#	ARTICLE	IF	CITATIONS
1	Developing, monitoring, and reporting of fidelity in aphasia trials: core recommendations from the collaboration of aphasia trialists (CATs) trials for aphasia panel. <i>Aphasiology</i> , 2023, 37, 1733-1755.	1.4	3
2	Operationalising treatment success in aphasia rehabilitation. <i>Aphasiology</i> , 2023, 37, 1693-1732.	1.4	9
3	When words first fail: Predicting the emergence of primary progressive aphasia variants from unclassifiable anomie performance in early disease. <i>Aphasiology</i> , 2023, 37, 1173-1185.	1.4	2
4	Application of the dual stream model to neurodegenerative disease: evidence from a multivariate classification tool in primary progressive aphasia. <i>Aphasiology</i> , 2022, 36, 618-647.	1.4	10
5	Neural regions underlying object and action naming: complementary evidence from acute stroke and primary progressive aphasia. <i>Aphasiology</i> , 2022, 36, 732-760.	1.4	20
6	Executive control deficits and lesion correlates in acute left hemisphere stroke survivors with and without aphasia. <i>Brain Imaging and Behavior</i> , 2022, 16, 868-877.	1.1	6
7	Disruptions of the Human Connectome Associated With Hemispatial Neglect. <i>Neurology</i> , 2022, 98, e107-e114.	1.5	14
8	Neural correlates of syntactic comprehension: A longitudinal study. <i>Brain and Language</i> , 2022, 225, 105068.	0.8	1
9	Hyperintense vessels on imaging account for neurological function independent of lesion volume in acute ischemic stroke. <i>NeuroImage: Clinical</i> , 2022, 34, 102991.	1.4	5
10	Simultaneous Hemodynamic and Structural Imaging of Ischemic Stroke With Magnetic Resonance Fingerprinting Arterial Spin Labeling. <i>Stroke</i> , 2022, 53, 2016-2025.	1.0	6
11	Various tests of left neglect are associated with distinct territories of hypoperfusion in acute stroke. <i>Brain Communications</i> , 2022, 4, fcac064.	1.5	8
12	The Impact of Mean Arterial Pressure and Volume Contraction in With Acute Ischemic Stroke. <i>Frontiers in Neurology</i> , 2022, 13, 766305.	1.1	2
13	Progressive Crossed Cerebellar Wallerian Degeneration After Hemispheric Infarct. <i>Stroke</i> , 2022, 53, STROKEAHA122038915.	1.0	1
14	Neural Correlates of Letter and Semantic Fluency in Primary Progressive Aphasia. <i>Brain Sciences</i> , 2022, 12, 1.	1.1	16
15	Transcranial Direct Current Stimulation Paired With Verb Network Strengthening Treatment Improves Verb Naming in Primary Progressive Aphasia: A Case Series. <i>American Journal of Speech-Language Pathology</i> , 2022, 31, 1736-1754.	0.9	2
16	Dissociable language and executive control deficits and recovery in post-stroke aphasia: An exploratory observational and case series study. <i>Neuropsychologia</i> , 2022, 172, 108270.	0.7	3
17	Arterial Spin Labeling technique and clinical applications of the intracranial compartment in stroke and stroke mimics - A case-based review. <i>Neuroradiology Journal</i> , 2022, 35, 437-453.	0.6	3
18	The Wernicke conundrum revisited: evidence from connectome-based lesion-symptom mapping. <i>Brain</i> , 2022, 145, 3916-3930.	3.7	12

#	ARTICLE	IF	CITATIONS
19	No evidence of impediment by three common classes of prescription drugs to post-stroke aphasia recovery in a retrospective longitudinal sample. <i>PLoS ONE</i> , 2022, 17, e0270135.	1.1	3
20	Differences in linguistic cohesion within the first year following right- and left-hemisphere lesions. <i>Aphasiology</i> , 2021, 35, 357-371.	1.4	17
21	White Matter Integrity Predicts Electrical Stimulation (tDCS) and Language Therapy Effects in Primary Progressive Aphasia. <i>Neurorehabilitation and Neural Repair</i> , 2021, 35, 44-57.	1.4	22
22	A double dissociation between plural and possessive "s": Evidence from the Morphosyntactic Generation test. <i>Cognitive Neuropsychology</i> , 2021, 38, 116-123.	0.4	4
23	Automatic Subtyping of Individuals with Primary Progressive Aphasia. <i>Journal of Alzheimer's Disease</i> , 2021, 79, 1185-1194.	1.2	13
24	One cat, two cats, red cat, blue cats: eliciting morphemes from individuals with primary progressive aphasia. <i>Aphasiology</i> , 2021, 35, 1611-1622.	1.4	5
25	Explicit Training to Improve Affective Prosody Recognition in Adults with Acute Right Hemisphere Stroke. <i>Brain Sciences</i> , 2021, 11, 667.	1.1	3
26	Cardiac Structure and Function Is Associated With Hemispatial Neglect Severity. <i>Frontiers in Neurology</i> , 2021, 12, 666257.	1.1	1
27	Treatment of post-stroke aphasia: A narrative review for stroke neurologists. <i>International Journal of Stroke</i> , 2021, 16, 1002-1008.	2.9	12
28	Stroke Recurrence and Its Relationship With Language Abilities. <i>Journal of Speech, Language, and Hearing Research</i> , 2021, 64, 2022-2037.	0.7	7
29	Characterizing subtypes and neural correlates of receptive aprosodia in acute right hemisphere stroke. <i>Cortex</i> , 2021, 141, 36-54.	1.1	9
30	Lesion loci of impaired affective prosody: A systematic review of evidence from stroke. <i>Brain and Cognition</i> , 2021, 152, 105759.	0.8	9
31	Thalamic Nuclei and Thalamocortical Pathways After Left Hemispheric Stroke and Their Association with Picture Naming. <i>Brain Connectivity</i> , 2021, 11, 553-565.	0.8	12
32	Independent contributions of structural and functional connectivity: Evidence from a stroke model. <i>Network Neuroscience</i> , 2021, 5, 911-928.	1.4	4
33	Neural bases of elements of syntax during speech production in patients with aphasia. <i>Brain and Language</i> , 2021, 222, 105025.	0.8	3
34	Machine learning-based multimodal prediction of language outcomes in chronic aphasia. <i>Human Brain Mapping</i> , 2021, 42, 1682-1698.	1.9	29
35	Task performance to discriminate among variants of primary progressive aphasia. <i>Cortex</i> , 2021, 145, 201-211.	1.1	10
36	Written Discourse Task Helps to Identify Progression from Mild Cognitive Impairment to Dementia. <i>Dementia and Geriatric Cognitive Disorders</i> , 2021, 50, 446-453.	0.7	1

#	ARTICLE	IF	CITATIONS
37	Deep learning-based detection and segmentation of diffusion abnormalities in acute ischemic stroke. <i>Communications Medicine</i> , 2021, 1, .	1.9	24
38	Protocol for Escitalopram and Language Intervention for Subacute Aphasia (ELISA): A randomized, double blind, placebo-controlled trial. <i>PLoS ONE</i> , 2021, 16, e0261474.	1.1	5
39	Leukoaraiosis severity predicts rate of decline in primary progressive aphasia. <i>Aphasiology</i> , 2020, 34, 365-375.	1.4	7
40	Brain volumes as predictors of tDCS effects in primary progressive aphasia. <i>Brain and Language</i> , 2020, 200, 104707.	0.8	31
41	MR fingerprinting ASL: Sequence characterization and comparison with dynamic susceptibility contrast (DSC) MRI. <i>NMR in Biomedicine</i> , 2020, 33, e4202.	1.6	11
42	Brain Damage Associated with Impaired Sentence Processing in Acute Aphasia. <i>Journal of Cognitive Neuroscience</i> , 2020, 32, 256-271.	1.1	20
43	Visuomotor figure construction and visual figure delayed recall and recognition in primary progressive aphasia. <i>Aphasiology</i> , 2020, 34, 1456-1470.	1.4	10
44	Baseline MRI associates with later naming status in primary progressive aphasia. <i>Brain and Language</i> , 2020, 201, 104723.	0.8	4
45	Cognitive and language performance predicts effects of spelling intervention and tDCS in Primary Progressive Aphasia. <i>Cortex</i> , 2020, 124, 66-84.	1.1	22
46	Progressive supranuclear palsy and pawpaw. <i>Neurology: Clinical Practice</i> , 2020, 10, e17-e18.	0.8	1
47	Right hemisphere ventral stream for emotional prosody identification. <i>Neurology</i> , 2020, 94, e1013-e1020.	1.5	27
48	Right Hemispheric Homologous Language Pathways Negatively Predicts Poststroke Naming Recovery. <i>Stroke</i> , 2020, 51, 1002-1005.	1.0	26
49	Naming errors and dysfunctional tissue metrics predict language recovery after acute left hemisphere stroke. <i>Neuropsychologia</i> , 2020, 148, 107651.	0.7	12
50	Is Aphasia Treatment Beneficial for the Elderly? A Review of Recent Evidence. <i>Current Physical Medicine and Rehabilitation Reports</i> , 2020, 8, 478-492.	0.3	1
51	Developmental and degenerative deficiencies in the language network. <i>Neurology</i> , 2020, 95, 281-282.	1.5	0
52	Ethical and Practical Challenges of the Communication and Behavioral Manifestations of Primary Progressive Aphasia. <i>Seminars in Speech and Language</i> , 2020, 41, 249-256.	0.5	3
53	Developments in treating the nonmotor symptoms of stroke. <i>Expert Review of Neurotherapeutics</i> , 2020, 20, 567-576.	1.4	10
54	Grammatical ability predicts relative action naming impairment in primary progressive aphasia. <i>Aphasiology</i> , 2020, 34, 664-674.	1.4	5

#	ARTICLE	IF	CITATIONS
55	The role of microstructural integrity of major language pathways in narrative speech in the first year after stroke. <i>Journal of Stroke and Cerebrovascular Diseases</i> , 2020, 29, 105078.	0.7	12
56	Influence of age, lesion volume, and damage to dorsal versus ventral streams to viewer- and stimulus-centered hemispatial neglect in acute right hemisphere stroke. <i>Cortex</i> , 2020, 126, 73-82.	1.1	5
57	Developing, Implementing, and Improving Assessment and Treatment Fidelity in Clinical Aphasia Research. <i>American Journal of Speech-Language Pathology</i> , 2020, 29, 286-298.	0.9	25
58	Cerebellar neuromodulation improves naming in post-stroke aphasia. <i>Brain Communications</i> , 2020, 2, fcaa179.	1.5	33
59	Across diagnoses, naming errors reflect the location of damage. <i>Neurology</i> , 2020, 95, 897-898.	1.5	1
60	Interrogating cortical function with transcranial magnetic stimulation: insights from neurodegenerative disease and stroke. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2019, 90, 47-57.	0.9	29
61	Neuroanatomical structures supporting lexical diversity, sophistication, and phonological word features during discourse. <i>NeuroImage: Clinical</i> , 2019, 24, 101961.	1.4	11
62	International Collaborations Are Essential for Stroke. <i>Stroke</i> , 2019, 50, 2993-2994.	1.0	1
63	Neural structures supporting spontaneous and assisted (entrained) speech fluency. <i>Brain</i> , 2019, 142, 3951-3962.	3.7	12
64	Neural processing critical for distinguishing between speech sounds. <i>Brain and Language</i> , 2019, 197, 104677.	0.8	7
65	Long-range fibre damage in small vessel brain disease affects aphasia severity. <i>Brain</i> , 2019, 142, 3190-3201.	3.7	40
66	Advances and Innovations in Aphasia Treatment Trials. <i>Stroke</i> , 2019, 50, 2977-2984.	1.0	31
67	Cortical and structural connectivity damage correlated with impaired syntactic processing in aphasia. <i>Human Brain Mapping</i> , 2019, 40, 2153-2173.	1.9	67
68	Distinguishing logopenic from semantic & nonfluent variant primary progressive aphasia: Patterns of linguistic and behavioral correlations. <i>Neurocase</i> , 2019, 25, 98-105.	0.2	8
69	“The effect of tDCS on functional connectivity in primary progressive aphasia” <i>NeuroImage: Clinical</i> , volume 19 (2018), pages 703-715. <i>NeuroImage: Clinical</i> , 2019, 22, 101734.	1.4	3
70	Evaluation of cerebrovascular reserve in patients with cerebrovascular diseases using resting-state MRI: A feasibility study. <i>Magnetic Resonance Imaging</i> , 2019, 59, 46-52.	1.0	34
71	Stealing Cookies in the Twenty-First Century: Measures of Spoken Narrative in Healthy Versus Speakers With Aphasia. <i>American Journal of Speech-Language Pathology</i> , 2019, 28, 321-329.	0.9	41
72	Genetic analysis of neurodegenerative diseases in a pathology cohort. <i>Neurobiology of Aging</i> , 2019, 76, 214.e1-214.e9.	1.5	25

#	ARTICLE	IF	CITATIONS
73	Describing Phonological Paraphasias in Three Variants of Primary Progressive Aphasia. <i>American Journal of Speech-Language Pathology</i> , 2018, 27, 336-349.	0.9	18
74	Neural Mechanisms of Swallowing Dysfunction and Apraxia of Speech in Acute Stroke. <i>Dysphagia</i> , 2018, 33, 610-615.	1.0	7
75	Pilot study of volume contracted state and hospital outcome after stroke. <i>Neurology: Clinical Practice</i> , 2018, 8, 21-26.	0.8	10
76	The eyes reveal uncertainty about object distinctions in semantic variant primary progressive aphasia. <i>Cortex</i> , 2018, 103, 372-381.	1.1	14
77	Predicting recovery in acute poststroke aphasia. <i>Annals of Neurology</i> , 2018, 83, 612-622.	2.8	104
78	Impaired Recognition of Emotional Faces after Stroke Involving Right Amygdala or Insula. <i>Seminars in Speech and Language</i> , 2018, 39, 087-100.	0.5	35
79	Anatomy of aphasia revisited. <i>Brain</i> , 2018, 141, 848-862.	3.7	235
80	Regional Brain Dysfunction Associated with Semantic Errors in Comprehension. <i>Seminars in Speech and Language</i> , 2018, 39, 079-086.	0.5	2
81	Longitudinal imaging of reading and naming recovery after stroke. <i>Aphasiology</i> , 2018, 32, 839-854.	1.4	13
82	Pre-stroke employment results in better patient-reported outcomes after minor stroke. <i>Clinical Neurology and Neurosurgery</i> , 2018, 165, 38-42.	0.6	19
83	Selective impairments in components of affective prosody in neurologically impaired individuals. <i>Brain and Cognition</i> , 2018, 124, 29-36.	0.8	22
84	Editorial: Neuroimaging of Affective Empathy and Emotional Communication. <i>Frontiers in Neurology</i> , 2018, 9, 875.	1.1	3
85	That's right! Language comprehension beyond the left hemisphere. <i>Brain</i> , 2018, 141, 3280-3289.	3.7	1
86	Types of naming errors in chronic post-stroke aphasia are dissociated by dual stream axonal loss. <i>Scientific Reports</i> , 2018, 8, 14352.	1.6	32
87	The effect of tDCS on functional connectivity in primary progressive aphasia. <i>NeuroImage: Clinical</i> , 2018, 19, 703-715.	1.4	57
88	Patterns of decline in naming and semantic knowledge in primary progressive aphasia. <i>Aphasiology</i> , 2018, 32, 1010-1030.	1.4	31
89	Right Hemisphere Regions Critical for Expression of Emotion Through Prosody. <i>Frontiers in Neurology</i> , 2018, 9, 224.	1.1	39
90	Leukoaraiosis is independently associated with naming outcome in poststroke aphasia. <i>Neurology</i> , 2018, 91, e526-e532.	1.5	32

#	ARTICLE	IF	CITATIONS
91	Abstract WP158: Supervised, Self Administered Tablet Based Cognitive Assessment in Neurodegenerative Disorders. Stroke, 2018, 49, .	1.0	0
92	Recovery of orthographic processing after stroke: A longitudinal fMRI study. Cortex, 2017, 92, 103-118.	1.1	8
93	Brain regions essential for word comprehension: Drawing inferences from patients. Annals of Neurology, 2017, 81, 759-768.	2.8	35
94	The cart before the horse: When cognitive neuroscience precedes cognitive neuropsychology. Cognitive Neuropsychology, 2017, 34, 420-429.	0.4	5
95	Stroke of bad luck?. Neurocase, 2017, 23, 70-78.	0.2	3
96	Important considerations in lesion-symptom mapping: Illustrations from studies of word comprehension. Human Brain Mapping, 2017, 38, 2990-3000.	1.9	38
97	An update on medications and noninvasive brain stimulation to augment language rehabilitation in post-stroke aphasia. Expert Review of Neurotherapeutics, 2017, 17, 1091-1107.	1.4	42
98	Affective prosody in frontotemporal dementia. Neurology, 2017, 89, 644-645.	1.5	3
99	Temporal lobe networks supporting the comprehension of spoken words. Brain, 2017, 140, 2370-2380.	3.7	98
100	The relationship between baseline volume in temporal areas and post-treatment naming accuracy in primary progressive aphasia. Aphasiology, 2017, 31, 1059-1077.	1.4	16
101	Where are aphasia theory and management headed?. F1000Research, 2017, 6, 1038.	0.8	6
102	Differentiating between subtypes of primary progressive aphasia and mild cognitive impairment on a modified version of the Frontal Behavioral Inventory. PLoS ONE, 2017, 12, e0183212.	1.1	10
103	Mapping Language Networks Using the Structural and Dynamic Brain Connectomes. ENeuro, 2017, 4, ENEURO.0204-17.2017.	0.9	45
104	Imaging network level language recovery after left PCA stroke. Restorative Neurology and Neuroscience, 2016, 34, 473-489.	0.4	28
105	The association of insular stroke with lesion volume. NeuroImage: Clinical, 2016, 11, 41-45.	1.4	30
106	Picturing the Size and Site of Stroke With an Expanded National Institutes of Health Stroke Scale. Stroke, 2016, 47, 1459-1465.	1.0	46
107	Acute Ischemic Lesions Associated With Impairments in Expression and Recognition of Affective Prosody. Perspectives of the ASHA Special Interest Groups, 2016, 1, 82-95.	0.4	15
108	A rapidly progressive dementia case with pathological diagnosis of FTLD-UPS. Acta Neuropathologica, 2016, 132, 309-311.	3.9	0

#	ARTICLE	IF	CITATIONS
109	Next-generation sequencing reveals substantial genetic contribution to dementia with Lewy bodies. <i>Neurobiology of Disease</i> , 2016, 94, 55-62.	2.1	55
110	Neural bases of orthographic long-term memory and working memory in dysgraphia. <i>Brain</i> , 2016, 139, 588-604.	3.7	74
111	White matter tracts critical for recognition of sarcasm. <i>Neurocase</i> , 2016, 22, 22-29.	0.2	16
112	Cerebellar tDCS: A Novel Approach to Augment Language Treatment Post-stroke. <i>Frontiers in Human Neuroscience</i> , 2016, 10, 695.	1.0	48
113	Anosognosia for hemiplegia: The contributory role of right inferior frontal gyrus.. <i>Neuropsychology</i> , 2015, 29, 421-432.	1.0	22
114	Content-based image retrieval for brain MRI: An image-searching engine and population-based analysis to utilize past clinical data for future diagnosis. <i>NeuroImage: Clinical</i> , 2015, 7, 367-376.	1.4	34
