#	ARTICLE	IF	CITATIONS
1	Retrospective study of the prevalence and characteristics of adverse drug events in adults who present to an Australian emergency department. <i>EMA - Emergency Medicine Australasia</i> , 2022, , .	1.1	0
2	Emergency Department Assessment of Suspected Acute Coronary Syndrome Using the IMPACT Pathway in Aboriginal and Torres Strait Islander People. <i>Heart Lung and Circulation</i> , 2022, , .	0.4	2
3	Chest Pain Assessment: What Is Our Endgame?. <i>Clinical Chemistry</i> , 2022, 68, 261-263.	3.2	0
4	Financial Costs of Emergency Department Presentations for Australian Patients With Heart Disease in the Last 3â€™%Years of Life. <i>Health Services Insights</i> , 2022, 15, 117863292210910.	1.3	1
5	What is an acceptable risk of major adverse cardiac event soon after discharge from emergency? The patientâ€™s perspective. <i>Emergency Medicine Journal</i> , 2022, , emermed-2021-212251.	1.0	0
6	Evaluation of the Atellica TnIH cardiac troponin I assay and assessment of biological equivalence. <i>Clinical Chemistry and Laboratory Medicine</i> , 2021, , .	2.3	1
7	Conversion of other opioids to methadone: a retrospective comparison of two methods. <i>BMJ Supportive and Palliative Care</i> , 2020, 10, 201-204.	1.6	1
8	Key occupational stressors in the ED: an international comparison. <i>Emergency Medicine Journal</i> , 2020, 37, 106-111.	1.0	11
9	Factors influencing physician risk estimates for acute cardiac events in emergency patients with suspected acute coronary syndrome. <i>Emergency Medicine Journal</i> , 2020, 37, 2-7.	1.0	3
10	Examining the translational success of an initiative to accelerate the assessment of chest pain for patients in an Australian emergency department: a pre-post study. <i>BMC Health Services Research</i> , 2020, 20, 419.	2.2	2
11	Widespread Introduction of a High-Sensitivity Troponin Assay: Assessing the Impact on Patients and Health Services. <i>Journal of Clinical Medicine</i> , 2020, 9, 1883.	2.4	9
12	Examining the association between triage streamed treatment location and time to appropriate antibiotics in emergency department patients with septic shock. <i>EMA - Emergency Medicine Australasia</i> , 2020, 32, 1008-1014.	1.1	6
13	Facilitators and barriers for emergency department clinicians using a rapid chest pain assessment protocol: qualitative interview research. <i>BMC Health Services Research</i> , 2020, 20, 74.	2.2	9
14	Affecting emergency department oxycodone discharge prescribing: An educational intervention. <i>EMA - Emergency Medicine Australasia</i> , 2019, 31, 580-586.	1.1	17
15	Machine Learning to Predict the Likelihood of Acute Myocardial Infarction. <i>Circulation</i> , 2019, 140, 899-909.	1.6	128
16	Staff perceptions of the emergency department working environment: An international crossâ€™sectional survey. <i>EMA - Emergency Medicine Australasia</i> , 2019, 31, 1082-1091.	1.1	6
17	Application of High-Sensitivity Troponin in Suspected Myocardial Infarction. <i>New England Journal of Medicine</i> , 2019, 380, 2529-2540.	27.0	230
18	Two-Hour Algorithm for Rapid Triage of Suspected Acute Myocardial Infarction Using a High-Sensitivity Cardiac Troponin I Assay. <i>Clinical Chemistry</i> , 2019, 65, 1437-1447.	3.2	36

#	ARTICLE	IF	CITATIONS
19	Diagnosis of acute myocardial infarction in the presence of left bundle branch block. <i>Heart</i> , 2019, 105, 1559-1567.	2.9	24
20	Stressors and coping strategies of emergency department nurses and doctors: A cross-sectional study. <i>Australasian Emergency Care</i> , 2019, 22, 180-186.	1.5	35
21	Emergency clinician perceptions of occupational stressors and coping strategies: A multi-site study. <i>International Emergency Nursing</i> , 2019, 45, 17-24.	1.5	17
22	B-Type Natriuretic Peptides and Cardiac Troponins for Diagnosis and Risk-Stratification of Syncope. <i>Circulation</i> , 2019, 139, 2403-2418.	1.6	40
23	Development of a revised Jalowiec Coping Scale for use by emergency clinicians: a cross-sectional scale development study. <i>BMJ Open</i> , 2019, 9, e033053.	1.9	1
24	Analgesic requirement as a predictor of mortality to guide ceilings of care discussions for oncology patients in the emergency room.. <i>Journal of Clinical Oncology</i> , 2019, 37, 188-188.	1.6	0
25	Characteristics, treatment and outcomes for all emergency department patients fulfilling criteria for septic shock: a prospective observational study. <i>European Journal of Emergency Medicine</i> , 2018, 25, 97-104.	1.1	12
26	Assessment of the 2016 National Institute for Health and Care Excellence high-sensitivity troponin rule-out strategy. <i>Heart</i> , 2018, 104, heartjnl-2017-311983.	2.9	15
27	Combining High-Sensitivity Cardiac Troponin I and Cardiac Troponin T in the Early Diagnosis of Acute Myocardial Infarction. <i>Circulation</i> , 2018, 138, 989-999.	1.6	56
28	Utility of community-acquired pneumonia severity scores in guiding disposition from the emergency department: Intensive care or short-stay unit?. <i>EMA - Emergency Medicine Australasia</i> , 2018, 30, 538-546.	1.1	8
29	Morale, stress and coping strategies of staff working in the emergency department: A comparison of two different-sized departments. <i>EMA - Emergency Medicine Australasia</i> , 2018, 30, 375-381.	1.1	41
30	Evaluating Rapid Rule-out of Acute Myocardial Infarction Using a High-Sensitivity Cardiac Troponin I Assay at Presentation. <i>Clinical Chemistry</i> , 2018, 64, 820-829.	3.2	42
31	External validation of heart-type fatty acid binding protein, high-sensitivity cardiac troponin, and electrocardiography as rule-out for acute myocardial infarction. <i>Clinical Biochemistry</i> , 2018, 52, 161-163.	1.9	11
32	Peripheral Intravenous Cannula Insertion and Use in the Emergency Department: An Intervention Study. <i>Academic Emergency Medicine</i> , 2018, 25, 26-32.	1.8	30
33	Psychological Predictors of Postconcussive Symptoms Following Traumatic Injury. <i>Journal of Head Trauma Rehabilitation</i> , 2018, 33, E47-E60.	1.7	2
34	Modification of the Thrombolysis in Myocardial Infarction risk score for patients presenting with chest pain to the emergency department. <i>EMA - Emergency Medicine Australasia</i> , 2018, 30, 47-54.	1.1	5
35	Diagnostic Accuracy of a New High-Sensitivity Troponin I Assay and Five Accelerated Diagnostic Pathways for Ruling Out Acute Myocardial Infarction and Acute Coronary Syndrome. <i>Annals of Emergency Medicine</i> , 2018, 71, 439-451.e3.	0.6	52
36	A Risk Assessment Score and Initial High-sensitivity Troponin Combine to Identify Low Risk of Acute Myocardial Infarction in the Emergency Department. <i>Academic Emergency Medicine</i> , 2018, 25, 434-443.	1.8	12

#	ARTICLE	IF	CITATIONS
37	Characteristics and occurrence of type 2 myocardial infarction in emergency department patients: a prospective study. <i>Emergency Medicine Journal</i> , 2018, 35, 169-175.	1.0	23
38	Detectable High-Sensitivity Cardiac Troponin within the Population Reference Interval Conveys High 5-Year Cardiovascular Risk: An Observational Study. <i>Clinical Chemistry</i> , 2018, 64, 1044-1053.	3.2	33
39	Prospective validation of prognostic and diagnostic syncope scores in the emergency department. <i>International Journal of Cardiology</i> , 2018, 269, 114-121.	1.7	18
40	Clinical chemistry score versus high-sensitivity cardiac troponin I and T tests alone to identify patients at low or high risk for myocardial infarction or death at presentation to the emergency department. <i>Cmaj</i> , 2018, 190, E974-E984.	2.0	38
41	Measuring the impact of the working environment on emergency department nurses: A cross-sectional pilot study. <i>International Emergency Nursing</i> , 2017, 31, 9-14.	1.5	23
42	Panic Disorder in Patients Presenting to the Emergency Department With Chest Pain: Prevalence and Presenting Symptoms. <i>Heart Lung and Circulation</i> , 2017, 26, 1310-1316.	0.4	8
43	Differences in Presentation, Management and Outcomes in Women and Men Presenting to an Emergency Department With Possible Cardiac Chest Pain. <i>Heart Lung and Circulation</i> , 2017, 26, 1282-1290.	0.4	13
44	Factors influencing choice of pre-hospital transportation of patients with potential acute coronary syndrome: An observational study. <i>EMA - Emergency Medicine Australasia</i> , 2017, 29, 210-216.	1.1	12
45	Rapid Rule-out of Acute Myocardial Infarction With a Single High-Sensitivity Cardiac Troponin T Measurement Below the Limit of Detection. <i>Annals of Internal Medicine</i> , 2017, 166, 715.	3.9	231
46	Direct Comparison of 2 Rule-Out Strategies for Acute Myocardial Infarction: 2-h Accelerated Diagnostic Protocol vs 2-h Algorithm. <i>Clinical Chemistry</i> , 2017, 63, 1227-1236.	3.2	35
47	The organisational value of diagnostic strategies using high-sensitivity troponin for patients with possible acute coronary syndromes: a trial-based cost-effectiveness analysis. <i>BMJ Open</i> , 2017, 7, e013653.	1.9	32
48	Two-hour evaluation and referral model for shorter turnaround times in the emergency department. <i>EMA - Emergency Medicine Australasia</i> , 2017, 29, 315-323.	1.1	19
49	Comparing the No Objective Testing Rule to the HEART Pathway. <i>Academic Emergency Medicine</i> , 2017, 24, 1169-1170.	1.8	1
50	Validating the Manchester Acute Coronary Syndromes (MACS) and Troponin-only Manchester Acute Coronary Syndromes (T-MACS) rules for the prediction of acute myocardial infarction in patients presenting to the emergency department with chest pain. <i>Emergency Medicine Journal</i> , 2017, 34, 517-523.	1.0	28
51	Immediate Rule-Out of Acute Myocardial Infarction Using Electrocardiogram and Baseline High-Sensitivity Troponin I. <i>Clinical Chemistry</i> , 2017, 63, 394-402.	3.2	57
52	Lactate $\geq 2$ mmol/L plus qSOFA improves utility over qSOFA alone in emergency department patients presenting with suspected sepsis. <i>EMA - Emergency Medicine Australasia</i> , 2017, 29, 626-634.	1.1	44
53	Association of High-Sensitivity Cardiac Troponin I Concentration With Cardiac Outcomes in Patients With Suspected Acute Coronary Syndrome. <i>JAMA - Journal of the American Medical Association</i> , 2017, 318, 1913.	7.4	188
54	Systemic Inflammatory Response Syndrome, Quick Sequential Organ Function Assessment, and Organ Dysfunction. <i>Chest</i> , 2017, 151, 586-596.	0.8	241

#	ARTICLE	IF	CITATIONS
55	The Association of Electrocardiographic Abnormalities and Acute Coronary Syndrome in Emergency Patients With Chest Pain. <i>Academic Emergency Medicine</i> , 2017, 24, 344-352.	1.8	5
56	Improved Assessment of Chest pain Trial (IMPACT): assessing patients with possible acute coronary syndromes. <i>Medical Journal of Australia</i> , 2017, 207, 195-200.	1.7	26
57	Implementing change: evaluating the Accelerated Chest pain Risk Evaluation (ACRE) project. <i>Medical Journal of Australia</i> , 2017, 207, 201-205.	1.7	20
58	Double-blind versus single-blind digital subcutaneous anaesthetic injection for finger injuries in the emergency department: A randomised controlled trial. <i>EMA - Emergency Medicine Australasia</i> , 2016, 28, 193-198.	1.1	9
59	External validation of the emergency department assessment of chest pain score accelerated diagnostic pathway (EDACS-ADP). <i>Emergency Medicine Journal</i> , 2016, 33, 618-625.	1.0	39
60	Does Uric Acid Level Provide Additional Risk Stratification Information in Emergency Patients With Symptoms of Possible Acute Coronary Syndrome?. <i>Critical Pathways in Cardiology</i> , 2016, 15, 169-173.	0.5	1
61	Validation of presentation and high-sensitivity troponin to rule-in and rule-out acute myocardial infarction. <i>Heart</i> , 2016, 102, 1270-1278.	2.9	82
62	Review article: Staff perception of the emergency department working environment: Integrative review of the literature. <i>EMA - Emergency Medicine Australasia</i> , 2016, 28, 7-26.	1.1	117
63	Assessment of the European Society of Cardiology 0-Hour/1-Hour Algorithm to Rule-Out and Rule-In Acute Myocardial Infarction. <i>Circulation</i> , 2016, 134, 1532-1541.	1.6	111
64	Heart Fatty Acid Binding Protein and cardiac troponin: development of an optimal rule-out strategy for acute myocardial infarction. <i>BMC Emergency Medicine</i> , 2016, 16, 34.	1.9	20
65	End-of-life issues: Withdrawal and withholding of life-sustaining healthcare in the emergency department: A comparison between emergency physicians and emergency registrars: A sub-study. <i>EMA - Emergency Medicine Australasia</i> , 2016, 28, 684-690.	1.1	12
66	Change to costs and lengths of stay in the emergency department and the Brisbane protocol: an observational study. <i>BMJ Open</i> , 2016, 6, e009746.	1.9	27
67	Agreement Between Patient-reported and Cardiology-adjudicated Medical History in Patients With Possible Ischemic Chest Pain: An Observational Study. <i>Critical Pathways in Cardiology</i> , 2016, 15, 121-125.	0.5	3
68	Evaluation of High-Sensitivity Cardiac Troponin I Levels in Patients With Suspected Acute Coronary Syndrome. <i>JAMA Cardiology</i> , 2016, 1, 405.	6.1	75
69	Diagnosis of Myocardial Infarction Using a High-Sensitivity Troponin I 1-Hour Algorithm. <i>JAMA Cardiology</i> , 2016, 1, 397.	6.1	186
70	Severity Scores in Emergency Department Patients With Presumed Infection. <i>Critical Care Medicine</i> , 2016, 44, 539-547.	0.9	42
71	Two-Hour Algorithm for Triage toward Rule-Out and Rule-In of Acute Myocardial Infarction by Use of High-Sensitivity Cardiac Troponin I. <i>Clinical Chemistry</i> , 2016, 62, 494-504.	3.2	95
72	Relationship Between Physiological Parameters and Acute Coronary Syndrome in Patients Presenting to the Emergency Department With Undifferentiated Chest Pain. <i>Journal of Cardiovascular Nursing</i> , 2016, 31, 267-273.	1.1	1

#	ARTICLE	IF	CITATIONS
73	Time to presentation and 12-month health outcomes in patients presenting to the emergency department with symptoms of possible acute coronary syndrome. <i>Emergency Medicine Journal</i> , 2016, 33, 390-395.	1.0	16
74	Sex-specific versus overall cut points for a high sensitivity troponin I assay in predicting 1-year outcomes in emergency patients presenting with chest pain. <i>Heart</i> , 2016, 102, 120-126.	2.9	61
75	Factors associated with triage assignment of emergency department patients ultimately diagnosed with acute myocardial infarction. <i>Australian Critical Care</i> , 2016, 29, 23-26.	1.3	14
76	A Clinical Decision Rule to Identify Emergency Department Patients at Low Risk for Acute Coronary Syndrome Who Do Not Need Objective Coronary Artery Disease Testing: The No Objective Testing Rule. <i>Annals of Emergency Medicine</i> , 2016, 67, 478-489.e2.	0.6	27
77	Distal Ureteric Stones and Tamsulosin: A Double-Blind, Placebo-Controlled, Randomized, Multicenter Trial. <i>Annals of Emergency Medicine</i> , 2016, 67, 86-95.e2.	0.6	114
78	Cost and outcomes of assessing patients with chest pain in an Australian emergency department. <i>Medical Journal of Australia</i> , 2015, 202, 427-432.	1.7	84
79	Accelerated diagnostic protocol using high-sensitivity cardiac troponin T in acute chest pain patients. <i>International Journal of Cardiology</i> , 2015, 184, 208-215.	1.7	46
80	Triaging older major trauma patients in the emergency department: an observational study. <i>Emergency Medicine Journal</i> , 2015, 32, 281-286.	1.0	17
81	Benefit of cerebrospinal fluid spectrophotometry in the assessment of CT scan negative suspected subarachnoid haemorrhage: A diagnostic accuracy study. <i>Journal of Clinical Neuroscience</i> , 2015, 22, 173-179.	1.5	9
82	PREDICT: a diagnostic accuracy study of a tool for predicting mortality within one year: Who should have an advance healthcare directive?. <i>Palliative Medicine</i> , 2015, 29, 31-37.	3.1	11
83	The utility of presentation and 4-hour high sensitivity troponin I to rule-out acute myocardial infarction in the emergency department. <i>Clinical Biochemistry</i> , 2015, 48, 1219-1224.	1.9	11
84	Combining presentation high-sensitivity cardiac troponin I and glucose measurements to rule-out an acute myocardial infarction in patients presenting to emergency department with chest pain. <i>Clinical Biochemistry</i> , 2015, 48, 288-291.	1.9	12
85	Two-hour diagnostic algorithms for early assessment of patients with acute chest pain – Implications of lowering the cardiac troponin I cut-off to the 97.5th percentile. <i>Clinica Chimica Acta</i> , 2015, 445, 19-24.	1.1	12
86	Utility of Routine Exercise Stress Testing among Intermediate Risk Chest Pain Patients Attending an Emergency Department. <i>Heart Lung and Circulation</i> , 2015, 24, 879-884.	0.4	17
87	Two-hour Algorithm for Triage Toward Rule-out and Rule-in of Acute Myocardial Infarction Using High-sensitivity Cardiac Troponin T. <i>American Journal of Medicine</i> , 2015, 128, 369-379.e4.	1.5	121
88	Admission glycaemia and its association with acute coronary syndrome in Emergency Department patients with chest pain. <i>Emergency Medicine Journal</i> , 2015, 32, 608-612.	1.0	13
89	Validation of an accelerated high-sensitivity troponin T assay protocol in an Australian cohort with chest pain. <i>Medical Journal of Australia</i> , 2014, 200, 161-165.	1.7	17
90	Development and validation of the emergency department assessment of chest pain score and an accelerated diagnostic protocol. <i>EMA - Emergency Medicine Australasia</i> , 2014, 26, 34-44.	1.1	172

#	ARTICLE	IF	CITATIONS
91	Effect of recalibration of the hs-TnT assay on diagnostic performance. <i>Clinical Chemistry and Laboratory Medicine</i> , 2014, 52, e25-7.	2.3	9
92	The new Vancouver Chest Pain Rule using troponin as the only biomarker: an external validation study. <i>American Journal of Emergency Medicine</i> , 2014, 32, 129-134.	1.6	44
93	Comparison of high sensitivity troponin T and I assays in the diagnosis of non-ST elevation acute myocardial infarction in emergency patients with chest pain. <i>Clinical Biochemistry</i> , 2014, 47, 321-326.	1.9	32
94	Performance of Risk Stratification for Acute Coronary Syndrome with Two-hour Sensitive Troponin Assay Results. <i>Heart Lung and Circulation</i> , 2014, 23, 428-434.	0.4	7
95	Towards a consistent definition of a significant delta troponin with z-scores: a way out of chaos?. <i>European Heart Journal: Acute Cardiovascular Care</i> , 2014, 3, 149-157.	1.0	14
96	Spectrophotometry or Visual Inspection to Most Reliably Detect Xanthochromia in Subarachnoid Hemorrhage: Systematic Review. <i>Annals of Emergency Medicine</i> , 2014, 64, 256-264.e5.	0.6	23
97	Comparison of Three Risk Stratification Rules for Predicting Patients With Acute Coronary Syndrome Presenting to an Australian Emergency Department. <i>Heart Lung and Circulation</i> , 2013, 22, 844-851.	0.4	40
98	Delta troponin for the early diagnosis of AMI in emergency patients with chest pain. <i>International Journal of Cardiology</i> , 2013, 168, 2602-2608.	1.7	42
99	Validation of High-Sensitivity Troponin I in a 2-Hour Diagnostic Strategy to Assess 30-Day Outcomes in Emergency Department Patients With Possible Acute Coronary Syndrome. <i>Journal of the American College of Cardiology</i> , 2013, 62, 1242-1249.	2.8	277
100	Examining Renal Impairment as a Risk Factor for Acute Coronary Syndrome: A Prospective Observational Study. <i>Annals of Emergency Medicine</i> , 2013, 62, 38-46.e1.	0.6	11
101	Validation of the Vancouver Chest Pain Rule using troponin as the only biomarker: a prospective cohort study. <i>American Journal of Emergency Medicine</i> , 2013, 31, 1103-1107.	1.6	9
102	Automated classification of limb fractures from free-text radiology reports using a clinician-informed gazetteer methodology. <i>Australasian Medical Journal</i> , 2013, 6, 301-307.	0.1	12
103	The HEART Score for the Assessment of Patients With Chest Pain in the Emergency Department. <i>Critical Pathways in Cardiology</i> , 2013, 12, 121-126.	0.5	203
104	Intern underperformance is detected more frequently in emergency medicine rotations. <i>EMA - Emergency Medicine Australasia</i> , 2013, 25, 68-74.	1.1	10
105	Sustained reductions in emergency department laboratory test orders: impact of a simple intervention. <i>Postgraduate Medical Journal</i> , 2013, 89, 566-571.	1.8	22
106	Automatic Classification of Free-Text Radiology Reports to Identify Limb Fractures using Machine Learning and the SNOMED CT Ontology. <i>AMIA Summits on Translational Science Proceedings</i> , 2013, 2013, 300-4.	0.4	13
107	Comparison of early biomarker strategies with the Heart Foundation of Australia/Cardiac Society of Australia and New Zealand guidelines for risk stratification of emergency department patients with chest pain. <i>EMA - Emergency Medicine Australasia</i> , 2012, 24, 595-603.	1.1	12
108	2-Hour Accelerated Diagnostic Protocol to Assess Patients With Chest Pain Symptoms Using Contemporary Troponins as the Only Biomarker. <i>Journal of the American College of Cardiology</i> , 2012, 59, 2091-2098.	2.8	361

#	ARTICLE	IF	CITATIONS
109	Examining the Signs and Symptoms Experienced by Individuals With Suspected Acute Coronary Syndrome in the Asia-Pacific Region: A Prospective Observational Study. <i>Annals of Emergency Medicine</i> , 2012, 60, 777-785.e3.	0.6	36
110	Comparison of intubation performance by junior emergency department doctors using gum elastic bougie versus stylet reinforced endotracheal tube insertion techniques. <i>EMA - Emergency Medicine Australasia</i> , 2012, 24, 194-200.	1.1	12
111	Enhancing capacity for intern training in the emergency department: the MoLIE project. <i>Medical Journal of Australia</i> , 2011, 194, 165-168.	1.7	12
112	Safety in Occupational Driving: Development of a Driver Behavior Scale for the Workplace Context. <i>Applied Psychology</i> , 2011, 60, 576-599.	7.1	27
113	Exercise-associated hyponatraemia on the Kokoda Trail. <i>EMA - Emergency Medicine Australasia</i> , 2011, 23, 712-716.	1.1	4
114	Prior Statin Use Is Not Associated With Improved Outcome in Emergency Patients Admitted With Infection: A Prospective Observational Study. <i>Academic Emergency Medicine</i> , 2011, 18, 127-134.	1.8	8
115	Organizational factors impacting on patient satisfaction: A cross sectional examination of service climate and linkages to nurses' effort and performance. <i>International Journal of Nursing Studies</i> , 2011, 48, 1188-1198.	5.6	51
116	A prospective registry of emergency department patients admitted with infection. <i>BMC Infectious Diseases</i> , 2011, 11, 27.	2.9	9
117	A Randomized Controlled Trial Comparing Patient-Controlled and Physician-Controlled Sedation in the Emergency Department. <i>Annals of Emergency Medicine</i> , 2010, 56, 502-508.e2.	0.6	7
118	Magnesium Sulfate versus Placebo for Paroxysmal Atrial Fibrillation: A Randomized Clinical Trial. <i>Academic Emergency Medicine</i> , 2009, 16, 295-300.	1.8	26
119	Social influence in the theory of planned behaviour: The role of descriptive, injunctive, and in-group norms. <i>British Journal of Social Psychology</i> , 2009, 48, 135-158.	2.8	320
120	Difficulties and Coping Strategies of Sudanese Refugees: A Qualitative Approach. <i>Transcultural Psychiatry</i> , 2008, 45, 489-512.	1.6	193
121	Coping and Resilience in Refugees from the Sudan: A Narrative Account. <i>Australian and New Zealand Journal of Psychiatry</i> , 2007, 41, 282-288.	2.3	164
122	Distinguishing between task and contextual performance for nurses: development of a job performance scale. <i>Journal of Advanced Nursing</i> , 2007, 58, 602-611.	3.3	67
123	What do practitioners think? A qualitative study of a shared care mental health and nutrition primary care program. <i>International Journal of Integrated Care</i> , 2006, 6, e18.	0.2	22
124	The Prediction of Above-Average Participation in Volunteerism: A Test of the Theory of Planned Behavior and the Volunteers Functions Inventory in Older Australian Adults. <i>Journal of Social Psychology</i> , 2005, 145, 155-172.	1.5	139
125	Value of single troponin values in the emergency department for excluding acute myocardial infarction in Aboriginal and Torres Strait Islander people. <i>Medical Journal of Australia</i> , 0, , .	1.7	1
