#	ARTICLE	IF	CITATIONS
1	Eating Disorder Examination Questionnaire (EDE-Q): Norms for undergraduate men. <i>Eating Behaviors</i> , 2010, 11, 119-121.	2.0	262
2	Daily patterns of anxiety in anorexia nervosa: Associations with eating disorder behaviors in the natural environment.. <i>Journal of Abnormal Psychology</i> , 2013, 122, 672-683.	1.9	96
3	Challenging expectancies to prevent nonmedical prescription stimulant use: A randomized, controlled trial. <i>Drug and Alcohol Dependence</i> , 2013, 132, 362-368.	3.2	40
4	Moderators of post-binge eating negative emotion in eating disorders. <i>Journal of Psychiatric Research</i> , 2013, 47, 323-328.	3.1	31
5	Associations between retrospective versus ecological momentary assessment measures of emotion and eating disorder symptoms in anorexia nervosa. <i>Journal of Psychiatric Research</i> , 2013, 47, 1514-1520.	3.1	31
6	Bidirectional associations between binge eating and restriction in anorexia nervosa. An ecological momentary assessment study. <i>Appetite</i> , 2014, 83, 69-74.	3.7	28
7	Restrictive eating behaviors are a nonweight-based marker of severity in anorexia nervosa. <i>International Journal of Eating Disorders</i> , 2013, 46, 849-854.	4.0	27
8	Prevalence and correlates of exercise motivated by negative affect. <i>International Journal of Eating Disorders</i> , 2010, 43, 50-58.	4.0	24
9	Beliefs about the emotional consequences of eating and binge eating frequency. <i>Eating Behaviors</i> , 2014, 15, 31-36.	2.0	22
10	The importance of the function of exercise in the relationship between obligatory exercise and eating and body image concerns. <i>Eating Behaviors</i> , 2010, 11, 62-64.	2.0	19
11	Binge eating is not associated with elevated eating, weight, or shape concerns in the absence of the desire to lose weight in men. <i>International Journal of Eating Disorders</i> , 2010, 43, 732-736.	4.0	17
12	Unique contributions of individual eating disorder symptoms to eating disorder-related impairment. <i>Eating Behaviors</i> , 2015, 18, 103-106.	2.0	17
13	Nonmedical prescription stimulant use for suppressing appetite and controlling body weight is uniquely associated with more severe eating disorder symptomatology. <i>International Journal of Eating Disorders</i> , 2016, 49, 813-816.	4.0	16
14	Experiential avoidance, eating expectancies, and binge eating: A preliminary test of an adaption of the Acquired Preparedness model of eating disorder risk. <i>Appetite</i> , 2018, 120, 423-430.	3.7	16
15	The differential associations of shame and guilt with eating disorder behaviors. <i>Eating Behaviors</i> , 2020, 39, 101427.	2.0	16
16	An investigation of the joint longitudinal trajectories of low body weight, binge eating, and purging in women with anorexia nervosa and bulimia nervosa. <i>International Journal of Eating Disorders</i> , 2011, 44, 679-686.	4.0	13
17	Differentiating motives for nonmedical prescription stimulant use by personality characteristics. <i>Addictive Behaviors</i> , 2019, 88, 187-193.	3.0	13
18	Identifying duration criteria for eating disorder remission and recovery through intensive modeling of longitudinal data. <i>International Journal of Eating Disorders</i> , 2020, 53, 1224-1233.	4.0	12

#	ARTICLE	IF	CITATIONS
19	Individual differences in negative affect and weekly variability in binge eating frequency. <i>International Journal of Eating Disorders</i> , 2014, 47, 296-301.	4.0	11
20	Eating disorder prevalence among Amazon MTurk workers assessed using a rigorous online, self-report anthropometric assessment. <i>Eating Behaviors</i> , 2021, 41, 101481.	2.0	11
21	A biobehavioral circadian model of restrictive eating and binge eating. <i>International Journal of Eating Disorders</i> , 2022, 55, 1291-1295.	4.0	8
22	A summary of reporting guidelines and evaluation domains for using single-case experimental designs and recommendations for the study of eating disorders. <i>International Journal of Eating Disorders</i> , 2018, 51, 617-628.	4.0	7
23	The Role of Anonymity in Determining the Self-Reported Use of Cocaine and Nonmedical Prescription Stimulant Use Among College Students. <i>Substance Use and Misuse</i> , 2016, 51, 795-802.	1.4	5
24	Trends in professionals' use of eating disorder assessment instruments.. <i>Professional Psychology: Research and Practice</i> , 2017, 48, 243-250.	1.0	4
25	Binge Eating Disorder in <i>DSM-5</i>. <i>Psychiatric Annals</i> , 2012, 42, 410-413.	0.1	4
26	Practice makes perfect: Commentary on Burnette et al. (2021). <i>International Journal of Eating Disorders</i> , 2022, 55, 273-275.	4.0	4
27	A preliminary mechanistic test of the effects of light therapy in bulimia nervosa. <i>Advances in Eating Disorders (Abingdon, England)</i> , 2016, 4, 237-249.	0.7	3
28	An Interactive, Graphical Tool for Retrospectively Assessing Symptom Frequency and Severity: An Illustration With Eating Disorder Behaviors, Body Weight, and Stress. <i>Assessment</i> , 2017, 24, 835-852.	3.1	3
29	The Relation of Dietary Restraint and Affect with Food Choice and the Experience of Guilt after Eating. <i>Current Psychology</i> , 2019, 38, 92-99.	2.8	3
30	Motivation to change predicts naturalistic changes in binge eating and purging, but not fasting or driven exercise among individuals with eating disorders. <i>Eating Disorders</i> , 2022, 30, 279-301.	3.0	3
31	Persistence: A key factor in understanding the circumstances under which dietary restraint predicts restriction of caloric intake. <i>Eating Behaviors</i> , 2021, 43, 101563.	2.0	3
32	Delusional intensity as a prognostic indicator among individuals with severe to extreme anorexia nervosa hospitalized at an acute medical stabilization program. <i>International Journal of Eating Disorders</i> , 2022, 55, 215-222.	4.0	3
33	Examining heart rate variability as an indicator of top-down inhibitory control over emotions and eating behaviors among individuals with and without binge eating. <i>Appetite</i> , 2021, 159, 105071.	3.7	2
34	Negative affect and past month binge eating may drive perceptions of loss of control. <i>Appetite</i> , 2018, 128, 116-119.	3.7	1
35	Sleep/waketime preference and delayed diurnal eating rhythms are associated through light exposure timing and modified by sleep efficiency. <i>Appetite</i> , 2022, 170, 105904.	3.7	1
36	Development and validation of a questionnaire assessing weighing tendencies: the Approach/Avoidance of Weighing Questionnaire (AAWQ). <i>Eating Disorders</i> , 2020, , 1-21.	3.0	0

#	ARTICLE	IF	CITATIONS
37	Cannabis Use Is Differentially Associated with Individual Facets of Impulsivity through Expectancy Effects: A Comprehensive Application of the Acquired Preparedness Model. <i>Journal of Psychoactive Drugs</i> , 2021, 53, 302-311.	1.7	0
