citing authors

#	ARTICLE	IF	CITATIONS
1	Microbial Survival in an Extreme Martian Analog Ecosystem: Poás Volcano, Costa Rica. <i>Frontiers in Astronomy and Space Sciences</i> , 2022, 9, .	2.8	3
2	Geochemical data indicate highly similar sediment compositions for the Grasberg and Burns formations on Meridiani Planum, Mars. <i>Earth and Planetary Science Letters</i> , 2021, 557, 116729.	4.4	10
3	Morphological comparison of blocks in chaos terrains on Pluto, Europa, and Mars. <i>Icarus</i> , 2021, 356, 113866.	2.5	15
4	Martian fan deposits: Insights on depositional processes and origin from mass balance survey. <i>Earth and Planetary Science Letters</i> , 2020, 533, 116049.	4.4	4
5	Sulfur Cycling and Mass Balance at Meridiani, Mars. <i>Geophysical Research Letters</i> , 2019, 46, 11728-11737.	4.0	7
6	Lack of Microbial Diversity in an Extreme Mars Analog Setting: Poás Volcano, Costa Rica. <i>Astrobiology</i> , 2018, 18, 923-933.	3.0	21
7	Characterization of terrestrial hydrothermal alteration products with Mars analog instrumentation: Implications for current and future rover investigations. <i>Icarus</i> , 2018, 307, 235-259.	2.5	17
8	Operational Conditions and In Situ Resources for Mars Surface Exploration. <i>New Space</i> , 2018, 6, 320-334.	0.8	2
9	Phosphorous Immobility During Formation of the Layered Sulfate Deposits of the Burns Formation at Meridiani Planum. <i>Journal of Geophysical Research E: Planets</i> , 2018, 123, 1230-1254.	3.6	5
10	Widespread exposure of Noachian phyllosilicates in the Margaritifer region of Mars: Implications for paleohydrology and astrobiological detection. <i>Journal of Geophysical Research E: Planets</i> , 2017, 122, 483-500.	3.6	9
11	Investigating target versus impactor influences on Martian crater morphology at the simple-to-complex transition. <i>Meteoritics and Planetary Science</i> , 2017, 52, 1722-1743.	1.6	11
12	Large-scale fluid-deposited mineralization in Margaritifer Terra, Mars. <i>Geophysical Research Letters</i> , 2017, 44, 6579-6588.	4.0	9
13	RESEARCH FOCUS: The great climate paradox of ancient Mars. <i>Geology</i> , 2016, 44, 879-880.	4.4	11
14	Mercury's low-reflectance material: Constraints from hollows. <i>Icarus</i> , 2016, 277, 455-465.	2.5	18
15	Late-stage formation of Martian chloride salts through ponding and evaporation. <i>Geology</i> , 2015, 43, 787-790.	4.4	53
16	Detection of iron substitution in natroalunite-natrojarosite solid solutions and potential implications for Mars. <i>American Mineralogist</i> , 2014, 99, 948-964.	1.9	32
17	Testing Mars Exploration Rover-inspired operational strategies for semi-autonomous rovers on the moon II: The GeoHeuristic operational Strategies Test in Alaska. <i>Acta Astronautica</i> , 2014, 99, 24-36.	3.2	10
18	The secondary crater population of Mars. <i>Earth and Planetary Science Letters</i> , 2014, 400, 66-76.	4.4	34

#	ARTICLE	IF	CITATIONS
19	The effects of sediment supply and concentrations on the formation timescale of martian deltas. Icarus, 2014, 228, 1-12.	2.5	25
20	Laboratory simulations of acid-sulfate weathering under volcanic hydrothermal conditions: Implications for early Mars. Journal of Geophysical Research E: Planets, 2014, 119, 679-703.	3.6	18
21	Utility of laser altimeter and stereoscopic terrain models: Application to Martian craters. Planetary and Space Science, 2013, 86, 57-65.	1.7	19
22	Desert Research and Technology Studies (DRATS) 2010 science operations: Operational approaches and lessons learned for managing science during human planetary surface missions. Acta Astronautica, 2013, 90, 224-241.	3.2	37
23	Large impact crater histories of Mars: The effect of different model crater age techniques. Icarus, 2013, 225, 173-184.	2.5	130
24	Experimental study of acid-sulfate alteration of basalt and implications for sulfate deposits on Mars. Journal of Geophysical Research E: Planets, 2013, 118, 577-614.	3.6	32
25	Chemical and mineralogical trends during acid-sulfate alteration of pyroclastic basalt at Cerro Negro volcano and implications for early Mars. Journal of Geophysical Research E: Planets, 2013, 118, 1719-1751.	3.6	20
26	Assessment of environmental controls on acid-sulfate alteration at active volcanoes in Nicaragua: Applications to relic hydrothermal systems on Mars. Journal of Geophysical Research E: Planets, 2013, 118, 2083-2104.	3.6	35
27	Visible-near-infrared reflectance spectroscopy of volcanic acid-sulfate alteration in Nicaragua: Analogs for early Mars. Journal of Geophysical Research E: Planets, 2013, 118, 2213-2233.	3.6	17
28	Uninhabitable martian clays?. Nature Geoscience, 2012, 5, 683-684.	12.9	2
29	A new global database of Mars impact craters >= 1 km: 1. Database creation, properties, and parameters. Journal of Geophysical Research, 2012, 117, .	3.3	140
30	A new global database of Mars impact craters >= 1 km: 2. Global crater properties and regional variations of the simple-to-complex transition diameter. Journal of Geophysical Research, 2012, 117, .	3.3	65
31	Distant secondary craters from Lyot crater, Mars, and implications for surface ages of planetary bodies. Geophysical Research Letters, 2011, 38, n/a-n/a.	4.0	21
32	Secondary crater fields from 24 large primary craters on Mars: Insights into nearby secondary crater production. Journal of Geophysical Research, 2011, 116, .	3.3	35
33	Geological evidence for a migrating Tharsis plume on early Mars. Earth and Planetary Science Letters, 2011, 310, 327-333.	4.4	23
34	Formation timescales of large Martian valley networks. Earth and Planetary Science Letters, 2011, 312, 1-12.	4.4	123
35	The volcanic history of Mars: High-resolution crater-based studies of the calderas of 20 volcanoes. Icarus, 2011, 211, 1179-1203.	2.5	149
36	Ancient ocean on Mars supported by global distribution of deltas and valleys. Nature Geoscience, 2010, 3, 459-463.	12.9	312

#	ARTICLE	IF	CITATIONS
37	Extraterrestrial digital elevation models: constraints on planetary evolution, with focus on Mars. <i>International Journal of Remote Sensing</i> , 2010, 31, 6259-6274.	2.9	0
38	Updated global map of Martian valley networks and implications for climate and hydrologic processes. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	364
39	Geologic context of proposed chloride-bearing materials on Mars. <i>Journal of Geophysical Research</i> , 2010, 115, .	3.3	204
40	Deltas and valley networks on Mars. , 2010, , 223-248.		14
41	Ancient equatorial ice on Mars?. <i>Nature Geoscience</i> , 2009, 2, 169-170.	12.9	9
42	Positive identification of lake strandlines in Shalbatana Vallis, Mars. <i>Geophysical Research Letters</i> , 2009, 36, .	4.0	32
43	Roaming zones of precipitation on ancient Mars as recorded in valley networks. <i>Journal of Geophysical Research</i> , 2009, 114, .	3.3	76
44	Geological context of water-altered minerals in Valles Marineris, Mars. <i>Journal of Geophysical Research</i> , 2008, 113, .	3.3	48
45	The stratigraphy of Meridiani Planum, Mars, and implications for the layered deposits' origin. <i>Earth and Planetary Science Letters</i> , 2008, 274, 214-220.	4.4	67
46	Astrobiological implications of Mars' surface composition and properties. , 2008, , 599-624.		19
47	Ground truth from the Opportunity Rover for Mars thermal inertia data. <i>Geophysical Research Letters</i> , 2007, 34, .	4.0	4
48	Thermophysical properties of the MER and Beagle II landing site regions on Mars. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	19
49	Surficial properties of landslides and surrounding units in Ophir Chasma, Mars. <i>Journal of Geophysical Research</i> , 2006, 111, .	3.3	9
50	Bedrock formation at Meridiani Planum (Reply). <i>Nature</i> , 2006, 443, E2-E2.	27.8	10
51	A volcanic environment for bedrock diagenesis at Meridiani Planum on Mars. <i>Nature</i> , 2005, 438, 1129-1131.	27.8	142
52	Implications for hydrologic processes on Mars from extensive bedrock outcrops throughout Terra Meridiani. <i>Nature</i> , 2004, 431, 156-159.	27.8	84
53	Mantled and exhumed terrains in Terra Meridiani, Mars. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	92
54	Explosive volcanism in the Tharsis region: Global evidence in the Martian geologic record. <i>Journal of Geophysical Research</i> , 2003, 108, .	3.3	200

#	ARTICLE	IF	CITATIONS
55	New data reveal mature, integrated drainage systems on Mars indicative of past precipitation. <i>Geology</i> , 2003, 31, 757.	4.4	143
56	Geologic setting and origin of Terra Meridiani hematite deposit on Mars. <i>Journal of Geophysical Research</i> , 2002, 107, 18-1.	3.3	168
57	Evidence for extensive denudation of the Martian highlands. <i>Geology</i> , 2001, 29, 407.	4.4	151
58	Ancient Geodynamics and Global-Scale Hydrology on Mars. <i>Science</i> , 2001, 291, 2587-2591.	12.6	453
59	INSIGHT INTO FORMATION PROCESSES OF LAYERED EJECTA CRATERS ON MARS FROM THERMOPHYSICAL OBSERVATIONS. <i>Journal of Geophysical Research E: Planets</i> , 0, , e2020JE006801.	3.6	1
