#	ARTICLE	IF	CITATIONS
1	Toward Improving the Prediction of Functional Ambulation After Spinal Cord Injury Through the Inclusion of Limb Accelerations During Sleep and Personal Factors. Archives of Physical Medicine and Rehabilitation, 2022, 103, 676-687.e6.	0.9	2
2	Characterizing the Experience of Spasticity after Spinal Cord Injury: A National Survey Project of the Spinal Cord Injury Model Systems Centers. Archives of Physical Medicine and Rehabilitation, 2022, 103, 764-772.e2.	0.9	17
3	Predicting Duration of Outpatient Physical Therapy Episodes for Individuals with Spinal Cord Injury Based on Locomotor Training Strategy. Archives of Physical Medicine and Rehabilitation, 2022, 103, 665-675.	0.9	5
4	Acceptability and impact on spasticity of a single session of upper extremity vibration in individuals with tetraplegia. Spinal Cord Series and Cases, 2022, 8, 17.	0.6	2
5	Effects of whole-body vibration on neuropathic pain and the relationship between pain and spasticity in persons with spinal cord injury. Spinal Cord, 2022, 60, 963-970.	1.9	1
6	A Pilot Study of Intensive Locomotor-Related Skill Training and Transcranial Direct Current Stimulation in Chronic Spinal Cord Injury. Journal of Neurologic Physical Therapy, 2022, 46, 281-292.	1.4	1
7	Walking and Balance Outcomes Are Improved Following Brief Intensive Locomotor Skill Training but Are Not Augmented by Transcranial Direct Current Stimulation in Persons With Chronic Spinal Cord Injury. Frontiers in Human Neuroscience, 2022, 16, .	2.0	3
8	Clinician Perceptions of Robotic Exoskeletons for Locomotor Training After Spinal Cord Injury: A Qualitative Approach. Archives of Physical Medicine and Rehabilitation, 2021, 102, 203-215.	0.9	7
9	Combined Transcutaneous Spinal Stimulation and Locomotor Training to Improve Walking Function and Reduce Spasticity in Subacute Spinal Cord Injury: A Randomized Study of Clinical Feasibility and Efficacy. Journal of Clinical Medicine, 2021, 10, 1167.	2.4	26
10	The influence of physiologic and atmospheric variables on spasticity after spinal cord injury. NeuroRehabilitation, 2021, 48, 353-363.	1.3	1
11	Meeting Proceedings for SCI 2020: Launching a Decade of Disruption in Spinal Cord Injury Research. Journal of Neurotrauma, 2021, 38, 1251-1266.	3.4	14
12	Efficacy of Transcutaneous Spinal Stimulation versus Whole Body Vibration for Spasticity Reduction in Persons with Spinal Cord Injury. Journal of Clinical Medicine, 2021, 10, 3267.	2.4	8
13	Noninvasive neuromodulation and rehabilitation to promote functional restoration in persons with spinal cord injury. Current Opinion in Neurology, 2021, 34, 812-818.	3.6	6
14	Reliability of S3 pressure sensation and voluntary hip adduction/toe flexion and agreement with deep anal pressure and voluntary anal contraction in classifying persons with traumatic spinal cord injury. Journal of Spinal Cord Medicine, 2020, 43, 616-622.	1.4	1
15	Spasticity and Pain after Spinal Cord Injury: Impact on Daily Life and the Influence of Psychological Factors. PM and R, 2020, 12, 119-129.	1.6	14
16	Budget impact analysis of robotic exoskeleton use for locomotor training following spinal cord injury in four SCI Model Systems. Journal of NeuroEngineering and Rehabilitation, 2020, 17, 4.	4.6	23
17	Applauding Our Peer Reviewersâ€”the Unsung Heroes of Science. Journal of Neurologic Physical Therapy, 2020, 44, 1-2.	1.4	0
18	Users with spinal cord injury experience of robotic Locomotor exoskeletons: a qualitative study of the benefits, limitations, and recommendations. Journal of NeuroEngineering and Rehabilitation, 2020, 17, 124.	4.6	13

#	ARTICLE	IF	CITATIONS
19	International Spinal Cord Injury Physical Therapyâ€œOccupational Therapy Basic Data Set (Version 1.2). Spinal Cord Series and Cases, 2020, 6, 74.	0.6	6
20	Therapeutic Interventions to Improve Mobility with Spinal Cord Injury Related Upper Motor Neuron Syndromes. Physical Medicine and Rehabilitation Clinics of North America, 2020, 31, 437-453.	1.3	2
21	Modified PRISM and SCI-SET Spasticity Measures for Persons With Traumatic Spinal Cord Injury: Results of a Rasch Analyses. Archives of Physical Medicine and Rehabilitation, 2020, 101, 1570-1579.	0.9	8
22	Disrupted Ankle Control and Spasticity in Persons With Spinal Cord Injury: The Association Between Neurophysiologic Measures and Function. A Scoping Review. Frontiers in Neurology, 2020, 11, 166.	2.4	5
23	Appraisals of robotic locomotor exoskeletons for gait: focus group insights from potential users with spinal cord injuries. Disability and Rehabilitation: Assistive Technology, 2020, 15, 762-772.	2.2	6
24	Mediators and Moderators, Confounders and Covariates: Exploring the Variables That Illuminate or Obscure the â€œActive Ingredientsâ€œin Neurorehabilitation. Journal of Neurologic Physical Therapy, 2019, 43, 83-84.	1.4	52
25	Importance and Significance: Synonyms Sometimes But Not Specifically in Statistics. Journal of Neurologic Physical Therapy, 2019, 43, 195-196.	1.4	1
26	Fake News in Science. Journal of Neurologic Physical Therapy, 2019, 43, 139-140.	1.4	5
27	40 Years of Funding Research to Optimize Movement and Health: A Name Update Positions the Foundation for the Decades Ahead. Physical Therapy, 2019, 99, 123-123.	2.4	0
28	Impact of spasticity on transfers and activities of daily living in individuals with spinal cord injury. Journal of Spinal Cord Medicine, 2019, 42, 318-327.	1.4	13
29	The experience of spasticity after spinal cord injury: perceived characteristics and impact on daily life. Spinal Cord, 2018, 56, 478-486.	1.9	41
30	Considerations and recommendations for selection and utilization of upper extremity clinical outcome assessments in human spinal cord injury trials. Spinal Cord, 2018, 56, 414-425.	1.9	24
31	Lower extremity outcome measures: considerations for clinical trials in spinal cord injury. Spinal Cord, 2018, 56, 628-642.	1.9	23
32	Magnifying the Momentum: White Paper Endorses the Development of Movement System Diagnostic Classifications in Neurologic Physical Therapy. Journal of Neurologic Physical Therapy, 2018, 42, 59-60.	1.4	0
33	Research progress from the SCI Model Systems (SCIMS): An interactive discussion on future directions. Journal of Spinal Cord Medicine, 2018, 41, 216-222.	1.4	2
34	Body System Effects of a Multi-Modal Training Program Targeting Chronic, Motor Complete Thoracic Spinal Cord Injury. Journal of Neurotrauma, 2018, 35, 411-423.	3.4	20
35	Experience of Robotic Exoskeleton Use at Four Spinal Cord Injury Model Systems Centers. Journal of Neurologic Physical Therapy, 2018, 42, 256-267.	1.4	43
36	Is This Study a Clinical Trial? Why Does It Matter?. Journal of Neurologic Physical Therapy, 2018, 42, 223-223.	1.4	0

#	ARTICLE	IF	CITATIONS
37	Medical Rehabilitation: Guidelines to Advance the Field With High-Impact Clinical Trials. Archives of Physical Medicine and Rehabilitation, 2018, 99, 2637-2648.	0.9	15
38	Neuromodulation in the restoration of function after spinal cord injury. Lancet Neurology, The, 2018, 17, 905-917.	10.2	119
39	Language as Advocacy. Journal of Neurologic Physical Therapy, 2018, 42, 1-1.	1.4	1
40	Comparison of Single-Session Dose Response Effects of Whole Body Vibration on Spasticity and Walking Speed in Persons with Spinal Cord Injury. Neurotherapeutics, 2018, 15, 684-696.	4.4	18
41	Lymphedema techniques to manage edema after SCI: a retrospective analysis. Spinal Cord, 2018, 56, 1158-1165.	1.9	3
42	Dose-Response Outcomes Associated with Different Forms of Locomotor Training in Persons with Chronic Motor-Incomplete Spinal Cord Injury. Journal of Neurotrauma, 2017, 34, 1903-1908.	3.4	13
43	Dalfampridine in Parkinson's disease related gait dysfunction: A randomized double blind trial. Journal of the Neurological Sciences, 2017, 379, 7-11.	0.6	7
44	Temporal Indices of Ankle Clonus and Relationship to Electrophysiologic and Clinical Measures in Persons With Spinal Cord Injury. Journal of Neurologic Physical Therapy, 2017, 41, 229-238.	1.4	6
45	The New NIH Rehabilitation Research Plan: Priorities and Potential for Progress in Neurorehabilitation Research. Journal of Neurologic Physical Therapy, 2017, 41, 1-2.	1.4	3
46	The Astounding Reciprocity of Movement-Related Interactions. Journal of Neurologic Physical Therapy, 2017, 41, 203-204.	1.4	0
47	Updates to the Common Rule. Journal of Neurologic Physical Therapy, 2017, 41, 91-92.	1.4	0
48	Next Steps: The Evolution of Neurologic Physical Therapy Practice and Research. Journal of Neurologic Physical Therapy, 2017, 41, S1-S2.	1.4	0
49	Supraspinal Control Predicts Locomotor Function and Forecasts Responsiveness to Training after Spinal Cord Injury. Journal of Neurotrauma, 2017, 34, 1813-1825.	3.4	32
50	Priming Neural Circuits to Modulate Spinal Reflex Excitability. Frontiers in Neurology, 2017, 8, 17.	2.4	55
51	Measuring What Matters. Journal of Neurologic Physical Therapy, 2016, 40, 221-222.	1.4	0
52	Technology for Children With Brain Injury and Motor Disability: Executive Summary From Research Summit IV. Pediatric Physical Therapy, 2016, 28, 483-489.	0.6	11
53	Translation, Implementation, Replication, and the Documentation of Interventions. Journal of Neurologic Physical Therapy, 2016, 40, 163-164.	1.4	1
54	Priming for Improved Hand Strength in Persons with Chronic Tetraplegia: A Comparison of Priming-Augmented Functional Task Practice, Priming Alone, and Conventional Exercise Training. Frontiers in Neurology, 2016, 7, 242.	2.4	13

#	ARTICLE	IF	CITATIONS
55	The Human Movement System in Neurologic Physical Therapy. <i>Journal of Neurologic Physical Therapy</i> , 2015, 39, 195-196.	1.4	2
56	Cortical vs. afferent stimulation as an adjunct to functional task practice training: a randomized, comparative pilot study in people with cervical spinal cord injury. <i>Clinical Rehabilitation</i> , 2015, 29, 771-782.	2.2	45
57	Single-dose effects of whole body vibration on quadriceps strength in individuals with motor-incomplete spinal cord injury. <i>Journal of Spinal Cord Medicine</i> , 2015, 38, 784-791.	1.4	10
58	Exciting recovery. <i>Progress in Brain Research</i> , 2015, 218, 103-126.	1.4	22
59	Lost in Translation. <i>Journal of Neurologic Physical Therapy</i> , 2015, 39, 83-84.	1.4	0
60	Improvements in Hand Function in Adults With Chronic Tetraplegia Following a Multiday 10-Hz Repetitive Transcranial Magnetic Stimulation Intervention Combined With Repetitive Task Practice. <i>Journal of Neurologic Physical Therapy</i> , 2015, 39, 23-30.	1.4	57
61	Challenges for defining minimal clinically important difference (MCID) after spinal cord injury. <i>Spinal Cord</i> , 2015, 53, 84-91.	1.9	76
62	Saying What We Mean, and Meaning What We Say. <i>Journal of Neurologic Physical Therapy</i> , 2014, 38, 205-206.	1.4	2
63	What Happens in Vegas.... <i>Journal of Neurologic Physical Therapy</i> , 2014, 38, 1.	1.4	2
64	Understanding Therapeutic Benefits of Overground Bionic Ambulation: Exploratory Case Series in Persons With Chronic, Complete Spinal Cord Injury. <i>Archives of Physical Medicine and Rehabilitation</i> , 2014, 95, 1878-1887.e4.	0.9	96
65	Bihemispheric Anodal Corticomotor Stimulation Using Transcranial Direct Current Stimulation Improves Bimanual Typing Task Performance. <i>Journal of Motor Behavior</i> , 2013, 45, 361-367.	0.9	29
66	Metabolic Responses to 4 Different Body Weight-Supported Locomotor Training Approaches in Persons With Incomplete Spinal Cord Injury. <i>Archives of Physical Medicine and Rehabilitation</i> , 2013, 94, 1436-1442.	0.9	32
67	Operant conditioning to increase ankle control or decrease reflex excitability improves reflex modulation and walking function in chronic spinal cord injury. <i>Journal of Neurophysiology</i> , 2013, 109, 2666-2679.	1.8	43
68	Modulatory effects of locomotor training on extensor spasticity in individuals with motor-incomplete spinal cord injury. <i>Restorative Neurology and Neuroscience</i> , 2013, 31, 633-646.	0.7	33
69	Physical Therapist/Movement Scientist. <i>Journal of Neurologic Physical Therapy</i> , 2013, 37, 97-98.	1.4	0
70	Guest Editorial. <i>Journal of Neurologic Physical Therapy</i> , 2013, 37, 1.	1.4	0
71	Effects of Practice Combined with Somatosensory or Motor Stimulation on Hand Function in Persons with Spinal Cord Injury. <i>Topics in Spinal Cord Injury Rehabilitation</i> , 2013, 19, 288-299.	1.8	26
72	An Impact Factor for JNPT!. <i>Journal of Neurologic Physical Therapy</i> , 2012, 36, 157-158.	1.4	0

#	ARTICLE	IF	CITATIONS
73	Measuring Up to Our Full Potential. <i>Journal of Neurologic Physical Therapy</i> , 2012, 36, 113-114.	1.4	1
74	Vibration Elicits Involuntary, Step-Like Behavior in Individuals With Spinal Cord Injury. <i>Neurorehabilitation and Neural Repair</i> , 2012, 26, 861-869.	2.9	20
75	Reflecting on the Future. <i>Journal of Neurologic Physical Therapy</i> , 2012, 36, 1-2.	1.4	1
76	Everything Important In Life I Learned From Neuroscience. <i>Journal of Neurologic Physical Therapy</i> , 2011, 35, 155-156.	1.4	0
77	Measures of Evidence in Evidence-Based Practice. <i>Journal of Neurologic Physical Therapy</i> , 2011, 35, 55-56.	1.4	9
78	Greater Than the Sum of the Parts. <i>Journal of Neurologic Physical Therapy</i> , 2011, 35, 1.	1.4	0
79	Influence of a Locomotor Training Approach on Walking Speed and Distance in People With Chronic Spinal Cord Injury: A Randomized Clinical Trial. <i>Physical Therapy</i> , 2011, 91, 48-60.	2.4	248
80	Vitalizing Practice Through Research and Research Through Practice: The Outcomes of a Conference to Enhance the Delivery of Care. <i>Physical Therapy</i> , 2011, 91, 1275-1284.	2.4	6
81	Seated reach distance and trunk excursion accurately reflect dynamic postural control in individuals with motor-incomplete spinal cord injury. <i>Spinal Cord</i> , 2010, 48, 745-749.	1.9	47
82	Restoration of walking function in an individual with chronic complete (AIS A) spinal cord injury. <i>Journal of Rehabilitation Medicine</i> , 2010, 42, 795-798.	1.1	45
83	Neurologic Physical Therapy at the Nexus of Recovery, Restoration, and Regeneration. <i>Journal of Neurologic Physical Therapy</i> , 2010, 34, 125-126.	1.4	0
84	Functional and Corticomotor Changes in Individuals With Tetraplegia Following Unimanual or Bimanual Massed Practice Training With Somatosensory Stimulation. <i>Journal of Neurologic Physical Therapy</i> , 2010, 34, 193-201.	1.4	52
85	Prescription for Change. <i>Journal of Neurologic Physical Therapy</i> , 2010, 34, 1-2.	1.4	0
86	Effect of whole-body vibration on quadriceps spasticity in individuals with spastic hypertonia due to spinal cord injury. <i>Restorative Neurology and Neuroscience</i> , 2009, 27, 623-633.	0.7	61
87	Gait quality is improved by locomotor training in individuals with SCI regardless of training approach. <i>Journal of NeuroEngineering and Rehabilitation</i> , 2009, 6, 36.	4.6	108
88	Whole-body vibration improves walking function in individuals with spinal cord injury: A pilot study. <i>Gait and Posture</i> , 2009, 30, 436-440.	1.4	68
89	The Power of Words. <i>Journal of Neurologic Physical Therapy</i> , 2009, 33, 67.	1.4	0
90	Does the Dose Do It?. <i>Journal of Neurologic Physical Therapy</i> , 2009, 33, 177-178.	1.4	4

#	ARTICLE	IF	CITATIONS
91	Affirming the Fundamentals in an Age of High-Tech Rehabilitation. <i>Journal of Neurologic Physical Therapy</i> , 2009, 33, 127-128.	1.4	0
92	Goodbye, Hello. <i>Journal of Neurologic Physical Therapy</i> , 2009, 33, 1.	1.4	0
93	Sensory Stimulation Augments the Effects of Massed Practice Training in Persons With Tetraplegia. <i>Archives of Physical Medicine and Rehabilitation</i> , 2008, 89, 602-608.	0.9	106
94	Cortical Reorganization Following Bimanual Training and Somatosensory Stimulation in Cervical Spinal Cord Injury: A Case Report. <i>Physical Therapy</i> , 2007, 87, 208-223.	2.4	80
95	Nutrient Supplementation Post Ambulation in Persons With Incomplete Spinal Cord Injuries: A Randomized, Double-Blinded, Placebo-Controlled Case Series. <i>Archives of Physical Medicine and Rehabilitation</i> , 2007, 88, 228-233.	0.9	10
96	Single joint perturbation during gait: Preserved compensatory response pattern in spinal cord injured subjects. <i>Clinical Neurophysiology</i> , 2007, 118, 1607-1616.	1.5	21
97	Influence of posture and stimulus parameters on post-activation depression of the soleus H-reflex in individuals with chronic spinal cord injury. <i>Neuroscience Letters</i> , 2006, 410, 37-41.	2.1	23
98	CORTICALLY-EVOKED POTENTIALS OF MUSCLES DISTAL TO THE LESION ARE POSTERIORLY SHIFTED AND OF LOWER AMPLITUDE IN INDIVIDUALS WITH TETRAPLEGIA DUE TO SPINAL CORD INJURY. <i>Journal of Neurologic Physical Therapy</i> , 2006, 30, 202-203.	1.4	1
99	Letter to the Editor. <i>Neurorehabilitation and Neural Repair</i> , 2006, 20, 233-234.	2.9	0
100	Promoting Optimal Function after Spinal Cord Injury. <i>Journal of Neurologic Physical Therapy</i> , 2005, 29, 54.	1.4	0
101	Standardization of Outcome Measures. <i>Journal of Neurologic Physical Therapy</i> , 2005, 29, 114-115.	1.4	2
102	Massed Practice versus Massed Practice with Stimulation: Effects on Upper Extremity Function and Cortical Plasticity in Individuals with Incomplete Cervical Spinal Cord Injury. <i>Neurorehabilitation and Neural Repair</i> , 2005, 19, 33-45.	2.9	130
103	Locomotor Training Approaches for Individuals with Spinal Cord Injury. <i>Journal of Neurologic Physical Therapy</i> , 2005, 29, 127-137.	1.4	154
104	LOCOMOTOR TRAINING IN INDIVIDUALS WITH INCOMPLETE SCI: FUNCTIONAL AND SPINAL REFLEX RELATED CHANGES ASSOCIATED WITH FOUR DIFFERENT BWS TRAINING PROTOCOLS.. <i>Journal of Neurologic Physical Therapy</i> , 2004, 28, 170.	1.4	0
105	Electrical Stimulation Modifies Spinal and Cortical Neural Circuitry. <i>Exercise and Sport Sciences Reviews</i> , 2004, 32, 155-160.	3.0	35
106	EFFECT OF HIGH VERSUS LOW FREQUENCY STIMULATION ON CORTICAL PLASTICITY AND PINCH GRIP STRENGTH.. <i>Journal of Neurologic Physical Therapy</i> , 2004, 28, 172.	1.4	0
107	Metabolic and Cardiac Responses To Roboticâ€“Assisted Locomotion In Motorâ€“Complete Tetraplegia: A Case Report. <i>Journal of Spinal Cord Medicine</i> , 2004, 27, 78-82.	1.4	43
108	Acute Effects of Whole-Body Vibration on Soleus H-Reflex. <i>Medicine and Science in Sports and Exercise</i> , 2004, 36, S351.	0.4	1
