#	ARTICLE	IF	CITATIONS
1	When sinks become sources: Adaptive colonization in asexuals*. <i>Evolution; International Journal of Organic Evolution</i> , 2020, 74, 29-42.	1.1	7
2	Genetic Paths to Evolutionary Rescue and the Distribution of Fitness Effects Along Them. <i>Genetics</i> , 2020, 214, 493-510.	1.2	17
3	Dynamics of adaptation in an anisotropic phenotype-fitness landscape. <i>Nonlinear Analysis: Real World Applications</i> , 2020, 54, 103107.	0.9	9
4	Adaptation in General Temporally Changing Environments. <i>SIAM Journal on Applied Mathematics</i> , 2020, 80, 2420-2447.	0.8	8
5	Dynamics of fitness distributions in the presence of a phenotypic optimum: an integro-differential approach. <i>Nonlinearity</i> , 2019, 32, 3485-3522.	0.6	8
6	Population persistence under high mutation rate: From evolutionary rescue to lethal mutagenesis. <i>Evolution; International Journal of Organic Evolution</i> , 2019, 73, 1517-1532.	1.1	17
7	Evolutionary Rescue over a Fitness Landscape. <i>Genetics</i> , 2018, 209, 265-279.	1.2	39
8	Evolution of bacteria specialization along an antibiotic dose gradient. <i>Evolution Letters</i> , 2018, 2, 221-232.	1.6	13
9	Mathematical Properties of a Class of Integro-differential Models from Population Genetics. <i>SIAM Journal on Applied Mathematics</i> , 2017, 77, 1536-1561.	0.8	13
10	Fisher's geometrical model and the mutational patterns of antibiotic resistance across dose gradients. <i>Evolution; International Journal of Organic Evolution</i> , 2017, 71, 23-37.	1.1	37
11	Beneficial mutation-selection dynamics in finite asexual populations: a free boundary approach. <i>Scientific Reports</i> , 2017, 7, 17838.	1.6	2
12	The Nonstationary Dynamics of Fitness Distributions: Asexual Model with Epistasis and Standing Variation. <i>Genetics</i> , 2016, 204, 1541-1558.	1.2	29
13	A simple, semi-deterministic approximation to the distribution of selective sweeps in large populations. <i>Theoretical Population Biology</i> , 2015, 101, 40-46.	0.5	28
14	The fitness effect of mutations across environments: Fisher's geometrical model with multiple optima. <i>Evolution; International Journal of Organic Evolution</i> , 2015, 69, 1433-1447.	1.1	83
15	Evolutionary rescue: linking theory for conservation and medicine. <i>Evolutionary Applications</i> , 2014, 7, 1161-1179.	1.5	104
16	Fisher's Geometrical Model Emerges as a Property of Complex Integrated Phenotypic Networks. <i>Genetics</i> , 2014, 197, 237-255.	1.2	68
17	The probability of evolutionary rescue: towards a quantitative comparison between theory and evolution experiments. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2013, 368, 20120088.	1.8	99
18	The high-throughput yeast deletion fitness data and the theories of dominance. <i>Journal of Evolutionary Biology</i> , 2012, 25, 892-903.	0.8	20

#	ARTICLE	IF	CITATIONS
19	Fitness Landscapes: An Alternative Theory for the Dominance of Mutation. <i>Genetics</i> , 2011, 189, 923-937.	1.2	146
20	HOST GROWTH CONDITIONS INFLUENCE EXPERIMENTAL EVOLUTION OF LIFE HISTORY AND VIRULENCE OF A PARASITE WITH VERTICAL AND HORIZONTAL TRANSMISSION. <i>Evolution; International Journal of Organic Evolution</i> , 2010, 64, 2126-38.	1.1	38
21	FISHER'S MODEL AND THE GENOMICS OF ADAPTATION: RESTRICTED PLEIOTROPY, HETEROGENOUS MUTATION, AND PARALLEL EVOLUTION. <i>Evolution; International Journal of Organic Evolution</i> , 2010, 64, 3213-3231.	1.1	127
22	Lethal mutagenesis and evolutionary epidemiology. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2010, 365, 1953-1963.	1.8	36
23	Multivariate $Q < i > F < i > st$ Comparisons: A Neutrality Test for the Evolution of the G Matrix in Structured Populations. <i>Genetics</i> , 2008, 180, 2135-2149.	1.2	62
24	The Distribution of Beneficial and Fixed Mutation Fitness Effects Close to an Optimum. <i>Genetics</i> , 2008, 179, 907-916.	1.2	81
25	Effects of Selection and Drift on G Matrix Evolution in a Heterogeneous Environment: A Multivariate $Q < i > F < i > st$ Test With the Freshwater Snail <i>Galba truncatula</i> . <i>Genetics</i> , 2008, 180, 2151-2161.	1.2	25
26	Under Neutrality, $QST \approx FST$ When There Is Dominance in an Island Model. <i>Genetics</i> , 2007, 176, 1371-1374.	1.2	48
27	Distributions of epistasis in microbes fit predictions from a fitness landscape model. <i>Nature Genetics</i> , 2007, 39, 555-560.	9.4	195
28	THE FITNESS EFFECT OF MUTATIONS ACROSS ENVIRONMENTS: A SURVEY IN LIGHT OF FITNESS LANDSCAPE MODELS. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 2413.	1.1	104
29	A GENERAL MULTIVARIATE EXTENSION OF FISHER'S GEOMETRICAL MODEL AND THE DISTRIBUTION OF MUTATION FITNESS EFFECTS ACROSS SPECIES. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 893-907.	1.1	183
30	THE FITNESS EFFECT OF MUTATIONS ACROSS ENVIRONMENTS: A SURVEY IN LIGHT OF FITNESS LANDSCAPE MODELS. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 2413-2427.	1.1	137
31	A GENERAL MULTIVARIATE EXTENSION OF FISHER'S GEOMETRICAL MODEL AND THE DISTRIBUTION OF MUTATION FITNESS EFFECTS ACROSS SPECIES. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 893.	1.1	60
32	Selection for Recombination in Structured Populations. <i>Genetics</i> , 2006, 172, 593-609.	1.2	89
33	A general multivariate extension of Fisher's geometrical model and the distribution of mutation fitness effects across species. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 893-907.	1.1	97
34	The fitness effect of mutations across environments: a survey in light of fitness landscape models. <i>Evolution; International Journal of Organic Evolution</i> , 2006, 60, 2413-27.	1.1	64
35	Do hairworms (Nematomorpha) manipulate the water seeking behaviour of their terrestrial hosts?. <i>Journal of Evolutionary Biology</i> , 2002, 15, 356-361.	0.8	208
