#	ARTICLE	IF	CITATIONS
1	Impact of Late Cretaceous inversion and Cenozoic extension on salt structure growth in the Baltic sector of the North German Basin. Basin Research, 2022, 34, 220-250.	2.7	9
2	Calcite Uâ€Pb dating of altered ancient oceanic crust in the North Pamir, Central Asia. Geochronology, 2022, 4, 227-250.	2.5	5
3	The Carboniferous Arc of the North Pamir. Lithosphere, 2021, 2021, .	1.4	15
4	Turning the Orogenic Switch: Slabâ€Reversal in the Eastern Alps Recorded by Lowâ€Temperature Thermochronology. Geophysical Research Letters, 2021, 48, e2020GL092121.	4.0	11
5	Emplacement of â€œexoticâ€Zechstein slivers along the inverted Sontra Graben (northern Hessen,) Tj ETQq1 1 0.784314 rgBT /Over 12, 1005-1024.	2.8	0
6	Late Cretaceous to Paleogene exhumation in central Europe â€ localized inversion vs. large-scale domal uplift. Solid Earth, 2021, 12, 935-958.	2.8	23
7	Dawn and dusk of Late Cretaceous basin inversion in central Europe. Solid Earth, 2021, 12, 1443-1471.	2.8	28
8	The Subhercynian Basin: an example of an intraplate foreland basin due to a broken plate. Solid Earth, 2021, 12, 2425-2438.	2.8	7
9	Along-strike variations in thin-skinned thrusting style controlled by pre-existing basement structure in the easternmost Jura Mountains (Northern Switzerland). Geological Society Special Publication, 2020, 490, 199-220.	1.3	5
10	Regional and applied geology â€ The focus of ZDGG/Journal of Applied and Regional Geology for more than 170 years. Zeitschrift Der Deutschen Gesellschaft Fur Geowissenschaften, 2020, 171, 423-427.	0.4	0
11	The timing of salt structure growth in the Southern Permian Basin (Central Europe) and implications for basin dynamics. Basin Research, 2019, 31, 337-360.	2.7	16
12	Salt flow direction and velocity during subsalt normal faulting and syn-kinematic sedimentationâ€ implications from analytical calculations. Geophysical Journal International, 2018, 213, 115-134.	2.4	3
13	Timing and spatial patterns of Cretaceous and Cenozoic inversion in the Southern Permian Basin. Geological Society Special Publication, 2018, 469, 19-31.	1.3	28
14	Maximum depositional age of the Neoproterozoic Jacobsville Sandstone, Michigan: Implications for the evolution of the Midcontinent Rift: REPLY. , 2018, 14, 1382-1384.		3
15	Insights from North America's failed Midcontinent Rift into the evolution of continental rifts and passive continental margins. Tectonophysics, 2018, 744, 403-421.	2.2	49
16	Rapid Quaternary subsidence in the northwestern German North Sea. Scientific Reports, 2018, 8, 11524.	3.3	7
17	Is the â€œGrenville Frontâ€ in the central United States really the Midcontinent Rift?. GSA Today, 2018, , 4-10.	2.0	20
18	Hans Stille in GÃrttingen. Global Tectonics and Metallogeny, 2018, 10, 61-65.	0.9	1

#	ARTICLE	IF	CITATIONS
19	Dynamics of prolonged salt movement in the GlÃ¼ckstadt Graben (NW Germany) driven by tectonic and sedimentary processes. <i>International Journal of Earth Sciences</i> , 2017, 106, 131-155.	1.8	15
20	Cenozoic evolution of the Pamir and Tien Shan mountains reflected in syntectonic deposits of the Tajik Basin. <i>Geological Society Special Publication</i> , 2017, 427, 523-564.	1.3	13
21	Intraplate brittle deformation and states of paleostress constrained by fault kinematics in the central German platform. <i>Tectonophysics</i> , 2017, 694, 146-163.	2.2	19
22	Maximum depositional age of the Neoproterozoic Jacobsville Sandstone, Michigan: Implications for the evolution of the Midcontinent Rift. , 2016, 12, 1271-1282.		54
23	Mass-transport deposits and reservoir quality of Upper Cretaceous Chalk within the German Central Graben, North Sea. <i>International Journal of Earth Sciences</i> , 2016, 105, 797-818.	1.8	19
24	An unusual triangle zone in the external northern Alpine foreland (Switzerland): Structural inheritance, kinematics and implications for the development of the adjacent Jura fold-and-thrust belt. <i>Tectonophysics</i> , 2016, 670, 127-143.	2.2	33
25	Analogue experiments of salt flow and pillow growth due to basement faulting and differential loading. <i>Solid Earth</i> , 2015, 6, 9-31.	2.8	35
26	Improving 2D seismic interpretation in challenging settings by integration of restoration techniques: A case study from the Jura fold-and-thrust belt (Switzerland). <i>Interpretation</i> , 2015, 3, SAA37-SAA58.	1.1	20
27	North America's Midcontinent Rift: When rift met LIP. , 2015, 11, 1607-1616.		56
28	Exploring Natural Hazard Policies with Bike Helmets and Bus Fares. <i>Eos</i> , 2015, 96, .	0.1	1
29	Late Palaeozoic to Early Cenozoic geological evolution of the northwestern German North Sea (Entenschnabel): New results and insights. <i>Geologie En Mijnbouw/Netherlands Journal of Geosciences</i> , 2014, 93, 147-174.	0.9	24
30	¹⁰ Be exposure dating of river terraces at the southern mountain front of the Dzungarian Alatau (SE Kazakhstan) reveals rate of thrust faulting over the past ~ 400 ka. <i>Quaternary Research</i> , 2014, 81, 168-178.	1.7	25
31	Combined geological and gravimetric mapping and modelling for an improved understanding of observed high-resolution gravity variations: a case study for the Global Geodynamics Project (GGP) station Moxa, Germany. <i>International Journal of Earth Sciences</i> , 2013, 102, 1257-1270.	1.8	3
32	Identification of maars and similar volcanic landforms in the West Eifel Volcanic Field through image processing of DTM data: efficiency of different methods depending on preservation state. <i>International Journal of Earth Sciences</i> , 2013, 102, 875-901.	1.8	16
33	Comparison of GPS, Seismological, and Geological Observations of Andean Mountain Building. <i>Geodynamic Series</i> , 2013, , 123-133.	0.1	4
34	Thermochronological constraints of the exhumation and uplift of the Sierra de Pie de Palo, NW Argentina. <i>Journal of South American Earth Sciences</i> , 2013, 48, 209-219.	1.4	13
35	Thick-skinned thrusting in the northern Tien Shan foreland, Kazakhstan: structural inheritance and polyphase deformation. <i>Geological Society Special Publication</i> , 2013, 377, 19-42.	1.3	17
36	Salt diapirism driven by differential loading – Some insights from analogue modelling. <i>Tectonophysics</i> , 2013, 591, 83-97.	2.2	69

#	ARTICLE	IF	CITATIONS
37	„Saxonian tectonics“ in the 21st century. Zeitschrift Der Deutschen Gesellschaft Fur Geowissenschaften, 2013, 164, 295-311.	0.4	12
38	A Forward Model of Mantle Convection with Evolving Continents and a Model of the Andean Subduction Orogen. , 2013, , 473-501.		0
39	The Finne fault zone (central Germany): structural analysis of a partially inverted extensional fault zone by balanced cross-sections. International Journal of Earth Sciences, 2012, 101, 2167-2182.	1.8	6
40	Carbonate diagenesis and feldspar alteration in fracture-related bleaching zones (Buntsandstein,) Tj ETQq0 0 0 rgBT /Overlock 10 Tf 50 Earth Sciences, 2012, 101, 159-176.	1.8	25
41	Towards a Dynamical Model of Mars™ Evolution. , 2010, , 485-510.		1
42	The role of inherited extensional fault segmentation and linkage in contractional orogenesis: a reconstruction of Lower Cretaceous inverted rift basins in the Eastern Cordillera of Colombia. Basin Research, 2009, 21, 111-137.	2.7	87
43	Unsteady evolution of the Bolivian Subandean thrust belt: The role of enhanced erosion and clastic wedge progradation. Earth and Planetary Science Letters, 2009, 281, 134-146.	4.4	74
44	Rating of seismicity and reconstruction of the fault geometries in northern Tien Shan within the project „Seismic Hazard Assessment for Almaty“. Journal of Geodynamics, 2009, 48, 269-278.	1.6	14
45	Kommentar zu „NÄrdliche Harzrandstörung: Diskussionsbeiträge zu Tiefenstruktur, Zeitlichkeit und Kinematik von Volker Wrede (ZDGG 159/2: 293316). Zeitschrift Der Deutschen Gesellschaft Fur Geowissenschaften, 2009, 160, 93-99.	0.4	5
46	Andean Orogeny and Plate Generation. , 2009, , 559-583.		0
47	Late Cretaceous intraplate thrusting in central Europe: Effect of Africa-Iberia-Europe convergence, not Alpine collision. Geology, 2008, 36, 839.	4.4	218
48	Preserved extensional structures in an inverted Cretaceous rift basin, northwestern Argentina: Outcrop examples and implications for fault reactivation. Tectonics, 2008, 27, .	2.8	42
49	Identification of volcanic landforms in a Digital Terrain Model (DTM) of the Westeifel. Zeitschrift Der Deutschen Gesellschaft Fur Geowissenschaften, 2008, 159, 657-670.	0.4	4
50	Subduction and Mountain Building in the Central Andes. , 2007, , 624-660.		2
51	Deformation of the Central Andean Upper Plate System „ Facts, Fiction, and Constraints for Plateau Models. , 2006, , 3-27.		178
52	Crustal balance and crustal flux from shortening estimates in the Central Andes. Earth and Planetary Science Letters, 2005, 230, 113-124.	4.4	71
53	Seismic and field evidence for selective inversion of Cretaceous normal faults, Salta rift, northwest Argentina. Tectonophysics, 2005, 399, 155-172.	2.2	88
54	Structure and Cenozoic kinematics of the Eastern Cordillera, southern Bolivia (21Â°S). Tectonics, 2002, 21, 1-1-1-24.	2.8	86

#	ARTICLE	IF	CITATIONS
55	Tectonic inversion in the Santa Barbara System of the central Andean foreland thrust belt, northwestern Argentina. <i>Tectonics</i> , 2002, 21, 11-1-11-18.	2.8	125
56	Consistency of geologic and geodetic displacements during Andean orogenesis. <i>Geophysical Research Letters</i> , 2002, 29, 29-1-29-4.	4.0	61
57	How Alpine or Himalayan are the Central Andes?. <i>International Journal of Earth Sciences</i> , 1999, 88, 175-189.	1.8	11
58	Geologic and geometric constraints on a kinematic model of the Bolivian orocline. <i>Journal of South American Earth Sciences</i> , 1999, 12, 221-235.	1.4	96
59	Along-strike segmentation of the Andean foreland: causes and consequences. <i>Tectonophysics</i> , 1999, 301, 75-94.	2.2	292
60	Tectonic shortening and crustal thickness in the Central Andes: How good is the correlation?. <i>Geology</i> , 1998, 26, 723.	4.4	253
61	Pre-Andean and Andean-age deformation in the Eastern Cordillera of southern Bolivia. <i>Journal of South American Earth Sciences</i> , 1997, 10, 1-19.	1.4	94
62	The geometry of the central Andean backarc crust: Joint interpretation of cross-section balancing and seismic refraction data. <i>Journal of South American Earth Sciences</i> , 1997, 10, 99-110.	1.4	33
63	Transition from basement-involved to thin-skinned thrusting in the Cordillera Oriental of southern Bolivia. <i>Tectonics</i> , 1996, 15, 763-775.	2.8	156
64	Basement-involved blind thrusting in the eastern Cordillera Oriental, southern Bolivia: evidence from cross-sectional balancing, gravimetric and magnetotelluric data. <i>Tectonophysics</i> , 1996, 259, 171-184.	2.2	47
