#	Article	IF	CITATIONS
1	Sympathetic-Nerve Activity during Sleep in Normal Subjects. New England Journal of Medicine, 1993, 328, 303-307.	27.0	1,318
2	Relationship Between Spectral Components of Cardiovascular Variabilities and Direct Measures of Muscle Sympathetic Nerve Activity in Humans. Circulation, 1997, 95, 1441-1448.	1.6	716
3	Extracellular acidosis increases neuronal cell calcium by activating acid-sensing ion channel 1a. Proceedings of the National Academy of Sciences of the United States of America, 2004, 101, 6752-6757.	7.1	348
4	PIEZOs mediate neuronal sensing of blood pressure and the baroreceptor reflex. Science, 2018, 362, 464-467.	12.6	312
5	The role of low pressure baroreceptors in reflex vasoconstrictor responses in man. Journal of Clinical Investigation, 1972, 51, 2967-2972.	8.2	286
6	Carotid and cardiopulmonary baroreceptor control of splanchnic and forearm vascular resistance during venous pooling in man. Journal of Physiology, 1979, 286, 173-184.	2.9	213
7	A Molecular Component of the Arterial Baroreceptor Mechanotransducer. Neuron, 1998, 21, 1435-1441.	8.1	206
8	Neurocardiogenic Syncope. New England Journal of Medicine, 1993, 328, 1117-1120.	27.0	204
9	Ejection Fraction. Circulation, 2017, 135, 717-719.	1.6	195
10	The continuous heart failure spectrum: moving beyond an ejection fraction classification. European Heart Journal, 2019, 40, 2155-2163.	2.2	195
11	The Ion Channel ASIC2 Is Required for Baroreceptor and Autonomic Control of the Circulation. Neuron, 2009, 64, 885-897.	8.1	186
12	Ventricular Syncope. New England Journal of Medicine, 1989, 320, 390-392.	27.0	172
13	Identification and function of thermosensory neurons in Drosophila larvae. Nature Neuroscience, 2003, 6, 267-273.	14.8	166
14	Effects of adrenergic stimulation on ventilation in man. Journal of Clinical Investigation, 1972, 51, 1469-1475.	8.2	155
15	Reflex control of the peripheral circulation. Progress in Cardiovascular Diseases, 1976, 18, 371-403.	3.1	152
16	Central Vagotonic Effects of Atropine Modulate Spectral Oscillations of Sympathetic Nerve Activity. Circulation, 1998, 98, 1394-1399.	1.6	138
17	The immune system and hypertension. Immunologic Research, 2014, 59, 243-253.	2.9	136
18	Autonomic Neural Regulation of the Immune System. Hypertension, 2012, 59, 755-762.	2.7	134

#	Article	IF	CITATIONS
19	Nitric Oxide as an Autocrine Regulator of Sodium Currents in Baroreceptor Neurons. Neuron, 1998, 20, 1039-1049.	8.1	128
20	Interaction of Baroreceptor and Chemoreceptor Reflexes MODULATION OF THE CHEMORECEPTOR REFLEX BY CHANGES IN BARORECEPTOR ACTIVITY. Journal of Clinical Investigation, 1974, 53, 1226-1236.	8.2	128
21	Abnormal Vascular Responses to Exercise in Patients with Aortic Stenosis. Journal of Clinical Investigation, 1973, 52, 1138-1146.	8.2	124
22	Abnormal Motion of the Interventricular Septum in Right Ventricular Volume Overload. Circulation, 1973, 48, 86-96.	1.6	122
23	Mechanisms Determining Sensitivity of Baroreceptor Afferents in Health and Disease. Annals of the New York Academy of Sciences, 2001, 940, 1-19.	3.8	121
24	Obstructive sleep apnea and insight into mechanisms of sympathetic overactivity. Journal of Clinical Investigation, 2014, 124, 1454-1457.	8.2	121
25	Role of Large Arteries in Regulation of Cerebral Blood Flow in Dogs. Journal of Clinical Investigation, 1978, 62, 761-768.	8.2	118
26	Echocardiographic Detection of Regional Myocardial Infarction. Circulation, 1973, 47, 997-1005.	1.6	111
27	Mechanisms of Resetting of Arterial Baroreceptors: An Overview. American Journal of the Medical Sciences, 1988, 295, 327-334.	1.1	102
28	Responses of coronary vessels to adrenergic stimuli. Journal of Clinical Investigation, 1971, 50, 773-778.	8.2	101
29	Parasympathetic hyperresponsiveness and bradyarrhythmias during apnoea in hypertension. Clinical Autonomic Research, 1992, 2, 171-176.	2.5	99
30	Chemoreceptor Hypersensitivity, Sympathetic Excitation, and Overexpression of ASIC and TASK Channels Before the Onset of Hypertension in SHR. Circulation Research, 2010, 106, 536-545.	4.5	99
31	Neurohormonal Modulation of the Innate Immune System Is Proinflammatory in the Prehypertensive Spontaneously Hypertensive Rat, a Genetic Model of Essential Hypertension. Circulation Research, 2012, 111, 1190-1197.	4.5	97
32	Oxygen-Derived Free Radicals Contribute to Baroreceptor Dysfunction in Atherosclerotic Rabbits. Circulation Research, 1996, 79, 802-811.	4.5	95
33	Differences in Direct Effects of Adrenergic Stimuli on Coronary, Cutaneous, and Muscular Vessels. Journal of Clinical Investigation, 1972, 51, 279-287.	8.2	92
34	Coronary Vascular Responses to Stimulation of Chemoreceptors and Baroreceptors: EVIDENCE FOR REFLEX ACTIVATION OF VAGAL CHOLINERGIC INNERVATION. Circulation Research, 1972, 31, 8-17.	4.5	91
35	Regulation of Blood Flow to the Aortic Media in Dogs. Journal of Clinical Investigation, 1978, 62, 133-140.	8.2	90
36	Depression of Ventilation by Dopamine in Man. Journal of Clinical Investigation, 1978, 61, 708-713.	8.2	88

#	Article	IF	CITATIONS
37	ASIC2a and ASIC3 Heteromultimerize to Form pH-Sensitive Channels in Mouse Cardiac Dorsal Root Ganglia Neurons. Circulation Research, 2009, 105, 279-286.	4.5	87
38	ENaC Subunits Are Molecular Components of the Arterial Baroreceptor Complex. Annals of the New York Academy of Sciences, 2001, 940, 42-47.	3.8	86
39	Spatial and temporal heterogeneity of left ventricular perfusion in awake dogs. American Heart Journal, 1977, 94, 748-754.	2.7	82
40	PERIPHERAL CENTRAL MECHANISMS OF BAROREFLEX RESETTING. Clinical and Experimental Pharmacology and Physiology, 1989, 16, 31-43.	1.9	82
41	Modulation of Baroreceptor Activity by Nitric Oxide and <i>S</i> -Nitrosocysteine. Circulation Research, 1995, 76, 426-433.	4.5	81
42	Cardiovascular responses to insulin in the absence of hypoglycemia. American Journal of Physiology, 1962, 202, 249-252.	5.0	80
43	Circulatory effects of sympathomimetic amines. American Heart Journal, 1962, 63, 119-135.	2.7	79
44	Reflex Inhibition of Renal Sympathetic Nerve Activity during Myocardial Ischemia Mediated by Left Ventricular Receptors with Vagal Afferents in Dogs. Journal of Clinical Investigation, 1979, 63, 395-402.	8.2	77
45	Hemodynamic effects of ventricular defibrillation. Journal of Clinical Investigation, 1970, 49, 282-297.	8.2	76
46	Reflex Vascular Responses to Stimulation of Chemoreceptors with Nicotine and Cyanide. Circulation Research, 1970, 27, 259-276.	4.5	72
47	Acid-Sensing Ion Channels Contribute to Transduction of Extracellular Acidosis in Rat Carotid Body Glomus Cells. Circulation Research, 2007, 101, 1009-1019.	4.5	71
48	Elevated Muscle Sympathetic Nerve Activity Contributes to Central Artery Stiffness in Young and Middle-Age/Older Adults. Hypertension, 2019, 73, 1025-1035.	2.7	69
49	Reflex Vascular Responses to Left Ventricular Outflow Obstruction and Activation of Ventricular Baroreceptors in Dogs. Journal of Clinical Investigation, 1973, 52, 1147-1153.	8.2	65
50	Mechanisms Mediating Bradycardia during Coronary Arteriography. Journal of Clinical Investigation, 1974, 54, 1455-1461.	8.2	65
51	In search of autonomic balance: the good, the bad, and the ugly. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2010, 298, R1449-R1467.	1.8	64
52	Analysis of afferent, central, and efferent components of the baroreceptor reflex in mice. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2002, 283, R1033-R1040.	1.8	62
53	Chemoreflexes—Responses, Interactions and Implications for Sleep Apnea. Sleep, 1993, 16, S30-S34.	1.1	61
54	Baroreceptor Reflex Sensitivity Estimated by the Sequence Technique is Reliable in Rats. American Journal of Physiology - Heart and Circulatory Physiology, 2006, 291, H482-H483.	3.2	59

#	Article	IF	CITATIONS
55	Integration of reflex responses in the control of blood pressure and vascular resistance. American Journal of Cardiology, 1979, 44, 903-911.	1.6	55
56	Effect of 9-α-Fluorohydrocortisone on Forearm Vascular Responses to Norepinephrine. Circulation, 1966, 34, 620-626.	1.6	52
57	Non–Voltage-Gated Ca 2+ Influx Through Mechanosensitive Ion Channels in Aortic Baroreceptor Neurons. Circulation Research, 1997, 80, 861-867.	4.5	52
58	Comparative Changes in Segmental Vascular Resistance in Response to Nerve Stimulation and to Norepinephrine. Circulation Research, 1966, 18, 263-277.	4.5	49
59	THE EFFECTS OF AGING AND DEGENERATIVE VASCULAR DISEASE ON THE MEASUREMENT OF ARTERIAL RIGIDITY IN MAN*. Journal of Clinical Investigation, 1961, 40, 933-939.	8.2	49
60	Receptor Activity-Modifying Protein 1 Increases Baroreflex Sensitivity and Attenuates Angiotensin-Induced Hypertension. Hypertension, 2010, 55, 627-635.	2.7	46
61	Relative burst amplitude of muscle sympathetic nerve activity is an indicator of altered sympathetic outflow in chronic anxiety. Journal of Neurophysiology, 2018, 120, 11-22.	1.8	46
62	Interaction of Cardiopulmonary and Somatic Reflexes in Humans. Journal of Clinical Investigation, 1980, 65, 1491-1497.	8.2	46
63	Effects of chronic hypertension on vasa vasorum in the thoracic aorta. Cardiovascular Research, 1985, 19, 777-781.	3.8	45
64	Angiotensin II-induced hypertension and cardiac hypertrophy are differentially mediated by TLR3- and TLR4-dependent pathways. American Journal of Physiology - Heart and Circulatory Physiology, 2019, 316, H1027-H1038.	3.2	45
65	Vascular responses after alpha adrenergic receptor blockade. Journal of Clinical Investigation, 1968, 47, 1-9.	8.2	45
66	Dual Activation of TRIF and MyD88 Adaptor Proteins by Angiotensin II Evokes Opposing Effects on Pressure, Cardiac Hypertrophy, and Inflammatory Gene Expression. Hypertension, 2015, 66, 647-656.	2.7	43
67	Nitric oxide enhances slow inactivation of voltage-dependent sodium currents in rat nodose neurons. Neuroscience Letters, 1999, 271, 159-162.	2.1	40
68	A novel effect of angiotensin on renal sympathetic nerve activity in mice. Journal of Hypertension, 2001, 19, 609-618.	0.5	40
69	Mechanosensory transduction of vagal and baroreceptor afferents revealed by study of isolated nodose neurons in culture. Autonomic Neuroscience: Basic and Clinical, 2002, 98, 59-63.	2.8	40
70	Impaired Reflex Vasoconstriction in Chronically Hypoxemic Patients. Journal of Clinical Investigation, 1972, 51, 331-337.	8.2	40
71	Nicotine Mediates CD161a <sup>+</sup> Renal Macrophage Infiltration and Premature Hypertension in the Spontaneously Hypertensive Rat. Circulation Research, 2016, 119, 1101-1115.	4.5	39
72	The volume-regulated anion channel (LRRC8) in nodose neurons is sensitive to acidic pH. JCI Insight, 2017, 2, e90632.	5.0	35

#	Article	IF	CITATIONS
73	Relationship between plasma sodium concentration and vascular reactivity in man. Journal of Clinical Investigation, 1971, 50, 2022-2032.	8.2	35
74	Acid-sensing ion channels interact with and inhibit BK K <sup>+</sup> channels. Proceedings of the National Academy of Sciences of the United States of America, 2008, 105, 3140-3144.	7.1	34
75	Mechanical stimulation of neurites generates an inward current in putative aortic baroreceptor neurons in vitro. Brain Research, 1997, 757, 149-154.	2.2	33
76	Forearm Venous Responses to Stimulation of Adrenergic Receptors*. Journal of Clinical Investigation, 1965, 44, 1151-1159.	8.2	33
77	Toll-like receptors and hypertension. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2014, 307, R501-R504.	1.8	32
78	Mechanosensitive ion channels in putative aortic baroreceptor neurons. American Journal of Physiology - Heart and Circulatory Physiology, 1998, 275, H1497-H1501.	3.2	31
79	Tacrolimus (FK506) modulates calcium release and contractility of intestinal smooth muscle. Cell Calcium, 1997, 22, 507-514.	2.4	30
80	Angiotensin Selectively Activates a Subpopulation of Postganglionic Sympathetic Neurons in Mice. Circulation Research, 2001, 88, 787-793.	4.5	29
81	Autonomic regulation of the immune system in cardiovascular diseases. American Journal of Physiology - Advances in Physiology Education, 2017, 41, 578-593.	1.6	29
82	Autonomic reflexes and vascular reactivity in experimental scurvy in man. Journal of Clinical Investigation, 1970, 49, 298-307.	8.2	28
83	Comparison of Effects of Deoxycorticosterone and Dexamethasone on Cardiovascular Responses to Norepinephrine *. Journal of Clinical Investigation, 1967, 46, 590-598.	8.2	27
84	Effects of Small Oral Doses of Reserpine on Vascular. Circulation, 1964, 29, 219-223.	1.6	25
85	Rapid adaptation of central pathways explains the suppressed baroreflex with aging. Neurobiology of Aging, 1991, 12, 601-604.	3.1	25
86	The Prostacyclin Analogue Carbacyclin Inhibits Ca2+-Activated K+Current in Aortic Baroreceptor Neurones of Rats. Journal of Physiology, 1997, 501, 275-287.	2.9	25
87	Catecholamines in Arteries and Veins of the Foreleg of the Dog. Circulation Research, 1968, 23, 653-661.	4.5	24
88	Effect of Inotropic Agents on the Localized Dyskinesis of Acutely Ischemic Myocardium. Circulation, 1974, 49, 1038-1046.	1.6	24
89	Measurement of Arterial Aging in Relation to Diabetes Mellitus. Circulation, 1962, 25, 938-946.	1.6	23
90	Echocardiography in experimentally-induced myocardial ischemia. American Journal of Medicine, 1977, 63, 21-28.	1.5	23

6

#	Article	IF	CITATIONS
91	Ganglionic Action of Angiotensin Contributes to Sympathetic Activity in Renin-Angiotensinogen Transgenic Mice. Hypertension, 2004, 43, 312-316.	2.7	23
92	ASICs and cardiovascular homeostasis. Neuropharmacology, 2015, 94, 87-98.	4.1	23
93	Responses of glomus cells to hypoxia and acidosis are uncoupled, reciprocal and linked to ASIC3 expression: selectivity of chemosensory transduction. Journal of Physiology, 2013, 591, 919-932.	2.9	22
94	Effects of Quinidine on Venous Responses to Adrenergic and Nonadrenergic Constrictor Stimuli: Indirect Evidence of Two Sites of Action in Vascular Smooth Muscle. Experimental Biology and Medicine, 1974, 146, 409-413.	2.4	19
95	Vasodilator Action of Guanethidine. Circulation Research, 1962, 11, 788-796.	4.5	17
96	The Value of Left Parasternal Impulse Recordings in the Assessment of Mitral Regurgitation. Circulation, 1973, 48, 1055-1065.	1.6	16
97	Mechano- and chemosensitivity of rat nodose neurones - selective excitatory effects of prostacyclin. Journal of Physiology, 2007, 582, 177-194.	2.9	16
98	MEASUREMENT OF ARTERIAL AGING IN HYPERTENSIVE PATIENTS*. Journal of Clinical Investigation, 1961, 40, 1915-1921.	8.2	15
99	Vascular responses after alpha adrenergic receptor blockade. Journal of Clinical Investigation, 1968, 47, 10-19.	8.2	15
100	Effectiveness of Congesting Cuffs ("Rotating Tourniquets") in Patients with Left Heart Failure. Circulation, 1974, 50, 366-371.	1.6	14
101	Modulation of baroreceptor activity by gene transfer of nitric oxide synthase to carotid sinus adventitia. American Journal of Physiology - Regulatory Integrative and Comparative Physiology, 2003, 284, R1190-R1198.	1.8	14
102	Acid sensing ion channels regulate neuronal excitability by inhibiting BK potassium channels. Biochemical and Biophysical Research Communications, 2012, 426, 511-515.	2.1	14
103	Abnormal CD161 + immune cells and retinoic acid receptor–related orphan receptor γt–mediate enhanced IL-17F expression in the setting of genetic hypertension. Journal of Allergy and Clinical Immunology, 2017, 140, 809-821.e3.	2.9	14
104	Acute hemodynamic responses to intravenous and intra-arterial guanethidine. American Journal of Physiology, 1961, 201, 462-466.	5.0	13
105	Venous and arterial responses to norepinephrine in dogs treated with reserpine. American Journal of Physiology, 1964, 206, 299-303.	5.0	13
106	Vascular Effects of Procaine Amide in the Dog. Circulation Research, 1974, 35, 948-960.	4.5	13
107	Slow inactivation of sodium currents in the rat nodose neurons. Autonomic Neuroscience: Basic and Clinical, 2001, 87, 209-216.	2.8	13
108	Inhibition of Venoconstrictor Responses by Prostaglandin E1. Experimental Biology and Medicine, 1970, 135, 757-759.	2.4	12

#	Article	IF	CITATIONS
109	Effect of Dichloroisoproterenol on Vascular Responses to Catecholamines in Man*. Journal of Clinical Investigation, 1964, 43, 316-322.	8.2	12
110	Ventricular aneurysm: Use of echocardiography. Journal of Clinical Ultrasound, 1973, 1, 60-63.	0.8	11
111	Relaxation, Autonomic Control and Hypertension. New England Journal of Medicine, 1976, 294, 107-109.	27.0	11
112	The Sympathetic Nervous System in Hypertension. Clinical and Experimental Hypertension, 1984, 6, 43-60.	0.3	11
113	Early Potentiation of the Vasoconstrictor Action of Norepinephrine by Guanethidine Experimental Biology and Medicine, 1962, 110, 489-492.	2.4	10
114	Adrenergic Control of the Peripheral Circulation in Cardiomyopathic Hamsters with Heart Failure. Circulation Research, 1973, 33, 74-81.	4.5	10
