#	Article	IF	Citations
1	Calibrating SoilGen2 for interglacial soil evolution in the Chinese Loess Plateau considering soil parameters and the effect of dust addition rhythm. Quaternary International, 2022, 607, 100-112.	1.5	6
2	Comparison of Arctic and Southern Ocean sea ice between the last nine interglacials and the future. Climate Dynamics, 2022, 59, 519-529.	3.8	2
3	Bidecadal Temperature Anomalies Over the Tibetan Plateau and Arctic in Response to the 1450s Volcanic Eruptions. Journal of Geophysical Research D: Atmospheres, 2022, 127, .	3.3	2
4	Insolation and CO ₂ Impacts on the Spatial Differences of the MISâ€9 and MISâ€11 Climate Between Monsoonal China and Central Asia. Journal of Geophysical Research D: Atmospheres, 2022, 127, .	3.3	2
5	A review of orbital-scale monsoon variability and dynamics in East Asia during the Quaternary. Quaternary Science Reviews, 2022, 288, 107593.	3.0	13
6	Orbital Forcing (Astronomical Theory of Paleoclimates). , 2021, , 435-443.		1
7	The Position of the Current Warm Period in the Context of the Past 22,000ÂYears of Summer Climate in China. Geophysical Research Letters, 2021, 48, e2020GL091940.	4.0	27
8	Modulation of the relationship between summer temperatures in the Qinghaiâ€“Tibetan Plateau and Arctic over the past millennium by external forcings. Quaternary Research, 2021, 103, 130-138.	1.7	6
9	Diverse Regional Sensitivity of Summer Precipitation in East Asia to Ice Volume, CO₂ and Astronomical Forcing. Geophysical Research Letters, 2021, 48, e2020GL092005.	4.0	25
10	Insolation triggered abrupt weakening of Atlantic circulation at the end of interglacials. Science, 2021, 373, 1035-1040.	12.6	34
11	Early Pleistocene integration of the Yellow River II: Evidence from the Plio-Pleistocene sedimentary record of the Fenwei Basin. Palaeogeography, Palaeoclimatology, Palaeoecology, 2021, 577, 110550.	2.3	9
12	Soil modeling for soil loss tolerance estimations: Exploring natural baselines and long-term variations. Global and Planetary Change, 2021, 204, 103548.	3.5	3
13	Possible link of an exceptionally strong East Asian summer monsoon to a La NiÃ±a-like condition during the interglacial MIS-13. Quaternary Science Reviews, 2020, 227, 106048.	3.0	7
14	Combination of insolation and ice-sheet forcing drive enhanced humidity in northern subtropical regions during MIS 13. Quaternary Science Reviews, 2020, 247, 106573.	3.0	7
15	Atmospheric Dynamics Patterns in Southern Central Asia Since 800Âka Revealed by Loessâ€Paleosol Sequences in Tajikistan. Geophysical Research Letters, 2020, 47, e2020GL088320.	4.0	11
16	Hemisphere differences in response of sea surface temperature and sea ice to precession and obliquity. Global and Planetary Change, 2020, 192, 103223.	3.5	11
17	Early Pleistocene integration of the Yellow River I: Detrital-zircon evidence from the North China Plain. Palaeogeography, Palaeoclimatology, Palaeoecology, 2020, 546, 109691.	2.3	28
18	Ensemble standardization constraints on the influence of the tree growth trends in dendroclimatology. Climate Dynamics, 2020, 54, 3387-3404.	3.8	9

#	Article	IF	Citations
19	Impacts of extremely asymmetrical polar ice sheets on the East Asian summer monsoon during the MIS-13 interglacial. Quaternary Science Reviews, 2020, 230, 106164.	3.0	23
20	Diverse manifestations of the mid-Pleistocene climate transition. Nature Communications, 2019, 10, 352.	12.8	118
21	Orbital and millennial northern mid-latitude westerlies over the last glacial period. Climate Dynamics, 2019, 53, 3315-3324.	3.8	30
22	Unraveling the forcings controlling the vegetation and climate of the best orbital analogues for the present interglacial in SW Europe. Climate Dynamics, 2018, 51, 667-686.	3.8	25
23	Climate-soil model reveals causes of differences between Marine Isotope Stage 5e and 13 paleosols. Geology, 2018, 46, 99-102.	4.4	11
24	The cause of extremely high magnetic susceptibility of the S5S1 paleosol in the central Chinese Loess Plateau. Quaternary International, 2018, 493, 252-257.	1.5	10
25	Slowdown of global surface air temperature increase and acceleration of ice melting. Earth's Future, 2017, 5, 811-822.	6.3	8
26	Multi-proxy reconstructions of Mayâ€“September precipitation field in China over the past 500 years. Climate of the Past, 2017, 13, 1919-1938.	3.4	52
27	Interglacials of the last 800,000â€‰years. Reviews of Geophysics, 2016, 54, 162-219.	23.0	359
28	Interglacial analogues of the Holocene and its natural near future. Quaternary Science Reviews, 2015, 120, 28-46.	3.0	95
29	State of the tropical Pacific Ocean and its enhanced impact on precipitation over East Asia during marine isotopic stage 13. Climate Dynamics, 2015, 44, 807-825.	3.8	9
30	Relative impact of insolation and the Indo-Pacific warm pool surface temperature on the East Asia summer monsoon during the MIS-13 interglacial. Climate of the Past, 2014, 10, 1645-1657.	3.4	12
31	Insolation-induced mid-Brunhes transition in Southern Ocean ventilation and deep-ocean temperature. Nature, 2013, 494, 222-225.	27.8	60
32	The Climate of the MIS-13 Interglacial according to HadCM3. Journal of Climate, 2013, 26, 9696-9712.	3.2	20
33	A multi-model assessment of last interglacial temperatures. Climate of the Past, 2013, 9, 699-717.	3.4	134
34	The last interglacial (Eemian) climate simulated by LOVECLIM and CCSM3. Climate of the Past, 2013, 9, 1789-1806.	3.4	54
35	Impact of ice sheet induced North Atlantic oscillation on East Asian summer monsoon during an interglacial 500,000Âyears ago. Climate Dynamics, 2012, 39, 1093-1105.	3.8	26
36	SST and ice sheet impacts on the MISâ€“13 climate. Climate Dynamics, 2012, 39, 1739-1761.	3.8	17

#	Article	IF	Citations
37	Modelling the climatic diversity of the warm interglacials. Quaternary Science Reviews, 2012, 56, 126-141.	3.0	45
38	Modelling the Past and Future Interglacials in Response to Astronomical and Greenhouse Gas Forcing. , 2012, , 437-462.		7
39	Individual contribution of insolation and CO2 to the interglacial climates of the past 800,000Âyears. Climate Dynamics, 2012, 38, 709-724.	3.8	185
40	Modeling the Interglacials of the Last 1 Million Years. , 2012, , 57-64.		2
41	Astronomical Theory and Orbital Forcing. , 2012, , 405-425.		7
42	An astronomically tuned 8.1 Ma eolian record from the Chinese Loess Plateau and its implication on the evolution of Asian monsoon. Journal of Geophysical Research, 2011, 116, n/a-n/a.	3.3	26
43	Carbon isotopic compositions of pore and matrix carbonates in carbonate nodules, and origin of carbonate formation. Science Bulletin, 2010, 55, 2926-2929.	1.7	6
44	Insolation and CO2 contribution to the interglacial climate before and after the Mid-Brunhes Event. Nature Geoscience, 2010, 3, 243-246.	12.9	110
45	Total irradiation during any time interval of the year using elliptic integrals. Quaternary Science Reviews, 2010, 29, 1968-1982.	3.0	72
46	Individual and combined effects of ice sheets and precession on MIS-13 climate. Climate of the Past, 2009, 5, 229-243.	3.4	63
47	Strong asymmetry of hemispheric climates during MIS-13 inferred from correlating China loess and Antarctica ice records. Climate of the Past, 2009, 5, 21-31.	3.4	168
48	The Eurasian ice sheet reinforces the East Asian summer monsoon during the interglacial 500 000 years ago. Climate of the Past, 2008, 4, 79-90.	3.4	52
49	A major reorganization of Asian climate by the early Miocene. Climate of the Past, 2008, 4, 153-174.	3.4	471
50	Strong summer monsoon during the cool MIS-13. Climate of the Past, 2008, 4, 29-34.	3.4	67
51	Grain-size features of a Miocene loess-soil sequence at Qinan: Implications on its origin. Science in China Series D: Earth Sciences, 2006, 49, 731-738.	0.9	42
52	Mid-pleistocene vermiculated red soils in southern China as an indication of unusually strengthened East Asian monsoon. Science Bulletin, 2006, 51, 213-220.	1.7	69
53	Diverse response of global terrestrial vegetation to astronomical forcing and CO2 during the MIS-11 and MIS-13 interglacials. Climate Dynamics, 0, , .	3.8	2
