#	ARTICLE	IF	CITATIONS
1	Mobilisation-based characteristic value of shear strength for ultimate limit states. Georisk, 2022, 16, 413-434.	3.5	8
2	Challenges in data-driven site characterization. Georisk, 2022, 16, 114-126.	3.5	55
3	Quasi-site-specific multivariate probability distribution model for sparse, incomplete, and three-dimensional spatially varying soil data. Georisk, 2022, 16, 53-76.	3.5	14
4	What is a characteristic value for soils?. Georisk, 2022, 16, 199-224.	3.5	6
5	Benchmark examples for data-driven site characterisation. Georisk, 2022, 16, 599-621.	3.5	17
6	Data analytics in geotechnical and geological engineering. Georisk, 2022, 16, 1-1.	3.5	4
7	Homogenizing spatially variable Young modulus using pseudo incremental energy method. Structural Safety, 2022, 97, 102226.	5.3	7
8	Unpacking data-centric geotechnics. Underground Space (China), 2022, 7, 967-989.	7.5	32
9	Quasi-site-specific soil property prediction using a cluster-based hierarchical Bayesian model. Structural Safety, 2022, 99, 102253.	5.3	7
10	Bayesian Learning Methods for Geotechnical Data. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2021, 7, .	1.7	8
11	Simulation of three-dimensional random field conditioning on incomplete site data. Engineering Geology, 2021, 281, 105987.	6.3	16
12	Dealing with Nonlattice Data in Three-Dimensional Probabilistic Site Characterization. Journal of Engineering Mechanics - ASCE, 2021, 147, .	2.9	24
13	Constructing Quasi-Site-Specific Multivariate Probability Distribution Using Hierarchical Bayesian Model. Journal of Engineering Mechanics - ASCE, 2021, 147, .	2.9	31
14	On the Hole Effect in Soil Spatial Variability. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2021, 7, 04021039.	1.7	4
15	Erratum for "Scale of Fluctuation for Spatially Varying Soils: Estimation Methods and Values" by Brigid Cami, Sina Javankhoshdel, Kok-Kwang Phoon, and Jianye Ching. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2021, 7, .	1.7	3
16	Statistical determination of multivariate characteristic values for Eurocode 7. Structural Safety, 2020, 82, 101893.	5.3	8
17	Simplified risk assessment for a spatially variable undrained long slope. Computers and Geotechnics, 2020, 117, 103228.	4.7	7
18	Calibration of reliability-based safety factors for sand boiling in excavations. Canadian Geotechnical Journal, 2020, 57, 742-753.	2.8	0

#	ARTICLE	IF	CITATIONS
19	3D Probabilistic Site Characterization by Sparse Bayesian Learning. Journal of Engineering Mechanics - ASCE, 2020, 146, .	2.9	39
20	Role of municipal database in constructing site-specific multivariate probability distribution. Computers and Geotechnics, 2020, 124, 103623.	4.7	10
21	Scale of Fluctuation for Spatially Varying Soils: Estimation Methods and Values. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2020, 6, .	1.7	82
22	Constructing a Site-Specific Multivariate Probability Distribution Using Sparse, Incomplete, and Spatially Variable (MUSIC-X) Data. Journal of Engineering Mechanics - ASCE, 2020, 146, .	2.9	44
23	A novel reliability-based design method based on quantile-based first-order second-moment. Applied Mathematical Modelling, 2020, 88, 461-473.	4.2	23
24	Measuring Similarity between Site-Specific Data and Records from Other Sites. ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering, 2020, 6, .	1.7	19
25	Identification of sample path smoothness in soil spatial variability. Structural Safety, 2019, 81, 101870.	5.3	42
26	A novel simplified geotechnical reliability analysis method. Applied Mathematical Modelling, 2019, 74, 337-349.	4.2	18
27	Constructing Site-Specific Multivariate Probability Distribution Model Using Bayesian Machine Learning. Journal of Engineering Mechanics - ASCE, 2019, 145, .	2.9	89
28	Impact of Autocorrelation Function Model on the Probability of Failure. Journal of Engineering Mechanics - ASCE, 2019, 145, .	2.9	43
29	Discretization error in the random finite element method for spatially variable undrained shear strength. Computers and Geotechnics, 2019, 105, 183-194.	4.7	28
30	Multivariate probability distribution for some intact rock properties. Canadian Geotechnical Journal, 2019, 56, 1080-1097.	2.8	21
31	Managing Risk in Geotechnical Engineering – From Data to Digitalization. , 2019, , .		32
32	Generic transformation models for some intact rock properties. Canadian Geotechnical Journal, 2018, 55, 1702-1741.	2.8	26
33	Effective Young's modulus of a spatially variable soil mass under a footing. Structural Safety, 2018, 73, 99-113.	5.3	18
34	Estimating horizontal scale of fluctuation with limited CPT soundings. Geoscience Frontiers, 2018, 9, 1597-1608.	8.4	58
35	Characterizing Uncertain Site-Specific Trend Function by Sparse Bayesian Learning. Journal of Engineering Mechanics - ASCE, 2017, 143, .	2.9	78
36	Worst case scale of fluctuation in basal heave analysis involving spatially variable clays. Structural Safety, 2017, 68, 28-42.	5.3	38

#	ARTICLE	IF	CITATIONS
37	Probabilistic transformation models for preconsolidation stress based on clay index properties. <i>Engineering Geology</i> , 2017, 226, 33-43.	6.3	4
38	Can a Spatially Variable Field Be Converted into a Homogeneous Spatial Average over an Influence Zone?. , 2017, , .		0
39	On characterizing spatially variable soil Young's modulus using spatial average. <i>Structural Safety</i> , 2017, 66, 106-117.	5.3	20
40	Correlations among some parameters of coarse-grained soils – the multivariate probability distribution model. <i>Canadian Geotechnical Journal</i> , 2017, 54, 1203-1220.	2.8	22
41	Discussion of "Transitional Markov Chain Monte Carlo: Observations and Improvements" by Wolfgang Betz, Iason Papaioannou, and Daniel Straub. <i>Journal of Engineering Mechanics - ASCE</i> , 2017, 143, .	2.9	2
42	Effective Young's Modulus for a Footing on a Spatially Variable Soil Mass. , 2017, , .		2
43	Transformation models for effective friction angle and relative density calibrated based on generic database of coarse-grained soils. <i>Canadian Geotechnical Journal</i> , 2017, 54, 481-501.	2.8	36
44	Characterizing Unknown Trend Using Sparse Bayesian Learning. , 2017, , .		1
45	Identifiability of Geotechnical Site-Specific Trend Functions. <i>ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems, Part A: Civil Engineering</i> , 2017, 3, .	1.7	22
46	Effect of Element Size in Random Finite Element Analysis for Effective Young's Modulus. <i>Mathematical Problems in Engineering</i> , 2016, 2016, 1-10.	1.1	17
47	Undrained strength for a 3D spatially variable clay column subjected to compression or shear. <i>Probabilistic Engineering Mechanics</i> , 2016, 45, 127-139.	2.7	22
48	Robust estimation of correlation coefficients among soil parameters under the multivariate normal framework. <i>Structural Safety</i> , 2016, 63, 21-32.	5.3	19
49	Spatial correlation for transformation uncertainty and its applications. <i>Georisk</i> , 2016, 10, 294-311.	3.5	8
50	Chapter 3 Uncertainty representation of geotechnical design parameters. , 2016, , 49-88.		15
51	Chapter 4 Statistical characterization of multivariate geotechnical data. , 2016, , 89-126.		19
52	Chapter 5 Statistical characterization of model uncertainty. , 2016, , 127-158.		15
53	Chapter 6 Semi-probabilistic reliability-based design. , 2016, , 159-192.		2
54	Some observations on ISO2394:2015 Annex D (Reliability of Geotechnical Structures). <i>Structural Safety</i> , 2016, 62, 24-33.	5.3	63

#	ARTICLE	IF	CITATIONS
55	Transitional Markov Chain Monte Carlo: Observations and Improvements. Journal of Engineering Mechanics - ASCE, 2016, 142, .	2.9	91
56	Impact of Statistical Uncertainty on Geotechnical Reliability Estimation. Journal of Engineering Mechanics - ASCE, 2016, 142, .	2.9	42
57	On characterizing spatially variable soil shear strength using spatial average. Probabilistic Engineering Mechanics, 2016, 45, 31-43.	2.7	29
58	New Sampling Method and Procedures for Estimating Failure Probability. Journal of Engineering Mechanics - ASCE, 2016, 142, .	2.9	15
59	Application of the transitional Markov chain Monte Carlo algorithm to probabilistic site characterization. Engineering Geology, 2016, 203, 151-167.	6.3	73
60	Effective Young's modulus for a spatially variable soil mass subjected to a simple stress state. Georisk, 2016, 10, 11-26.	3.5	13
61	Statistical characterization of random field parameters using frequentist and Bayesian approaches. Canadian Geotechnical Journal, 2016, 53, 285-298.	2.8	80
62	Can the effect of shear strength spatial variability be summarized as the pure spatial average?. Japanese Geotechnical Society Special Publication, 2016, 2, 2429-2434.	0.2	0
63	Estimating peak flow-discharge during extreme rainfall events for the Gao-Ping River, Taiwan. International Journal of Safety and Security Engineering, 2016, 6, 663-673.	1.0	0
64	ESTIMATING PEAK FLOW-DISCHARGE DURING EXTREME RAINFALL EVENTS FOR THE GAO-PING RIVER, TAIWAN. WIT Transactions on State-of-the-art in Science and Engineering, 2016, , 209-219.	0.0	0
65	A New Procedure for Simulating Active Lateral Force in Spatially Variable Clay Modeled by Anisotropic Random Field. Journal of Mechanics, 2015, 31, 381-390.	1.4	1
66	Cone penetration test (CPT)-based stratigraphic profiling using the wavelet transform modulus maxima method. Canadian Geotechnical Journal, 2015, 52, 1993-2007.	2.8	58
67	Simplified Reliability-Based Design of Wall Displacements for Excavations in Soft Clay Considering Cross Walls. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2015, 141, .	3.0	4
68	Role of redundancy in simplified geotechnical reliability-based design – A quantile value method perspective. Structural Safety, 2015, 55, 37-48.	5.3	14
69	Impact of spatial variability in undrained shear strength on active lateral force in clay. Structural Safety, 2015, 52, 121-131.	5.3	33
70	Reducing the Transformation Uncertainty for the Mobilized Undrained Shear Strength of Clays. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2015, 141, .	3.0	10
71	Calibration of model uncertainties in base heave stability for wide excavations in clay. Soils and Foundations, 2014, 54, 1159-1174.	3.1	11
72	Probability Distribution for Mobilized Shear Strengths of Saturated Undrained Clays Modeled by 2-D Stationary Gaussian Random Field - A 1-D Stochastic Process View. Journal of Mechanics, 2014, 30, 229-239.	1.4	3

#	ARTICLE	IF	CITATIONS
73	Mean and Variance of Mobilized Shear Strength for Spatially Variable Soils under Uniform Stress States. <i>Journal of Engineering Mechanics - ASCE</i> , 2014, 140, 487-501.	2.9	36
74	Reply to the discussion by Mesri on "Multivariate distribution for undrained shear strengths under various test procedures". <i>Canadian Geotechnical Journal</i> , 2014, 51, 348-351.	2.8	2
75	Modeling piezocone cone penetration (CPTU) parameters of clays as a multivariate normal distribution. <i>Canadian Geotechnical Journal</i> , 2014, 51, 77-91.	2.8	56
76	Linking Site Investigation Efforts to Final Design Savings with Simplified Reliability-Based Design Methods. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2014, 140, .	3.0	34
77	The critical scale of fluctuation for active lateral forces in spatially variable undrained clays. <i>Computers and Geotechnics</i> , 2014, 57, 24-29.	4.7	6
78	Transformations and correlations among some clay parameters in the global database. <i>Canadian Geotechnical Journal</i> , 2014, 51, 663-685.	2.8	86
79	Correlations among some clay parameters in the multivariate distribution. <i>Canadian Geotechnical Journal</i> , 2014, 51, 686-704.	2.8	97
80	Probabilistic observational method for estimating wall displacements in excavations. <i>Canadian Geotechnical Journal</i> , 2014, 51, 1111-1122.	2.8	13
81	Statistics for the calculated safety factors of undrained failure slopes. <i>Engineering Geology</i> , 2014, 172, 85-94.	6.3	21
82	Quantile Value Method for Geotechnical Reliability Code Calibration. , 2014, , .		0
83	Characterization of geotechnical variability in a multivariate perspective. , 2014, , 61-70.		1
84	Quantile value method versus design value method for calibration of reliability-based geotechnical codes. <i>Structural Safety</i> , 2013, 44, 47-58.	5.3	32
85	Effect of element sizes in random field finite element simulations of soil shear strength. <i>Computers and Structures</i> , 2013, 126, 120-134.	4.4	69
86	Determining the Factors of Safety of Spatially Variable Slopes Modeled by Random Fields. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2013, 139, 2082-2095.	3.0	42
87	Simplified procedure for estimation of liquefaction-induced settlement and site-specific probabilistic settlement exceedance curve using cone penetration test (CPT). <i>Canadian Geotechnical Journal</i> , 2013, 50, 1055-1066.	2.8	56
88	Predicting Wall Displacements for Excavations with Cross Walls in Soft Clay. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2013, 139, 914-927.	3.0	41
89	Multivariate distribution for undrained shear strengths under various test procedures. <i>Canadian Geotechnical Journal</i> , 2013, 50, 907-923.	2.8	61
90	Performance of reliability-based design code formats for foundations in layered soils. <i>Computers and Structures</i> , 2013, 126, 100-106.	4.4	15

#	ARTICLE	IF	CITATIONS
91	Probability distribution for mobilised shear strengths of spatially variable soils under uniform stress states. <i>Georisk</i> , 2013, 7, 209-224.	3.5	49
92	Estimation of rock pressure during an excavation/cut in sedimentary rocks with inclined bedding planes. <i>Structural Safety</i> , 2013, 41, 11-19.	5.3	16
93	Simplified reliability method for spatially variable undrained engineered slopes. <i>Soils and Foundations</i> , 2013, 53, 708-719.	3.1	49
94	Mobilized shear strength of spatially variable soils under simple stress states. <i>Structural Safety</i> , 2013, 41, 20-28.	5.3	62
95	Multivariate Model for Soil Parameters Based on Johnson Distributions. , 2013, , .		13
96	Simulating Spatial Averages of Stationary Random Field Using the Fourier Series Method. <i>Journal of Engineering Mechanics - ASCE</i> , 2013, 139, 594-605.	2.9	51
97	Robustness of Constant Load and Resistance Factor Design Factors for Drilled Shafts in Multiple Strata. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2013, 139, 1104-1114.	3.0	13
98	Second-Moment Characterization of Undrained Shear Strengths from Different Test Procedures. , 2013, , .		1
99	Assessing SPT-based probabilistic models for liquefaction potential evaluation: a 10-year update. <i>Georisk</i> , 2013, 7, 137-150.	3.5	20
100	Is Site Investigation An Investment Or Expense? â€œ A Reliability Perspective. , 2013, , .		1
101	Reliability-based design for the serviceability state design of an excavation with cross walls in clays. , 2013, , 471-476.		0
102	DISCUSSION: Predicting rainfall-induced landslide potential along a mountain road in Taiwan J. CHING, H.-J. LIAO and J.-Y. LEE (2011). <i>Geotechnique</i> 61, No. 2, 153â€“166. <i>Geotechnique</i> , 2012, 62, 555-561.	4.0	0
103	Reliability-Based Design for Basal Heave Stability of Deep Excavations in Spatially Varying Soils. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2012, 138, 594-603.	3.0	44
104	Examination of Multivariate Dependency Structure in Soil Parameters. , 2012, , .		2
105	Unified CPTu-based probabilistic model for assessing probability of liquefaction of sand and clay. <i>Geotechnique</i> , 2012, 62, 877-892.	4.0	19
106	Value of Geotechnical Site Investigation in Reliability-Based Design. <i>Advances in Structural Engineering</i> , 2012, 15, 1935-1945.	2.4	19
107	Probabilistic version of the Robertson and Wride method for liquefaction evaluation: development and application. <i>Canadian Geotechnical Journal</i> , 2012, 49, 27-44.	2.8	55
108	Probabilistic Model for Overall Shear Strengths of Spatially Variable Soil Masses. , 2012, , .		1

#	ARTICLE	IF	CITATIONS
109	Modeling parameters of structured clays as a multivariate normal distribution. Canadian Geotechnical Journal, 2012, 49, 522-545.	2.8	100
110	Updating Uncertainties in Friction Angles of Clean Sands. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2012, 138, 217-229.	3.0	38
111	New models for probability of liquefaction using standard penetration tests based on an updated database of case histories. Engineering Geology, 2012, 133-134, 85-93.	6.3	64
112	Establishment of generic transformations for geotechnical design parameters. Structural Safety, 2012, 35, 52-62.	5.3	32
113	Overall Shear Strength of Soil Mass With Spatial Variability. , 2012, , .		0
114	Predicting rainfall-induced landslide potential along a mountain road in Taiwan. Geotechnique, 2011, 61, 153-166.	4.0	20
115	Selection among CPTU-Based Liquefaction Models. Procedia Engineering, 2011, 14, 2576-2584.	1.2	2
116	Practical Monte Carlo Based Reliability Analysis and Design Methods for Geotechnical Problems. , 2011, , .		2
117	Constructing Joint Distributions of Multivariate Geotechnical Data. , 2011, , .		1
118	Quantile Framework for Simplified Geotechnical Reliability-Based Design. , 2011, , .		0
119	Challenges in limit equilibrium based slope reliability problems. , 2011, , 1709-1715.		1
120	Updating Uncertainties in Friction Angles of Clean Sands. , 2011, , .		0
121	Reliability-based design for allowable bearing capacity of footings on rock masses by considering angle of distortion. International Journal of Rock Mechanics and Minings Sciences, 2011, 48, 728-740.	5.8	18
122	A quantile-based approach for calibrating reliability-based partial factors. Structural Safety, 2011, 33, 275-285.	5.3	44
123	Calibrating Resistance Factors of Single Bored Piles Based on Incomplete Load Test Results. Journal of Engineering Mechanics - ASCE, 2011, 137, 309-323.	2.9	8
124	Reliability-Based Design for External Stability of Narrow Mechanically Stabilized Earth Walls: Calibration from Centrifuge Tests. Journal of Geotechnical and Geoenvironmental Engineering - ASCE, 2011, 137, 239-253.	3.0	24
125	Reliability Based Design of Base Heave Stability in Wide Excavations. , 2011, , .		2
126	Effective Shear Strengths of Isotropic Spatially Variable Soil Masses. , 2011, , .		0

#	ARTICLE	IF	CITATIONS
127	Liquefaction Probability by Probabilistic Version of Robertson and Wride Model. , 2011, , .		0
128	Reliability-Based Design for Allowable Bearing Capacity by Considering Differential Settlement on Highly Fractured Rock Masses. , 2011, , .		1
129	Complexity of Limit Equilibrium Based Slope Reliability Problems. , 2010, , .		0
130	Reliability-Based Design for Basal Heave in an Excavation Considering Spatial Variability. , 2010, , .		5
131	Evaluating small failure probabilities of multiple limit states by parallel subset simulation. Probabilistic Engineering Mechanics, 2010, 25, 291-304.	2.7	47
132	Converting reliability constraints by adaptive quantile estimation. Structural Safety, 2010, 32, 316-325.	5.3	1
133	Predicting displacement of augered cast-in-place piles based on load test database. Structural Safety, 2010, 32, 372-383.	5.3	8
134	Observations on Limit Equilibrium-Based Slope Reliability Problems with Inclined Weak Seams. Journal of Engineering Mechanics - ASCE, 2010, 136, 1220-1233.	2.9	25
135	Updating Uncertainties in Undrained Shear Strengths by Multivariate Correlations. , 2010, , .		2
136	Reducing shear strength uncertainties in clays by multivariate correlations. Canadian Geotechnical Journal, 2010, 47, 16-33.	2.8	82
137	Calibrating Resistance Factors of Single Bored Piles Based on Incomplete Load Test Information. , 2010, , .		1
138	Approximate reliability-based design with general geotechnical models by stochastic simulation. Georisk, 2009, 3, 58-66.	3.5	0
139	Reliability-Based Code Calibration for Axial Ultimate Bearing Capacities of Single Bored Piles in Taipei Basin. Journal of Mechanics, 2009, 25, 389-400.	1.4	3
140	Updating real-time reliability of instrumented systems with stochastic simulation. Probabilistic Engineering Mechanics, 2009, 24, 242-250.	2.7	12
141	Model selection issue in calibrating reliability-based resistance factors based on geotechnical in-situ test data. Structural Safety, 2009, 31, 420-431.	5.3	5
142	Equivalence between reliability and factor of safety. Probabilistic Engineering Mechanics, 2009, 24, 159-171.	2.7	27
143	Bayesian updating of reliability of civil infrastructure facilities based on condition-state data and fault-tree model. Reliability Engineering and System Safety, 2009, 94, 1962-1974.	8.9	48
144	Updating future reliability of nonlinear systems with low dimensional monitoring data using short-cut simulation. Computers and Structures, 2009, 87, 871-879.	4.4	3

#	ARTICLE	IF	CITATIONS
145	Propagating uncertainties for loss estimation in performance-based earthquake engineering using moment matching. <i>Structure and Infrastructure Engineering</i> , 2009, 5, 245-262.	3.7	16
146	Efficient Evaluation of Reliability for Slopes with Circular Slip Surfaces Using Importance Sampling. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2009, 135, 768-777.	3.0	139
147	Approximation of reliability constraints by estimating quantile functions. <i>Structural Engineering and Mechanics</i> , 2009, 32, 127-145.	1.0	2
148	Approximate optimization of systems with high-dimensional uncertainties and multiple reliability constraints. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2008, 198, 52-71.	6.6	8
149	Transforming reliability limit-state constraints into deterministic limit-state constraints. <i>Structural Safety</i> , 2008, 30, 11-33.	5.3	29
150	Calibration of Reliability-Based Resistance Factors for Flush Drilled Soil Anchors in Taipei Basin. <i>Journal of Geotechnical and Geoenvironmental Engineering - ASCE</i> , 2008, 134, 1348-1363.	3.0	8
151	Damage localization with modeling errors and uncertainties. , 2008, , .		0
152	Local Estimation of Failure Probability Function with Direct Monte Carlo Simulation. , 2007, , 1.		0
153	Approximate Reliability-Based Optimization Using a Three-Step Approach Based on Subset Simulation. <i>Journal of Engineering Mechanics - ASCE</i> , 2007, 133, 481-493.	2.9	45
154	Transitional Markov Chain Monte Carlo Method for Bayesian Model Updating, Model Class Selection, and Model Averaging. <i>Journal of Engineering Mechanics - ASCE</i> , 2007, 133, 816-832.	2.9	574
155	Local estimation of failure probability function and its confidence interval with maximum entropy principle. <i>Probabilistic Engineering Mechanics</i> , 2007, 22, 39-49.	2.7	92
156	Real-time reliability estimation for serviceability limit states in structures with uncertain dynamic excitation and incomplete output data. <i>Probabilistic Engineering Mechanics</i> , 2007, 22, 50-62.	2.7	34
157	An Efficient Method for Evaluating Origin-Destination Connectivity Reliability of Real-World Lifeline Networks. <i>Computer-Aided Civil and Infrastructure Engineering</i> , 2007, 22, 584-596.	9.8	19
158	Application of subset simulation methods to reliability benchmark problems. <i>Structural Safety</i> , 2007, 29, 183-193.	5.3	213
