Katarzyna Stolarz-Skrzypek

List of Publications by Year in descending order

Source: https://exaly.com/author-pdf/5773411/publications.pdf Version: 2024-02-01

#	Article	IF	CITATIONS
1	Right ventricular wall thickness indexed to body surface area as an echocardiographic predictor of acute pulmonary embolism in high-risk patients. Kardiologia Polska, 2022, 80, 205-207.	0.6	3
2	Risk Stratification by Cross-Classification of Central and Brachial Systolic Blood Pressure. Hypertension, 2022, 79, 1101-1111.	2.7	19
3	Association of Fatal and Nonfatal Cardiovascular Outcomes With 24-Hour Mean Arterial Pressure. Hypertension, 2021, 77, 39-48.	2.7	24
4	Relative and Absolute Risk to Guide the Management of Pulse Pressure, an Age-Related Cardiovascular Risk Factor. American Journal of Hypertension, 2021, 34, 929-938.	2.0	15
5	Factors determining acceptance of illness in patients with arterial hypertension and comorbidities. Kardiologia Polska, 2021, 79, 426-433.	0.6	2
6	Urinary proteomics combined with home blood pressure telemonitoring for health care reform trial: rational and protocol. Blood Pressure, 2021, 30, 269-281.	1.5	8
7	Association between cardiovascular disease, cardiovascular drug therapy, and in-hospital outcomes in patients with COVID-19: data from a large single-center registry in Poland. Kardiologia Polska, 2021, 79, 773-780.	0.6	19
8	The International Database of Central Arterial Properties for Risk Stratification: Research Objectives and Baseline Characteristics of Participants. American Journal of Hypertension, 2021, , .	2.0	6
9	Urinary peptidomic profiles to address age-related disabilities: a prospective population study. The Lancet Healthy Longevity, 2021, 2, e690-e703.	4.6	17
10	Isolated Diastolic Hypertension in the IDACO Study: An Age-Stratified Analysis Using 24-Hour Ambulatory Blood Pressure Measurements. Hypertension, 2021, 78, 1222-1231.	2.7	16
11	Increased Blood Pressure Variability May Herald Cognitive Decline and Dementia. Hypertension, 2020, 76, 1076-1078.	2.7	2
12	Cardiovascular End Points and Mortality Are Not Closer Associated With Central Than Peripheral Pulsatile Blood Pressure Components. Hypertension, 2020, 76, 350-358.	2.7	33
13	Outcome-Driven Thresholds for Ambulatory Blood Pressure Based on the New American College of Cardiology/American Heart Association Classification of Hypertension. Hypertension, 2019, 74, 776-783.	2.7	23
14	Association of Office and Ambulatory Blood Pressure With Mortality and Cardiovascular Outcomes. JAMA - Journal of the American Medical Association, 2019, 322, 409.	7.4	265
15	Opposing Age-Related Trends in Absolute and Relative Risk of Adverse Health Outcomes Associated With Out-of-Office Blood Pressure. Hypertension, 2019, 74, 1333-1342.	2.7	31
16	Inflammatory markers and left ventricular diastolic dysfunction in a family-based population study. Kardiologia Polska, 2019, 77, 33-39.	0.6	7
17	Predicting future cardiovascular risk from blood pressure response to dynamic exercise: a neglected risk factor?. Polish Archives of Internal Medicine, 2019, 129, 850-851.	0.4	1
18	Ambulatory blood pressure and long-term risk for atrial fibrillation. Heart, 2018, 104, 1263-1270.	2.9	21

#	Article	IF	CITATIONS
19	Obesity, Visceral Fat, and Hypertension-Related Complications. Metabolic Syndrome and Related Disorders, 2018, 16, 521-529.	1.3	16
20	Evidence-based proposal for the number of ambulatory readings required for assessing blood pressure level in research settings: an analysis of the IDACO database. Blood Pressure, 2018, 27, 341-350.	1.5	29
21	Genetic loci associated with heart rate variability and their effects on cardiac disease risk. Nature Communications, 2017, 8, 15805.	12.8	95
22	The Cardiovascular Risk of White-CoatÂHypertension. Journal of the American College of Cardiology, 2016, 68, 2033-2043.	2.8	129
23	Assessment of sleep disorders among patients with hypertension and coexisting metabolic syndrome. Advances in Medical Sciences, 2016, 61, 261-268.	2.1	11
24	Subclinical arterial and cardiac damage in white-coat and masked hypertension. Blood Pressure, 2016, 25, 249-256.	1.5	17
25	Will Sodium Intake Reduction Improve Cardiovascular Outcomes in the General Population? A Critical Review of Current Evidence. Current Hypertension Reviews, 2015, 11, 22-29.	0.9	2
26	Reducing Salt Intake for Prevention of Cardiovascular Disease—Times Are Changing. Advances in Chronic Kidney Disease, 2015, 22, 108-115.	1.4	18
27	Left ventricular diastolic function associated with common genetic variation in ATP12Ain a general population. BMC Medical Genetics, 2014, 15, 121.	2.1	4
28	Systematic Review of Health Outcomes in Relation to Salt Intake Highlights the Widening Divide Between Guidelines and the Evidence. American Journal of Hypertension, 2014, 27, 1138-1142.	2.0	8
29	Sodium and Potassium and the Pathogenesis of Hypertension. Current Hypertension Reports, 2013, 15, 122-130.	3.5	37
30	Prevalence of left ventricular diastolic dysfunction in European populations based on cross-validated diagnostic thresholds. Cardiovascular Ultrasound, 2012, 10, 10.	1.6	68
