citing authors

#	ARTICLE	IF	CITATIONS
1	Impaired social response reversal: A case of 'acquired sociopathy'. <i>Brain</i> , 2000, 123, 1122-1141.	7.6	745
2	Reduced Amygdala Response to Fearful Expressions in Children and Adolescents With Callous-Unemotional Traits and Disruptive Behavior Disorders. <i>American Journal of Psychiatry</i> , 2008, 165, 712-720.	7.2	713
3	Deficits in facial affect recognition among antisocial populations: A meta-analysis. <i>Neuroscience and Biobehavioral Reviews</i> , 2008, 32, 454-465.	6.1	685
4	ADVANCES IN NEUROPSYCHIATRY: Neurocognitive models of aggression, the antisocial personality disorders, and psychopathy. <i>Journal of Neurology, Neurosurgery and Psychiatry</i> , 2001, 71, 727-731.	1.9	562
5	The roles of orbital frontal cortex in the modulation of antisocial behavior. <i>Brain and Cognition</i> , 2004, 55, 198-208.	1.8	554
6	The amygdala and ventromedial prefrontal cortex in morality and psychopathy. <i>Trends in Cognitive Sciences</i> , 2007, 11, 387-392.	7.8	541
7	Facial expressions, their communicatory functions and neurocognitive substrates. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2003, 358, 561-572.	4.0	426
8	Empathic responsiveness in amygdala and anterior cingulate cortex in youths with psychopathic traits. <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2013, 54, 900-910.	5.2	209
9	Reduced amygdala-orbitofrontal connectivity during moral judgments in youths with disruptive behavior disorders and psychopathic traits. <i>Psychiatry Research - Neuroimaging</i> , 2011, 194, 279-286.	1.8	140
10	Considering anger from a cognitive neuroscience perspective. <i>Wiley Interdisciplinary Reviews: Cognitive Science</i> , 2012, 3, 65-74.	2.8	115
11	Neuro-cognitive system dysfunction and symptom sets: A review of fMRI studies in youth with conduct problems. <i>Neuroscience and Biobehavioral Reviews</i> , 2018, 91, 69-90.	6.1	102
12	Traits of empathy and anger: implications for psychopathy and other disorders associated with aggression. <i>Philosophical Transactions of the Royal Society B: Biological Sciences</i> , 2018, 373, 20170155.	4.0	70
13	Dual neurocircuitry dysfunctions in disruptive behavior disorders: emotional responding and response inhibition. <i>Psychological Medicine</i> , 2016, 46, 1485-1496.	4.5	68
14	Psychopathy. <i>Nature Reviews Disease Primers</i> , 2021, 7, 49.	30.5	55
15	Psychopathic traits from an RDoC perspective. <i>Current Opinion in Neurobiology</i> , 2015, 30, 79-84.	4.2	52
16	Looming animate and inanimate threats: The response of the amygdala and periaqueductal gray. <i>Social Neuroscience</i> , 2013, 8, 621-630.	1.3	51
17	Emotion-based learning systems and the development of morality. <i>Cognition</i> , 2017, 167, 38-45.	2.2	37
18	Executive attention control and emotional responding in attention-deficit/hyperactivity disorder - A functional MRI study. <i>NeuroImage: Clinical</i> , 2015, 9, 545-554.	2.7	32

#	ARTICLE	IF	CITATIONS
19	Neurodevelopmental changes in the responsiveness of systems involved in top down attention and emotional responding. <i>Neuropsychologia</i> , 2014, 62, 277-285.	1.6	21
20	Segregating sustained attention from response inhibition in ADHD: An fMRI study. <i>NeuroImage: Clinical</i> , 2019, 21, 101677.	2.7	21
21	Recent neuro-imaging findings with respect to conduct disorder, callous-unemotional traits and psychopathy. <i>Current Opinion in Psychiatry</i> , 2020, 33, 45-50.	6.3	21
22	Threat Responsiveness as a Function of Cannabis and Alcohol Use Disorder Severity. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2019, 29, 526-534.	1.3	19
23	Alcohol use disorder and cannabis use disorder symptomatology in adolescents are differentially related to dysfunction in brain regions supporting face processing. <i>Psychiatry Research - Neuroimaging</i> , 2019, 292, 62-71.	1.8	19
24	Interaction of irritability and anxiety on emotional responding and emotion regulation: a functional MRI study. <i>Psychological Medicine</i> , 2021, 51, 2778-2788.	4.5	17
25	Disruptive Behavior Disorders: Taking an RDoC(ish) Approach. <i>Current Topics in Behavioral Neurosciences</i> , 2013, , 319-336.	1.7	17
26	Test-retest reliability of the facial expression labeling task. <i>Psychological Assessment</i> , 2017, 29, 1537-1542.	1.5	17
27	Psychophysiological underpinnings of proactive and reactive aggression in young men and women. <i>Physiology and Behavior</i> , 2021, 242, 113601.	2.1	15
28	Disruptive Behavior Disorders: Taking an RDoC(ish) Approach. <i>Current Topics in Behavioral Neurosciences</i> , 2013, 16, 319-336.	1.7	13
29	Alcohol Use Disorder and Cannabis Use Disorder Symptomatology in Adolescents and Aggression: Associations With Recruitment of Neural Regions Implicated in Retaliation. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2021, 6, 536-544.	1.5	10
30	Alcohol use disorder and cannabis use disorder symptomatology in adolescents is associated with dysfunction in neural processing of future events. <i>Addiction Biology</i> , 2021, 26, e12885.	2.6	9
31	Commentary: Disregard for others: empathic dysfunction or emotional volatility? The relationship with future antisocial behavior – reflections on Rhee et Al. (2013). <i>Journal of Child Psychology and Psychiatry and Allied Disciplines</i> , 2013, 54, 167-168.	5.2	8
32	Reduced neural differentiation of rewards and punishment during passive avoidance learning in adolescents with generalized anxiety disorder. <i>Depression and Anxiety</i> , 2021, 38, 794-803.	4.1	8
33	Dissociable Systems for Empathy. <i>Novartis Foundation Symposium</i> , 2007, 278, 134-145.	1.1	8
34	Dysfunctional neurocognition in individuals with clinically significant psychopathic traits. <i>Dialogues in Clinical Neuroscience</i> , 2019, 21, 291-299.	3.7	8
35	Structural atrophy of the right superior frontal gyrus in adolescents with severe irritability. <i>Human Brain Mapping</i> , 2021, 42, 4611-4622.	3.6	7
36	Dysfunctional Social Reinforcement Processing in Disruptive Behavior Disorders: An Functional Magnetic Resonance Imaging Study. <i>Clinical Psychopharmacology and Neuroscience</i> , 2018, 16, 449-460.	2.0	6

#	ARTICLE	IF	CITATIONS
37	Differential associations of conduct disorder, callous-unemotional traits and irritability with outcome expectations and values regarding the consequences of aggression. <i>Child and Adolescent Psychiatry and Mental Health</i> , 2022, 16, .	2.5	5
38	Alcohol and Cannabis Use Disorder Symptom Severity, Conduct Disorder, and Callous-Unemotional Traits and Impairment in Expression Recognition. <i>Frontiers in Psychiatry</i> , 2021, 12, 714189.	2.6	4
39	The motivation of aggression: A cognitive neuroscience approach and neurochemical speculations.. <i>Motivation Science</i> , 2022, 8, 106-120.	1.6	4
40	Neural Responses to Fluoxetine in Youths with Disruptive Behavior and Trauma Exposure: A Pilot Study. <i>Journal of Child and Adolescent Psychopharmacology</i> , 2021, 31, 562-571.	1.3	3
41	Neurodevelopmental Changes in Social Reinforcement Processing: A Functional Magnetic Resonance Imaging Study. <i>Clinical Psychopharmacology and Neuroscience</i> , 2017, 15, 369-381.	2.0	2
42	Valence specific response reversal deficits and risk for mania. <i>Motivation and Emotion</i> , 2017, 41, 661-670.	1.3	1
43	Dysfunctional Social Reinforcement Processing in Disruptive Behavior Disorders: An Functional Magnetic Resonance Imaging Study. <i>Clinical Psychopharmacology and Neuroscience</i> , 2018, 16, 449-460.	2.0	1
44	Changing Views on the Salience Network in Response to Data on Exposure to Assault. <i>Biological Psychiatry: Cognitive Neuroscience and Neuroimaging</i> , 2019, 4, 331-332.	1.5	0
