#	ARTICLE	IF	CITATIONS
1	Measuring Speech Intelligibility and Hearing-Aid Benefit Using Everyday Conversational Sentences in Real-World Environments. <i>Frontiers in Neuroscience</i> , 2022, 16, 789565.	2.8	4
2	A dynamic binaural harmonic-cancellation model to predict speech intelligibility against a harmonic masker varying in intonation, temporal envelope, and location. <i>Hearing Research</i> , 2022, 426, 108535.	2.0	2
3	Investigating the role of harmonic cancellation in speech-on-speech masking. <i>Hearing Research</i> , 2022, 426, 108562.	2.0	3
4	Effects of Hearing Loss on Interaural Time Difference Sensitivity at Low and High Frequencies. <i>Trends in Hearing</i> , 2022, 26, 233121652210953.	1.3	0
5	Does Sentence-Level Coarticulation Affect Speech Recognition in Noise or a Speech Masker?. <i>Journal of Speech, Language, and Hearing Research</i> , 2021, 64, 1390-1403.	1.6	1
6	High-resolution temporal weighting of interaural time differences in speech. <i>Journal of the Acoustical Society of America</i> , 2021, 150, 1311-1320.	1.1	1
7	Individual differences in speech intelligibility at a cocktail party: A modeling perspective. <i>Journal of the Acoustical Society of America</i> , 2021, 150, 1076-1087.	1.1	5
8	Intracranial lateralization bias observed in the presence of symmetrical hearing thresholds. <i>JASA Express Letters</i> , 2021, 1, 104401.	1.1	1
9	Sound Externalization: A Review of Recent Research. <i>Trends in Hearing</i> , 2020, 24, 233121652094839.	1.3	40
10	A harmonic-cancellation-based model to predict speech intelligibility against a harmonic masker. <i>Journal of the Acoustical Society of America</i> , 2020, 148, 3246-3254.	1.1	9
11	Spectro-temporal weighting of interaural time differences in speech. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 3883-3894.	1.1	7
12	The importance of processing resolution in "ideal time-frequency segregation" of masked speech and the implications for predicting speech intelligibility. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 1648-1660.	1.1	3
13	Speech detection and localization in a reverberant multitalker environment by normal-hearing and hearing-impaired listeners. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 1469-1477.	1.1	9
14	Development of the Everyday Conversational Sentences in Noise test. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 1562-1576.	1.1	17
15	Binaural sensitivity and release from speech-on-speech masking in listeners with and without hearing loss. <i>Journal of the Acoustical Society of America</i> , 2020, 147, 1546-1561.	1.1	12
16	Can background noise increase the informational masking in a speech mixture?. <i>Journal of the Acoustical Society of America</i> , 2020, 147, EL144-EL150.	1.1	4
17	Benefits of Beamforming With Local Spatial-Cue Preservation for Speech Localization and Segregation. <i>Trends in Hearing</i> , 2020, 24, 233121651989690.	1.3	8
18	Age-Related Changes in Segregation of Sound Sources. <i>Springer Handbook of Auditory Research</i> , 2020, , 143-171.	0.7	10

#	ARTICLE	IF	CITATIONS
19	An effect of eye position in cocktail party listening. Proceedings of Meetings on Acoustics, 2020, , .	0.3	1
20	Modeling Binaural Speech Understanding in Complex Situations. Modern Acoustics and Signal Processing, 2020, , 547-578.	0.8	5
21	Determining the energetic and informational components of speech-on-speech masking in listeners with sensorineural hearing loss. Journal of the Acoustical Society of America, 2019, 145, 440-457.	1.1	25
22	Energetic and Informational Components of Speech-on-Speech Masking in Binaural Speech Intelligibility and Perceived Listening Effort. Trends in Hearing, 2019, 23, 233121651985459.	1.3	24
23	Revisiting the detection of interaural time differences in listeners with hearing loss. Journal of the Acoustical Society of America, 2019, 145, EL508-EL513.	1.1	12
24	The importance of a broad bandwidth for understanding "glimpsed" speech. Journal of the Acoustical Society of America, 2019, 146, 3215-3221.	1.1	11
25	Talker identification: Effects of masking, hearing loss, and age. Journal of the Acoustical Society of America, 2018, 143, 1085-1092.	1.1	18
26	Evaluating the Performance of a Visually Guided Hearing Aid Using a Dynamic Auditory-Visual Word Congruence Task. Ear and Hearing, 2018, 39, 756-769.	2.1	12
27	Sensorineural hearing loss degrades behavioral and physiological measures of human spatial selective auditory attention. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, E3286-E3295.	7.1	54
28	Evaluation of the NAL Dynamic Conversations Test in older listeners with hearing loss. International Journal of Audiology, 2018, 57, 221-229.	1.7	16
29	A "Buildup" of Speech Intelligibility in Listeners With Normal Hearing and Hearing Loss. Trends in Hearing, 2018, 22, 233121651880751.	1.3	9
30	Listening through hearing aids affects spatial perception and speech intelligibility in normal-hearing listeners. Journal of the Acoustical Society of America, 2018, 144, 2896-2905.	1.1	29
31	Use of a glimpsing model to understand the performance of listeners with and without hearing loss in spatialized speech mixtures. Journal of the Acoustical Society of America, 2017, 141, 81-91.	1.1	35
32	Streaming and sound localization with a preceding distractor. Journal of the Acoustical Society of America, 2017, 141, EL331-EL337.	1.1	10
33	Asymmetries in behavioral and neural responses to spectral cues demonstrate the generality of auditory looming bias. Proceedings of the National Academy of Sciences of the United States of America, 2017, 114, 9743-9748.	7.1	28
34	The Benefit of a Visually Guided Beamformer in a Dynamic Speech Task. Trends in Hearing, 2017, 21, 233121651772230.	1.3	22
35	Examination of a hybrid beamformer that preserves auditory spatial cues. Journal of the Acoustical Society of America, 2017, 142, EL369-EL374.	1.1	17
36	A Method for Assessing Auditory Spatial Analysis in Reverberant Multitalker Environments. Journal of the American Academy of Audiology, 2016, 27, 601-611.	0.7	14

#	ARTICLE	IF	CITATIONS
37	Informational Masking in Normal-Hearing and Hearing-Impaired Listeners Measured in a Nonspeech Pattern Identification Task. Trends in Hearing, 2016, 20, 233121651663851.	1.3	6
38	Determining the energetic and informational components of speech-on-speech masking. Journal of the Acoustical Society of America, 2016, 140, 132-144.	1.1	82
39	Auditory masking of speech in reverberant multi-talker environments. Journal of the Acoustical Society of America, 2016, 139, 1303-1313.	1.1	2
40	Role of Binaural Temporal Fine Structure and Envelope Cues in Cocktail-Party Listening. Journal of Neuroscience, 2016, 36, 8250-8257.	3.6	39
41	A Dynamic Speech Comprehension Test for Assessing Real-World Listening Ability. Journal of the American Academy of Audiology, 2016, 27, 515-526.	0.7	19
42	A Flexible Question-and-Answer Task for Measuring Speech Understanding. Trends in Hearing, 2016, 20, 233121651667870.	1.3	15
43	Development and preliminary evaluation of a new test of ongoing speech comprehension. International Journal of Audiology, 2016, 55, 45-52.	1.7	26
44	On the Contribution of Target Audibility to Performance in Spatialized Speech Mixtures. Advances in Experimental Medicine and Biology, 2016, 894, 83-91.	1.6	7
45	Benefits of Acoustic Beamforming for Solving the Cocktail Party Problem. Trends in Hearing, 2015, 19, 233121651559338.	1.3	21
46	Cognitive spare capacity: evaluation data and its association with comprehension of dynamic conversations. Frontiers in Psychology, 2015, 6, 597.	2.1	15
47	Musical training, individual differences and the cocktail party problem. Scientific Reports, 2015, 5, 11628.	3.3	105
48	Better-ear glimpsing in hearing-impaired listeners. Journal of the Acoustical Society of America, 2015, 137, EL213-EL219.	1.1	20
49	An examination of speech reception thresholds measured in a simulated reverberant cafeteria environment. International Journal of Audiology, 2015, 54, 682-690.	1.7	34
50	An evaluation of the performance of two binaural beamformers in complex and dynamic multitalker environments. International Journal of Audiology, 2015, 54, 727-735.	1.7	29
51	Effect of audibility on spatial release from speech-on-speech masking. Journal of the Acoustical Society of America, 2015, 138, 3311-3319.	1.1	22
52	Does providing more processing time improve speech intelligibility in hearing-impaired listeners?. Proceedings of Meetings on Acoustics, 2015, , .	0.3	0
53	The role of syntax in maintaining the integrity of streams of speech. Journal of the Acoustical Society of America, 2014, 135, 766-777.	1.1	26
54	Acoustic analysis of the directional information captured by five different hearing aid styles. Journal of the Acoustical Society of America, 2014, 136, 818-828.	1.1	12

#	ARTICLE	IF	CITATIONS
55	An Energetic Limit on Spatial Release from Masking. JARO - Journal of the Association for Research in Otolaryngology, 2013, 14, 603-610.	1.8	32
56	Spatial release from masking as a function of the spectral overlap of competing talkers. Journal of the Acoustical Society of America, 2013, 133, 3677-3680.	1.1	11
57	Perceiving sequential dependencies in auditory streams. Journal of the Acoustical Society of America, 2013, 134, 1215-1231.	1.1	2
58	The effect of better-ear glimpsing on spatial release from masking. Journal of the Acoustical Society of America, 2013, 134, 2937-2945.	1.1	49
59	Spatial release from masking for noise-vocoded speech. Proceedings of Meetings on Acoustics, 2013, , .	0.3	0
60	The influence of non-spatial factors on measures of spatial release from masking. Journal of the Acoustical Society of America, 2012, 131, 3103-3110.	1.1	60
61	How Visual Cues for when to Listen Aid Selective Auditory Attention. JARO - Journal of the Association for Research in Otolaryngology, 2012, 13, 359-368.	1.8	17
62	Spatial release from masking in normally hearing and hearing-impaired listeners as a function of the temporal overlap of competing talkers. Journal of the Acoustical Society of America, 2011, 129, 1616-1625.	1.1	35
63	Binaural interference in bilateral cochlear-implant listeners. Journal of the Acoustical Society of America, 2011, 130, 2939-2950.	1.1	21
64	Localization in speech mixtures by listeners with hearing loss. Journal of the Acoustical Society of America, 2011, 129, EL210-EL215.	1.1	29
65	The Impact of Noise and Hearing Loss on the Processing of Simultaneous Sentences. Ear and Hearing, 2010, 31, 213-220.	2.1	35
66	Exploring the benefit of auditory spatial continuity. Journal of the Acoustical Society of America, 2010, 127, EL258-EL264.	1.1	25
67	Stimulus factors influencing spatial release from speech-on-speech masking. Journal of the Acoustical Society of America, 2010, 128, 1965-1978.	1.1	83
68	Phase effects on the perceived elevation of complex tones. Journal of the Acoustical Society of America, 2010, 127, 3060-3072.	1.1	5
69	A comparison of CIC and BTE hearing aids for three-dimensional localization of speech. International Journal of Audiology, 2010, 49, 723-732.	1.7	47
70	Speech localization in a multitalker mixture. Journal of the Acoustical Society of America, 2010, 127, 1450-1457.	1.1	32
71	Effects of Sensorineural Hearing Loss on Visually Guided Attention in a Multitalker Environment. JARO - Journal of the Association for Research in Otolaryngology, 2009, 10, 142-149.	1.8	28
72	Spatial unmasking of birdsong in zebra finches (<i>Taeniopygia guttata</i>) and budgerigars (<i>Melopsittacus</i>) Tj ETQq0 0 Q,rgBT /Overlock 10 T	0.5	33
