#	ARTICLE	IF	CITATIONS
1	Acute Myocardial Infarction. <i>Circulation</i> , 2017, 136, 1908-1919.	1.6	352
2	Predictors of successful extracorporeal membrane oxygenation (ECMO) weaning after assistance for refractory cardiogenic shock. <i>Intensive Care Medicine</i> , 2011, 37, 1738-1745.	8.2	274
3	Improved outcome of cardiogenic shock at the acute stage of myocardial infarction: a report from the USIK 1995, USIC 2000, and FAST-MI French Nationwide Registries. <i>European Heart Journal</i> , 2012, 33, 2535-2543.	2.2	203
4	How to wean a patient from veno-arterial extracorporeal membrane oxygenation. <i>Intensive Care Medicine</i> , 2015, 41, 902-905.	8.2	123
5	Cardiogenic shock in intensive care units: evolution of prevalence, patient profile, management and outcomes, 1997-2012. <i>European Journal of Heart Failure</i> , 2017, 19, 192-200.	7.1	105
6	Two-Dimensional Strain Rate and Doppler Tissue Myocardial Velocities: Analysis by Echocardiography of Hemodynamic and Functional Changes of the Failed Left Ventricle during Different Degrees of Extracorporeal Life Support. <i>Journal of the American Society of Echocardiography</i> , 2012, 25, 632-640.	2.8	99
7	Weaning from veno-arterial extra-corporeal membrane oxygenation: which strategy to use?. <i>Annals of Cardiothoracic Surgery</i> , 2019, 8, E1-E8.	1.7	78
8	Trends in cardiogenic shock complicating acute myocardial infarction. <i>European Journal of Heart Failure</i> , 2020, 22, 664-672.	7.1	74
9	Fifteen-year trends in the management of cardiogenic shock and associated 1-year mortality in elderly patients with acute myocardial infarction: the FAST-MI programme. <i>European Journal of Heart Failure</i> , 2016, 18, 1144-1152.	7.1	48
10	Fulminant giant-cell myocarditis on mechanical circulatory support: Management and outcomes of a French multicentre cohort. <i>International Journal of Cardiology</i> , 2018, 253, 105-112.	1.7	40
11	Mechanical circulatory support in patients with cardiogenic shock in intensive care units: A position paper of the "Unité de Soins Intensifs de Cardiologie" group of the French Society of Cardiology, endorsed by the "Groupe Athérome et Cardiologie Interventionnelle" of the French Society of Cardiology. <i>Archives of Cardiovascular Diseases</i> , 2018, 111, 601-612.	1.6	35
12	Long-term outcome in early survivors of cardiogenic shock at the acute stage of myocardial infarction: a landmark analysis from the French registry of Acute ST-elevation and non-ST-elevation Myocardial Infarction (FAST-MI) Registry. <i>Critical Care</i> , 2014, 18, 516.	5.8	34
13	Mechanical circulatory support with the Impella® LP5.0 pump and an intra-aortic balloon pump for cardiogenic shock in acute myocardial infarction: The IMPELLA-STIC randomized study. <i>Archives of Cardiovascular Diseases</i> , 2020, 113, 237-243.	1.6	32
14	Right-left ventricular interdependence: a promising predictor of successful extracorporeal membrane oxygenation (ECMO) weaning after assistance for refractory cardiogenic shock. <i>Intensive Care Medicine</i> , 2017, 43, 592-594.	8.2	29
15	Optimising clinical trials in acute myocardial infarction complicated by cardiogenic shock: a statement from the 2020 Critical Care Clinical Trialists Workshop. <i>Lancet Respiratory Medicine</i> , 2021, 9, 1192-1202.	10.7	28
16	Early in-hospital management of cardiac arrest from neurological cause: Diagnostic pitfalls and treatment issues. <i>Resuscitation</i> , 2018, 132, 147-155.	3.0	24
17	Age and benefit of early coronary angiography after out-of-hospital cardiac arrest in patients presenting with shockable rhythm: Insights from the Sudden Death Expertise Center registry. <i>Resuscitation</i> , 2018, 128, 126-131.	3.0	20
18	IMPELLA® or Extracorporeal Membrane Oxygenation for Left Ventricular Dominant Refractory Cardiogenic Shock. <i>Journal of Clinical Medicine</i> , 2021, 10, 759.	2.4	12

#	ARTICLE	IF	CITATIONS
19	Long-term clinical outcomes in patients with cardiogenic shock according to left ventricular function: The French registry of Acute ST-elevation and non-ST-elevation Myocardial Infarction (FAST-MI) programme. Archives of Cardiovascular Diseases, 2018, 111, 678-685.	1.6	9
20	Hyperoxia effects on intensive care unit mortality: a retrospective pragmatic cohort study. Critical Care, 2018, 22, 218.	5.8	8
21	What's new in severe pulmonary embolism?. Intensive Care Medicine, 2019, 45, 75-77.	8.2	8
22	Hemodynamic Profiles of Cardiogenic Shock Depending on Their Etiology. Journal of Clinical Medicine, 2020, 9, 3384.	2.4	5
23	Reperfusion therapies in pulmonary embolism "state of the art and expert opinion: A position paper from the "Unité de Soins Intensifs de Cardiologie" group of the French Society of Cardiology. Archives of Cardiovascular Diseases, 2020, 113, 749-759.	1.6	5
24	Ten questions ICU specialists should address when managing cardiogenic acute pulmonary oedema. Intensive Care Medicine, 2022, 48, 482-485.	8.2	4
25	The modern cardiovascular care unit: the cardiologist managing multiorgan dysfunction. Current Opinion in Critical Care, 2018, 24, 300-308.	3.2	3
26	Role of echocardiography in the management of veno-arterial extra-corporeal membrane oxygenation patients. Journal of Emergency and Critical Care Medicine, 0, 3, 25-25.	0.7	3
27	Impact of hyperoxia on patients hospitalized in an intensive care unit for acute heart failure. Archives of Cardiovascular Diseases, 2019, 112, 748-753.	1.6	3
28	In-hospital cardiac arrests admitted alive in intensive care units: Insights from the Cubra database. Journal of Critical Care, 2022, 69, 154003.	2.2	3
29	Extra-corporeal life support for life-saving interventions: Another brick in the wall. Resuscitation, 2021, 160, 168-169.	3.0	0
