#	ARTICLE	IF	CITATIONS
1	Uniform stability of nonlinear time-varying impulsive systems with eventually uniformly bounded impulse frequency. <i>Nonlinear Analysis: Hybrid Systems</i> , 2020, 38, 100933.	3.5	40
2	Robust exact differentiators with predefined convergence time. <i>Automatica</i> , 2021, 134, 109858.	5.0	31
3	Uniform Input-To-State Stability for Switched and Time-Varying Impulsive Systems. <i>IEEE Transactions on Automatic Control</i> , 2020, 65, 5028-5042.	5.7	28
4	Global Stability Results for Switched Systems Based on Weak Lyapunov Functions. <i>IEEE Transactions on Automatic Control</i> , 2017, 62, 2764-2777.	5.7	22
5	ISS implies iISS even for switched and time-varying systems (if you are careful enough). <i>Automatica</i> , 2019, 104, 154-164.	5.0	20
6	Disturbance-tailored super-twisting algorithms: Properties and design framework. <i>Automatica</i> , 2019, 101, 318-329.	5.0	14
7	Strong ISS implies strong iISS for time-varying impulsive systems. <i>Automatica</i> , 2020, 122, 109224.	5.0	14
8	A Characterization of Integral ISS for Switched and Time-Varying Systems. <i>IEEE Transactions on Automatic Control</i> , 2018, 63, 578-585.	5.7	13
9	Ideal switched-model dynamic stability conditions for semi-quasi-Z-source inverters. <i>Automatica</i> , 2016, 63, 47-59.	5.0	9
10	On controller-driven varying-sampling-rate stabilization via Lie-algebraic solvability. <i>Nonlinear Analysis: Hybrid Systems</i> , 2013, 7, 28-38.	3.5	8
11	Nonrobustness of asymptotic stability of impulsive systems with inputs. <i>Automatica</i> , 2020, 122, 109238.	5.0	5
12	A Characterization of iISS for Time-Varying Impulsive Systems. , 2018, , .		4
13	Characterization of semiglobal stability properties for discrete-time models of non-uniformly sampled nonlinear systems. <i>Systems and Control Letters</i> , 2018, 122, 60-66.	2.3	4
14	State Measurement Error-to-State Stability Results Based on Approximate Discrete-Time Models. <i>IEEE Transactions on Automatic Control</i> , 2019, 64, 3308-3315.	5.7	4
15	A characterization of strong iISS for time-varying impulsive systems. , 2019, , .		4
16	On zero-input stability inheritance for time-varying systems with decaying-to-zero input power. <i>Systems and Control Letters</i> , 2017, 104, 31-37.	2.3	3
17	Equivalence between uniform- and varying-sampling stability properties for discrete-time exact and approximate models. , 2017, , .		2
18	Converging-Input Convergent-State and Related Properties of Time-Varying Impulsive Systems. , 2020, 4, 680-685.		2

#	ARTICLE	IF	CITATIONS
19	Semiglobal exponential input-to-state stability of sampled-data systems based on approximate discrete-time models. Automatica, 2021, 131, 109742.	5.0	2
20	Differentiator for Noisy Sampled Signals With Best Worst-Case Accuracy. , 2022, 6, 938-943.		2
21	Generalized Super-Twisting for Control Under Time- and State-Dependent Perturbations: Breaking the Algebraic Loop. IEEE Transactions on Automatic Control, 2022, , 1-8.	5.7	2
22	(Integral-)ISS of switched and time-varying impulsive systems based on global state weak linearization. IEEE Transactions on Automatic Control, 2021, , 1-1.	5.7	1
