#	ARTICLE	IF	CITATIONS
1	Variable selection for misclassified current status data under the proportional hazards model. Communications in Statistics Part B: Simulation and Computation, 2024, 53, 1494-1503.	1.2	0
2	Variable selection for bivariate interval-censored failure time data under linear transformation models. International Journal of Biostatistics, 2023, 19, 61-79.	0.7	2
3	Simultaneous variable selection and estimation for joint models of longitudinal and failure time data with interval censoring. Biometrics, 2022, 78, 151-164.	1.4	4
4	Regression analysis of dependent current status data with the accelerated failure time model. Communications in Statistics Part B: Simulation and Computation, 2022, 51, 6188-6196.	1.2	3
5	Sample size calculation for recurrent event data with additive rates models. Pharmaceutical Statistics, 2022, 21, 89-102.	1.3	1
6	Variable Selection for Interval-Censored Failure Time Data. International Statistical Review, 2022, 90, 193-215.	1.9	5
7	An efficient penalized estimation approach for semiparametric linear transformation models with interval-censored data. Statistics in Medicine, 2022, 41, 1829-1845.	1.6	1
8	Variable selection for time-varying effects based on interval-censored failure time data. Statistics and Its Interface, 2022, 15, 303-311.	0.3	1
9	Variable Selection for Generalized Linear Models with Interval-Censored Failure Time Data. Mathematics, 2022, 10, 763.	2.2	1
10	A new approach to estimation of the proportional hazards model based on interval-censored data with missing covariates. Lifetime Data Analysis, 2022, 28, 335-355.	0.9	3
11	Estimation of the Proportional Mean Residual Life Model with Internal and Longitudinal Covariates. Statistics in Biosciences, 2022, 14, 550-563.	1.2	1
12	Variable selection for case-cohort studies with informatively interval-censored outcomes. Computational Statistics and Data Analysis, 2022, 172, 107484.	1.2	4
13	Regression analysis of multivariate interval-censored failure time data with informative censoring. Statistical Methods in Medical Research, 2022, 31, 391-403.	1.5	5
14	Role of Long Noncoding RNAs in Smoking-Induced Lung Cancer: An In Silico Study. Computational and Mathematical Methods in Medicine, 2022, 2022, 1-20.	1.3	2
15	Inference of a time-varying coefficient regression model for multivariate panel count data. Journal of Multivariate Analysis, 2022, 192, 105047.	1.0	1
16	A pairwise pseudo-likelihood approach for left-truncated and interval-censored data under the Cox model. Biometrics, 2021, 77, 1303-1314.	1.4	13
17	Regression analysis of case-cohort studies in the presence of dependent interval censoring. Journal of Applied Statistics, 2021, 48, 846-865.	1.3	9
18	Weighted rank estimation for nonparametric transformation models with doubly truncated data. Journal of the Korean Statistical Society, 2021, 50, 1-24.	0.4	1

#	ARTICLE	IF	CITATIONS
19	Weighted rank estimation for nonparametric transformation models with nonignorable missing data. <i>Computational Statistics and Data Analysis</i> , 2021, 153, 107061.	1.2	3
20	Regression analysis of mixed panel count data with informative indicator processes. <i>Statistics in Medicine</i> , 2021, 40, 1262-1271.	1.6	2
21	Variable selection for generalized odds rate mixture cure models with interval-censored failure time data. <i>Computational Statistics and Data Analysis</i> , 2021, 156, 107115.	1.2	9
22	Semiparametric analysis of case K interval-censored failure time data in the presence of a cured subgroup and informative censoring. <i>Journal of Statistical Computation and Simulation</i> , 2021, 91, 2018-2033.	1.2	2
23	Regression analysis of asynchronous longitudinal data with informative observation processes. <i>Computational Statistics and Data Analysis</i> , 2021, 157, 107161.	1.2	3
24	Regression analysis of censored data with nonignorable missing covariates and application to Alzheimer Disease. <i>Computational Statistics and Data Analysis</i> , 2021, 157, 107157.	1.2	5
25	A weighted method for the exclusive hypothesis test with application to typhoon data. <i>Canadian Journal of Statistics</i> , 2021, 49, 1258-1272.	0.9	2
26	Editorial to special issue <i>Frontiers of Data Analysis</i> . <i>Journal of Applied Statistics</i> , 2021, 48, 1349-1351.	1.3	0
27	New methods for the additive hazards model with the informatively interval-censored failure time data. <i>Biometrical Journal</i> , 2021, 63, 1507-1525.	1.0	4
28	A unified approach to variable selection for Cox's proportional hazards model with interval-censored failure time data. <i>Statistical Methods in Medical Research</i> , 2021, 30, 1833-1849.	1.5	8
29	A simulation-extrapolation approach for regression analysis of misclassified current status data with the additive hazards model. <i>Statistics in Medicine</i> , 2021, 40, 6309-6320.	1.6	7
30	An additive hazards cure model with informative interval censoring. <i>Lifetime Data Analysis</i> , 2021, 27, 244-268.	0.9	4
31	Semiparametric regression analysis of clustered interval-censored failure time data with a cured subgroup. <i>Statistics in Medicine</i> , 2021, 40, 6918.	1.6	3
32	Regression analysis of interval-censored failure time data with cured subgroup and mismeasured covariates. <i>Communications in Statistics - Theory and Methods</i> , 2020, 49, 189-202.	1.0	2
33	Simultaneous Estimation and Variable Selection for Interval-Censored Data With Broken Adaptive Ridge Regression. <i>Journal of the American Statistical Association</i> , 2020, 115, 204-216.	3.1	38
34	A class of additive transformation models for recurrent gap times. <i>Communications in Statistics - Theory and Methods</i> , 2020, 49, 4030-4045.	1.0	0
35	Semiparametric regression analysis of doubly censored failure time data from cohort studies. <i>Lifetime Data Analysis</i> , 2020, 26, 315-338.	0.9	3
36	Semiparametric regression analysis of multivariate doubly censored data. <i>Statistical Modelling</i> , 2020, 20, 502-526.	1.1	5

#	ARTICLE	IF	CITATIONS
37	Regression analysis of interval-censored failure time data with time-dependent covariates. Computational Statistics and Data Analysis, 2020, 144, 106848.	1.2	6
38	A vine copula approach for regression analysis of bivariate current status data with informative censoring. Journal of Nonparametric Statistics, 2020, 32, 185-200.	0.9	0
39	Nonparametric tests for stratified additive hazards model based on current status data. Journal of Applied Statistics, 2020, 47, 2178-2191.	1.3	0
40	Penalized estimation of semiparametric transformation models with interval-censored data and application to Alzheimer's disease. Statistical Methods in Medical Research, 2020, 29, 2151-2166.	1.5	25
41	Regression analysis of misclassified current status data. Journal of Nonparametric Statistics, 2020, 32, 1-19.	0.9	7
42	Estimation of the additive hazards model with case $K$ interval-censored failure time data in the presence of informative censoring. Computational Statistics and Data Analysis, 2020, 144, 106891.	1.2	9
43	Nonparametric screening and feature selection for ultrahigh-dimensional Case II interval-censored failure time data. Biometrical Journal, 2020, 62, 1909-1925.	1.0	3
44	A new method for regression analysis of interval-censored data with the additive hazards model. Journal of the Korean Statistical Society, 2020, 49, 1131-1147.	0.4	4
45	Statistical analysis of clustered mixed recurrent-event data with application to a cancer survivor study. Lifetime Data Analysis, 2020, 26, 820-832.	0.9	3
46	Variable selection for high-dimensional partly linear additive Cox model with application to Alzheimer's disease. Statistics in Medicine, 2020, 39, 3120-3134.	1.6	15
47	Estimation of the additive hazards model with interval-censored data and missing covariates. Canadian Journal of Statistics, 2020, 48, 499-517.	0.9	4
48	Estimation of the additive hazards model with linear inequality restrictions based on current status data. Communications in Statistics - Theory and Methods, 2020, , 1-14.	1.0	1
49	A regularized estimation approach for case-cohort periodic follow-up studies with an application to HIV vaccine trials. Biometrical Journal, 2020, 62, 1176-1191.	1.0	6
50	Additive hazards regression for case-cohort studies with interval-censored data. Statistics and Its Interface, 2020, 13, 181-191.	0.3	5
51	Variable selection for high-dimensional quadratic Cox model with application to Alzheimer's disease. International Journal of Biostatistics, 2020, 16, .	0.7	1
52	Regression analysis of informatively interval-censored failure time data with semiparametric linear transformation model. Journal of Nonparametric Statistics, 2019, 31, 663-679.	0.9	7
53	Control charts based on dependent count data with deflation or inflation of zeros. Journal of Statistical Computation and Simulation, 2019, 89, 3273-3289.	1.2	8
54	Semiparametric probit model for informative current status data. Statistics in Medicine, 2019, 38, 2219-2227.	1.6	5

#	ARTICLE	IF	CITATIONS
55	Simultaneous estimation and variable selection for incomplete event history studies. <i>Journal of Multivariate Analysis</i> , 2019, 171, 350-361.	1.0	1
56	Maximum likelihood estimation in transformed linear regression with nonnormal errors. <i>Annals of Statistics</i> , 2019, 47, .	2.6	5
57	An additive“multiplicative mean model for panel count data with dependent observation and dropout processes. <i>Scandinavian Journal of Statistics</i> , 2019, 46, 414-431.	1.4	4
58	A class of semiparametric transformation cure models for interval-censored failure time data. <i>Computational Statistics and Data Analysis</i> , 2019, 133, 153-165.	1.2	10
59	Nonparametric test for stratum effects in the cox model with interval-censored data. <i>Communications in Statistics - Theory and Methods</i> , 2019, 48, 300-310.	1.0	2
60	Regression analysis of informative current status data with the semiparametric linear transformation model. <i>Journal of Applied Statistics</i> , 2019, 46, 187-202.	1.3	7
61	Estimation of the additive hazards model with current status data in the presence of informative censoring. <i>Statistics and Its Interface</i> , 2019, 12, 321-330.	0.3	4
62	Semiparametric analysis of the additive hazards model with informatively interval-censored failure time data. <i>Computational Statistics and Data Analysis</i> , 2018, 125, 1-9.	1.2	19
63	A Class of Semiparametric Transformation Models for Doubly Censored Failure Time Data. <i>Scandinavian Journal of Statistics</i> , 2018, 45, 682-698.	1.4	10
64	Joint analysis of interval-censored failure time data and panel count data. <i>Lifetime Data Analysis</i> , 2018, 24, 94-109.	0.9	11
65	Regression analysis of interval“censored failure time data with possibly crossing hazards. <i>Statistics in Medicine</i> , 2018, 37, 768-775.	1.6	6
66	A semiparametric regression cure model for doubly censored data. <i>Lifetime Data Analysis</i> , 2018, 24, 492-508.	0.9	7
67	A Semiparametric Likelihood-based Method for Regression Analysis of Mixed Panel-count Data. <i>Biometrics</i> , 2018, 74, 488-497.	1.4	9
68	Regression analysis of clustered interval-censored failure time data with linear transformation models in the presence of informative cluster size. <i>Journal of Nonparametric Statistics</i> , 2018, 30, 703-715.	0.9	6
69	Variable selection for recurrent event data with broken adaptive ridge regression. <i>Canadian Journal of Statistics</i> , 2018, 46, 416-428.	0.9	7
70	Inference on semiparametric transformation model with general interval-censored failure time data. <i>Journal of Nonparametric Statistics</i> , 2018, 30, 758-773.	0.9	7
71	Regression analysis of incomplete data from event history studies with the proportional rates model. <i>Statistics and Its Interface</i> , 2018, 11, 91-97.	0.3	2
72	A new copula model-based method for regression analysis of dependent current status data. <i>Statistics and Its Interface</i> , 2018, 11, 463-471.	0.3	5

#	ARTICLE	IF	CITATIONS
73	A Sieve Semiparametric Maximum Likelihood Approach for Regression Analysis of Bivariate Interval-Censored Failure Time Data. <i>Journal of the American Statistical Association</i> , 2017, 112, 664-672.	3.1	67
74	Regression analysis of mixed panel count data with dependent terminal events. <i>Statistics in Medicine</i> , 2017, 36, 1669-1680.	1.6	3
75	Regression analysis of current status data in the presence of dependent censoring with applications to tumorigenicity experiments. <i>Computational Statistics and Data Analysis</i> , 2017, 110, 75-86.	1.2	23
76	Nonparametric comparison of survival functions based on interval-censored data with unequal censoring. <i>Statistics in Medicine</i> , 2017, 36, 1895-1906.	1.6	2
77	Identification of prognostic genes and gene sets for early-stage non-small cell lung cancer using bi-level selection methods. <i>Scientific Reports</i> , 2017, 7, 46164.	3.3	9
78	Regression analysis of bivariate current status data under the proportional hazards model. <i>Canadian Journal of Statistics</i> , 2017, 45, 410-424.	0.9	23
79	Regression analysis of clustered failure time data with informative cluster size under the additive transformation models. <i>Lifetime Data Analysis</i> , 2017, 23, 651-670.	0.9	6
80	Regression analysis of current status data in the presence of a cured subgroup and dependent censoring. <i>Lifetime Data Analysis</i> , 2017, 23, 626-650.	0.9	15
81	Joint analysis of panel count data with an informative observation process and a dependent terminal event. <i>Lifetime Data Analysis</i> , 2017, 23, 560-584.	0.9	4
82	Simulation Studies on the Effects of the Censoring Distribution Assumption in the Analysis of Interval-Censored Failure Time Data. <i>ICSA Book Series in Statistics</i> , 2017, , 319-346.	0.2	1
83	Cox regression analysis of dependent interval-censored failure time data. <i>Computational Statistics and Data Analysis</i> , 2016, 103, 79-90.	1.2	16
84	Joint Analysis of Longitudinal Data and Informative Observation Times with Time-Dependent Random Effects. <i>ICSA Book Series in Statistics</i> , 2016, , 37-51.	0.2	2
85	A multiple imputation approach to the analysis of clustered interval-censored failure time data with the additive hazards model. <i>Computational Statistics and Data Analysis</i> , 2016, 103, 242-249.	1.2	7
86	Semiparametric Quantile Regression Analysis of Right-Censored and Length-Biased Failure Time Data with Partially Linear Varying Effects. <i>Scandinavian Journal of Statistics</i> , 2016, 43, 921-938.	1.4	0
87	Regression Analysis of Case $i > K$ Interval-Censored Failure Time Data in the Presence of Informative Censoring. <i>Biometrics</i> , 2016, 72, 1103-1112.	1.4	34
88	Nonparametric comparison of recurrent event processes based on panel count data. <i>Journal of the Korean Statistical Society</i> , 2016, 45, 250-259.	0.4	0
89	Regression analysis of longitudinal data with correlated censoring and observation times. <i>Lifetime Data Analysis</i> , 2016, 22, 343-362.	0.9	2
90	Regression Analysis of Length-Biased and Right-Censored Failure Time Data with Missing Covariates. <i>Scandinavian Journal of Statistics</i> , 2015, 42, 438-452.	1.4	7

#	ARTICLE	IF	CITATIONS
91	Regression Analysis of Current Status Data Under the Additive Hazards Model with Auxiliary Covariates. <i>Scandinavian Journal of Statistics</i> , 2015, 42, 118-136.	1.4	8
92	Empirical Analysis of Interval-Censored Failure Time Data with Linear Transformation Models. <i>Communications in Statistics - Theory and Methods</i> , 2015, 44, 5120-5135.	1.0	2
93	Regression analysis of multivariate current status data with auxiliary covariates under the additive hazards model. <i>Computational Statistics and Data Analysis</i> , 2015, 87, 34-45.	1.2	7
94	Regression analysis of informative current status data with the additive hazards model. <i>Lifetime Data Analysis</i> , 2015, 21, 241-258.	0.9	30
95	Semiparametric regression of multivariate panel count data with informative observation times. <i>Journal of Multivariate Analysis</i> , 2015, 140, 209-219.	1.0	9
96	Survival prediction and variable selection with simultaneous shrinkage and grouping priors. <i>Statistical Analysis and Data Mining</i> , 2015, 8, 114-127.	2.8	8
97	Regression Analysis of Left-truncated and Case I Interval-censored Data with the Additive Hazards Model. <i>Communications in Statistics - Theory and Methods</i> , 2015, 44, 1537-1551.	1.0	9
98	Sieve maximum likelihood regression analysis of dependent current status data. <i>Biometrika</i> , 2015, 102, 731-738.	2.4	68
99	Focused and Model Average Estimation for Regression Analysis of Panel Count Data. <i>Scandinavian Journal of Statistics</i> , 2015, 42, 732-745.	1.4	7
100	Regression Analysis of Mixed Recurrent-Event and Panel-Count Data with Additive Rate Models. <i>Biometrics</i> , 2015, 71, 71-79.	1.4	9
101	Simple estimation procedures for regression analysis of interval-censored failure time data under the proportional hazards model. <i>Lifetime Data Analysis</i> , 2015, 21, 138-155.	0.9	9
102	Regression analysis of interval-censored failure time data with the additive hazards model in the presence of informative censoring. <i>Statistics and Its Interface</i> , 2015, 8, 367-377.	0.3	6
103	Efficient estimation for the additive hazards model in the presence of left-truncation and interval censoring. <i>Statistics and Its Interface</i> , 2015, 8, 391-402.	0.3	7
104	Sieve Estimation for the Cox Model with Clustered Interval-Censored Failure Time Data. <i>Statistics in Biosciences</i> , 2014, 6, 55-72.	1.2	3
105	Nonparametric Comparison for Multivariate Panel Count Data. <i>Communications in Statistics - Theory and Methods</i> , 2014, 43, 644-655.	1.0	6
106	Nonparametric tests for panel count data with unequal observation processes. <i>Computational Statistics and Data Analysis</i> , 2014, 73, 103-111.	1.2	6
107	Regression analysis of mixed recurrent-event and panel-count data. <i>Biostatistics</i> , 2014, 15, 555-568.	1.5	7
108	A Conditional Approach for Regression Analysis of Longitudinal Data with Informative Observation Time and Non-negligible Observation Duration. <i>Communications in Statistics - Theory and Methods</i> , 2014, 43, 4998-5011.	1.0	1

#	ARTICLE	IF	CITATIONS
109	Semiparametric transformation models for panel count data with correlated observation and follow-up times. <i>Statistics in Medicine</i> , 2013, 32, 3039-3054.	1.6	19
110	Efficient Estimation for Linear Transformation Models with Current Status Data. <i>Communications in Statistics - Theory and Methods</i> , 2013, 42, 3191-3203.	1.0	5
111	Joint analysis of longitudinal data and recurrent episodes data with application to medical cost analysis. <i>Biometrical Journal</i> , 2013, 55, 5-16.	1.0	5
112	Variable selection and estimation for multivariate panel count data via the seamless $L_{m0}$ penalty. <i>Canadian Journal of Statistics</i> , 2013, 41, 368-385.	0.9	14
113	Regression analysis of multivariate panel count data with an informative observation process. <i>Journal of Multivariate Analysis</i> , 2013, 119, 71-80.	1.0	16
114	Robust estimation for panel count data with informative observation times. <i>Computational Statistics and Data Analysis</i> , 2013, 57, 33-40.	1.2	33
115	A new class of generalized log rank tests for interval-censored failure time data. <i>Computational Statistics and Data Analysis</i> , 2013, 60, 123-131.	1.2	8
116	Estimating Incidence Rate on Current Status Data with Application to a Phase IV Cancer Trial. <i>Communications in Statistics - Theory and Methods</i> , 2013, 42, 3117-3133.	1.0	5
117	Analyzing panel count data with a dependent observation process and a terminal event. <i>Canadian Journal of Statistics</i> , 2013, 41, 174-191.	0.9	17
118	Statistical analysis of mixed recurrent event data with application to cancer survivor study. <i>Statistics in Medicine</i> , 2013, 32, 1954-1963.	1.6	12
119	Semiparametric analysis of multivariate panel count data with dependent observation processes and a terminal event. <i>Journal of Nonparametric Statistics</i> , 2013, 25, 379-394.	0.9	14
120	Semiparametric Regression Analysis of Clustered Interval-Censored Failure Time Data with Informative Cluster Size. <i>International Journal of Biostatistics</i> , 2013, 9, 205-14.	0.7	7
121	Statistical Analysis of Panel Count Data. <i>Statistics in the Health Sciences</i> , 2013, , .	0.2	61
122	Analysis of Multivariate Panel Count Data. <i>Statistics in the Health Sciences</i> , 2013, , 155-187.	0.2	0
123	Nonparametric Comparison of Point Processes. <i>Statistics in the Health Sciences</i> , 2013, , 71-90.	0.2	0
124	Regression Analysis of Panel Count Data II. <i>Statistics in the Health Sciences</i> , 2013, , 121-153.	0.2	0
125	Other Topics. <i>Statistics in the Health Sciences</i> , 2013, , 189-222.	0.2	0
126	Regression Analysis of Panel Count Data I. <i>Statistics in the Health Sciences</i> , 2013, , 91-120.	0.2	0

#	ARTICLE	IF	CITATIONS
127	Regression analysis of clustered interval-censored failure time data with the additive hazards model. <i>Journal of Nonparametric Statistics</i> , 2012, 24, 1041-1050.	0.9	8
128	Nonparametric estimation of current status data with dependent censoring. <i>Lifetime Data Analysis</i> , 2012, 18, 434-445.	0.9	12
129	Efficient estimation for additive hazards regression with bivariate current status data. <i>Science China Mathematics</i> , 2012, 55, 763-774.	1.7	2
