#	Article	IF	CITATIONS
1	I'm too calmâ€"Let's take a risk! On the impact of state and trait arousal on risk taking. Psychophysiology, 2013, 50, 498-503.	2.4	49
2	Resting frontal EEG alpha-asymmetry predicts the evaluation of affective musical stimuli. Neuroscience Letters, 2009, 460, 237-240.	2.1	40
3	I can't wait! Neural reward signals in impulsive individuals exaggerate the difference between immediate and future rewards. Psychophysiology, 2017, 54, 409-415.	2.4	29
4	Paying Out One or All Trials: A Behavioral Economic Evaluation of Payment Methods in a Prototypical Risky Decision Study. Psychological Record, 2015, 65, 245-250.	0.9	25
5	Anxious gambling: Anxiety is associated with higher frontal midline theta predicting less risky decisions. Psychophysiology, 2018, 55, e13210.	2.4	25
6	The Power of mind: Blocking visual perception by hypnosis. Scientific Reports, 2017, 7, 4889.	3.3	24
7	Work first then play: Prior task difficulty increases motivation-related brain responses in a risk game. Biological Psychology, 2017, 126, 82-88.	2.2	17
8	Hypnotic suggestions of safety improve well-being in non-invasively ventilated patients in the intensive care unit. Intensive Care Medicine, 2021, 47, 485-486.	8.2	17
9	Suggested deafness during hypnosis and simulation of hypnosis compared to a distraction and control condition: A study on subjective experience and cortical brain responses. PLoS ONE, 2020, 15, e0240832.	2.5	15
10	What you give is what you get: Payment of one randomly selected trial induces risk-aversion and decreases brain responses to monetary feedback. Cognitive, Affective and Behavioral Neuroscience, 2019, 19, 187-196.	2.0	13
11	Wearing a bike helmet leads to less cognitive control, revealed by lower frontal midline theta power and risk indifference. Psychophysiology, 2019, 56, e13458.	2.4	11
12	Feel Safe and Money is Less Important! Hypnotic Suggestions of Safety Decrease Brain Responses to Monetary Rewards in a Risk Game. Cerebral Cortex Communications, 2020, 1, tgaa050.	1.6	8
13	Suggested visual blockade during hypnosis: Top-down modulation of stimulus processing in a visual oddball task. PLoS ONE, 2021, 16, e0257380.	2.5	8
14	Hypnotic suggestions of safety reduce neuronal signals of delay discounting. Scientific Reports, 2021, 11, 2706.	3.3	6
15	Safety on demand: Postâ€hypnotic suggestions of safety reduce neural signals of reward sensitivity with longâ€term beneficial effects. Psychophysiology, 2022, 59, e14015.	2.4	6
16	What Makes Us Feel Good or Bad. Journal of Individual Differences, 2018, 39, 142-150.	1.0	3
17	Feeling Safe during Intensive Care: Protocol of a Pilot Study on Therapeutic Suggestions of Safety under Hypnosis in Patients with Non-Invasive Ventilation. , 2020, 5, 1-8.		3
18	Feeling Safe With Hypnosis: Eliciting Positive Feelings During a Special State of Consciousness. Frontiers in Psychology, 2022, 13, .	2.1	2
