#	ARTICLE	IF	CITATIONS
1	Standards for Reporting Implementation Studies (StaRI) Statement. BMJ: British Medical Journal, 2017, 356, i6795.	2.4	621
2	Effectiveness of Physical Activity Advice and Prescription by Physicians in Routine Primary Care_{title>&A Cluster Randomized Trial}. Archives of Internal Medicine, 2009, 169, 694.	4.3	176
3	Effectiveness of physical activity promotion interventions in primary care: A review of reviews. Preventive Medicine, 2015, 76, S56-S67.	1.6	113
4	Is integration of healthy lifestyle promotion into primary care feasible? Discussion and consensus sessions between clinicians and researchers. BMC Health Services Research, 2008, 8, 213.	0.9	58
5	Targeting physical activity promotion in general practice: Characteristics of inactive patients and willingness to change. BMC Public Health, 2008, 8, 172.	1.2	50
6	Two-Year Longitudinal Analysis of a Cluster Randomized Trial of Physical Activity Promotion by General Practitioners. PLoS ONE, 2011, 6, e18363.	1.1	41
7	Predictors of long-term outcome of a smoking cessation programme in primary care. British Journal of General Practice, 2003, 53, 101-7.	0.7	32
8	Development and Content Validation of a Transcultural Instrument to Assess Organizational Readiness for Knowledge Translation in Healthcare Organizations: The OR4KT. International Journal of Health Policy and Management, 2018, 7, 791-797.	0.5	25
9	An evaluation of Spanish and English on-line information sources regarding pregnancy, birth and the postnatal period. Midwifery, 2018, 58, 19-26.	1.0	21
10	Consensus on priorities in maternal education: results of Delphi and nominal group technique approaches. BMC Pregnancy and Childbirth, 2019, 19, 264.	0.9	20
11	The implementation of health promotion in primary and community care: a qualitative analysis of the "Prescribe Vida Saludable"™ strategy. BMC Family Practice, 2017, 18, 23.	2.9	19
12	Supervised physical exercise to improve the quality of life of cancer patients: the EFICANCER randomised controlled trial. BMC Cancer, 2015, 15, 40.	1.1	17
13	Metric properties of the "prescribe healthy life" screening questionnaire to detect healthy behaviors: a cross-sectional pilot study. BMC Public Health, 2016, 16, 1228.	1.2	16
14	Feasibility of an implementation strategy for the integration of health promotion in routine primary care: a quantitative process evaluation. BMC Family Practice, 2017, 18, 24.	2.9	16
15	Framework for the establishment of a feasible, tailored and effective perinatal education programme. BMC Pregnancy and Childbirth, 2017, 17, 58.	0.9	16
16	Modelling innovative interventions for optimising healthy lifestyle promotion in primary health care: "Prescribe Vida Saludable" phase I research protocol. BMC Health Services Research, 2009, 9, 103.	0.9	14
17	Barriers and facilitators in the implementation of an evidence-based health promotion intervention in a primary care setting: a qualitative study. Journal of Health Organization and Management, 2021, 35, 349-367.	0.6	13
18	Collaborative modeling of an implementation strategy: a case study to integrate health promotion in primary and community care. BMC Research Notes, 2017, 10, 699.	0.6	12

#	ARTICLE	IF	CITATIONS
19	Validity and reliability of the Spanish version of the Organizational Readiness for Knowledge Translation (OR4KT) questionnaire. <i>Implementation Science</i> , 2017, 12, 128.	2.5	11
20	Effective translation of a type-2 diabetes primary prevention programme into routine primary care: The PreDE cluster randomised clinical trial. <i>Diabetes Research and Clinical Practice</i> , 2018, 139, 32-42.	1.1	8
21	Feasibility and effectiveness of the implementation of a primary prevention programme for type 2 diabetes in routine primary care practice: a phase IV cluster randomised clinical trial. <i>BMC Family Practice</i> , 2012, 13, 109.	2.9	6
22	Type-2 diabetes primary prevention program implemented in routine primary care: a process evaluation study. <i>Trials</i> , 2016, 17, 254.	0.7	6
23	Engaging primary care professionals in collaborative processes for optimising type 2 diabetes prevention practice: the PREDIAPS cluster randomised type II hybrid implementation trial. <i>Implementation Science</i> , 2018, 13, 94.	2.5	6
24	Implementing Exercise in Standard Cancer Care (Bizi Orain Hybrid Exercise Program): Protocol for a Randomized Controlled Trial. <i>JMIR Research Protocols</i> , 2021, 10, e24835.	0.5	6
25	“My Patients Asked Me If I Owned a Fruit Stand in Town or Something.” Barriers and Facilitators of Personalized Dietary Advice Implemented in a Primary Care Setting. <i>Journal of Personalized Medicine</i> , 2021, 11, 747.	1.1	4
26	Future Directions for the Organizational Readiness for Knowledge Translation (OR4KT) Tool: Response to Recent Commentaries. <i>International Journal of Health Policy and Management</i> , 2019, 8, 315-316.	0.5	4
27	Effectiveness of two procedures for deploying a facilitated collaborative modeling implementation strategy—the PVS-PREDIAPS strategy—to optimize type 2 diabetes prevention in primary care: the PREDIAPS cluster randomized hybrid type II implementation trial. <i>Implementation Science</i> , 2021, 16, 58.	2.5	3
28	Efficiency of “Prescribe Vida Saludable”, a health promotion innovation. Pilot phase. <i>Gaceta Sanitaria</i> , 2017, 31, 404-409.	0.6	2
