#	ARTICLE	IF	CITATIONS
1	Incidence and seasonality of respiratory viruses among medically attended children with acute respiratory infections in an Ecuador birth cohort, 2011–2014. <i>Influenza and Other Respiratory Viruses</i> , 2022, 16, 24-33.	3.4	7
2	Helminth infections and allergic diseases: Systematic review and meta-analysis of the global literature. <i>Journal of Allergy and Clinical Immunology</i> , 2022, 149, 2139-2152.	2.9	9
3	Yaws elimination in Ecuador: Findings of a serological survey of children in Esmeraldas province to evaluate interruption of transmission. <i>PLoS Neglected Tropical Diseases</i> , 2022, 16, e0010173.	3.0	0
4	Prospective study of factors associated with asthma attack recurrence (ATTACK) in children from three Ecuadorian cities during COVID-19: a study protocol. <i>BMJ Open</i> , 2022, 12, e056295.	1.9	0
5	WSB1 and IL21R Genetic Variants Are Involved in Th2 Immune Responses to <i>Ascaris lumbricoides</i> . <i>Frontiers in Immunology</i> , 2021, 12, 622051.	4.8	2
6	A prospective seroepidemiological study of toxocariasis during early childhood in coastal Ecuador: potential for congenital transmission and risk factors for infection. <i>Parasites and Vectors</i> , 2021, 14, 95.	2.5	3
7	Intestinal helminth co-infection is an unrecognised risk factor for increased pneumococcal carriage density and invasive disease. <i>Scientific Reports</i> , 2021, 11, 6984.	3.3	6
8	Impact of early life geohelminths on wheeze, asthma and atopy in Ecuadorian children at 8 years. <i>Allergy: European Journal of Allergy and Clinical Immunology</i> , 2021, 76, 2765-2775.	5.7	9
9	Î±-Gal specific-IgE prevalence and levels in Ecuador and Kenya: Relation to diet, parasites, and IgG4. <i>Journal of Allergy and Clinical Immunology</i> , 2021, 147, 1393-1401.e7.	2.9	13
10	Trends in hospital admissions and mortality rates for asthma in Ecuador: a joinpoint regression analysis of data from 2000 to 2018. <i>BMJ Open Respiratory Research</i> , 2021, 8, e000773.	3.0	10
11	Sexually transmitted infections and factors associated with risky sexual practices among female sex workers: A cross sectional study in a large Andean city. <i>PLoS ONE</i> , 2021, 16, e0250117.	2.5	7
12	Lack of Consistent Association between Asthma, Allergic Diseases and Intestinal Helminth Infection in School-Aged Children in the Province of Bengo, Angola. <i>International Journal of Environmental Research and Public Health</i> , 2021, 18, 6156.	2.6	1
13	Impact of COVID-19 pandemic on asthma symptoms and management: A prospective analysis of asthmatic children in Ecuador. <i>World Allergy Organization Journal</i> , 2021, 14, 100551.	3.5	5
14	What can we learn from measuring IgE to allergens and allergen components in tropical and subtropical settings in Brazil?. <i>Jornal De Pediatria</i> , 2021, 97, 363-365.	2.0	0
15	Patterns of Allergic Sensitization and Factors Associated With Emergence of Sensitization in the Rural Tropics Early in the Life Course: Findings of an Ecuadorian Birth Cohort. <i>Frontiers in Allergy</i> , 2021, 2, 687073.	2.8	4
16	Health workersâ€™ perspectives on asthma care coordination between primary and specialised healthcare in the COVID-19 pandemic: a protocol for a qualitative study in Ecuador and Brazil. <i>BMJ Open</i> , 2021, 11, e052971.	1.9	3
17	The epidemiology of soil-transmitted helminth infections in children up to 8 years of age: Findings from an Ecuadorian birth cohort. <i>PLoS Neglected Tropical Diseases</i> , 2021, 15, e0009972.	3.0	7
18	Age-dependent seroprevalence of dengue and chikungunya: inference from a cross-sectional analysis in Esmeraldas Province in coastal Ecuador. <i>BMJ Open</i> , 2020, 10, e040735.	1.9	13

#	ARTICLE	IF	CITATIONS
19	Electrochemical detection of <i>Toxocara canis</i> excretory-secretory antigens in children from rural communities in Esmeraldas Province, Ecuador: association between active infection and high eosinophilia. <i>Parasites and Vectors</i> , 2020, 13, 245.	2.5	5
20	Whipworm and roundworm infections. <i>Nature Reviews Disease Primers</i> , 2020, 6, 44.	30.5	114
21	Detection of enteric parasite DNA in household and bed dust samples: potential for infection transmission. <i>Parasites and Vectors</i> , 2020, 13, 141.	2.5	7
22	Human myiasis in Ecuador. <i>PLoS Neglected Tropical Diseases</i> , 2020, 14, e0007858.	3.0	24
23	Measuring urbanicity as a risk factor for childhood wheeze in a transitional area of coastal Ecuador: a cross-sectional analysis. <i>BMJ Open Respiratory Research</i> , 2020, 7, e000679.	3.0	3
24	Urbanisation and asthma in low-income and middle-income countries: a systematic review of the urban-rural differences in asthma prevalence. <i>Thorax</i> , 2019, 74, 1020-1030.	5.6	53
25	Parasites and allergy: a case of more means less and less means more?. <i>Parasite Immunology</i> , 2019, 41, e12629.	1.5	1
26	Predictors of severe asthma attack re-attendance in Ecuadorian children: a cohort study. <i>European Respiratory Journal</i> , 2019, 54, 1802419.	6.7	14
27	Soil-transmitted helminth parasites and allergy: Observations from Ecuador. <i>Parasite Immunology</i> , 2019, 41, e12590.	1.5	21
28	Parasites and allergy: Observations from Brazil. <i>Parasite Immunology</i> , 2019, 41, e12588.	1.5	5
29	Is childhood wheeze and asthma in Latin America associated with poor hygiene and infection? A systematic review. <i>BMJ Open Respiratory Research</i> , 2018, 5, e000249.	3.0	7
30	Soil-transmitted helminth infections and nutritional status in Ecuador: findings from a national survey and implications for control strategies. <i>BMJ Open</i> , 2018, 8, e021319.	1.9	32
31	Effect of Early-Life Geohelminth Infections on the Development of Wheezing at 5 Years of Age. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2018, 197, 364-372.	5.6	23
32	Associations between infant fungal and bacterial dysbiosis and childhood atopic wheeze in a nonindustrialized setting. <i>Journal of Allergy and Clinical Immunology</i> , 2018, 142, 424-434.e10.	2.9	181
33	Understanding asthma phenotypes: the World Asthma Phenotypes (WASP) international collaboration. <i>ERJ Open Research</i> , 2018, 4, 00013-2018.	2.6	39
34	The somatic proteins of <i>Toxocara canis</i> larvae and excretory-secretory products revealed by proteomics. <i>Veterinary Parasitology</i> , 2018, 259, 25-34.	1.8	24
35	Predictors of repeated acute hospital attendance for asthma in children: A systematic review and meta-analysis. <i>Pediatric Pulmonology</i> , 2018, 53, 1179-1192.	2.0	35
36	Risk factors for <i>Toxocara</i> spp. seroprevalence and its association with atopy and asthma phenotypes in school-age children in a small town and semi-rural areas of Northeast Brazil. <i>Acta Tropica</i> , 2017, 174, 158-164.	2.0	35

#	ARTICLE	IF	CITATIONS
37	Global issues in allergy and immunology: Parasitic infections and allergy. <i>Journal of Allergy and Clinical Immunology</i> , 2017, 140, 1217-1228.	2.9	61
38	Dissociation between skin test reactivity and anti-aeroallergen IgE: Determinants among urban Brazilian children. <i>PLoS ONE</i> , 2017, 12, e0174089.	2.5	13
39	Comparison of Cytokine Responses in Ecuadorian Children Infected with <i>Giardia</i> , <i>Ascaris</i> , or Both Parasites. <i>American Journal of Tropical Medicine and Hygiene</i> , 2017, 96, 1394-1399.	1.4	19
40	Geographic distribution of human <i>Blastocystis</i> subtypes in South America. <i>Infection, Genetics and Evolution</i> , 2016, 41, 32-35.	2.3	174
41	De novo assembly and characterization of the <i>Trichuris trichiura</i> adult worm transcriptome using Ion Torrent sequencing. <i>Acta Tropica</i> , 2016, 159, 132-141.	2.0	14
42	Data on prevalence and risk factors associated with <i>Toxocara</i> spp infection, atopy and asthma development in Northeast Brazilian school children. <i>Data in Brief</i> , 2016, 9, 425-428.	1.0	1
43	Whipworms in humans and pigs: origins and demography. <i>Parasites and Vectors</i> , 2016, 9, 37.	2.5	21
44	Effects of maternal geohelminth infections on allergy in early childhood. <i>Journal of Allergy and Clinical Immunology</i> , 2016, 137, 899-906.e2.	2.9	20
45	Risk factors for acute asthma in tropical America: a case-control study in the City of Esmeraldas, Ecuador. <i>Pediatric Allergy and Immunology</i> , 2015, 26, 423-430.	2.6	20
46	Cohort Profile: The Ecuador Life (ECUAVIDA) study in Esmeraldas Province, Ecuador. <i>International Journal of Epidemiology</i> , 2015, 44, 1517-1527.	1.9	31
47	Effects of environment on human cytokine responses during childhood in the tropics: role of urban versus rural residence. <i>World Allergy Organization Journal</i> , 2015, 8, 22.	3.5	13
48	Asthma in Latin America. <i>Thorax</i> , 2015, 70, 898-905.	5.6	68
49	A genetic analysis of <i>Trichuris trichiura</i> and <i>Trichuris suis</i> from Ecuador. <i>Parasites and Vectors</i> , 2015, 8, 168.	2.5	25
50	Norovirus Infection and Disease in an Ecuadorian Birth Cohort: Association of Certain Norovirus Genotypes With Host FUT2 Secretor Status. <i>Journal of Infectious Diseases</i> , 2015, 211, 1813-1821.	4.0	106
51	Effects of helminth co-infections on atopy, asthma and cytokine production in children living in a poor urban area in Latin America. <i>BMC Research Notes</i> , 2014, 7, 817.	1.4	57
52	Hygiene, atopy and wheeze-eczema-rhinitis symptoms in schoolchildren from urban and rural Ecuador. <i>Thorax</i> , 2014, 69, 232-239.	5.6	47
53	Risk Factors for Soil-Transmitted Helminth Infections during the First 3 Years of Life in the Tropics; Findings from a Birth Cohort. <i>PLoS Neglected Tropical Diseases</i> , 2014, 8, e2718.	3.0	42
54	Single-Cell Analysis of Innate Cytokine Responses to Pattern Recognition Receptor Stimulation in Children across Four Continents. <i>Journal of Immunology</i> , 2014, 193, 3003-3012.	0.8	30

#	ARTICLE	IF	CITATIONS
55	Risk factors for non-atopic asthma/wheeze in children and adolescents: a systematic review. <i>Emerging Themes in Epidemiology</i> , 2014, 11, 5.	2.7	63
56	Pattern recognition receptor-mediated cytokine response in infants across 4 continents. <i>Journal of Allergy and Clinical Immunology</i> , 2014, 133, 818-826.e4.	2.9	48
57	Whipworm genome and dual-species transcriptome analyses provide molecular insights into an intimate host-parasite interaction. <i>Nature Genetics</i> , 2014, 46, 693-700.	21.4	139
58	Environmental conditions, immunologic phenotypes, atopy, and asthma: New evidence of how the hygiene hypothesis operates in Latin America. <i>Journal of Allergy and Clinical Immunology</i> , 2013, 131, 1064-1068.e1.	2.9	40
59	A Novel, Multi-Parallel, Real-Time Polymerase Chain Reaction Approach for Eight Gastrointestinal Parasites Provides Improved Diagnostic Capabilities to Resource-Limited At-Risk Populations. <i>American Journal of Tropical Medicine and Hygiene</i> , 2013, 88, 1041-1047.	1.4	217
60	Immunology of <i>Ascaris</i> and Immunomodulation. , 2013, , 3-19.		10
61	Patent Human Infections with the Whipworm, <i>Trichuris trichiura</i> , Are Not Associated with Alterations in the Faecal Microbiota. <i>PLoS ONE</i> , 2013, 8, e76573.	2.5	159
62	Maternal Geohelminth Infections Are Associated with an Increased Susceptibility to Geohelminth Infection in Children: A Case-Control Study. <i>PLoS Neglected Tropical Diseases</i> , 2012, 6, e1753.	3.0	33
63	A Single Dose of Oral BCG Moreau Fails to Boost Systemic IFN- $\gamma$ Responses to Tuberculin in Children in the Rural Tropics: Evidence for a Barrier to Mucosal Immunization. <i>Journal of Tropical Medicine</i> , 2012, 2012, 1-8.	1.7	3
64	Influence of poverty and infection on asthma in Latin America. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2012, 12, 171-178.	2.3	34
65	Helminth infection is associated with decreased basophil responsiveness in human beings. <i>Journal of Allergy and Clinical Immunology</i> , 2012, 130, 270-272.	2.9	24
66	Upper Airways Microbiota in Antibiotic-Naïve Wheezing and Healthy Infants from the Tropics of Rural Ecuador. <i>PLoS ONE</i> , 2012, 7, e46803.	2.5	89
67	Urbanisation is associated with prevalence of childhood asthma in diverse, small rural communities in Ecuador. <i>Thorax</i> , 2011, 66, 1043-1050.	5.6	63
68	The relevance of tick bites to the production of IgE antibodies to the mammalian oligosaccharide galactose- $\alpha$ -1,3-galactose. <i>Journal of Allergy and Clinical Immunology</i> , 2011, 127, 1286-1293.e6.	2.9	515
69	Do regulatory antibodies offer an alternative mechanism to explain the hygiene hypothesis?. <i>Trends in Parasitology</i> , 2011, 27, 523-529.	3.3	6
70	Immune system development during early childhood in tropical Latin America: Evidence for the age-dependent down regulation of the innate immune response. <i>Clinical Immunology</i> , 2011, 138, 299-310.	3.2	49
71	Evidence for a modulatory effect of IL-10 on both Th1 and Th2 cytokine production: The role of the environment. <i>Clinical Immunology</i> , 2011, 139, 57-64.	3.2	21
72	Impact of early life exposures to geohelminth infections on the development of vaccine immunity, allergic sensitization, and allergic inflammatory diseases in children living in tropical Ecuador: the ECUAVIDA birth cohort study. <i>BMC Infectious Diseases</i> , 2011, 11, 184.	2.9	40

#	ARTICLE	IF	CITATIONS
73	Effects of Chronic Ascariasis and Trichuriasis on Cytokine Production and Gene Expression in Human Blood: A Cross-Sectional Study. <i>PLoS Neglected Tropical Diseases</i> , 2011, 5, e1157.	3.0	25
74	Chronic Intestinal Helminth Infections Are Associated with Immune Hyporesponsiveness and Induction of a Regulatory Network. <i>Infection and Immunity</i> , 2010, 78, 3160-3167.	2.2	147
75	Differences in asthma between rural and urban communities in South Africa and other developing countries. <i>Journal of Allergy and Clinical Immunology</i> , 2010, 125, 106-107.	2.9	14
76	Poverty, dirt, infections and non-atopic wheezing in children from a Brazilian urban center. <i>Respiratory Research</i> , 2010, 11, 167.	3.6	46
77	Risk factors for atopic and non-atopic asthma in a rural area of Ecuador. <i>Thorax</i> , 2010, 65, 409-416.	5.6	63
78	Asthma cases in childhood attributed to atopy in tropical area in Brazil. <i>Revista Panamericana De Salud Publica/Pan American Journal of Public Health</i> , 2010, 28, 405-411.	1.1	35
79	Spontaneous Cytokine Production in Children According to Biological Characteristics and Environmental Exposures. <i>Environmental Health Perspectives</i> , 2009, 117, 845-849.	6.0	34
80	Evidence for In Utero Sensitization to <i>Ascaris lumbricoides</i> in Newborns of Mothers with Ascariasis. <i>Journal of Infectious Diseases</i> , 2009, 199, 1846-1850.	4.0	47
81	Interactions between helminth parasites and allergy. <i>Current Opinion in Allergy and Clinical Immunology</i> , 2009, 9, 29-37.	2.3	179
82	Repeated Treatments with Albendazole Enhance Th2 Responses to <i>Ascaris Lumbricoides</i> , but Not to Aeroallergens, in Children from Rural Communities in the Tropics. <i>Journal of Infectious Diseases</i> , 2008, 198, 1237-1242.	4.0	25
83	<i>Ascaris lumbricoides</i> Induced Interleukin-10 Is Not Associated with Atopy in Schoolchildren in a Rural Area of the Tropics. <i>Journal of Infectious Diseases</i> , 2008, 197, 1333-1340.	4.0	25
84	Impact of Long-Term Treatment with Ivermectin on the Prevalence and Intensity of Soil-Transmitted Helminth Infections. <i>PLoS Neglected Tropical Diseases</i> , 2008, 2, e293.	3.0	49
85	Impact of long-term treatment of onchocerciasis with ivermectin in Ecuador: potential for elimination of infection. <i>BMC Medicine</i> , 2007, 5, 9.	5.5	28
86	Effect of albendazole treatments on the prevalence of atopy in children living in communities endemic for geohelminth parasites: a cluster-randomised trial. <i>Lancet</i> , The, 2006, 367, 1598-1603.	13.7	134
87	Risk factors and immunological pathways for asthma and other allergic diseases in children: background and methodology of a longitudinal study in a large urban center in Northeastern Brazil (Salvador-SCAALA study). <i>BMC Pulmonary Medicine</i> , 2006, 6, 15.	2.0	104
88	Risk factors for asthma and allergy associated with urban migration: background and methodology of a cross-sectional study in Afro-Ecuadorian school children in Northeastern Ecuador (Esmeraldas-SCAALA Study). <i>BMC Pulmonary Medicine</i> , 2006, 6, 24.	2.0	33
89	Atopic Phenotype Is an Important Determinant of Immunoglobulin E-Mediated Inflammation and Expression of T Helper Cell Type 2 Cytokines to <i>Ascaris</i> Antigens in Children Exposed to Ascariasis. <i>Journal of Infectious Diseases</i> , 2004, 190, 1338-1346.	4.0	45
90	The Potential Impact of Early Exposures to Geohelminth Infections on the Development of Atopy. <i>Clinical Reviews in Allergy and Immunology</i> , 2004, 26, 5-14.	6.5	27

#	ARTICLE	IF	CITATIONS
91	Reduced risk of atopy among school-age children infected with geohelminth parasites in a rural area of the tropics. <i>Journal of Allergy and Clinical Immunology</i> , 2003, 111, 995-1000.	2.9	287
92	Allergic Symptoms, Atopy, and Geohelminth Infections in a Rural Area of Ecuador. <i>American Journal of Respiratory and Critical Care Medicine</i> , 2003, 168, 313-317.	5.6	136
93	Association of Transient Dermal Mastocytosis and Elevated Plasma Tryptase Levels with Development of Adverse Reactions after Treatment of Onchocerciasis with Ivermectin. <i>Journal of Infectious Diseases</i> , 2002, 186, 1307-1313.	4.0	24
94	Human Infection with <i>Ascaris lumbricoides</i> Is Associated with Suppression of the Interleukin-2 Response to Recombinant Cholera Toxin B Subunit following Vaccination with the Live Oral Cholera Vaccine CVD 103-HgR. <i>Infection and Immunity</i> , 2001, 69, 1574-1580.	2.2	212
95	An outbreak of bartonellosis in Zamora Chinchipe Province in Ecuador. <i>Transactions of the Royal Society of Tropical Medicine and Hygiene</i> , 1997, 91, 544-546.	1.8	14
96	A line of non-tumorigenic mouse melanocytes, syngeneic with the B16 melanoma and requiring a tumour promoter for growth. <i>International Journal of Cancer</i> , 1987, 39, 414-418.	5.1	441
