| #  | ARTICLE  | IF   | CITATIONS |
|----|--|------|-----------|
| 1  | Word learning emerges from the interaction of online referent selection and slow associative learning.. Psychological Review, 2012, 119, 831-877.  | 3.8  | 308       |
| 2  | Gradient effects of within-category phonetic variation on lexical access. Cognition, 2002, 86, B33-B42.  | 2.2  | 306       |
| 3  | Speaker variability augments phonological processing in early word learning. Developmental Science, 2009, 12, 339-349.   | 2.4  | 258       |
| 4  | What information is necessary for speech categorization? Harnessing variability in the speech signal by integrating cues computed relative to expectations.. Psychological Review, 2011, 118, 219-246. | 3.8  | 201       |
| 5  | Within-category VOT affects recovery from "lexical" garden-paths: Evidence against phoneme-level inhibition. Journal of Memory and Language, 2009, 60, 65-91.  | 2.1  | 196       |
| 6  | Statistical learning of phonetic categories: insights from a computational approach. Developmental Science, 2009, 12, 369-378.   | 2.4  | 186       |
| 7  | Individual differences in online spoken word recognition: Implications for SLI. Cognitive Psychology, 2010, 60, 1-39.  | 2.2  | 172       |
| 8  | How Can Hearing Loss Cause Dementia?. Neuron, 2020, 108, 401-412.  | 8.1  | 169       |
| 9  | Defusing the Childhood Vocabulary Explosion. Science, 2007, 317, 631-631.  | 12.6 | 164       |
| 10 | Cue Integration With Categories: Weighting Acoustic Cues in Speech Using Unsupervised Learning and Distributional Statistics. Cognitive Science, 2010, 34, 434-464.                                    | 1.7  | 157       |
| 11 | Continuous Perception and Graded Categorization. Psychological Science, 2010, 21, 1532-1540.   | 3.3  | 150       |
| 12 | Short Arms and Talking Eggs: Why We Should No Longer Abide the Nativist"Empiricist Debate. Child Development Perspectives, 2009, 3, 79-87.   | 3.9  | 133       |
| 13 | Longitudinal Speech Perception and Language Performance in Pediatric Cochlear Implant Users. Ear and Hearing, 2014, 35, 148-160.   | 2.1  | 130       |
| 14 | Finding the Signal by Adding Noise: The Role of Noncontrastive Phonetic Variability in Early Word Learning. Infancy, 2010, 15, 608-635.  | 1.6  | 129       |
| 15 | Infants are sensitive to within-category variation in speech perception. Cognition, 2005, 95, B15-B26.   | 2.2  | 106       |
| 16 | Infant directed speech and the development of speech perception: Enhancing development or an unintended consequence?. Cognition, 2013, 129, 362-378.   | 2.2  | 105       |
| 17 | Spatiotemporal Structure of REM Sleep Twitching Reveals Developmental Origins of Motor Synergies. Current Biology, 2013, 23, 2100-2109.  | 3.9  | 86        |
| 18 | Anticipatory Eye Movements Reveal Infants' Auditory and Visual Categories. Infancy, 2004, 6, 203-229.  | 1.6  | 82        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 19 | Functional organization of human auditory cortex: Investigation of response latencies through direct recordings. <i>NeuroImage</i> , 2014, 101, 598-609.   | 4.2 | 78        |
| 20 | What's new? Children prefer novelty in referent selection. <i>Cognition</i> , 2011, 118, 234-244.  | 2.2 | 76        |
| 21 | Gradient sensitivity to within-category variation in words and syllables.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2008, 34, 1609-1631.                            | 0.9 | 76        |
| 22 | Tracking the time course of phonetic cue integration during spoken word recognition. <i>Psychonomic Bulletin and Review</i> , 2008, 15, 1064-1071.   | 2.8 | 70        |
| 23 | Automated Corneal-Reflection Eye Tracking in Infancy: Methodological Developments and Applications to Cognition. <i>Infancy</i> , 2004, 6, 155-163.  | 1.6 | 69        |
| 24 | Using Variability to Guide Dimensional Weighting: Associative Mechanisms in Early Word Learning. <i>Cognitive Science</i> , 2011, 35, 1105-1138.   | 1.7 | 69        |
| 25 | Test-Retest Reliability of Eye Tracking in the Visual World Paradigm for the Study of Real-Time Spoken Word Recognition. <i>Journal of Speech, Language, and Hearing Research</i> , 2013, 56, 1328-1345. | 1.6 | 67        |
| 26 | Rate effects on Swedish VOT: Evidence for phonological overspecification. <i>Journal of Phonetics</i> , 2011, 39, 39-49.   | 1.2 | 64        |
| 27 | Waiting for lexical access: Cochlear implants or severely degraded input lead listeners to process speech less incrementally. <i>Cognition</i> , 2017, 169, 147-164.                                     | 2.2 | 64        |
| 28 | Statistical learning in reading: Variability in irrelevant letters helps children learn phonics skills.. <i>Developmental Psychology</i> , 2013, 49, 1348-1365.  | 1.6 | 63        |
| 29 | Slowing Down Fast Mapping: Redefining the Dynamics of Word Learning. <i>Child Development Perspectives</i> , 2015, 9, 74-78.   | 3.9 | 62        |
| 30 | Unmasking the acoustic effects of vowel-to-vowel coarticulation: A statistical modeling approach. <i>Journal of Phonetics</i> , 2010, 38, 167-184.   | 1.2 | 60        |
| 31 | Contributions of Attentional Style and Previous Experience to 4-Month-Old Infants' Categorization. <i>Infancy</i> , 2012, 17, 324-338.   | 1.6 | 59        |
| 32 | Lexical effects on compensation for coarticulation: the ghost of Christmash past. <i>Cognitive Science</i> , 2003, 27, 285-298.  | 1.7 | 52        |
| 33 | The process of spoken word recognition in the face of signal degradation.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2014, 40, 308-327.                              | 0.9 | 51        |
| 34 | The slow developmental time course of real-time spoken word recognition.. <i>Developmental Psychology</i> , 2015, 51, 1690-1703.   | 1.6 | 51        |
| 35 | Cue-integration and context effects in speech: Evidence against speaking-rate normalization. <i>Attention, Perception, and Psychophysics</i> , 2012, 74, 1284-1301.                                      | 1.3 | 49        |
| 36 | Immediate lexical integration of novel word forms. <i>Cognition</i> , 2015, 134, 85-99.  | 2.2 | 49        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 37 | Probabilistic constraint satisfaction at the lexical/phonetic interface: evidence for gradient effects of within-category VOT on lexical access. <i>Journal of Psycholinguistic Research</i> , 2003, 32, 77-97.              | 1.3 | 48        |
| 38 | Semantic priming is affected by real-time phonological competition: Evidence for continuous cascading systems. <i>Psychonomic Bulletin and Review</i> , 2011, 18, 141-149.   | 2.8 | 47        |
| 39 | Speech categorization develops slowly through adolescence.. <i>Developmental Psychology</i> , 2018, 54, 1472-1491.   | 1.6 | 46        |
| 40 | Pigeons acquire multiple categories in parallel via associative learning: A parallel to human word learning?. <i>Cognition</i> , 2015, 136, 99-122.  | 2.2 | 42        |
| 41 | Four-month-old infantsâ€™ visual investigation of cats and dogs: Relations with pet experience and attentional strategy.. <i>Developmental Psychology</i> , 2014, 50, 402-413.   | 1.6 | 41        |
| 42 | The past, present, and future of computational models of cognitive development. <i>Cognitive Development</i> , 2012, 27, 326-348.  | 1.3 | 39        |
| 43 | The time-course of speaking rate compensation: effects of sentential rate and vowel length on voicing judgments. <i>Language, Cognition and Neuroscience</i> , 2015, 30, 529-543.  | 1.2 | 39        |
| 44 | Evaluating the sources and functions of gradiency in phoneme categorization: An individual differences approach.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2017, 43, 1594-1611.         | 0.9 | 38        |
| 45 | The Role of Single Talker Acoustic Variation in Early Word Learning. <i>Language Learning and Development</i> , 2015, 11, 66-79.   | 1.4 | 36        |
| 46 | Sound identification in human auditory cortex: Differential contribution of local field potentials and high gamma power as revealed by direct intracranial recordings. <i>Brain and Language</i> , 2015, 148, 37-50.         | 1.6 | 35        |
| 47 | Observational word learning: Beyond propose-but-verify and associative bean counting. <i>Journal of Memory and Language</i> , 2016, 87, 105-127.   | 2.1 | 34        |
| 48 | Reconsidering the role of temporal order in spoken word recognition. <i>Psychonomic Bulletin and Review</i> , 2013, 20, 981-987.   | 2.8 | 32        |
| 49 | What does it take to learn a word?. <i>Wiley Interdisciplinary Reviews: Cognitive Science</i> , 2017, 8, e1421.  | 2.8 | 32        |
| 50 | Individual Differences in Language Ability Are Related to Variation in Word Recognition, Not Speech Perception: Evidence From Eye Movements. <i>Journal of Speech, Language, and Hearing Research</i> , 2014, 57, 1344-1362. | 1.6 | 30        |
| 51 | Detecting when timeseries differ: Using the Bootstrapped Differences of Timeseries (BDOTS) to analyze Visual World Paradigm data (and more). <i>Journal of Memory and Language</i> , 2018, 102, 55-67.                       | 2.1 | 28        |
| 52 | Continuous dynamics of color categorization. <i>Psychonomic Bulletin and Review</i> , 2010, 17, 348-354.   | 2.8 | 27        |
| 53 | Too Much of a Good Thing: How Novelty Biases and Vocabulary Influence Known and Novel Referent Selection in 18-Month-Old Children and Associative Learning Models. <i>Cognitive Science</i> , 2018, 42, 463-493.             | 1.7 | 27        |
| 54 | Development of Twitching in Sleeping Infant Mice Depends on Sensory Experience. <i>Current Biology</i> , 2015, 25, 656-662.  | 3.9 | 26        |

| #  | ARTICLE   | IF  | CITATIONS |
|----|---|-----|-----------|
| 55 | Training alters the resolution of lexical interference: Evidence for plasticity of competition and inhibition.. Journal of Experimental Psychology: General, 2016, 145, 8-30.       | 2.1 | 25        |
| 56 | A real-time mechanism underlying lexical deficits in developmental language disorder: Between-word inhibition. Cognition, 2019, 191, 104000.  | 2.2 | 24        |
| 57 | Spatiotemporal organization of myoclonic twitching in sleeping human infants. Developmental Psychobiology, 2020, 62, 697-710.   | 1.6 | 24        |
| 58 | Lexical effects on compensation for coarticulation: a tale of two systems?. Cognitive Science, 2003, 27, 801-805.   | 1.7 | 22        |
| 59 | The Effect of Residual Acoustic Hearing and Adaptation to Uncertainty on Speech Perception in Cochlear Implant Users. Ear and Hearing, 2016, 37, e37-e51.                           | 2.1 | 22        |
| 60 | Automaticity of word recognition is a unique predictor of reading fluency in middle-school students.. Journal of Educational Psychology, 2019, 111, 314-330.                        | 2.9 | 22        |
| 61 | Detecting time-specific differences between temporal nonlinear curves: Analyzing data from the visual world paradigm. Statistical Methods in Medical Research, 2017, 26, 2708-2725. | 1.5 | 21        |
| 62 | How Do You Deal With Uncertainty? Cochlear Implant Users Differ in the Dynamics of Lexical Processing of Noncanonical Inputs. Ear and Hearing, 2019, 40, 961-980.                   | 2.1 | 21        |
| 63 | The development of voicing categories: A quantitative review of over 40 years of infant speech perception research. Psychonomic Bulletin and Review, 2014, 21, 884-906.             | 2.8 | 20        |
| 64 | What Comes After /f/? Prediction in Speech Derives From Data-Explanatory Processes. Psychological Science, 2016, 27, 43-52.   | 3.3 | 20        |
| 65 | Newly learned word forms are abstract and integrated immediately after acquisition. Psychonomic Bulletin and Review, 2016, 23, 491-499.   | 2.8 | 19        |
| 66 | Temporal Responsiveness in Mother-Child Dialogue: A Longitudinal Analysis of Children with Normal Hearing and Hearing Loss. Infancy, 2018, 23, 410-431.                             | 1.6 | 18        |
| 67 | Dynamic EEG analysis during language comprehension reveals interactive cascades between perceptual processing and sentential expectations. Brain and Language, 2020, 211, 104875.   | 1.6 | 18        |
| 68 | Pre- and post-target cortical processes predict speech-in-noise performance. NeuroImage, 2021, 228, 117699.   | 4.2 | 18        |
| 69 | Perceptual similarity affects the learning curve (but not necessarily learning).. Journal of Experimental Psychology: General, 2014, 143, 312-331.                                  | 2.1 | 17        |
| 70 | Learning During Processing: Word Learning Doesn't Wait for Word Recognition to Finish. Cognitive Science, 2017, 41, 706-747.  | 1.7 | 17        |
| 71 | What Are You Waiting For? Real-time Integration of Cues for Fricatives Suggests Encapsulated Auditory Memory. Cognitive Science, 2019, 43, e12700.                                  | 1.7 | 16        |
| 72 | On Leveraged Learning in Lexical Acquisition and Its Relationship to Acceleration. Cognitive Science, 2009, 33, 1503-1523.  | 1.7 | 15        |

| #  | ARTICLE  | IF  | CITATIONS |
|----|--|-----|-----------|
| 73 | Seeing the World Through a Third Eye: Developmental Systems Theory Looks Beyond the Nativistâ€“Empiricist Debate. <i>Child Development Perspectives</i> , 2009, 3, 103-105.  | 3.9 | 14        |
| 74 | Contingent categorisation in speech perception. <i>Language, Cognition and Neuroscience</i> , 2014, 29, 1070-1082.   | 1.2 | 13        |
| 75 | Can you hear me yet? An intracranial investigation of speech and non-speech audiovisual interactions in human cortex. <i>Language, Cognition and Neuroscience</i> , 2016, 31, 284-302.   | 1.2 | 13        |
| 76 | Core computational principles of language acquisition: can statistical learning do the job? Introduction to Special Section. <i>Developmental Science</i> , 2009, 12, 365-368.   | 2.4 | 12        |
| 77 | Language at Three Timescales: The Role of Real-Time Processes in Language Development and Evolution. <i>Topics in Cognitive Science</i> , 2016, 8, 393-407.  | 1.9 | 12        |
| 78 | The Slow Development of Real-Time Processing: Spoken-Word Recognition as a Crucible for New Thinking About Language Acquisition and Language Disorders. <i>Current Directions in Psychological Science</i> , 2022, 31, 305-315.                | 5.3 | 12        |
| 79 | Antiphonal Responses to Loud Contact Calls Produced by <i>Saguinus oedipus</i> . <i>International Journal of Primatology</i> , 2004, 25, 465-475.  | 1.9 | 11        |
| 80 | The pictures who shall not be named: Empirical support for benefits of preview in the Visual World Paradigm. <i>Journal of Memory and Language</i> , 2021, 121, 104279.  | 2.1 | 11        |
| 81 | Idiosyncratic use of bottom-up and top-down information leads to differences in speech perception flexibility: Converging evidence from ERPs and eye-tracking. <i>Brain and Language</i> , 2021, 223, 105031.                                  | 1.6 | 11        |
| 82 | Sometimes it is better to know less: How known words influence referent selection and retention in 18- to 24-month-old children. <i>Journal of Experimental Child Psychology</i> , 2020, 189, 104705.  | 1.4 | 10        |
| 83 | Context Effects on Musical Chord Categorization: Different Forms of Top-Down Feedback in Speech and Music?. <i>Cognitive Science</i> , 2008, 32, 893-920.  | 1.7 | 9         |
| 84 | Relative cue encoding in the context of sophisticated models of categorization: Separating information from categorization. <i>Psychonomic Bulletin and Review</i> , 2015, 22, 916-943.  | 2.8 | 9         |
| 85 | Gradient activation of speech categories facilitates listenersâ€™ recovery from lexical garden paths, but not perception of speech-in-noise.. <i>Journal of Experimental Psychology: Human Perception and Performance</i> , 2021, 47, 578-595. | 0.9 | 9         |
| 86 | Within- and between-language competition in adult second language learners: implications for language proficiency. <i>Language, Cognition and Neuroscience</i> , 2022, 37, 165-181.  | 1.2 | 9         |
| 87 | Cross-Situational Statistical Learning of New Words Despite Bilateral Hippocampal Damage and Severe Amnesia. <i>Frontiers in Human Neuroscience</i> , 2019, 13, 448.   | 2.0 | 8         |
| 88 | Cross-linguistic perception of clearly spoken English tense and lax vowels based on auditory, visual, and auditory-visual information. <i>Journal of Phonetics</i> , 2020, 81, 100980.   | 1.2 | 8         |
| 89 | Validation of the Iowa Test of Consonant Perception. <i>Journal of the Acoustical Society of America</i> , 2021, 150, 2131-2153.   | 1.1 | 7         |
| 90 | Pushing the Envelope of Associative Learning. , 2013, , 49-80.   |     | 7         |

| #   | ARTICLE  | IF  | CITATIONS |
|-----|--|-----|-----------|
| 91  | The profile of real-time competition in spoken and written word recognition: More similar than different. Quarterly Journal of Experimental Psychology, 2021, , 174702182110568.                                   | 1.1 | 7         |
| 92  | Adapting open science and pre-registration to longitudinal research. Infant and Child Development, 2024, 33, .   | 1.5 | 7         |
| 93  | Decoding the temporal dynamics of spoken word and nonword processing from EEG. NeuroImage, 2022, 260, 119457.  | 4.2 | 7         |
| 94  | Listeners can anticipate future segments before they identify the current one. Attention, Perception, and Psychophysics, 2019, 81, 1147-1166.  | 1.3 | 6         |
| 95  | Lexical processing depends on sublexical processing: Evidence from the visual world paradigm and aphasia. Attention, Perception, and Psychophysics, 2019, 81, 1047-1064.   | 1.3 | 6         |
| 96  | The development of lexical competition in written- and spoken-word recognition. Quarterly Journal of Experimental Psychology, 2023, 76, 196-219.   | 1.1 | 6         |
| 97  | Learning in rich networks involves both positive and negative associations.. Journal of Experimental Psychology: General, 2016, 145, 1062-1074.  | 2.1 | 5         |
| 98  | Dynamic competition account of men's perceptions of women's sexual interest. Cognition, 2018, 174, 43-54.  | 2.2 | 5         |
| 99  | Symbolic flexibility during unsupervised word learning in children and adults. Journal of Experimental Child Psychology, 2018, 175, 17-36.   | 1.4 | 5         |
| 100 | Cognitive and Physiological Measures of Listening Effort During Degraded Speech Perception: Relating Dual-Task and Pupillometry Paradigms. Journal of Speech, Language, and Hearing Research, 2021, 64, 3627-3652. | 1.6 | 5         |
| 101 | Similarity of referents influences the learning of phonological word forms: Evidence from concurrent word learning. Cognition, 2019, 190, 42-60.   | 2.2 | 4         |
| 102 | Students' Perceptions of a Gamified Reading Assessment. Journal of Special Education Technology, 2020, 35, 191-203.  | 2.2 | 4         |
| 103 | Automaticity as an independent trait in predicting reading outcomes in middle-school.. Developmental Psychology, 2021, 57, 361-375.  | 1.6 | 4         |
| 104 | Tracking Men's Perceptions of Women's Sexual Interest. Current Directions in Psychological Science, 2020, 29, 71-79.   | 5.3 | 3         |
| 105 | Multiple components of statistical word learning are resource dependent: Evidence from a dual-task learning paradigm. Memory and Cognition, 2021, 49, 984-997.   | 1.6 | 3         |
| 106 | Emergent Information-Level Coupling Between Perception and Production. , 2011, , .   |     | 3         |
| 107 | Morpho-phonological regularities influence the dynamics of real-time word recognition: Evidence from artificial language learning. Laboratory Phonology, 2018, 9, 2.   | 0.6 | 3         |
| 108 | Moo-cow! Mummy! More! How do children learn so many words?. Significance, 2007, 4, 159-163.  | 0.4 | 2         |
