#	ARTICLE	IF	CITATIONS
1	Digital phenotyping of student mental health during COVID-19: an observational study of 100 college students. <i>Journal of American College Health</i> , 2023, 71, 736-748.	1.5	22
2	College student engagement with mental health apps: analysis of barriers to sustained use. <i>Journal of American College Health</i> , 2022, 70, 1819-1825.	1.5	43
3	Changes in telepsychiatry regulations during the COVID-19 pandemic: 17 countries and regions' approaches to an evolving healthcare landscape. <i>Psychological Medicine</i> , 2022, 52, 2606-2613.	4.5	72
4	Sharing clinical notes, and placebo and nocebo effects: Can documentation affect patient health?. <i>Journal of Health Psychology</i> , 2022, 27, 135-146.	2.3	13
5	Measurement Properties of Smartphone Approaches to Assess Diet, Alcohol Use, and Tobacco Use: Systematic Review. <i>JMIR MHealth and UHealth</i> , 2022, 10, e27337.	3.7	7
6	Individualized Intervention to Support Mental Health Recovery Through Implementation of Digital Tools into Clinical Care: Feasibility Study. <i>Community Mental Health Journal</i> , 2022, 58, 99-110.	2.0	15
7	Are Mental Health Apps Adequately Equipped to Handle Users in Crisis?. <i>Crisis</i> , 2022, 43, 289-298.	1.2	9
8	Alliance With an Unguided Smartphone App: Validation of the Digital Working Alliance Inventory. <i>Assessment</i> , 2022, 29, 1331-1345.	3.1	24
9	Introducing an implementation framework for augmenting care with digital technology for early psychosis patients: theory and motivation. <i>Journal of Mental Health</i> , 2022, 31, 816-824.	1.9	3
10	Smartphone-Based Neuropsychological Assessment in Parkinson's Disease: Feasibility, Validity, and Contextually Driven Variability in Cognition. <i>Journal of the International Neuropsychological Society</i> , 2022, 28, 401-413.	1.8	15
11	Evolution of Telehealth in Ambulatory Psychiatry: A One Year Perspective. <i>Administration and Policy in Mental Health and Mental Health Services Research</i> , 2022, 49, 1-4.	2.1	4
12	Applying machine learning to smartphone based cognitive and sleep assessments in schizophrenia. <i>Schizophrenia Research: Cognition</i> , 2022, 27, 100216.	1.3	3
13	Information technology and electronic health record to improve behavioral health services. , 2022, , 11-39.		3
14	What gets resident physicians stressed and how would they prefer to be supported? A best-worst scaling study. <i>Postgraduate Medical Journal</i> , 2022, 98, 930-935.	1.8	7
15	Coaching to Support Mental Health Apps: Exploratory Narrative Review. <i>JMIR Human Factors</i> , 2022, 9, e28301.	2.0	15
16	Information and communication technology-based interventions for suicide prevention implemented in clinical settings: a scoping review protocol. <i>BMJ Open</i> , 2022, 12, e056232.	1.9	3
17	Mobile phone-based interventions for mental health: A systematic meta-review of 14 meta-analyses of randomized controlled trials. , 2022, 1, e0000002.		96
18	Global Collaboration Around Digital Mental Health: The LAMP Consortium. <i>Journal of Technology in Behavioral Science</i> , 2022, , 1-7.	2.3	7

#	ARTICLE	IF	CITATIONS
19	Piloting Smartphone Digital Phenotyping to Understand Problematic Internet Use in an Adolescent and Young Adult Sample. <i>Child Psychiatry and Human Development</i> , 2022, , 1.	1.9	3
20	Enabling Research and Clinical Use of Patient-Generated Health Data (the mindLAMP Platform): Digital Phenotyping Study. <i>JMIR MHealth and UHealth</i> , 2022, 10, e30557.	3.7	33
21	Problematic Internet Use Before and During the COVID-19 Pandemic in Youth in Outpatient Mental Health Treatment: App-Based Ecological Momentary Assessment Study. <i>JMIR Mental Health</i> , 2022, 9, e33114.	3.3	10
22	Current directions in digital interventions for mood and anxiety disorders. <i>Current Opinion in Psychiatry</i> , 2022, 35, 130-135.	6.3	14
23	Trends and factors associated with use of digital health technology among adults with serious psychological distress in the United States: A secondary data analysis of the National Health Interview Survey. <i>Population Medicine</i> , 2022, 4, 1-7.	0.8	1
24	An electronic monitored anesthesia care (MAC) decision aid for breast conserving surgery. <i>Journal of Clinical Anesthesia</i> , 2022, 78, 110648.	1.6	1
25	A qualitative exploration of perceived needs and barriers of individuals with schizophrenia, caregivers and clinicians in using mental health applications in Madhya Pradesh, India. <i>SSM Mental Health</i> , 2022, 2, 100063.	1.8	5
26	Smartphone apps for eating disorders: An overview of the marketplace and research trends. <i>International Journal of Eating Disorders</i> , 2022, 55, 625-632.	4.0	10
27	Teaching Telepsychiatry Skills: Building on the Lessons of the COVID-19 Pandemic to Enhance Mental Health Care in the Future. <i>JMIR Mental Health</i> , 2022, 9, e37939.	3.3	10
28	Assessing engagement features in an observational study of mental health apps in college students. <i>Psychiatry Research</i> , 2022, 310, 114470.	3.3	10
29	Longitudinal symptom changes and association with home time in people with schizophrenia: An observational digital phenotyping study. <i>Schizophrenia Research</i> , 2022, 243, 64-69.	2.0	15
30	Development of a Mobile Assessment Tool for Understanding Social Comparison Processes Among Individuals With Schizophrenia: Two-Phase Survey Study. <i>JMIR Formative Research</i> , 2022, 6, e36541.	1.4	3
31	Evidenceâ€informed is not enough: digital therapeutics also need to be evidenceâ€based. <i>World Psychiatry</i> , 2022, 21, 320-321.	10.4	12
32	Assessment of Smartphone Apps for Common Neurologic Conditions (Headache, Insomnia, and Pain): Cross-sectional Study. <i>JMIR MHealth and UHealth</i> , 2022, 10, e36761.	3.7	3
33	Similarity matrix-based anomaly detection for clinical intervention. <i>Scientific Reports</i> , 2022, 12, .	3.3	6
34	Digital phenotyping correlations in larger mental health samples: analysis and replication. <i>BJPsych Open</i> , 2022, 8, .	0.7	21
35	Smartphone Ownership, Smartphone Utilization, and Interest in Using Mental Health Apps to Address Substance Use Disorders: Literature Review and Cross-sectional Survey Study Across Two Sites. <i>JMIR Formative Research</i> , 2022, 6, e38684.	1.4	12
36	The Appalachia Mind Health Initiative (AMHI): a pragmatic randomized clinical trial of adjunctive internet-based cognitive behavior therapy for treating major depressive disorder among primary care patients. <i>Trials</i> , 2022, 23, .	1.6	5

#	ARTICLE	IF	CITATIONS
37	Is there a clinically relevant, publicly accessible app for that? Exploring the clinical relevance and availability of mobile apps for schizophrenia and psychosis. <i>Schizophrenia Research</i> , 2021, 230, 98-99.	2.0	10
38	Interest and readiness for digital mental health in coordinate specialty care for early course psychosis: A survey study of 42 programs in 30 states. <i>Microbial Biotechnology</i> , 2021, 15, 1243-1255.	1.7	5
39	A Literature Review Comparing Clinicians' Approaches and Skills to In-Person, Synchronous, and Asynchronous Care: Moving Toward Competencies to Ensure Quality Care. <i>Telemedicine Journal and E-Health</i> , 2021, 27, 356-373.	2.8	42
40	Counterpoint. Early intervention for psychosis risk syndromes: Minimizing risk and maximizing benefit. <i>Schizophrenia Research</i> , 2021, 227, 10-17.	2.0	28
41	Our Digital Moment: Innovations and Opportunities in Digital Mental Health Care. <i>Canadian Journal of Psychiatry</i> , 2021, 66, 5-8.	1.9	43
42	Social decline in the psychosis prodrome: Predictor potential and heterogeneity of outcome. <i>Schizophrenia Research</i> , 2021, 227, 44-51.	2.0	12
43	<scp>ReMindCare</scp>, an app for daily clinical practice in patients with first episode psychosis: A pragmatic real-world study protocol. <i>Microbial Biotechnology</i> , 2021, 15, 183-192.	1.7	14
44	The Functionality, Evidence, and Privacy Issues Around Smartphone Apps for the Top Neuropsychiatric Conditions. <i>Journal of Neuropsychiatry and Clinical Neurosciences</i> , 2021, 33, 72-79.	1.8	12
45	Towards precision clinical trials and personalized prevention in CHR with smartphone digital phenotyping and personal sensing tools. <i>Schizophrenia Research</i> , 2021, 227, 61-62.	2.0	5
46	Changes to the Psychiatric Chatbot Landscape: A Systematic Review of Conversational Agents in Serious Mental Illness: Changements du paysage psychiatrique des chatbots: une revue systématique des agents conversationnels dans la maladie mentale sérieuse. <i>Canadian Journal of Psychiatry</i> , 2021, 66, 339-348.	1.9	29
47	Cross cultural and global uses of a digital mental health app: results of focus groups with clinicians, patients and family members in India and the United States. <i>Global Mental Health (Cambridge, England)</i> , 2021, 8, e30.	2.5	18
48	Smartphone Health Assessment for Relapse Prevention (SHARP): a digital solution toward global mental health. <i>BJPsych Open</i> , 2021, 7, e29.	0.7	14
49	Technology Enabled Clinical Care (TECC): Protocol for a Prospective Longitudinal Cohort Study of Smartphone-Augmented Mental Health Treatment. <i>JMIR Research Protocols</i> , 2021, 10, e23771.	1.0	7
50	Anomaly detection to predict relapse risk in schizophrenia. <i>Translational Psychiatry</i> , 2021, 11, 28.	4.8	35
51	A Scoping Review to Develop a Framework of Asynchronous Technology Competencies for Psychiatry and Medicine. <i>Journal of Technology in Behavioral Science</i> , 2021, 6, 231-251.	2.3	1
52	Marketplace and Literature Review of Spanish Language Mental Health Apps. <i>Frontiers in Digital Health</i> , 2021, 3, 615366.	2.8	18
53	Evaluating evaluation frameworks: a scoping review of frameworks for assessing health apps. <i>BMJ Open</i> , 2021, 11, e047001.	1.9	56
54	Investigating Associations Between Screen Time and Symptomatology in Individuals With Serious Mental Illness: Longitudinal Observational Study. <i>Journal of Medical Internet Research</i> , 2021, 23, e23144.	4.3	10

#	ARTICLE	IF	CITATIONS
55	Understanding Side Effects of Antidepressants: Large-scale Longitudinal Study on Social Media Data. JMIR Mental Health, 2021, 8, e26589.	3.3	19
56	Child and adolescent asynchronous technology competencies for clinical care and training: Scoping review.. Families, Systems and Health, 2021, 39, 121-152.	0.6	8
57	Association of Patients Reading Clinical Notes With Perception of Medication Adherence Among Persons With Serious Mental Illness. JAMA Network Open, 2021, 4, e212823.	5.9	31
58	Psychiatric rehabilitation through teaching smartphone skills to improve functional outcomes in serious mental illness. Internet Interventions, 2021, 23, 100366.	2.7	11
59	Case studies from the digital clinic: integrating digital phenotyping and clinical practice into today's world. International Review of Psychiatry, 2021, 33, 394-403.	2.8	22
60	A systematic review of mHealth application interventions for peripartum mood disorders: trends and evidence in academia and industry. Archives of Women's Mental Health, 2021, 24, 881-892.	2.6	18
61	Telemental health policies for college students during COVID-19. Journal of American College Health, 2021, , 1-5.	1.5	6
62	Self-Reported Preferences for Help-Seeking and Barriers to Using Mental Health Supports Among Internal Medicine Residents: Exploratory Use of an Econometric Best-Worst Scaling Framework for Gathering Physician Wellness Preferences. JMIR Medical Education, 2021, 7, e28623.	2.6	0
63	Assessing mental health apps marketplaces with objective metrics from 29,190 data points from 278 apps. Acta Psychiatrica Scandinavica, 2021, 144, 201-210.	4.5	45
64	Preparing Patients and Clinicians for Open Notes in Mental Health: Qualitative Inquiry of International Experts. JMIR Mental Health, 2021, 8, e27397.	3.3	15
65	Mobile mental health: Bridging psychiatry and neurology through engaging innovations. General Hospital Psychiatry, 2021, 75, 90-90.	2.4	1
66	Digital Clinics and Mobile Technology Implementation for Mental Health Care. Current Psychiatry Reports, 2021, 23, 38.	4.5	37
67	Using apps for bipolar disorder – An online survey of healthcare provider perspectives and practices. Journal of Psychiatric Research, 2021, 137, 22-28.	3.1	15
68	Smartphone ownership and use of mental health applications by psychiatric inpatients. Psychiatry Research, 2021, 299, 113806.	3.3	16
69	Advancing translational research through the interface of digital phenotyping and neuroimaging: A narrative review. Biomarkers in Neuropsychiatry, 2021, 4, 100032.	1.0	8
70	Banbury Forum Consensus Statement on the Path Forward for Digital Mental Health Treatment. Psychiatric Services, 2021, 72, 677-683.	2.0	65
71	To the editor: New approaches toward actionable mobile health evaluation. Journal of the American Medical Informatics Association: JAMIA, 2021, 28, 2306-2307.	4.4	1
72	Evaluating the Machine Learning Literature: A Primer and User's Guide for Psychiatrists. American Journal of Psychiatry, 2021, 178, 715-729.	7.2	29

#	ARTICLE	IF	CITATIONS
73	Exploring the Association Between Electronic Wearable Device Use and Levels of Physical Activity Among Individuals With Depression and Anxiety: A Population Level Study. <i>Frontiers in Digital Health</i> , 2021, 3, 707900.	2.8	6
74	The growing field of digital psychiatry: current evidence and the future of apps, social media, chatbots, and virtual reality. <i>World Psychiatry</i> , 2021, 20, 318-335.	10.4	337
75	Mental Health App Evaluation: Updating the American Psychiatric Association's Framework Through a Stakeholder-Engaged Workshop. <i>Psychiatric Services</i> , 2021, 72, 1095-1098.	2.0	32
76	Using objective clinical metrics to understand the relationship between the electronic health record and physician well-being: observational pilot study. <i>BJPsych Open</i> , 2021, 7, e174.	0.7	6
77	Artificial Intelligence for Mental Health Care: Clinical Applications, Barriers, Facilitators, and Artificial Wisdom. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 856-864.	1.5	62
78	Use of smartphones, mobile apps and wearables for health promotion by people with anxiety or depression: An analysis of a nationally representative survey data. <i>Psychiatry Research</i> , 2021, 304, 114120.	3.3	18
79	Supporting the Mental Health Workforce During and After COVID-19. <i>Psychiatric Services</i> , 2021, 72, 1222-1224.	2.0	13
80	The Role of Digital Navigators in Promoting Clinical Care and Technology Integration into Practice. <i>Digital Biomarkers</i> , 2021, 4, 119-135.	4.4	71
81	Consensus Statement on Ethical & Safety Practices for Conducting Digital Monitoring Studies with People at Risk of Suicide and Related Behaviors. <i>Psychiatric Research and Clinical Practice</i> , 2021, 3, 57-66.	2.4	40
82	The benefits and harms of open notes in mental health: A Delphi survey of international experts. <i>PLoS ONE</i> , 2021, 16, e0258056.	2.5	10
83	Exploring the Neuropsychiatric Sequelae of Perceived COVID-19 Exposure in College Students: A Pilot Digital Phenotyping Study. <i>Frontiers in Psychiatry</i> , 2021, 12, 788926.	2.6	3
84	PERSPECTIVE: The Digital Health App Policy Landscape: Regulatory Gaps and Choices Through the Lens of Mental Health. <i>Journal of Mental Health Policy and Economics</i> , 2021, 24, 101-108.	0.6	0
85	Validation of an ecological momentary assessment to measure processing speed and executive function in schizophrenia. <i>NPJ Schizophrenia</i> , 2021, 7, 64.	3.6	6
86	Development of a decision-making checklist tool to support technology selection in digital health research. <i>Translational Behavioral Medicine</i> , 2020, 10, 1004-1015.	2.4	63
87	Mobile device applications and treatment of autism spectrum disorder: a systematic review and meta-analysis of effectiveness. <i>Archives of Disease in Childhood</i> , 2020, 105, 458-462.	1.9	15
88	Dropout rates in clinical trials of smartphone apps for depressive symptoms: A systematic review and meta-analysis. <i>Journal of Affective Disorders</i> , 2020, 263, 413-419.	4.1	283
89	T99. HARNESSING DIGITAL TECHNOLOGIES TO ASSESS AND TREAT COGNITIVE SYMPTOMS IN SCHIZOPHRENIA. <i>Schizophrenia Bulletin</i> , 2020, 46, S269-S269.	4.3	1
90	Preventive digital mental health interventions for children and young people: a review of the design and reporting of research. <i>Npj Digital Medicine</i> , 2020, 3, 133.	10.9	76

#	ARTICLE	IF	CITATIONS
91	From Symptom Tracking to Contact Tracing: A Framework to Explore and Assess COVID-19 Apps. <i>Future Internet</i> , 2020, 12, 153.	3.8	12
92	Determining sample size and length of follow-up for smartphone-based digital phenotyping studies. <i>Journal of the American Medical Informatics Association: JAMIA</i> , 2020, 27, 1844-1849.	4.4	21
93	Digital phenotyping for mental health of college students: a clinical review. <i>Evidence-Based Mental Health</i> , 2020, 23, 161-166.	4.5	73
94	Genome-wide association analysis of opioid use disorder: A novel approach using clinical data. <i>Drug and Alcohol Dependence</i> , 2020, 217, 108276.	3.2	17
95	Digital Health and Engagement—Looking Behind the Measures and Methods. <i>JAMA Network Open</i> , 2020, 3, e2010918.	5.9	68
96	Understanding the evolving preferences for use of health information technology among adults with self reported anxiety and depression in the U.S. <i>Journal of Behavioral and Cognitive Therapy</i> , 2020, 30, 49-56.	1.4	13
97	Smartphone Apps for College Mental Health: A Concern for Privacy and Quality of Current Offerings. <i>Psychiatric Services</i> , 2020, 71, 1114-1119.	2.0	30
98	A comparison of In-Person, Synchronous and Asynchronous Telepsychiatry: Skills/Competencies, Teamwork, and Administrative Workflow. <i>Journal of Technology in Behavioral Science</i> , 2020, 5, 273-288.	2.3	14
99	Deriving symptom networks from digital phenotyping data in serious mental illness. <i>BJPsych Open</i> , 2020, 6, e135.	0.7	8
100	Telerehabilitation in Psychiatry. <i>Indian Journal of Psychological Medicine</i> , 2020, 42, 57S-62S.	1.5	16
101	Does Patient Access to Clinical Notes Change Documentation?. <i>Frontiers in Public Health</i> , 2020, 8, 577896.	2.7	36
102	A pilot study using ecological momentary assessment via smartphone application to identify adolescent problematic internet use. <i>Psychiatry Research</i> , 2020, 293, 113428.	3.3	15
103	Actionable health app evaluation: translating expert frameworks into objective metrics. <i>Npj Digital Medicine</i> , 2020, 3, 100.	10.9	88
104	Expanding technology for engagement in dementia while ensuring equity, interoperability, and privacy. <i>International Psychogeriatrics</i> , 2020, 32, 893-895.	1.0	3
105	Impact of dynamic greenspace exposure on symptomatology in individuals with schizophrenia. <i>PLoS ONE</i> , 2020, 15, e0238498.	2.5	23
106	Digital Health Around Clinical High Risk and First-Episode Psychosis. <i>Current Psychiatry Reports</i> , 2020, 22, 58.	4.5	7
107	Smartphone relapse prediction in serious mental illness: a pathway towards personalized preventive care. <i>World Psychiatry</i> , 2020, 19, 308-309.	10.4	22
108	Digital technology for management of severe mental disorders in low-income and middle-income countries. <i>Current Opinion in Psychiatry</i> , 2020, 33, 501-507.	6.3	41

#	ARTICLE	IF	CITATIONS
109	Systematic Review of Digital Phenotyping and Machine Learning in Psychosis Spectrum Illnesses. <i>Harvard Review of Psychiatry</i> , 2020, 28, 296-304.	2.1	65
110	A meta-review of "lifestyle psychiatry": the role of exercise, smoking, diet and sleep in the prevention and treatment of mental disorders. <i>World Psychiatry</i> , 2020, 19, 360-380.	10.4	424
111	Exploring the Impact of Internet Use on Memory and Attention Processes. <i>International Journal of Environmental Research and Public Health</i> , 2020, 17, 9481.	2.6	16
112	Making mental health more accessible in light of COVID-19: Scalable digital health with digital navigators in low and middle-income countries. <i>Asian Journal of Psychiatry</i> , 2020, 54, 102433.	2.0	24
113	Sharing Clinical Notes in Psychotherapy: A New Tool to Strengthen Patient Autonomy. <i>Frontiers in Psychiatry</i> , 2020, 11, 527872.	2.6	12
114	Longitudinal trends in the quality, effectiveness and attributes of highly rated smartphone health apps. <i>Evidence-Based Mental Health</i> , 2020, 23, 107-111.	4.5	20
115	There is a non-evidence-based app for that: A systematic review and mixed methods analysis of depression- and anxiety-related apps that incorporate unrecognized techniques. <i>Journal of Affective Disorders</i> , 2020, 273, 410-421.	4.1	37
116	Opportunities From the Coronavirus Disease 2019 Pandemic for Transforming Psychiatric Care With Telehealth. <i>JAMA Psychiatry</i> , 2020, 77, 1205.	11.0	129
117	Advancing care for bipolar disorder today and breakthroughs in access and treatments tomorrow with mobile health and smartphone apps. <i>Bipolar Disorders</i> , 2020, 22, 211-212.	1.9	9
118	Towards clinically actionable digital phenotyping targets in schizophrenia. <i>NPJ Schizophrenia</i> , 2020, 6, 13.	3.6	26
119	Smartphone apps for the treatment of mental health conditions: status and considerations. <i>Current Opinion in Psychology</i> , 2020, 36, 65-70.	4.9	78
120	Measurement properties of smartphone approaches to assess key lifestyle behaviours: protocol of a systematic review. <i>Systematic Reviews</i> , 2020, 9, 127.	5.3	3
121	Social Media and Mental Health: Benefits, Risks, and Opportunities for Research and Practice. <i>Journal of Technology in Behavioral Science</i> , 2020, 5, 245-257.	2.3	193
122	Digital Opportunities for Outcomes in Recovery Services (DOORS): A Pragmatic Hands-On Group Approach Toward Increasing Digital Health and Smartphone Competencies, Autonomy, Relatedness, and Alliance for Those With Serious Mental Illness. <i>Journal of Psychiatric Practice</i> , 2020, 26, 80-88.	0.7	61
123	Multidisciplinary research priorities for the COVID-19 pandemic. <i>Lancet Psychiatry</i> , 2020, 7, e39.	7.4	2
124	The digital clinic: Implementing technology and augmenting care for mental health. <i>General Hospital Psychiatry</i> , 2020, 66, 59-66.	2.4	56
125	Guidelines for wrist-worn consumer wearable assessment of heart rate in biobehavioral research. <i>Npj Digital Medicine</i> , 2020, 3, 90.	10.9	131
126	Generating value with mental health apps. <i>BJPsych Open</i> , 2020, 6, e16.	0.7	20

#	ARTICLE	IF	CITATIONS
127	Sharing notes with mental health patients: balancing risks with respect. <i>Lancet Psychiatry</i> , 2020, 7, 924-925.	7.4	39
128	Digital navigators to implement smartphone and digital tools in care. <i>Acta Psychiatrica Scandinavica</i> , 2020, 141, 350-355.	4.5	82
129	A Narrative Review of Methods for Applying User Experience in the Design and Assessment of Mental Health Smartphone Interventions. <i>International Journal of Technology Assessment in Health Care</i> , 2020, 36, 64-70.	0.5	29
130	Impact of Collateral on Emergency Department Length of Stay in College-Aged Patients. <i>Psychiatric Quarterly</i> , 2020, 91, 761-768.	2.1	1
131	Feasibility and correlations of smartphone meta-data toward dynamic understanding of depression and suicide risk in schizophrenia. <i>International Journal of Methods in Psychiatric Research</i> , 2020, 29, e1825.	2.1	7
132	Genome-wide association analysis of insomnia using data from Partners Biobank. <i>Scientific Reports</i> , 2020, 10, 6928.	3.3	11
133	COVID-19, mobile health and serious mental illness. <i>Schizophrenia Research</i> , 2020, 218, 36-37.	2.0	98
134	Verbal memory measurement towards digital perspectives in first-episode psychosis: A review. <i>Schizophrenia Research: Cognition</i> , 2020, 21, 100177.	1.3	6
135	Multiple uses of app instead of using multiple apps – a case for rethinking the digital health technology toolbox. <i>Epidemiology and Psychiatric Sciences</i> , 2020, 29, e100.	3.9	16
136	Scaling evidence-based treatments through digital mental health.. <i>American Psychologist</i> , 2020, 75, 1093-1104.	4.2	71
137	Digital health developments and drawbacks: a review and analysis of top-rated apps for bipolar disorder. <i>International Journal of Bipolar Disorders</i> , 2020, 8, 39.	2.2	36
