Version: 2024-02-01

138 papers	16,807 citations	30070 54 h-index	16183 124 g-index
150 all docs	150 docs citations	150 times ranked	14400 citing authors

#	Article	IF	Citations
1	A movement ecology paradigm for unifying organismal movement research. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 19052-19059.	7.1	2,043
2	Spatial patterns of seed dispersal, their determinants and consequences for recruitment. Trends in Ecology and Evolution, 2000, 15, 278-285.	8.7	1,620
3	Long-Distance Dispersal of Plants. Science, 2006, 313, 786-788.	12.6	835
4	Moving in the Anthropocene: Global reductions in terrestrial mammalian movements. Science, 2018, 359, 466-469.	12.6	783
5	Mechanisms of long-distance seed dispersal. Trends in Ecology and Evolution, 2008, 23, 638-647.	8.7	705
6	The Ecology and Evolution of Seed Dispersal: A Theoretical Perspective. Annual Review of Ecology, Evolution, and Systematics, 2003, 34, 575-604.	8.3	653
7	Mechanisms of long-distance dispersal of seeds by wind. Nature, 2002, 418, 409-413.	27.8	565
8	Longâ€distance gene flow and adaptation of forest trees to rapid climate change. Ecology Letters, 2012, 15, 378-392.	6.4	550
9	The importance of long-distance dispersal in biodiversity conservation. Diversity and Distributions, 2005, 11, 173-181.	4.1	428
10	Methods for estimating long-distance dispersal. Oikos, 2003, 103, 261-273.	2.7	382
11	Using tri-axial acceleration data to identify behavioral modes of free-ranging animals: general concepts and tools illustrated for griffon vultures. Journal of Experimental Biology, 2012, 215, 986-996.	1.7	359
12	Forecasting Regional to Global Plant Migration in Response to Climate Change. BioScience, 2005, 55, 749.	4.9	279
13	Trends and missing parts in the study of movement ecology. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 19060-19065.	7.1	276
14	DETERMINANTS OF LONG-DISTANCE SEED DISPERSAL BY WIND IN GRASSLANDS. Ecology, 2004, 85, 3056-3068.	3.2	235
15	An emerging movement ecology paradigm. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 19050-19051.	7.1	232
16	The challenges of studying dispersal. Trends in Ecology and Evolution, 2001, 16, 481-483.	8.7	221
17	FIELD VALIDATION AND SENSITIVITY ANALYSIS OF A MECHANISTIC MODEL FOR TREE SEED DISPERSAL BY WIND. Ecology, 2001, 82, 374-388.	3.2	194
18	Incorporating dispersal distance into the disperser effectiveness framework: frugivorous birds provide complementary dispersal to plants in a patchy environment. Ecology Letters, 2007, 10, 718-728.	6.4	194

#	Article	IF	Citations
19	Large-scale navigational map in a mammal. Proceedings of the National Academy of Sciences of the United States of America, 2011, 108, E718-24.	7.1	175
20	Big-data approaches lead to an increased understanding of the ecology of animal movement. Science, 2022, 375, eabg1780.	12.6	173
21	Reproductive traits of Pinus halepensis in the light of fire â€“ a critical review. Plant Ecology, 2004, 171, 69-79.	1.6	161
22	Field Validation and Sensitivity Analysis of a Mechanistic Model for Tree Seed Dispersal by Wind. Ecology, 2001, 82, 374.	3.2	161
23	Spread of North American wind-dispersed trees in future environments. Ecology Letters, 2011, 14, 211-219.	6.4	160
24	A simple mechanistic model of seed dispersal, predation and plant establishment: Janzen-Connell and beyond. Journal of Ecology, 2004, 92, 733-746.	4.0	158
25	Mechanistic models of seed dispersal by wind. Theoretical Ecology, 2011, 4, 113-132.	1.0	157
26	Management of plant invasions mediated by frugivore interactions. Journal of Applied Ecology, 2006, 43, 848-857.	4.0	151
27	Costs of migratory decisions: A comparison across eight white stork populations. Science Advances, 2016, 2, e1500931.	10.3	151
28	Dispersal kernels: review. , 2012, , 186-210.		148
29	The challenges of the first migration: movement and behaviour of juvenile vs. adult white storks with insights regarding juvenile mortality. Journal of Animal Ecology, 2016, 85, 938-947.	2.8	144
30	SPATIOTEMPORAL VARIATION IN SEED DISPERSAL AND RECRUITMENT NEAR AND FAR FROMPINUS HALEPENSISTREES. Ecology, 2000, 81, 2156-2169.	3.2	141
31	How fragmentation and corridors affect wind dynamics and seed dispersal in open habitats. Proceedings of the National Academy of Sciences of the United States of America, 2014, 111, 3484-3489.	7.1	127
32	A comprehensive analysis of autocorrelation and bias in home range estimation. Ecological Monographs, 2019, 89, e01344.	5.4	127
33	AcceleRater: a web application for supervised learning of behavioral modes from acceleration measurements. Movement Ecology, 2014, 2, 27.	2.8	126
34	Seed release without fire inPinus halepensis, a Mediterranean serotinous windâ€dispersed tree. Journal of Ecology, 1999, 87, 659-669.	4.0	125
35	Effects of canopy heterogeneity, seed abscission and inertia on windâ€driven dispersal kernels of tree seeds. Journal of Ecology, 2008, 96, 569-580.	4.0	122
36	Long-distance dispersal of tree seeds by wind. Ecological Research, 2001, 16, 877-885.	1.5	120

#	Article	IF	Citations
37	Effects of long-distance dispersal for metapopulation survival and genetic structure at ecological time and spatial scales. Journal of Ecology, 2005, 93, 1029-1040.	4.0	118
38	Foliage shedding in deciduous forests lifts up long-distance seed dispersal by wind. Proceedings of the National Academy of Sciences of the United States of America, 2005, 102, 8251-8256.	7.1	116
39	Plant fecundity and seed dispersal in spatially heterogeneous environments: models, mechanisms and estimation. Journal of Ecology, 2008, 96, 628-641.	4.0	114
40	Adult vultures outperform juveniles in challenging thermal soaring conditions. Scientific Reports, 2016, 6, 27865.	3.3	105
41	Long-distance dispersal research: building a network of yellow brick roads. Diversity and Distributions, 2005, 11, 125-130.	4.1	100
42	Understanding strategies for seed dispersal by wind under contrasting atmospheric conditions. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 19084-19089.	7.1	99
43	Long-distance biological transport processes through the air: can nature's complexity be unfolded in silico?. Diversity and Distributions, 2005, 11, 131-137.	4.1	98
44	Cognitive mapâ€“based navigation in wild bats revealed by a new high-throughput tracking system. Science, 2020, 369, 188-193.	12.6	98
45	Spatiotemporal dynamics of recruitment in Aleppo pine (Pinus halepensis Miller). Plant Ecology, 2004, 171, 123-137.	1.6	80
46	Effective gene dispersal and female reproductive success in Mediterranean maritime pine (Pinus) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 3	3.9	80
47	Flight Modes in Migrating European Bee-Eaters: Heart Rate May Indicate Low Metabolic Rate during Soaring and Gliding. PLoS ONE, 2010, 5, e13956.	2.5	77
48	A milestone for movement ecology research. Movement Ecology, 2013, 1, 1.	2.8	75
49	Increases in air temperature can promote wind-driven dispersal and spread of plants. Proceedings of the Royal Society B: Biological Sciences, 2009, 276, 3081-3087.	2.6	72
50	Factors Influencing Foraging Search Efficiency: Why Do Scarce Lappet-Faced Vultures Outperform Ubiquitous White-Backed Vultures?. American Naturalist, 2013, 181, E102-E115.	2.1	65
51	Social foraging and individual consistency in following behaviour: testing the information centre hypothesis in free-ranging vultures. Proceedings of the Royal Society B: Biological Sciences, 2017, 284, 20162654.	2.6	64
52	Decision-making by a soaring bird: time, energy and risk considerations at different spatio-temporal scales. Philosophical Transactions of the Royal Society B: Biological Sciences, 2016, 371, 20150397.	4.0	63
53	HUMAN EFFECTS ON LONG-DISTANCE WIND DISPERSAL AND COLONIZATION BY GRASSLAND PLANTS. Ecology, 2004, 85, 3069-3079.	3.2	62
54	Mixed strategies of griffon vulturesâ€™ (Gyps fulvus) response to food deprivation lead to a hump-shaped movement pattern. Movement Ecology, 2013, 1, 5.	2.8	62

#	Article	IF	Citations
55	Movementâ€mediated community assembly and coexistence. Biological Reviews, 2020, 95, 1073-1096.	10.4	62
56	Wintering in Europe instead of Africa enhances juvenile survival in a long-distance migrant. Animal Behaviour, 2017, 126, 79-88.	1.9	61
57	Habitat loss and fragmentation affecting mammal and bird communitiesâ€"The role of interspecific competition and individual space use. Ecological Informatics, 2013, 14, 90-98.	5.2	60
58	The gliding speed of migrating birds: slow and safe or fast and risky?. Ecology Letters, 2014, 17, 670-679.	6.4	60
59	Insights and approaches using deep learning to classify wildlife. Scientific Reports, 2019, 9, 8137.	3.3	60
60	Seed terminal velocity, wind turbulence, and demography drive the spread of an invasive tree in an analytical model. Ecology, 2012, 93, 368-377.	3.2	57
61	Pervasive humanâ€mediated largeâ€scale invasion: analysis of spread patterns and their underlying mechanisms in 17 of China's worst invasive plants. Journal of Ecology, 2017, 105, 85-94.	4.0	52
62	Genetic evidence for a Janzen-Connell recruitment pattern in reproductive offspring of Pinus halepensis trees. Molecular Ecology, 2011, 20, 4152-4164.	3.9	50
63	Migration by soaring or flapping: numerical atmospheric simulations reveal that turbulence kinetic energy dictates bee-eater flight mode. Proceedings of the Royal Society B: Biological Sciences, 2011, 278, 3380-3386.	2.6	50
64	Incorporating density dependence into the directed-dispersal hypothesis. Ecology, 2010, 91, 1538-1548.	3.2	49
65	Early arrival at breeding grounds: Causes, costs and a tradeâ€off with overwintering latitude. Journal of Animal Ecology, 2018, 87, 1627-1638.	2.8	49
66	Biological Earth observation with animal sensors. Trends in Ecology and Evolution, 2022, 37, 293-298.	8.7	49
67	Moving beyond Curve Fitting: Using Complementary Data to Assess Alternative Explanations for Long Movements of Three Vulture Species. American Naturalist, 2015, 185, E44-E54.	2.1	47
68	An allometric model of home range formation explains the structuring of animal communities exploiting heterogeneous resources. Oikos, 2011, 120, 106-118.	2.7	45
69	Empirical evaluation of directed dispersal and densityâ€dependent effects across successive recruitment phases. Journal of Ecology, 2012, 100, 392-404.	4.0	44
70	Over the (range) edge: a 45-year transplant experiment with the perennial forest herbHyacinthoides non-scripta. Journal of Ecology, 2007, 95, 343-351.	4.0	42
71	Mechanistic modeling of seed dispersal by wind over hilly terrain. Ecological Modelling, 2014, 274, 29-40.	2.5	42
72	Timing and flight mode of departure in migrating European bee-eaters in relation to multi-scale meteorological processes. Behavioral Ecology and Sociobiology, 2011, 65, 1353-1365.	1.4	40

#	Article	IF	Citations
73	Characterizing the Accuracy of a Self-Synchronized Reverse-GPS Wildlife Localization System. , 2016, , .		40
74	A guide to preâ€processing highâ€throughput animal tracking data. Journal of Animal Ecology, 2022, 91, 287-307.	2.8	40
75	Large birds travel farther in homogeneous environments. Global Ecology and Biogeography, 2019, 28, 576-587.	5.8	39
76	Guidelines for Using Movement Science to Inform Biodiversity Policy. Environmental Management, 2015, 56, 791-801.	2.7	36
77	Movement ecology and sex are linked to barn owl microbial community composition. Molecular Ecology, 2020, 29, 1358-1371.	3.9	33
78	Long-Distance Dispersal1. Ecology, 2003, 84, 1943-1944.	3.2	32
79	Movement upscaled â€“ the importance of individual foraging movement for community response to habitat loss. Ecography, 2012, 35, 436-445.	4.5	31
80	Enriching the isotopic toolbox for migratory connectivity analysis: a new approach for migratory species breeding in remote or unexplored areas. Diversity and Distributions, 2015, 21, 416-427.	4.1	30
81	Fireâ€induced population reduction and landscape opening increases gene flow via pollen dispersal in <scp>P</scp>inus halepensis. Molecular Ecology, 2014, 23, 70-81.	3.9	29
82	Home Range Size and Resource Use of Breeding and Non-breeding White Storks Along a Land Use Gradient. Frontiers in Ecology and Evolution, 2018, 6, .	2.2	28
83	Stochastic simulations reveal few green wave surfing populations among spring migrating herbivorous waterfowl. Nature Communications, 2019, 10, 2187.	12.8	28
84	Linking traits of foraging animals to spatial patterns of plants: social and solitary ants generate opposing patterns of surviving seeds. Ecology Letters, 2008, 11, 224-234.	6.4	27
85	The spatial complexity of seed movement: Animalâ€generated seed dispersal patterns in fragmented landscapes revealed by animal movement models. Journal of Ecology, 2020, 108, 687-701.	4.0	27
86	Plant dispersal across multiple scales: linking models and reality. Journal of Ecology, 2008, 96, 567-568.	4.0	26
87	Effects of forest plantations on the genetic composition of conspecific native Aleppo pine populations. Molecular Ecology, 2012, 21, 300-313.	3.9	26
88	Individual environmental niches in mobile organisms. Nature Communications, 2021, 12, 4572.	12.8	26
89	Migration, pathogens and the avian microbiome: A comparative study in sympatric migrants and residents. Molecular Ecology, 2020, 29, 4706-4720.	3.9	25
90	Sex determination in the wild: a field application of loopâ€mediated isothermal amplification successfully determines sex across three raptor species. Molecular Ecology Resources, 2017, 17, 153-160.	4.8	24

#	Article	IF	Citations
91	Individualâ€based modelling of resource competition to predict densityâ€dependent population dynamics: a case study with white storks. Oikos, 2015, 124, 319-330.	2.7	23
92	Movement Strategies of Seed Predators as Determinants of Plant Recruitment Patterns. American Naturalist, 2008, 172, 694-711.	2.1	22
93	Lessons and Experiences from the Design, Implementation, and Deployment of a Wildlife Tracking System. , 2016, , .		22
94	Agricultural Rodent Control Using Barn Owls: Is It Profitable?. American Journal of Agricultural Economics, 2014, 96, 733-752.	4.3	21
95	Causes and consequences of facultative sea crossing in a soaring migrant. Functional Ecology, 2020, 34, 840-852.	3.6	20
96	Is habitat selection in the wild shaped by individualâ€level cognitive biases in orientation strategy?. Ecology Letters, 2021, 24, 751-760.	6.4	20
97	Hotspots in the grid: Avian sensitivity and vulnerability to collision risk from energy infrastructure interactions in Europe and North Africa. Journal of Applied Ecology, 2022, 59, 1496-1512.	4.0	20
98	Lightweight low-cost wildlife tracking tags using integrated transceivers. , 2014, , .		19
99	Using accelerometry to compare costs of extended migration in an arctic herbivore. Environmental Epigenetics, 2017, 63, 667-674.	1.8	19
100	An evaluation of machine learning classifiers for next-generation, continuous-ethogram smart trackers. Movement Ecology, 2021, 9, 15.	2.8	19
101	Ergodicity Breaking in Area-Restricted Search of Avian Predators. Physical Review X, 2022, 12, .	8.9	19
102	Long-Distance Seed Dispersal. , 0, , 204-237.		18
103	Extra-pair paternity in the socially monogamous white stork (Ciconia ciconia) is fairly common and independent of local density. Scientific Reports, 2016, 6, 27976.	3.3	17
104	Habitat use, but not gene flow, is influenced by human activities in two ecotypes of Egyptian fruit bat (Rousettus aegyptiacus). Molecular Ecology, 2017, 26, 6224-6237.	3.9	17
105	Drivers of change and stability in the gut microbiota of an omnivorous avian migrant exposed to artificial food supplementation. Molecular Ecology, 2021, 30, 4723-4739.	3.9	16
106	Early-life behaviour predicts first-year survival in a long-distance avian migrant. Proceedings of the Royal Society B: Biological Sciences, 2021, 288, 20202670.	2.6	16
107	Fine-scale spatial genetic dynamics over the life cycle of the tropical tree Prunus africana. Heredity, 2014, 113, 401-407.	2.6	15
108	Seasonal differences in energy expenditure, flight characteristics and spatial utilization of Dalmatian Pelicans Pelecanus crispus in Greece. Ibis, 2019, 161, 415-427.	1.9	15

#	Article	IF	Citations
109	Congruence between oceanâ€dispersal modelling and phylogeography explains recent evolutionary history of Cycas species with buoyant seeds. New Phytologist, 2021, 232, 1863-1875.	7.3	15
110	Phase Transition in a Non-Markovian Animal Exploration Model with Preferential Returns. Physical Review Letters, 2022, 128, 148301.	7.8	15
111	How Movement Properties Affect Prey Encounter Rates of Ambush versus Active Predators: A Comment on Scharf et al.. American Naturalist, 2008, 172, 593-595.	2.1	14
112	The characteristic timeâ€scale of perceived information for decisionâ€making: Departure from thermal columns in soaring birds. Functional Ecology, 2018, 32, 2065-2072.	3.6	14
113	Landscapeâ€dependent time versus energy optimizations in pelicans migrating through a large ecological barrier. Functional Ecology, 2019, 33, 2161-2171.	3.6	14
114	A role for lakes in revealing the nature of animal movement using high dimensional telemetry systems. Movement Ecology, 2021, 9, 40.	2.8	13
115	Using movement ecology to evaluate the effectiveness of multiple human-wildlife conflict management practices. Biological Conservation, 2021, 262, 109306.	4.1	13
116	Compensation for lateral drift due to crosswind in migrating European Bee-eaters. Journal of Ornithology, 2014, 155, 745-753.	1.1	11
117	A simple modeling approach to elucidate the main transport processes and predict invasive spread: Riverâ€mediated invasion of <scp>A</scp>geratina adenophora in China. Water Resources Research, 2014, 50, 9738-9747.	4.2	11
118	Seasonal niche tracking of climate emerges at the population level in a migratory bird. Proceedings of the Royal Society B: Biological Sciences, 2020, 287, 20201799.	2.6	11
119	Changes of effective gene dispersal distances by pollen and seeds across successive life stages in a tropical tree. Oikos, 2013, 122, 1616-1625.	2.7	10
120	Dispersal Biogeography. , 2013, , 539-561.		9
121	In situ threeâ€dimensional video tracking of tagged individuals within siteâ€attached social groups of coralâ€reef fish. Limnology and Oceanography: Methods, 2021, 19, 579-588.	2.0	9
122	Spatial cognitive ability is associated with transitory movement speed but not straightness during the early stages of exploration. Royal Society Open Science, 2021, 8, 201758.	2.4	8
123	Memory and Conformity, but Not Competition, Explain Spatial Partitioning Between Two Neighboring Fruit Bat Colonies. Frontiers in Ecology and Evolution, 2021, 9, .	2.2	8
124	Understanding continent-wide variation in vulture ranging behavior to assess feasibility of Vulture Safe Zones in Africa: Challenges and possibilities. Biological Conservation, 2022, 268, 109516.	4.1	7
125	Managing uncertainty in movement knowledge for environmental decisions. Conservation Letters, 2019, 12, e12620.	5.7	6
126	Resource limitation drives fissionâ€“fusion dynamics of group composition and size in a social bird. Animal Behaviour, 2022, 191, 15-32.	1.9	6
