#	ARTICLE	IF	CITATIONS
1	Short- and long-term outcomes of laparoscopic surgery with extracorporeal anastomosis for transverse colon cancer: comparison of triangulating anastomosis with functional end-to-end anastomosis. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2022, 36, 3261-3269.	2.4	1
2	Lymph Node Mapping in Transverse Colon Cancer Treated Using Laparoscopic Colectomy With D3 Lymph Node Dissection. <i>Diseases of the Colon and Rectum</i> , 2022, 65, 340-352.	1.3	8
3	Primary Tumor Resection in Colorectal Cancer with Unresectable Synchronous Metastasis: Time to Reconsider the Role of the Surgeon. <i>Annals of Surgical Oncology</i> , 2022, 29, 1-3.	1.5	1
4	Lateral lymph node dissection in rectal cancer: State of the art review. <i>European Journal of Surgical Oncology</i> , 2022, 48, 2315-2322.	1.0	10
5	Prognosis for Poorly Differentiated, High-Grade Rectal Neuroendocrine Carcinomas. <i>Annals of Surgical Oncology</i> , 2022, 29, 2539-2548.	1.5	6
6	Incidence and Prognostic Value of Lavage Cytology in Colorectal Cancer. <i>Diseases of the Colon and Rectum</i> , 2022, 65, 894-900.	1.3	2
7	The Authors Reply. <i>Diseases of the Colon and Rectum</i> , 2022, Publish Ahead of Print, .	1.3	0
8	Roboticâ€assisted laparoscopic surgery for synchronous primary rectal and prostate cancer: Initial case series. <i>Asian Journal of Endoscopic Surgery</i> , 2022, , .	0.9	4
9	Current controversies in TNM for the radiological staging of rectal cancer and how to deal with them: results of a global online survey and multidisciplinary expert consensus. <i>European Radiology</i> , 2022, 32, 4991-5003.	4.5	32
10	What is the Risk for Peritoneal Metastases and Survival Afterwards in T4 Colon Cancers?. <i>Annals of Surgical Oncology</i> , 2022, 29, 4224-4233.	1.5	4
11	Non-operative management after chemoradiotherapy plus consolidation or sandwich (induction with) Tj ETQq1 1 0.784314 rgBT /Over multicentre, randomised phase II trial (NOMINATE trial). <i>BMJ Open</i> , 2022, 12, e055140.	1.9	6
12	ASO Visual Abstract: What is the Risk for Peritoneal Metastases and Survival Afterwards in T4 Colon Cancers?. <i>Annals of Surgical Oncology</i> , 2022, , 1.	1.5	1
13	Complete Mesocolic Excision and Extent of Lymphadenectomy for the Treatment of Colon Cancer. <i>Surgical Oncology Clinics of North America</i> , 2022, 31, 293-306.	1.5	2
14	Risk factors for anastomotic leakage after laparoscopic low anterior resection: A singleâ€center retrospective study. <i>Asian Journal of Endoscopic Surgery</i> , 2021, 14, 478-488.	0.9	4
15	Educational system for acquiring appropriate laparoscopic colorectal surgical skills: analysis in a Japanese high-volume cancer center. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2021, 35, 2660-2666.	2.4	7
16	Long-term outcomes of needlescopic surgery in patients with colon cancer: a retrospective cohort study. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2021, 35, 1039-1045.	2.4	0
17	Treatment of anastomotic leakage after rectal cancer resection: The TENTACLEâ€Rectum study. <i>Colorectal Disease</i> , 2021, 23, 982-988.	1.4	16
18	Effects of needlescopic surgery on postoperative pain in intersphincteric or abdominoperineal resection. <i>Langenbeck's Archives of Surgery</i> , 2021, 406, 301-307.	1.9	1

#	ARTICLE	IF	CITATIONS
19	Adding Narrow-Band Imaging to Chromoendoscopy for the Evaluation of Tumor Response to Neoadjuvant Therapy in Rectal Cancer. <i>Diseases of the Colon and Rectum</i> , 2021, 64, 53-59.	1.3	4
20	Predisposing factors and clinical impact of high-output syndrome after sphincter-preserving surgery with covering ileostomy for rectal cancer: a retrospective single-center cohort study. <i>International Journal of Clinical Oncology</i> , 2021, 26, 118-125.	2.2	2
21	Improved oncologic outcomes with increase of laparoscopic surgery in modified complete mesocolic excision with D3 lymph node dissection for T3/4a colon cancer: results of 1191 consecutive patients during a 10-year period: a retrospective cohort study. <i>International Journal of Clinical Oncology</i> , 2021, 26, 893-902.	2.2	5
22	Wound infection in colorectal cancer resections through a laparoscopic approach: a single-center prospective observational study of over 3000 cases. <i>Discover Oncology</i> , 2021, 12, 2.	2.1	7
23	Clinical Calculator Based on Molecular and Clinicopathologic Characteristics Predicts Recurrence Following Resection of Stage I-III Colon Cancer. <i>Journal of Clinical Oncology</i> , 2021, 39, 911-919.	1.6	34
24	Safety of Small Circular Staplers in Double Stapling Technique Anastomosis for Sigmoid Colon and Rectal Cancer. <i>Diseases of the Colon and Rectum</i> , 2021, 64, 937-945.	1.3	16
25	Systemic Inflammatory Markers Combined with Tumor-Infiltrating Lymphocyte Density for the Improved Prediction of Response to Neoadjuvant Chemoradiotherapy in Rectal Cancer. <i>Annals of Surgical Oncology</i> , 2021, 28, 6189-6198.	1.5	10
26	ASO Visual Abstract: Systemic Inflammatory Markers Combined with Tumor-Infiltrating Lymphocyte Density for the Improved Prediction of Response to Neoadjuvant Chemoradiotherapy in Rectal Cancer. <i>Annals of Surgical Oncology</i> , 2021, 28, 406-407.	1.5	0
27	MRI Staging in an Evolving Management Paradigm for Rectal Cancer, From the <i>AJR</i> Special Series on Cancer Staging. <i>American Journal of Roentgenology</i> , 2021, 217, 1282-1293.	2.2	7
28	Surgical Outcomes of Rectal Gastrointestinal Stromal Tumor in the Era of Imatinib. <i>Journal of Gastrointestinal Surgery</i> , 2021, 25, 2963-2965.	1.7	2
29	Prognostic Impact of Lateral Pelvic Node Dissection on the Survival of Patients in Low Rectal Cancer Subgroups Based on Lymph Node Size. <i>Annals of Surgical Oncology</i> , 2021, 28, 6179-6188.	1.5	10
30	Oncologic impact of lateral lymph node metastasis at the distal lateral compartment in locally advanced low rectal cancer after neoadjuvant (chemo)radiotherapy. <i>European Journal of Surgical Oncology</i> , 2021, 47, 3157-3165.	1.0	6
31	Rectal cancer lateral lymph nodes: multicentre study of the impact of obturator and internal iliac nodes on oncological outcomes. <i>British Journal of Surgery</i> , 2021, 108, 205-213.	0.3	42
32	Impact of postoperative complications after primary tumor resection on survival in patients with incurable stage IV colorectal cancer: A multicenter retrospective cohort study. <i>Annals of Gastroenterological Surgery</i> , 2021, 5, 354-362.	2.4	8
33	Feasibility of needlescopic surgery for colorectal cancer: safety and learning curve for Japanese Endoscopic Surgical Skill Qualification System-unqualified young surgeons. <i>Surgical Endoscopy and Other Interventional Techniques</i> , 2020, 34, 752-757.	2.4	7
34	Laparoscopic-Endoscopic cooperative surgery for ileal lipoma: A case report. <i>Asian Journal of Endoscopic Surgery</i> , 2020, 13, 219-222.	0.9	1
35	Needlescopic surgery for very low rectal cancer with no abdominal skin incision. <i>Asian Journal of Endoscopic Surgery</i> , 2020, 13, 180-185.	0.9	2
36	A case of severe megacolon due to acquired isolated hypoganglionosis after low anterior resection for lower rectal cancer. <i>Clinical Journal of Gastroenterology</i> , 2020, 13, 328-333.	0.8	3

#	ARTICLE	IF	CITATIONS
37	Quantitative assessment of tumor-infiltrating lymphocytes in mismatch repair proficient colon cancer. <i>Oncolmmunology</i> , 2020, 9, 1841948.	4.6	3
38	Impact of asymptomatic COVID-19 patients in global surgical practice during the COVID-19 pandemic. <i>British Journal of Surgery</i> , 2020, 107, e364-e365.	0.3	16
39	Radiomics Approach Outperforms Diameter Criteria for Predicting Pathological Lateral Lymph Node Metastasis After Neoadjuvant (Chemo)Radiotherapy in Advanced Low Rectal Cancer. <i>Annals of Surgical Oncology</i> , 2020, 27, 4273-4283.	1.5	40
40	Screening policies, preventive measures and in-hospital infection of COVID-19 in global surgical practices. <i>Journal of Global Health</i> , 2020, 10, 020507.	2.7	23
41	Surgeons' fear of getting infected by COVID19: A global survey. <i>British Journal of Surgery</i> , 2020, 107, e543-e544.	0.3	19
42	Robotic extralevator abdominoperineal resection with en bloc multivisceral resection and lateral lymph node dissection for rectal cancer. <i>Techniques in Coloproctology</i> , 2020, 24, 1093-1094.	1.8	3
43	Optimal strategy of systemic treatment for unresectable pancreatic neuroendocrine tumors based upon opinion of Japanese experts. <i>Pancreatology</i> , 2020, 20, 944-950.	1.1	14
44	Laparoscopic multivisceral resection for locally advanced colon cancer: a single-center analysis of short- and long-term outcomes. <i>Surgery Today</i> , 2020, 50, 1024-1031.	1.5	11
45	Laparoscopic and robotic lateral lymph node dissection for rectal cancer. <i>Surgery Today</i> , 2020, 50, 209-216.	1.5	22
46	Why Do We Need to Know the Differences Between the East and West?. <i>Clinics in Colon and Rectal Surgery</i> , 2020, 33, 327-328.	1.1	0
47	Current Status of Nonoperative Management (Watch and Wait) for Rectal Cancer. <i>Nihon Daicho Komonbyo Gakkai Zasshi</i> , 2020, 73, 433-441.	0.0	0
48	Prognostic impact of residual lateral lymph node metastasis after neoadjuvant (chemo)radiotherapy in patients with advanced low rectal cancer. <i>BJS Open</i> , 2019, 3, 822-829.	1.7	27
49	Prognostic value of metastatic lymph node regression grade after neoadjuvant chemoradiotherapy in patients with locally advanced rectal cancer. <i>Surgery</i> , 2019, 166, 1061-1067.	1.9	9
50	Lateral Nodal Features on Restaging Magnetic Resonance Imaging Associated With Lateral Local Recurrence in Low Rectal Cancer After Neoadjuvant Chemoradiotherapy or Radiotherapy. <i>JAMA Surgery</i> , 2019, 154, e192172.	4.3	141
51	The short-term outcomes of laparoscopic“endoscopic cooperative surgery for colorectal tumors (LECS-CR) in cases involving endoscopically unresectable colorectal tumors. <i>Surgery Today</i> , 2019, 49, 1051-1057.	1.5	15
52	ASO Author Reflections: Combining Intensive Neoadjuvant Therapy with Minimally Invasive Surgery: A Promising Future Strategy for Rectal Cancer with High-Risk Features. <i>Annals of Surgical Oncology</i> , 2019, 26, 753-754.	1.5	0
53	The Short- and Long-Term Feasibility of Laparoscopic Surgery in Colon Cancer Patients with Bulky Tumors. <i>Journal of Gastrointestinal Surgery</i> , 2019, 23, 1893-1899.	1.7	3
54	Contemporary Validation of a Nomogram Predicting Colon Cancer Recurrence, Revealing All-Stage Improved Outcomes. <i>JNCI Cancer Spectrum</i> , 2019, 3, pkz015.	2.9	16

#	ARTICLE	IF	CITATIONS
55	Difficulty of predicting lymph node metastasis on CT in patients with rectal neuroendocrine tumors. PLoS ONE, 2019, 14, e0211675.	2.5	21
56	Phase II Trial of Neoadjuvant Chemotherapy, Chemoradiotherapy, and Laparoscopic Surgery with Selective Lateral Node Dissection for Poor-Risk Low Rectal Cancer. Annals of Surgical Oncology, 2019, 26, 2507-2513.	1.5	32
57	Feasibility of neoadjuvant therapy for elderly patients with locally advanced rectal cancer. Surgery Today, 2019, 49, 694-703.	1.5	4
58	Neoadjuvant (Chemo)radiotherapy With Total Mesorectal Excision Only Is Not Sufficient to Prevent Lateral Local Recurrence in Enlarged Nodes: Results of the Multicenter Lateral Node Study of Patients With Low cT3/4 Rectal Cancer. Journal of Clinical Oncology, 2019, 37, 33-43.	1.6	308
59	Prevalence of and risk factors for thyroid carcinoma in patients with familial adenomatous polyposis: results of a multicenter study in Japan and a systematic review. Surgery Today, 2019, 49, 72-81.	1.5	11
60	Laparoscopic right hemicolectomy for a colon cancer patient with an ileal conduit. Asian Journal of Endoscopic Surgery, 2019, 12, 114-117.	0.9	1
61	Poorly Differentiated Clusters Predict Colon Cancer Recurrence. American Journal of Surgical Pathology, 2018, 42, 705-714.	3.7	61
62	Laparoscopic repair of bowel herniation into the space between the obturator nerve and the umbilical artery after pelvic lymphadenectomy for cervical cancer. Asian Journal of Endoscopic Surgery, 2018, 11, 409-412.	0.9	7
63	Association of Preoperative and Postoperative Serum Carcinoembryonic Antigen and Colon Cancer Outcome. JAMA Oncology, 2018, 4, 309.	7.1	146
64	Open versus Laparoscopic Surgery for Advanced Low Rectal Cancer. Annals of Surgery, 2018, 268, 318-324.	4.2	85
65	Laparoscopic and endoscopic cooperative surgery (LECS) to overcome the limitations of endoscopic resection for colorectal tumors. Endoscopy International Open, 2018, 06, E1477-E1485.	1.8	15
66	Lateral Node Dissection in Rectal Cancer in the Era of Minimally Invasive Surgery: A Step-by-Step Description for the Surgeon Unacquainted with This Complex Procedure with the Use of the Laparoscopic Approach. Diseases of the Colon and Rectum, 2018, 61, 1237-1240.	1.3	34
67	Management of lateral pelvic lymph node in the East: Time to learn from the Western viewpoints. Annals of Gastroenterological Surgery, 2018, 2, 330-331.	2.4	4
68	Skeletal muscle loss is an independent negative prognostic factor in patients with advanced lower rectal cancer treated with neoadjuvant chemoradiotherapy. PLoS ONE, 2018, 13, e0195406.	2.5	46
69	Endoscopic criteria to evaluate tumor response of rectal cancer to neoadjuvant chemoradiotherapy using magnifying chromoendoscopy. European Journal of Surgical Oncology, 2018, 44, 1247-1253.	1.0	12
70	A Feasibility Study of Capecitabine and Oxaliplatin for Patients with Stage â€¦â€¦â€¦ Colon Cancer â€œACTOR Studyâ€œ. Anticancer Research, 2018, 38, 1741-1747.	1.1	6
71	The significance of extended lymphadenectomy for colorectal cancer with isolated synchronous extraregional lymph node metastasis. Asian Journal of Surgery, 2017, 40, 254-261.	0.4	31
72	The treatment of desmoid tumors associated with familial adenomatous polyposis: the results of a Japanese multicenter observational study. Surgery Today, 2017, 47, 1259-1267.	1.5	14

#	ARTICLE	IF	CITATIONS
73	Prognostic impact of hospital volume on familial adenomatous polyposis: a nationwide multicenter study. <i>International Journal of Colorectal Disease</i> , 2017, 32, 1489-1498.	2.2	5
74	Laparoscopic dissection of Merkel cell carcinoma recurrence at the pelvic lymph node. <i>Asian Journal of Endoscopic Surgery</i> , 2017, 10, 427-429.	0.9	0
75	Laparoscopic Versus Open Lateral Lymph Node Dissection for Locally Advanced Low Rectal Cancer: A Subgroup Analysis of a Large Multicenter Cohort Study in Japan. <i>Diseases of the Colon and Rectum</i> , 2017, 60, 954-964.	1.3	64
76	Current status of prophylactic surgical treatment for familial adenomatous polyposis in Japan. <i>Surgery Today</i> , 2017, 47, 690-696.	1.5	13
77	Preoperative Chemoradiotherapy Might Improve the Prognosis of Patients with Locally Advanced Low Rectal Cancer and Lateral Pelvic Lymph Node Metastases. <i>World Journal of Surgery</i> , 2017, 41, 876-883.	1.6	35
78	Feasibility of Laparoscopic Total Mesorectal Excision with Extended Lateral Pelvic Lymph Node Dissection for Advanced Lower Rectal Cancer after Preoperative Chemoradiotherapy. <i>World Journal of Surgery</i> , 2017, 41, 868-875.	1.6	62
79	Postoperative complications after stapled and handâ€šewn ileal pouchâ€šanal anastomosis for familial adenomatous polyposis: A multicenter study. <i>Annals of Gastroenterological Surgery</i> , 2017, 1, 143-149.	2.4	14
80	Recurrence 30 Years after Surgical Resection of a Localized Rectal Neuroendocrine Tumor. <i>Internal Medicine</i> , 2017, 56, 1521-1525.	0.7	4
81	Comprehensive genomic sequencing detects important genetic differences between right-sided and left-sided colorectal cancer. <i>Oncotarget</i> , 2017, 8, 93567-93579.	1.8	26
82	Poorly differentiated clusters as a prognostic marker at the invasive front of colon cancer.. <i>Journal of Clinical Oncology</i> , 2017, 35, 621-621.	1.6	1
83	Change in clinical outcomes during the transition of adjuvant chemotherapy for stage III colorectal cancer. <i>PLoS ONE</i> , 2017, 12, e0176745.	2.5	3
84	Risk Factors for the Development of Desmoid Tumor After Colectomy in Patients with Familial Adenomatous Polyposis: Multicenter Retrospective Cohort Study in Japan. <i>Annals of Surgical Oncology</i> , 2016, 23, 559-565.	1.5	33
85	Feasibility of laparoscopic total proctocolectomy with ileal pouchâ€šanal anastomosis and total colectomy with ileorectal anastomosis for familial adenomatous polyposis: results of a nationwide multicenter study. <i>International Journal of Clinical Oncology</i> , 2016, 21, 953-961.	2.2	33
86	Therapeutic approaches for patients with coexisting familial adenomatous polyposis and colorectal cancer. <i>Japanese Journal of Clinical Oncology</i> , 2016, 46, 819-824.	1.3	9
87	Randomized clinical trial of oral and intravenous <i>versus</i> intravenous antibiotic prophylaxis for laparoscopic colorectal resection. <i>British Journal of Surgery</i> , 2016, 103, 1608-1615.	0.3	57
88	Patient-centered outcomes to decide treatment strategy for patients with low rectal cancer. <i>Journal of Surgical Oncology</i> , 2016, 114, 630-636.	1.7	14
89	Prevalence of laparoscopic surgical treatment and its clinical outcomes in patients with familial adenomatous polyposis in Japan. <i>International Journal of Clinical Oncology</i> , 2016, 21, 713-722.	2.2	20
90	A rare case of hepatocellular carcinoma metastasizing hematogenously to the rectum. <i>International Cancer Conference Journal</i> , 2016, 5, 168-173.	0.5	3

#	ARTICLE	IF	CITATIONS
91	<i>RAS</i> mutation is a prognostic biomarker in colorectal cancer patients with metastasectomy. International Journal of Cancer, 2016, 139, 803-811.	5.1	38
92	Safety of Laparoscopic Pelvic Exenteration with Urinary Diversion for Colorectal Malignancies. World Journal of Surgery, 2016, 40, 1236-1243.	1.6	27
93	Upper gastrointestinal tumours in Japanese familial adenomatous polyposis patients. Japanese Journal of Clinical Oncology, 2016, 46, 310-315.	1.3	37
94	Laparoscopic right colectomy in patients treated with previous gastrectomy. Surgery Today, 2016, 46, 209-213.	1.5	5
95	Recurrent colorectal cancer after endoscopic resection when additional surgery was recommended. World Journal of Gastroenterology, 2016, 22, 2336-2341.	3.3	5
96	Surgery for synchronous colorectal cancers with double colonic anastomoses: A comparison of laparoscopic and open approaches. Asian Journal of Endoscopic Surgery, 2015, 8, 429-433.	0.9	5
97	Laparoscopic salvage lateral pelvic lymph node dissection for locally recurrent rectal cancer. Colorectal Disease, 2015, 17, O213-6.	1.4	23
98	Indications for Lateral Pelvic Lymph Node Dissection Based on Magnetic Resonance Imaging Before and After Preoperative Chemoradiotherapy in Patients with Advanced Low-Rectal Cancer. Annals of Surgical Oncology, 2015, 22, 614-620.	1.5	140
99	Endoscopic evaluation of clinical response after preoperative chemoradiotherapy for lower rectal cancer: the significance of endoscopic complete response. International Journal of Colorectal Disease, 2015, 30, 367-373.	2.2	12
100	Prognostic Impact of Distribution of Lymph Node Metastases in Stage III Colon Cancer. World Journal of Surgery, 2015, 39, 3008-3015.	1.6	36
101	Feasibility and safety of laparoscopic surgery for metachronous colorectal cancer. Surgery Today, 2015, 45, 434-438.	1.5	9
