#	ARTICLE	IF	CITATIONS
1	German Mobile Apps for Patients With Psoriasis: Systematic Search and Evaluation. JMIR MHealth and UHealth, 2022, 10, e34017.	3.7	6
2	Impact of an eHealth Smartphone App on the Mental Health of Patients With Psoriasis: Prospective Randomized Controlled Intervention Study. JMIR MHealth and UHealth, 2021, 9, e28149.	3.7	21
3	Effects of a 90-min educational intervention for patients with insect venom allergy: a prospective controlled pilot study. Allergy, Asthma and Clinical Immunology, 2021, 17, 22.	2.0	2
4	Drug survival rates and reasons for drug discontinuation in patients with atopic dermatitis: a retrospective study of adult outpatients. European Journal of Dermatology, 2021, 31, 233-238.	0.6	5
5	Leukemia Cutis. New England Journal of Medicine, 2021, 385, 1316-1316.	27.0	1
6	Effect of a disease-monitoring smartphone application in combination with a patient educational program on mental health of patients with psoriasis: A randomized intervention study. Journal of the American Academy of Dermatology, 2021, 85, 1628-1629.	1.2	8
7	Sex Differences in Adults with Insect Venom Allergy regarding Psychological Distress, Attitudes toward the Emergency Medication, and Factual Knowledge about the Disease. International Archives of Allergy and Immunology, 2020, 181, 529-535.	2.1	3
8	ADP secreted by dying melanoma cells mediates chemotaxis and chemokine secretion of macrophages via the purinergic receptor P2Y12. Cell Death and Disease, 2019, 10, 760.	6.3	18
9	Analyzing the value of an educational program for psoriasis patients: a prospective controlled pilot study. BMC Public Health, 2019, 19, 1535.	2.9	15
10	The novel immunoglobulin super family receptor SLAMF9 identified in TAM of murine and human melanoma influences pro-inflammatory cytokine secretion and migration. Cell Death and Disease, 2018, 9, 939.	6.3	16
11	Disease Burden, Psychological Well-Being and Attitudes regarding the Set of Emergency Medication in Adults with Insect Venom Allergy. International Archives of Allergy and Immunology, 2018, 176, 150-156.	2.1	5
12	Treatment preferences for biologicals in psoriasis: experienced patients appreciate sustainability. JDDG - Journal of the German Society of Dermatology, 2017, 15, 189-200.	0.8	7
13	The shedded ectodomain of Lyve-1 expressed on M2-like tumor-associated macrophages inhibits melanoma cell proliferation. Oncotarget, 2017, 8, 103682-103692.	1.8	30
14	Patient Preferences for Treatment of Psoriasis with Biologicals: A Discrete Choice Experiment. PLoS ONE, 2015, 10, e0129120.	2.5	51
15	Patient Preferences for Biologicals in Psoriasis: Top Priority of Safety for Cardiovascular Patients. PLoS ONE, 2015, 10, e0144335.	2.5	19
16	Impact of fumaric acid esters on cardiovascular risk factors and depression in psoriasis: a prospective pilot study. Archives of Dermatological Research, 2015, 307, 413-424.	1.9	20
17	Macrophage activation in human diseases. Seminars in Immunology, 2015, 27, 249-256.	5.6	101
18	Localized insulin-dependent amyloidosis with scar-tissue formation. Journal of the American Academy of Dermatology, 2014, 71, e160-e162.	1.2	6

#	ARTICLE	IF	CITATIONS
19	HLA-DQB1 gene and pemphigus vulgaris in patients with Mid-East origin. <i>Journal of Dermatological Science</i> , 2014, 76, 153-155.	1.9	6
20	Expression of stabilin-1 in M2 macrophages in human granulomatous disease and melanocytic lesions. <i>International Journal of Clinical and Experimental Pathology</i> , 2014, 7, 1625-34.	0.5	12
21	Prognostic value of immune cell infiltration, tertiary lymphoid structures and PD-L1 expression in Merkel cell carcinomas. <i>International Journal of Clinical and Experimental Pathology</i> , 2014, 7, 7610-21.	0.5	36
22	Extended eosinophilic pustular folliculitis with reactive bone marrow hypereosinophilia responsive to combined treatment with indomethacin, dapsone, and narrow-band UVB phototherapy. <i>Journal of the American Academy of Dermatology</i> , 2013, 69, e312-e314.	1.2	4
23	The CD20 homolog M _{s4a8a} integrates pro- and anti-inflammatory signals in novel M ₂ -like macrophages and is expressed in parasite infection. <i>European Journal of Immunology</i> , 2012, 42, 2971-2982.	2.9	14
24	Comorbidities significantly impact patients' preferences for psoriasis treatments. <i>Journal of the American Academy of Dermatology</i> , 2012, 67, 363-372.	1.2	48
25	Differentiation and gene expression profile of tumor-associated macrophages. <i>Seminars in Cancer Biology</i> , 2012, 22, 289-297.	9.6	207
26	Synergistic activation by p38MAPK and glucocorticoid signaling mediates induction of M ₂ -like tumor-associated macrophages expressing the novel CD20 homolog MS4A8A. <i>International Journal of Cancer</i> , 2011, 129, 122-132.	5.1	33
27	Palmoplantar Hyperkeratoses and Hypopigmentation: A Quiz. <i>Acta Dermato-Venereologica</i> , 2011, 91, 737-740.	1.3	12
28	Juvenile dermatomyositis in an 8-year-old boy. <i>Dermatology Online Journal</i> , 2009, 15, 3.	0.5	1
