29
98	The w MelPop strain of Wolbachia interferes with dopamine levels in <i>Aedes aegypti</i> . <i>Parasites and Vectors</i> , 2011, 4, 28.	2.5	29
99	Developmental Vitamin D Deficiency Produces Behavioral Phenotypes of Relevance to Autism in an Animal Model. <i>Nutrients</i> , 2019, 11, 1187.	4.1	29
100	Season of birth, neonatal vitamin D status, and cardiovascular disease risk at 35 y of age: a cohort study from Sweden. <i>American Journal of Clinical Nutrition</i> , 2014, 99, 472-478.	4.7	28
101	Rhinoviruses significantly affect day-to-day respiratory symptoms of children with asthma. <i>Journal of Allergy and Clinical Immunology</i> , 2015, 135, 663-669.e12.	2.9	27
102	Neonatal vitamin D status and childhood peanut allergy: a pilot study. <i>Annals of Allergy, Asthma and Immunology</i> , 2012, 109, 324-328.	1.0	25
103	A Collaborative Analysis of Individual Participant Data from 19 Prospective Studies Assesses Circulating Vitamin D and Prostate Cancer Risk. <i>Cancer Research</i> , 2019, 79, 274-285.	0.9	25
104	How do established developmental risk-factors for schizophrenia change the way the brain develops?. <i>Translational Psychiatry</i> , 2021, 11, 158.	4.8	24
105	Determination of haloperidol and reduced haloperidol in the plasma and blood of patients on depot haloperidol. <i>Psychopharmacology</i> , 1992, 106, 268-274.	3.1	23
106	Haloperidol and its tetrahydropyridine derivative (HPTP) are metabolized to potentially neurotoxic pyridinium species in the baboon. <i>Life Sciences</i> , 1996, 59, 1473-1482.	4.3	23
107	Low vitamin D concentration exacerbates adult brain dysfunction. <i>American Journal of Clinical Nutrition</i> , 2013, 97, 907-908.	4.7	23
108	Developmental Vitamin D (DVD) Deficiency Reduces Nurr1 and TH Expression in Post-mitotic Dopamine Neurons in Rat Mesencephalon. <i>Molecular Neurobiology</i> , 2018, 55, 2443-2453.	4.0	23

#	ARTICLE	IF	CITATIONS
109	Ontogeny of small RNA in the regulation of mammalian brain development. <i>BMC Genomics</i> , 2014, 15, 777.	2.8	22
110	Heritability of Transforming Growth Factor- β 1 and Tumor Necrosis Factor-Receptor Type 1 Expression and Vitamin D Levels in Healthy Adolescent Twins. <i>Twin Research and Human Genetics</i> , 2015, 18, 28-35.	0.6	22
111	Transient Dysregulation of Dopamine Signaling in a Developing Drosophila Arousal Circuit Permanently Impairs Behavioral Responsiveness in Adults. <i>Frontiers in Psychiatry</i> , 2017, 8, 22.	2.6	22
112	The placental immune response is dysregulated developmentally vitamin D deficient rats: Relevance to autism. <i>Journal of Steroid Biochemistry and Molecular Biology</i> , 2018, 180, 73-80.	2.5	22
