#	ARTICLE	IF	CITATIONS
1	Impact of Smoking on Cognitive Decline in Early Old Age. Archives of General Psychiatry, 2012, 69, 627-35.	12.3	176
2	Exposure-Effect Relations between Aircraft and Road Traffic Noise Exposure at School and Reading Comprehension. American Journal of Epidemiology, 2006, 163, 27-37.	3.4	152
3	Comorbidity and Functional Trajectories From Midlife to Old Age: The Health and Retirement Study. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2015, 70, 332-338.	3.6	128
4	Effortâ€“reward imbalance and relational injustice at work predict sickness absence: The Whitehall II study. Journal of Psychosomatic Research, 2007, 63, 433-440.	2.6	124
5	Diagnosis-specific sickness absence as a predictor of mortality: the Whitehall II prospective cohort study. BMJ: British Medical Journal, 2008, 337, a1469-a1469.	2.3	118
6	Smoking, physical inactivity and obesity as predictors of healthy and disease-free life expectancy between ages 50 and 75: a multicohort study. International Journal of Epidemiology, 2016, 45, 1260-1270.	1.9	114
7	Does Traffic-related Air Pollution Explain Associations of Aircraft and Road Traffic Noise Exposure on Children's Health and Cognition? A Secondary Analysis of the United Kingdom Sample From the RANCH Project. American Journal of Epidemiology, 2012, 176, 327-337.	3.4	109
8	Influence of change in psychosocial work characteristics on sickness absence: the Whitehall II study. Journal of Epidemiology and Community Health, 2006, 60, 55-61.	3.7	106
9	Working conditions as predictors of retirement intentions and exit from paid employment: a 10-year follow-up of the English Longitudinal Study of Ageing. European Journal of Ageing, 2016, 13, 39-48.	2.8	100
10	Alcohol consumption and sickness absence: from the Whitehall II study. Addiction, 1993, 88, 369-382.	3.3	97
11	A follow-up study of effects of chronic aircraft noise exposure on child stress responses and cognition. International Journal of Epidemiology, 2001, 30, 839-845.	1.9	97
12	Lifestyle factors and risk of sickness absence from work: a multicohort study. Lancet Public Health, The, 2018, 3, e545-e554.	10.0	88
13	Longitudinal effects of aircraft noise exposure on children's health and cognition: A six-year follow-up of the UK RANCH cohort. Journal of Environmental Psychology, 2013, 35, 1-9.	5.1	62
14	Is there support for curvilinear relationships between psychosocial work characteristics and mental well-being? Cross-sectional and long-term data from the Whitehall II study. Work and Stress, 2006, 20, 6-20.	4.5	57
15	Socioeconomic Inequalities in Disability-free Life Expectancy in Older People from England and the United States: A Cross-national Population-Based Study. Journals of Gerontology - Series A Biological Sciences and Medical Sciences, 2020, 75, 906-913.	3.6	56
16	Occupational and educational inequalities in exit from employment at older ages: evidence from seven prospective cohorts. Occupational and Environmental Medicine, 2018, 75, 369-377.	2.8	55
17	The Association Between Informal Caregiving and Exit From Employment Among Older Workers: Prospective Findings From the UK Household Longitudinal Study. Journals of Gerontology - Series B Psychological Sciences and Social Sciences, 2018, 73, gbw156.	3.9	44
18	Effect of retirement on cognitive function: the Whitehall II cohort study. European Journal of Epidemiology, 2018, 33, 989-1001.	5.7	43

#	ARTICLE	IF	CITATIONS
19	Mental Health Before and After Retirementâ€”Assessing the Relevance of Psychosocial Working Conditions: The Whitehall II Prospective Study of British Civil Servants. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2020, 75, 403-413.	3.9	39
20	Physical activity level as a predictor of healthy and chronic disease-free life expectancy between ages 50 and 75. <i>Age and Ageing</i> , 2018, 47, 423-429.	1.6	37
21	Behavioural risk factors and healthy life expectancy: evidence from two longitudinal studies of ageing in England and the US. <i>Scientific Reports</i> , 2020, 10, 6955.	3.3	35
22	Sleep Duration and Sleep Disturbances as Predictors of Healthy and Chronic Diseaseâ€”Free Life Expectancy Between Ages 50 and 75: A Pooled Analysis of Three Cohorts. <i>Journals of Gerontology - Series A Biological Sciences and Medical Sciences</i> , 2019, 74, 204-210.	3.6	32
23	The Impact of Retirement on Cardiovascular Disease and Its Risk Factors: A Systematic Review of Longitudinal Studies. <i>Gerontologist, The</i> , 2020, 60, e367-e377.	3.9	32
24	The Influence of Education and Family Background on Women's Earnings in Midlife: evidence from a British national birth cohort study. <i>British Journal of Sociology of Education</i> , 1997, 18, 385-405.	1.8	29
25	Can favourable psychosocial working conditions in midlife moderate the risk of work exit for chronically ill workers? A 20-year follow-up of the Whitehall II study. <i>Occupational and Environmental Medicine</i> , 2018, 75, 183-190.	2.8	29
26	Long working hours and change in body weight: analysis of individual-participant data from 19 cohort studies. <i>International Journal of Obesity</i> , 2020, 44, 1368-1375.	3.4	29
27	Socioeconomic differences in healthy and disease-free life expectancy between ages 50 and 75: a multi-cohort study. <i>European Journal of Public Health</i> , 2019, 29, 267-272.	0.3	28
28	Diet quality as a predictor of cardiometabolic diseaseâ€”free life expectancy: the Whitehall II cohort study. <i>American Journal of Clinical Nutrition</i> , 2020, 111, 787-794.	4.7	28
29	Job strain and loss of healthy life years between ages 50 and 75 by sex and occupational position: analyses of 64 934 individuals from four prospective cohort studies. <i>Occupational and Environmental Medicine</i> , 2018, 75, 486-493.	2.8	26
30	Physical and cognitive capability in mid-adulthood as determinants of retirement and extended working life in a British cohort study. <i>Scandinavian Journal of Work, Environment and Health</i> , 2017, 43, 15-23.	3.4	25
31	Late Life Employment Histories and Their Association With Work and Family Formation During Adulthood: A Sequence Analysis Based on ELSA. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2018, 73, 1263-1277.	3.9	24
32	Weekly hours of informal caregiving and paid work, and the risk of cardiovascular disease. <i>European Journal of Public Health</i> , 2018, 28, 743-747.	0.3	23
33	Do depressive symptoms predict cancer incidence?. <i>Journal of Psychosomatic Research</i> , 2015, 79, 595-603.	2.6	19
34	Workâ€”family life course patterns and work participation in later life. <i>European Journal of Ageing</i> , 2019, 16, 83-94.	2.8	18
35	Physical occupational exposures and health expectancies in a French occupational cohort. <i>Occupational and Environmental Medicine</i> , 2017, 74, 176-183.	2.8	16
36	Association between midlife health behaviours and transitions out of employment from midlife to early old age: Whitehall II cohort study. <i>BMC Public Health</i> , 2017, 17, 82.	2.9	16

#	ARTICLE	IF	CITATIONS
37	Sickness absence diagnoses among abstainers, low-risk drinkers and at-risk drinkers: consideration of the U-shaped association between alcohol use and sickness absence in four cohort studies. <i>Addiction</i> , 2018, 113, 1633-1642.	3.3	16
38	Does inflammation provide a link between psychosocial work characteristics and diabetes? Analysis of the role of interleukin-6 and C-reactive protein in the Whitehall II cohort study. <i>Brain, Behavior, and Immunity</i> , 2019, 78, 153-160.	4.1	15
39	Work Disability among Employees with Diabetes: Latent Class Analysis of Risk Factors in Three Prospective Cohort Studies. <i>PLoS ONE</i> , 2015, 10, e0143184.	2.5	14
40	Local area unemployment, individual health and workforce exit: ONS Longitudinal Study. <i>European Journal of Public Health</i> , 2016, 26, 463-469.	0.3	14
41	Mid-life psychosocial work environment as a predictor of work exit by age 50. <i>PLoS ONE</i> , 2018, 13, e0195495.	2.5	12
42	Changes in autonomy, job demands and working hours after diagnosis of chronic disease: a comparison of employed and self-employed older persons using the English Longitudinal Study of Ageing (ELSA). <i>Journal of Epidemiology and Community Health</i> , 2018, 72, 951-957.	3.7	12
43	Do gender and socioeconomic status matter when combining work and family: Could control at work and at home help? Results from the Whitehall II study. <i>Economic and Industrial Democracy</i> , 2020, 41, 29-54.	1.6	12
44	The effect of life course socioeconomic position on crystallised cognitive ability in two large UK cohort studies: a structured modelling approach. <i>BMJ Open</i> , 2017, 7, e014461.	1.9	11
45	Comorbidity and work disability among employees with diabetes: Associations with risk factors in a pooled analysis of three cohort studies. <i>Scandinavian Journal of Public Health</i> , 2016, 44, 84-90.	2.3	10
46	Dynamic Longitudinal Associations Between Social Support and Cognitive Function: A Prospective Investigation of the Directionality of Associations. <i>Journals of Gerontology - Series B Psychological Sciences and Social Sciences</i> , 2018, 73, gbw135.	3.9	9
47	Informal caregiving and diurnal patterns of salivary cortisol: Results from the Whitehall II cohort study. <i>Psychoneuroendocrinology</i> , 2019, 100, 41-47.	2.7	9
48	Work Exposures and Development of Cardiovascular Diseases: A Systematic Review. <i>Annals of Work Exposures and Health</i> , 2022, 66, 698-713.	1.4	9
49	Socioeconomic gradient in work disability in diabetes: evidence from three occupational cohorts. <i>Journal of Epidemiology and Community Health</i> , 2016, 70, 125-131.	3.7	8
50	A meta-analysis of the association of aircraft noise at school on children's reading comprehension and psychological health for use in health impact assessment. <i>Journal of Environmental Psychology</i> , 2021, 76, 101646.	5.1	8
51	Sociodemographic Differences Between Alcohol Use and Sickness Absence: Pooled Analysis of Four Cohort Studies. <i>Alcohol and Alcoholism</i> , 2018, 53, 95-103.	1.6	7
52	Linking local labour market conditions across the life course to retirement age: Pathways of health, employment status, occupational class and educational achievement, using 60 years of the 1946 British Birth Cohort. <i>Social Science and Medicine</i> , 2019, 226, 113-122.	3.8	7
53	Role of psychosocial work factors in the relation between becoming a caregiver and changes in health behaviour: results from the Whitehall II cohort study. <i>Journal of Epidemiology and Community Health</i> , 2016, 70, 1200-1206.	3.7	6
54	Inequalities in time from stopping paid work to death: findings from the ONS Longitudinal Study, 2001-2011. <i>Journal of Epidemiology and Community Health</i> , 2019, 73, 1101-1107.	3.7	3

#	ARTICLE	IF	CITATIONS
55	4: Risk factors for persistent fatigue in adolescents. Journal of Adolescent Health, 2006, 38, 113-114.	2.5	2
56	Measuring progress towards healthy working lives. Lancet Public Health, The, 2020, 5, e366-e367.	10.0	2
57	Dynamic longitudinal associations between social support and cognitive function: a prospective cohort study. Lancet, The, 2015, 386, S50.	13.7	1
58	Heterogeneity in the association between youth unemployment and mental health later in life: a quantile regression analysis of longitudinal data from English schoolchildren. BMJ Open, 2021, 11, e047997.	1.9	1
59	Diagnosis-specific sickness absence as a predictor of mortality: the Whitehall II prospective cohort study. , 0, .		1
60	Diet quality as a predictor of healthy and cardiometabolic disease-free life expectancy between ages 50 to 85. Proceedings of the Nutrition Society, 2020, 79, .	1.0	0
61	P37â€¦Measuring the health of people in places: a scoping review of OECD member countries. , 2021, , .		0
62	Measuring the health of people in places: A scoping review of OECD member countries. Health and Place, 2022, 73, 102731.	3.3	0
63	Trends in Associations Between Sickness Absence Before the Age of 65 and Being in Paid Work After the Age of 65: Prospective Study of Three Total Population Cohorts. Journal of Aging and Social Policy, 2022, , 1-24.	1.6	0
