Hannah M Sinclair

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/5651441/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	166â€Ct coronary angiography versus ct fractional flow reserve: a single centre experience. , 2021, , .		0
2	Intravascular imaging–guided intracoronary lithotripsy: First realâ€world experience. Health Science Reports, 2021, 4, e307.	1.5	4
3	One-year clinical outcomes in older patients with non-ST elevation acute coronary syndrome undergoing coronary angiography: An analysis of the ICON1 study. International Journal of Cardiology, 2019, 274, 45-51.	1.7	36
4	Gender Differences in Outcomes and Predictors of All-Cause Mortality After Percutaneous Coronary Intervention (Data from United Kingdom and Sweden). American Journal of Cardiology, 2017, 119, 210-216.	1.6	81
5	55â€High serum parathyroid hormone levels are not associated with endothelial function, vascular stiffness or early adverse outcomes after invasive management of non-st elevation myocardial infarction in high-risk older patients. Heart, 2017, 103, A43.1-A43.	2.9	0
6	54â€Frail older patients have a greater improvement in physical quality of life than robust patients at one year following invasive treatment for non-st elevation acute coronary syndrome. Heart, 2017, 103, A42-A43.	2.9	1
7	56â€High serum parathyroid hormone level is independently associated with carotid intima-media thickness in older patients undergoing invasive management of non-st elevation myocardial infarction. Heart, 2017, 103, A43.2-A44.	2.9	0
8	57â€Serum total vitamin d levels are not associated with endothelial dysfunction, vascular stiffness or early adverse outcomes after invasive management of non-st elevation acute coronary syndrome in older patients. Heart, 2017, 103, A44.1-A44.	2.9	0
9	66â€Cognitive impairment is not associated with 30 day major adverse cardiovascular events in older (75 years) patients presenting with non-st elevation acute coronary syndrome: an evaluation from the icon1 study. Heart, 2017, 103, A50.1-A50.	2.9	0
10	Carotid Intima Media Thickness and Its Utility as a Predictor of Cardiovascular Disease. Cardiology in Review, 2016, 24, 70-75.	1.4	53
11	Engaging older patients in cardiovascular research: observational analysis of the ICON-1 study. Open Heart, 2016, 3, e000436.	2.3	23
12	Study to Improve Cardiovascular Outcomes in high-risk older patieNts (ICON1) with acute coronary syndrome: study design and protocol of a prospective observational study. BMJ Open, 2016, 6, e012091.	1.9	25
13	Coronary artery disease in patients with dementia. Coronary Artery Disease, 2016, 27, 511-520.	0.7	13
14	The Role of Virtual Histology Intravascular Ultrasound in the Identification of Coronary Artery Plaque Vulnerability in Acute Coronary Syndromes. Cardiology in Review, 2016, 24, 303-309.	1.4	18
15	Intracoronary Imaging in the Detection of Vulnerable Plaques. Current Cardiology Reports, 2016, 18, 28.	2.9	26
16	Coronary revascularisation in older patients with non-ST elevation acute coronary syndromes. Heart, 2016, 102, 416-424.	2.9	14
17	Gender differences in outcomes in patients with acute coronary syndrome in the current era: A review. European Heart Journal: Acute Cardiovascular Care, 2016, 5, 51-60.	1.0	35
18	5â€Major Adverse Cardiovascular Events at 30-days were not Significantly different between Frail and non-frail older (≥75 years) Patients with non ST Elevation Acute Coronary Syndrome Managed by Invasive Strategy: An Analysis from the ICON1 Study: Abstract 5 Table 1. Heart, 2015, 101, A3-A4.	2.9	3

HANNAH M SINCLAIR

#	Article	IF	CITATIONS
19	Endothelial Dysfunction and Coronary Artery Disease. Cardiology in Review, 2015, 23, 119-129.	1.4	38
20	4â€Association of Telomere Length and Telomerase Activity with Clinical Parameters in Older Patients Undergoing Invasive Management Of non-ST Elevation Acute Coronary Syndrome. Heart, 2015, 101, A2.2-A3.	2.9	0
21	6â€Frailty is Associated with Undiagnosed Early Cognitive Impairment in older patients (≥75 years) with non-ST Elevation Acute Coronary Syndrome Managed by Invasive Strategy: Abstract 6 Table 1. Heart, 2015, 101, A4.1-A4.	2.9	0
22	OCT for theÂldentification of Vulnerable Plaque inÂAcute Coronary Syndrome. JACC: Cardiovascular Imaging, 2015, 8, 198-209.	5.3	130
23	Interventional Management of Coronary Artery Disease: Acute Coronary Syndromes. , 2014, , 1-43.		0
24	Aspirin, Platelet P2Y12 Receptor Inhibitors, and Other Oral Antiplatelets. Interventional Cardiology Clinics, 2013, 2, 527-535.	0.4	8
25	Effects of salbutamol and glyceryl trinitrate on large arterial stiffness are similar between patients with hypertension and adults with normal blood pressure. British Journal of Clinical Pharmacology, 2006, 62, 621-626.	2.4	9
