#	ARTICLE	IF	CITATIONS
1	Characteristics of high-resolution esophageal manometry in children without dysphagia. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14184.	1.6	4
2	Variables influencing manometric parameters of deglutitive and non-deglutitive upper esophageal sphincter: A study of 89 asymptomatic participants. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14175.	1.6	6
3	Identification and characterization of rostral ventromedial medulla neurons synaptically connected to the urinary bladder afferents in female rats with or without neonatal cystitis. <i>Journal of Comparative Neurology</i> , 2022, 530, 1129-1147.	0.9	1
4	Managing the risks and benefits of clinical research in response to a pandemic. <i>Journal of Clinical and Translational Science</i> , 2021, 5, .	0.3	4
5	Fatigability of the external anal sphincter muscles using a novel strength training resistance exercise device. <i>American Journal of Physiology - Renal Physiology</i> , 2021, 320, G609-G616.	1.6	4
6	Prioritizing Studies of COVID-19 and Lessons Learned. <i>Journal of Clinical and Translational Science</i> , 2021, 5, 1-27.	0.3	8
7	The rights (and responsibilities) of the public to advance health through research. <i>Archives of Public Health</i> , 2021, 79, 198.	1.0	2
8	Differences in fatigability of muscles involved in fecal continence: Potential clinical ramifications. <i>Physiological Reports</i> , 2021, 9, e15144.	0.7	0
9	Mechanisms of bradycardia in premature infants: Aerodigestive-cardiac regulatory rhythm interactions. <i>Physiological Reports</i> , 2020, 8, e14495.	0.7	10
10	Characterization and mechanism of the esophago-esophageal contractile reflex of the striated muscle esophagus. <i>American Journal of Physiology - Renal Physiology</i> , 2019, 317, G304-G313.	1.6	1
11	Interplay of spinal and vagal pathways on esophageal acid-related anterior cingulate cortex functional networks in rats. <i>American Journal of Physiology - Renal Physiology</i> , 2019, 316, G615-G622.	1.6	3
12	Pharyngoesophageal and cardiorespiratory interactions: potential implications for premature infants at risk of clinically significant cardiorespiratory events. <i>American Journal of Physiology - Renal Physiology</i> , 2019, 316, G304-G312.	1.6	23
13	Effects of esophageal acidification on esophageal reflexes controlling the upper esophageal sphincter. <i>American Journal of Physiology - Renal Physiology</i> , 2019, 316, G45-G54.	1.6	12
14	Säure-vermittelte Aktivierung des Wnt/ β -Catenin-Signalwegs während der gastroösophagealen Refluxkrankheit (GERD) in vitro. , 2019, 57, .		0
15	Tumor-induzierte endotheliale-mesenchymale Transition (EndMT) im Ösophagealen Adenokarzinom. <i>Zeitschrift Fur Gastroenterologie</i> , 2019, 57, .	0.2	0
16	Dickkopf-1 (DKK1) promotes tumor growth via Akt-phosphorylation and independently of Wnt-axis in Barrett's associated esophageal adenocarcinoma. <i>American Journal of Cancer Research</i> , 2019, 9, 330-346.	1.4	14
17	Upper esophageal sphincter augmentation reduces pharyngeal reflux in nasogastric tube-fed patients. <i>Laryngoscope</i> , 2018, 128, 1310-1315.	1.1	6
18	Maturation Modulates Pharyngeal-Stimulus Provoked Pharyngeal and Respiratory Rhythms in Human Infants. <i>Dysphagia</i> , 2018, 33, 63-75.	1.0	22

#	ARTICLE	IF	CITATIONS
19	The effect of body position on esophageal reflexes in cats: a possible mechanism of SIDS?. <i>Pediatric Research</i> , 2018, 83, 731-738.	1.1	5
20	The Real-Time IRB: A Collaborative Innovation to Decrease IRB Review Time. <i>Journal of Empirical Research on Human Research Ethics</i> , 2018, 13, 432-437.	0.6	10
21	Defining pharyngeal contractile integral during high-resolution manometry in neonates: a neuromotor marker of pharyngeal vigor. <i>Pediatric Research</i> , 2018, 84, 341-347.	1.1	18
22	Swallow strength training exercise for elderly: A health maintenance need. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13382.	1.6	23
23	Older Age Reduces Upper Esophageal Sphincter and Esophageal Body Responses to Simulated Slow and Ultraslow Reflux Events and Post-Reflux Residue. <i>Gastroenterology</i> , 2018, 155, 760-770.e1.	0.6	13
24	Neonatal bladder inflammation induces long-term visceral pain and altered responses of spinal neurons in adult rats. <i>Neuroscience</i> , 2017, 346, 349-364.	1.1	17
25	Obituary. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13079.	1.6	0
26	Pharyngeal peristaltic pressure variability, operational range, and functional reserve. <i>American Journal of Physiology - Renal Physiology</i> , 2017, 312, G516-G525.	1.6	8
27	Comparative effect of the sites of anterior cervical pressure on the geometry of the upper esophageal sphincter high-pressure zone. <i>Laryngoscope</i> , 2017, 127, 2466-2474.	1.1	2
28	The Dysphagia Research Society Accelerating a Priority Research Agenda. <i>Dysphagia</i> , 2017, 32, 11-14.	1.0	7
29	MicroRNA-mediated downregulation of potassium-chloride-cotransporter and vesicular β -aminobutyric acid transporter expression in spinal cord contributes to neonatal cystitis-induced visceral pain in rats. <i>Pain</i> , 2017, 158, 2461-2474.	2.0	27
30	Correlation of Pharyngeal Phase of Swallowing Biomechanics and Striated Muscle Esophageal Contractility: A Potential Stretch Related Modulatory Interaction. <i>Gastroenterology</i> , 2017, 152, S691.	0.6	1
31	Characterization of pharyngeal peristaltic pressure variability during volitional swallowing in healthy individuals. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13119.	1.6	14
32	Characterization and mechanisms of the supragastric belch in the cat. <i>American Journal of Physiology - Renal Physiology</i> , 2017, 313, G220-G229.	1.6	3
33	Special Section on DRS 25th Anniversary. <i>Dysphagia</i> , 2017, 32, 1-2.	1.0	4
34	Recognizing the Importance of Dysphagia: Stumbling Blocks and Stepping Stones in the Twenty-First Century. <i>Dysphagia</i> , 2017, 32, 78-82.	1.0	60
35	A CASE FOR DEVELOPING AN EXERCISE-BASED PREVENTIVE SWALLOW HEALTH MAINTENANCE PROGRAM IN THE ELDERLY. <i>Innovation in Aging</i> , 2017, 1, 441-441.	0.0	0
36	In Memoriam—Konrad H. Soergel, MD, 1929–2017. <i>Gastroenterology</i> , 2017, 153, 1172-1173.	0.6	0

#	ARTICLE	IF	CITATIONS
37	Oropharyngeal dysphagia in older persons – from pathophysiology to adequate intervention: a review and summary of an international expert meeting. <i>Clinical Interventions in Aging</i> , 2016, 11, 189.	1.3	342
38	Prolonged esophageal acid exposures induce synaptic downscaling of cortical membrane <sc>AMPA</sc> receptor subunits in rats. <i>Neurogastroenterology and Motility</i> , 2016, 28, 1356-1369.	1.6	0
39	Characterization and mechanisms of the pharyngeal swallow activated by stimulation of the esophagus. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 311, G827-G837.	1.6	14
40	A human model of restricted upper esophageal sphincter opening and its pharyngeal and UES deglutitive pressure phenomena. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 311, G84-G90.	1.6	19
41	Mechanisms of airway responses to esophageal acidification in cats. <i>Journal of Applied Physiology</i> , 2016, 120, 774-783.	1.2	3
42	Reply. <i>Gastroenterology</i> , 2016, 150, 1693-1694.	0.6	0
43	Dysregulation of WNT5A/ROR2 Signaling Characterizes the Progression of Barrett-Associated Esophageal Adenocarcinoma. <i>Molecular Cancer Research</i> , 2016, 14, 647-659.	1.5	11
44	Excessive coupling of the salience network with intrinsic neurocognitive brain networks during rectal distension in adolescents with irritable bowel syndrome: a preliminary report. <i>Neurogastroenterology and Motility</i> , 2016, 28, 43-53.	1.6	46
45	Effect of nasal noninvasive respiratory support methods on pharyngeal provocation-induced aerodigestive reflexes in infants. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 310, G1006-G1014.	1.6	32
46	Effects of laryngeal restriction on pharyngeal peristalsis and biomechanics: Clinical implications. <i>American Journal of Physiology - Renal Physiology</i> , 2016, 310, G1036-G1043.	1.6	23
47	Esophageal acid stimulation alters insular cortex functional connectivity in gastroesophageal reflux disease. <i>Neurogastroenterology and Motility</i> , 2015, 27, 201-211.	1.6	7
48	Impaired Upper Esophageal Sphincter Reflexes in Patients With Supraesophageal Reflux Disease. <i>Gastroenterology</i> , 2015, 149, 1381-1391.	0.6	48
49	841 Variability of Pharyngeal Peristaltic Pressure Parameters Measured by High Resolution Manometry (HRM); A Study of Over 900 Pressure Signatures. <i>Gastroenterology</i> , 2015, 148, S-167.	0.6	1
50	Dysphagia: current reality and scope of the problem. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2015, 12, 259-270.	8.2	339
51	Upper and lower esophageal sphincter kinetics are modified during maturation: effect of pharyngeal stimulus in premature infants. <i>Pediatric Research</i> , 2015, 77, 99-106.	1.1	41
52	Wnt/ β -Catenin Signaling Activation beyond Robust Nuclear β -Catenin Accumulation in Nondysplastic Barrett's Esophagus: Regulation via Dickkopf-1. <i>Neoplasia</i> , 2015, 17, 598-611.	2.3	17
53	Mechanisms of cough provocation and cough resolution in neonates with bronchopulmonary dysplasia. <i>Pediatric Research</i> , 2015, 78, 462-469.	1.1	26
54	Endothelial-mesenchymal transition in normal human esophageal endothelial cells cocultured with esophageal adenocarcinoma cells: role of IL-1 β and TGF- β 2. <i>American Journal of Physiology - Cell Physiology</i> , 2014, 307, C859-C877.	2.1	48

#	ARTICLE	IF	CITATIONS
55	Emergence of Deglutology: A Transdisciplinary Field. <i>Clinical Gastroenterology and Hepatology</i> , 2014, 12, 2046-2048.	2.4	2
56	Dickkopf-1, the Wnt antagonist, is induced by acidic pH and mediates epithelial cellular senescence in human reflux esophagitis. <i>American Journal of Physiology - Renal Physiology</i> , 2014, 306, G557-G574.	1.6	24
57	Social Media Analytics for Smart Health. <i>IEEE Intelligent Systems</i> , 2014, 29, 60-80.	4.0	41
58	Mechanism of UES relaxation initiated by gastric air distension. <i>American Journal of Physiology - Renal Physiology</i> , 2014, 307, G452-G458.	1.6	14
59	Effect of aging on hypopharyngeal safe volume and the aerodigestive reflexes protecting the airways. <i>Laryngoscope</i> , 2014, 124, 1862-1868.	1.1	12
60	Prevention of esophagopharyngeal reflux by augmenting the upper esophageal sphincter pressure barrier. <i>Laryngoscope</i> , 2014, 124, 2268-2274.	1.1	34
61	Analgesic effect of minocycline in rat model of inflammation-induced visceral pain. <i>European Journal of Pharmacology</i> , 2014, 727, 87-98.	1.7	32
62	Visceral analgesic effect of 5-HT4 receptor agonist in rats involves the rostroventral medulla (RVM). <i>Neuropharmacology</i> , 2014, 79, 345-358.	2.0	17
63	Tu1765 Regurgitation Can Indicate Either True Esophago-Pharyngeal Reflux (EPR) Event or Upper Esophageal Sphincter (UES) and Sub-Sphincter Proximal Esophageal Acid Exposure. <i>Gastroenterology</i> , 2013, 144, S-839.	0.6	2
64	231 Mechanism of Esophagopharyngeal Reflux: A Concurrent Videopharyngoscopy and High Resolution Manometry/Impedance Study. <i>Gastroenterology</i> , 2013, 144, S-50.	0.6	1
65	Functional connectivity of the cortical swallowing network in humans. <i>NeuroImage</i> , 2013, 76, 33-44.	2.1	34
66	Airway Protective Mechanisms, Reciprocal Physiology of the Deglutitive Axis. , 2013, , 35-51.		1
67	Effect of Aging of the Pharynx and the UES. , 2013, , 215-225.		1
68	Deglutitive Pharyngeal and UES Pressure Phenomena. , 2013, , 257-266.		0
69	<sc>AMPA</sc> receptor subunits expression and phosphorylation in cingulate cortex in rats following esophageal acid exposure. <i>Neurogastroenterology and Motility</i> , 2013, 25, 973.	1.6	9
70	Intrinsic functional connectivity of the brain swallowing network during subliminal esophageal acid stimulation. <i>Neurogastroenterology and Motility</i> , 2013, 25, 992.	1.6	11
71	UES Opening Muscle Dysfunction. , 2013, , 529-535.		2
72	Reproducibility of swallow-induced cortical BOLD positive and negative fMRI activity. <i>American Journal of Physiology - Renal Physiology</i> , 2012, 303, G600-G609.	1.6	19

#	ARTICLE	IF	CITATIONS
73	Characterization of the Upper Esophageal Sphincter Response During Cough. <i>Chest</i> , 2012, 142, 1229-1236.	0.4	14
74	Response of the Upper Esophageal Sphincter to Esophageal Distension Is Affected by Posture, Velocity, Volume, and Composition of the Infusate. <i>Gastroenterology</i> , 2012, 142, 734-743.e7.	0.6	31
75	Physiology of Aerodigestive Reflexes in Neonates and Adults. , 2012, , 893-918.		6
76	Unsedated transnasal endoscopy with ultrathin endoscope as a screening tool for research studies. <i>Laryngoscope</i> , 2012, 122, 1719-1723.	1.1	9
77	On the 20th Anniversary of the Dysphagia Research Society. <i>Dysphagia</i> , 2012, 27, 1-1.	1.0	2
78	Neuronal Plasticity in the Cingulate Cortex of Rats Following Esophageal Acid Exposure in Early Life. <i>Gastroenterology</i> , 2011, 141, 544-552.	0.6	11
79	A Novel "UES Assist Device" for Prevention of Supine Pharyngeal Reflux of Gastric Content. <i>Gastroenterology</i> , 2011, 140, S-190.	0.6	1
80	Protective Role of Aerodigestive Reflexes Against Aspiration: Study on Subjects With Impaired and Preserved Reflexes. <i>Gastroenterology</i> , 2011, 140, 1927-1933.	0.6	34
81	Reproducibility of the Resting and Active State Connectivity of the Deglutition Connectome. <i>Gastroenterology</i> , 2011, 140, S-368.	0.6	2
82	Pharyngeal airway protective reflexes are triggered before the maximum volume of fluid that the hypopharynx can safely hold is exceeded. <i>American Journal of Physiology - Renal Physiology</i> , 2011, 301, G197-G202.	1.6	28
83	Neonatal cystitis-induced colonic hypersensitivity in adult rats: a model of viscerovisceral convergence. <i>Neurogastroenterology and Motility</i> , 2011, 23, 683-e281.	1.6	29
84	Physiology and Pathophysiology of Glottic Reflexes and Pulmonary Aspiration: From Neonates to Adults. <i>Seminars in Respiratory and Critical Care Medicine</i> , 2010, 31, 554-560.	0.8	40
85	Anatomic-manometric correlation of the upper esophageal sphincter: a concurrent US and manometry study. <i>Gastrointestinal Endoscopy</i> , 2010, 72, 587-592.	0.5	17
86	Definition and Implications of Novel Pharyngo-Glottal Reflex in Human Infants Using Concurrent Manometry Ultrasonography. <i>American Journal of Gastroenterology</i> , 2009, 104, 2572-2582.	0.2	59
87	Effect of Systemic Alcohol and Nicotine on Airway Protective Reflexes. <i>American Journal of Gastroenterology</i> , 2009, 104, 2431-2438.	0.2	25
88	Effect of Postnatal Maturation on the Mechanisms of Esophageal Propulsion in Preterm Human Neonates: Primary and Secondary Peristalsis. <i>American Journal of Gastroenterology</i> , 2009, 104, 411-419.	0.2	67
89	Effect of esophageal acid exposure on the cortical swallowing network in healthy human subjects. <i>American Journal of Physiology - Renal Physiology</i> , 2009, 297, G152-G158.	1.6	16
90	Altered expression of P2X3 in vagal and spinal afferents following esophagitis in rats. <i>Histochemistry and Cell Biology</i> , 2009, 132, 585-597.	0.8	25

#	ARTICLE	IF	CITATIONS
91	Augmentation of Deglutitive Thyrohyoid Muscle Shortening by the Shaker Exercise. <i>Dysphagia</i> , 2009, 24, 26-31.	1.0	83
92	A Randomized Study Comparing the Shaker Exercise with Traditional Therapy: A Preliminary Study. <i>Dysphagia</i> , 2009, 24, 403-411.	1.0	138
93	Differential effects of transient receptor vanilloid one (TRPV1) antagonists in acid-induced excitation of esophageal vagal afferent fibers of rats. <i>Neuroscience</i> , 2009, 161, 515-525.	1.1	31
94	Prevalence of Abnormal Upper GI Findings in Apparently Healthy Volunteers Enrolled for Research Studies. <i>Gastrointestinal Endoscopy</i> , 2009, 69, AB350-AB351.	0.5	4
95	M2019 Phonation-Induced UES Contractile Reflex Is Preserved in the Elderly. <i>Gastroenterology</i> , 2009, 136, A-468.	0.6	1
96	W1829 Influence of Position On the Maximum Volume of Fluid That Can Safely Dwell in the Hypo-Pharynx; "Hypopharyngeal Safe Volume"(HPSV). <i>Gastroenterology</i> , 2009, 136, A-734.	0.6	1
97	Intramucosal Distribution of WNT Signaling Components in Human Esophagus. <i>Journal of Clinical Gastroenterology</i> , 2009, 43, 327-337.	1.1	11
98	The Feasibility of Establishing Agreement Between Laboratories for Measures of Oropharyngeal Structural Movements. <i>Journal of Medical Speech - Language Pathology</i> , 2009, 17, 9-19.	0.2	5
99	Editorial: The 15th Anniversary of the Dysphagia Research Society and Establishment of the "Endowment for the Future". <i>Dysphagia</i> , 2008, 23, 101-101.	1.0	0
100	Fatigue Analysis Before and After Shaker Exercise: Physiologic Tool for Exercise Design. <i>Dysphagia</i> , 2008, 23, 385-391.	1.0	42
101	Esophageal Dysphagia. <i>Physical Medicine and Rehabilitation Clinics of North America</i> , 2008, 19, 729-745.	0.7	12
102	Manometric evidence for a phonation-induced UES contractile reflex. <i>American Journal of Physiology - Renal Physiology</i> , 2008, 294, G885-G891.	1.6	36
103	Neurocognitive processing of esophageal central sensitization in the insula and cingulate gyrus. <i>American Journal of Physiology - Renal Physiology</i> , 2008, 294, G787-G794.	1.6	35
104	Ionizing Radiation Modulates Hsp34 and beta-Catenin. <i>FASEB Journal</i> , 2008, 22, 1120.18.	0.2	0
105	Esophago-Glottal Closure Reflex in Human Infants: A Novel Reflex Elicited With Concurrent Manometry and Ultrasonography. <i>American Journal of Gastroenterology</i> , 2007, 102, 2286-2293.	0.2	68
106	Performance and Optimal Technique for Pharyngeal Impedance Recording: A Simulated Pharyngeal Reflux Study. <i>American Journal of Gastroenterology</i> , 2007, 102, 33-39.	0.2	11
107	Gastroesophageal Reflux Disease. <i>Journal of Clinical Gastroenterology</i> , 2007, 41, S160-S162.	1.1	21
108	Safety and feasibility of evaluating airway-protective reflexes during sleep: new technique and preliminary results. <i>Gastrointestinal Endoscopy</i> , 2007, 65, 483-486.	0.5	3
