#	ARTICLE	IF	CITATIONS
1	The origin of symptoms on the brain-gut axis in functional dyspepsia. <i>Gastroenterology</i> , 1991, 101, 999-1006.	0.6	444
2	Gastric Tone Measured by an Electronic Barostat in Health and Postsurgical Gastroparesis. <i>Gastroenterology</i> , 1987, 92, 934-943.	0.6	343
3	Mechanisms of hypersensitivity in IBS and functional disorders. <i>Neurogastroenterology and Motility</i> , 2007, 19, 62-88.	1.6	310
4	Impaired transit and tolerance of intestinal gas in the irritable bowel syndrome. <i>Gut</i> , 2001, 48, 14-19.	6.1	291
5	Minimum standards of anorectal manometry. <i>Neurogastroenterology and Motility</i> , 2002, 14, 553-559.	1.6	271
6	Selective dysfunction of mechanosensitive intestinal afferents in irritable bowel syndrome. <i>Gastroenterology</i> , 1995, 108, 636-643.	0.6	265
7	Reduction of butyrate- and methane-producing microorganisms in patients with Irritable Bowel Syndrome. <i>Scientific Reports</i> , 2015, 5, 12693.	1.6	248
8	Diarrhoea-predominant irritable bowel syndrome: an organic disorder with structural abnormalities in the jejunal epithelial barrier. <i>Gut</i> , 2013, 62, 1160-1168.	6.1	229
9	Functional dyspepsia. <i>Nature Reviews Disease Primers</i> , 2017, 3, 17081.	18.1	226
10	Gastric wall tension determines perception of gastric distention. <i>Gastroenterology</i> , 1999, 116, 1035-1042.	0.6	225
11	Selective gastric hypersensitivity and reflex hyporeactivity in functional dyspepsia. <i>Gastroenterology</i> , 1994, 107, 1345-1351.	0.6	209
12	Anorectal functional testing: review of collective experience ¹ . <i>American Journal of Gastroenterology</i> , 2002, 97, 232-240.	0.2	197
13	PASSCLAIM ¹ ?Gut health and immunity. <i>European Journal of Nutrition</i> , 2004, 43, ii118-ii173.	1.8	197
14	Storage conditions of intestinal microbiota matter in metagenomic analysis. <i>BMC Microbiology</i> , 2012, 12, 158.	1.3	191
15	Gastric tone determines the sensitivity of the stomach to distention. <i>Gastroenterology</i> , 1995, 108, 330-336.	0.6	175
16	Lipid-induced intestinal gas retention in irritable bowel syndrome. <i>Gastroenterology</i> , 2002, 123, 700-706.	0.6	169
17	The Jejunum of Diarrhea-Predominant Irritable Bowel Syndrome Shows Molecular Alterations in the Tight Junction Signaling Pathway That Are Associated With Mucosal Pathobiology and Clinical Manifestations. <i>American Journal of Gastroenterology</i> , 2012, 107, 736-746.	0.2	169
18	Intestinal gas dynamics and tolerance in humans. <i>Gastroenterology</i> , 1998, 115, 542-550.	0.6	144

#	ARTICLE	IF	CITATIONS
19	Antro-fundic dysfunctions in functional dyspepsia. <i>Gastroenterology</i> , 2003, 124, 1220-1229.	0.6	139
20	Processing faecal samples: a step forward for standards in microbial community analysis. <i>BMC Microbiology</i> , 2014, 14, 112.	1.3	134
21	Prokinetic effects in patients with intestinal gas retention. <i>Gastroenterology</i> , 2002, 122, 1748-1755.	0.6	133
22	The sympathetic nervous system modulates perception and reflex responses to gut distention in humans. <i>Gastroenterology</i> , 1995, 108, 680-686.	0.6	131
23	Abdominal Bloating. <i>Gastroenterology</i> , 2005, 129, 1060-1078.	0.6	121
24	Origin of gas retention and symptoms in patients with bloating. <i>Gastroenterology</i> , 2005, 128, 574-579.	0.6	117
25	Physiological variations in canine gastric tone measured by an electronic barostat. <i>American Journal of Physiology - Renal Physiology</i> , 1985, 248, G229-G237.	1.6	113
26	Attention and distraction: Effects on gut perception. <i>Gastroenterology</i> , 1997, 113, 415-422.	0.6	111
27	Significance of pelvic floor muscles in anal incontinence. <i>Gastroenterology</i> , 2002, 123, 1441-1450.	0.6	110
28	European society of neurogastroenterology and motility guidelines on functional constipation in adults. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13762.	1.6	110
29	Perception and Reflex Relaxation of the Stomach in Response to Gut Distention. <i>Gastroenterology</i> , 1990, 98, 1193-1198.	0.6	108
30	Effectiveness of Combined Pharmacologic and Ligation Therapy in High-Risk Patients With Acute Esophageal Variceal Bleeding. <i>American Journal of Gastroenterology</i> , 2011, 106, 1787-1795.	0.2	108
31	Importance of vagal input in maintaining gastric tone in the dog. <i>Journal of Physiology</i> , 1987, 384, 511-524.	1.3	107
32	Abdominal Distention Results From Caudo-ventral Redistribution of Contents. <i>Gastroenterology</i> , 2009, 136, 1544-1551.	0.6	105
33	miR-16 and miR-125b are involved in barrier function dysregulation through the modulation of claudin-2 and cingulin expression in the jejunum in IBS with diarrhoea. <i>Gut</i> , 2017, 66, 1537.1-1538.	6.1	105
34	Anal gas evacuation and colonic microbiota in patients with flatulence: effect of diet. <i>Gut</i> , 2014, 63, 401-408.	6.1	104
35	Fundamentals of Neurogastroenterology: Physiology/Motility "Sensation. <i>Gastroenterology</i> , 2016, 150, 1292-1304.e2.	0.6	103
36	Applied Principles of Neurogastroenterology: Physiology/Motility Sensation. <i>Gastroenterology</i> , 2006, 130, 1412-1420.	0.6	100

#	ARTICLE	IF	CITATIONS
37	Impaired Viscerosomatic Reflexes and Abdominal-Wall Dystony Associated With Bloating. <i>Gastroenterology</i> , 2006, 130, 1062-1068.	0.6	96
38	Effects of sc<scp>FOS</scp> on the composition of fecal microbiota and anxiety in patients with irritable bowel syndrome: a randomized, double blind, placebo controlled study. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12911.	1.6	95
39	Principles of applied neurogastroenterology: physiology/motility-sensation. <i>Gut</i> , 1999, 45, ii17-ii24.	6.1	94
40	Dietary and lifestyle factors in functional dyspepsia. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2013, 10, 150-157.	8.2	94
41	Increased humoral immunity in the jejunum of diarrhoea-predominant irritable bowel syndrome associated with clinical manifestations. <i>Gut</i> , 2015, 64, 1379-1388.	6.1	94
42	Bowel habit after cholecystectomy: Physiological changes and clinical implications. <i>Gastroenterology</i> , 1996, 111, 617-622.	0.6	90
43	Chronological assessment of mast cell-mediated gut dysfunction and mucosal inflammation in a rat model of chronic psychosocial stress. <i>Brain, Behavior, and Immunity</i> , 2010, 24, 1166-1175.	2.0	88
44	Effects of Prebiotics vs a Diet Low in FODMAPs in Patients With Functional Gut Disorders. <i>Gastroenterology</i> , 2018, 155, 1004-1007.	0.6	88
45	MetaTrans: an open-source pipeline for metatranscriptomics. <i>Scientific Reports</i> , 2016, 6, 26447.	1.6	87
46	Intestinal gas distribution determines abdominal symptoms. <i>Gut</i> , 2003, 52, 1708-1713.	6.1	85
47	Physical Activity and Intestinal Gas Clearance in Patients with Bloating. <i>American Journal of Gastroenterology</i> , 2006, 101, 2552-2557.	0.2	85
48	New Insight Into Intestinal Motor Function via Noninvasive Endoluminal Image Analysis. <i>Gastroenterology</i> , 2008, 135, 1155-1162.	0.6	85
49	Mechanisms of intestinal gas retention in humans: impaired propulsion versus obstructed evacuation. <i>American Journal of Physiology - Renal Physiology</i> , 2001, 281, G138-G143.	1.6	84
50	Generic feature learning for wireless capsule endoscopy analysis. <i>Computers in Biology and Medicine</i> , 2016, 79, 163-172.	3.9	84
51	Randomised clinical trial: the analgesic properties of dietary supplementation with palmitoylethanolamide and polydatin in irritable bowel syndrome. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 45, 909-922.	1.9	81
52	Irritable bowel syndrome diagnosis and management: A simplified algorithm for clinical practice. <i>United European Gastroenterology Journal</i> , 2017, 5, 773-788.	1.6	81
53	Impaired reflex control of intestinal gas transit in patients with abdominal bloating. <i>Gut</i> , 2005, 54, 344-348.	6.1	80
54	Effects of physical activity on intestinal gas transit and evacuation in healthy subjects. <i>American Journal of Medicine</i> , 2004, 116, 536-539.	0.6	78

#	ARTICLE	IF	CITATIONS
55	Perception and reflex responses to intestinal distention in humans are modified by simultaneous or previous stimulation. <i>Gastroenterology</i> , 1995, 109, 1742-1749.	0.6	76
56	Intestinal control of gastric tone. <i>American Journal of Physiology - Renal Physiology</i> , 1985, 249, G501-G509.	1.6	75
57	Dietary Lipids and Functional Gastrointestinal Disorders. <i>American Journal of Gastroenterology</i> , 2013, 108, 737-747.	0.2	75
58	Perception and gut reflexes induced by stimulation of gastrointestinal thermoreceptors in humans. <i>Journal of Physiology</i> , 1997, 502, 215-222.	1.3	72
59	Impaired Small Bowel Gas Propulsion in Patients with Bloating During Intestinal Lipid Infusion. <i>American Journal of Gastroenterology</i> , 2006, 101, 1853-1857.	0.2	68
60	Endogenous cholecystokinin enhances postprandial gastroesophageal reflux in humans through extrasphincteric receptors. <i>Gastroenterology</i> , 1998, 115, 597-604.	0.6	64
61	Bloating and Abdominal Distension: Old Misconceptions and Current Knowledge. <i>American Journal of Gastroenterology</i> , 2017, 112, 1221-1231.	0.2	63
62	Chronic psychosocial stress induces reversible mitochondrial damage and corticotropin-releasing factor receptor type-1 upregulation in the rat intestine and IBS-like gut dysfunction. <i>Psychoneuroendocrinology</i> , 2012, 37, 65-77.	1.3	62
63	Mechanisms of postprandial abdominal bloating and distension in functional dyspepsia. <i>Gut</i> , 2014, 63, 395-400.	6.1	62
64	Nongastrointestinal Disorders in the Irritable Bowel Syndrome. <i>Digestion</i> , 2000, 62, 66-72.	1.2	61
65	Role of Alimentation in Irritable Bowel Syndrome. <i>Digestion</i> , 2003, 67, 225-233.	1.2	61
66	Vagally mediated gastric relaxation induced by intestinal nutrients in the dog. <i>American Journal of Physiology - Renal Physiology</i> , 1986, 251, G727-G735.	1.6	59
67	Somatic stimulation reduces perception of gut distention in humans. <i>Gastroenterology</i> , 1994, 107, 1636-1642.	0.6	55
68	Acute experimental stress evokes a differential gender-determined increase in human intestinal macromolecular permeability. <i>Neurogastroenterology and Motility</i> , 2012, 24, 740.	1.6	55
69	Diabetic neuropathy in the gut: pathogenesis and diagnosis. <i>Diabetologia</i> , 2016, 59, 404-408.	2.9	55
70	Gastric distension and duodenal lipid infusion modulate intestinal gas transit and tolerance in humans. <i>American Journal of Gastroenterology</i> , 2002, 97, 2225-2230.	0.2	54
71	Biofeedback-Guided Control of Abdominothoracic Muscular Activity Reduces Regurgitation Episodes in Patients With Rumination. <i>Clinical Gastroenterology and Hepatology</i> , 2015, 13, 100-106.e1.	2.4	54
72	Abdominothoracic Mechanisms of Functional Abdominal Distension and Correction by Biofeedback. <i>Gastroenterology</i> , 2015, 148, 732-739.	0.6	53

#	ARTICLE	IF	CITATIONS
73	Relations among intragastric pressure, postcibal perception, and gastric emptying. American Journal of Physiology - Renal Physiology, 1993, 264, G1112-G1117.	1.6	52
74	Anal sphincteric pressure in fissure-in-ano before and after lateral internal sphincterotomy. Diseases of the Colon and Rectum, 1982, 25, 198-201.	0.7	51
75	Abdomino-Phrenic Dyssynergia in Patients With Abdominal Bloating and Distension. American Journal of Gastroenterology, 2011, 106, 815-819.	0.2	51
76	Sensorial and intestinointestinal reflex pathways in the human jejunum. Gastroenterology, 1991, 101, 1606-1612.	0.6	50
77	Abdominal Accommodation: A Coordinated Adaptation of the Abdominal Wall to Its Content. American Journal of Gastroenterology, 2008, 103, 2807-2815.	0.2	50
78	Intestinal Motility Assessment With Video Capsule Endoscopy: Automatic Annotation of Phasic Intestinal Contractions. IEEE Transactions on Medical Imaging, 2010, 29, 246-259.	5.4	50
79	Modification of small bowel mechanosensitivity by intestinal fat. Gut, 2001, 48, 690-695.	6.1	49
80	Colonic Responses to Gas Loads in Subgroups of Patients With Abdominal Bloating. American Journal of Gastroenterology, 2010, 105, 876-882.	0.2	49
81	Gastrointestinal perception: pathophysiological implications. Neurogastroenterology and Motility, 2002, 14, 229-239.	1.6	48
82	Randomized, Placebo-Controlled Trial of Biofeedback for the Treatment of Rumination. American Journal of Gastroenterology, 2016, 111, 1007-1013.	0.2	48
83	Gas Distribution Within the Human Gut: Effect of Meals. American Journal of Gastroenterology, 2007, 102, 842-849.	0.2	47
84	Influence of body posture on intestinal transit of gas. Gut, 2003, 52, 971-974.	6.1	46
85	Rectal Function and Bowel Habit in Irritable Bowel Syndrome. American Journal of Gastroenterology, 2004, 99, 131-137.	0.2	46
86	The puborectalis muscle. Neurogastroenterology and Motility, 2005, 17, 68-72.	1.6	46
87	Modulation of gut perception in humans by spatial summation phenomena. Journal of Physiology, 1998, 506, 579-587.	1.3	44
88	Intestinal Gas and Bloating: Effect of Prokinetic Stimulation. American Journal of Gastroenterology, 2008, 103, 2036-2042.	0.2	44
89	Constipation: a potential cause of pelvic floor damage?. Neurogastroenterology and Motility, 2010, 22, 150-e48.	1.6	44
90	Innervation Zones of the External Anal Sphincter in Healthy Male and Female Subjects. Digestion, 2004, 69, 123-130.	1.2	42

#	ARTICLE	IF	CITATIONS
91	Impaired intestinal gas propulsion in manometrically proven dysmotility and in irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2010, 22, 401-e92.	1.6	42
92	Reflex control of intestinal gas dynamics and tolerance in humans. <i>American Journal of Physiology - Renal Physiology</i> , 2004, 286, G89-G94.	1.6	41
93	Downregulation of mucosal mast cell activation and immune response in diarrhoea-irritable bowel syndrome by oral disodium cromoglycate: A pilot study. <i>United European Gastroenterology Journal</i> , 2017, 5, 887-897.	1.6	40
94	Post-infectious IBS: Defining its clinical features and prognosis using an internet-based survey. <i>United European Gastroenterology Journal</i> , 2018, 6, 1245-1253.	1.6	40
95	Predictors of Response to Biofeedback Treatment in Anal Incontinence. <i>Diseases of the Colon and Rectum</i> , 2003, 46, 1218-1225.	0.7	39
96	Sites of symptomatic gas retention during intestinal lipid perfusion in healthy subjects. <i>Gut</i> , 2004, 53, 661-665.	6.1	39
97	Categorization and Segmentation of Intestinal Content Frames for Wireless Capsule Endoscopy. <i>IEEE Transactions on Information Technology in Biomedicine</i> , 2012, 16, 1341-1352.	3.6	39
98	Metabolic adaptation of colonic microbiota to galactooligosaccharides: a proof-of-concept study. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 45, 670-680.	1.9	39
99	Intestinal gas dynamics: mechanisms and clinical relevance. <i>Gut</i> , 2005, 54, 893-895.	6.1	38
100	The external anal sphincter and the role of surface electromyography. <i>Neurogastroenterology and Motility</i> , 2005, 17, 60-67.	1.6	37
101	Gastric sensitivity and reflexes: basic mechanisms underlying clinical problems. <i>Journal of Gastroenterology</i> , 2014, 49, 206-218.	2.3	37
102	Pressure activity patterns in the canine proximal stomach: response to distension. <i>American Journal of Physiology - Renal Physiology</i> , 1984, 247, G265-G272.	1.6	36
103	Symptomatic responses to stimulation of sensory pathways in the jejunum. <i>American Journal of Physiology - Renal Physiology</i> , 1992, 263, G673-G677.	1.6	35
104	Functional gut disorders or disordered gut function? Small bowel dysmotility evidenced by an original technique. <i>Neurogastroenterology and Motility</i> , 2012, 24, 223.	1.6	34
105	Reflex gastric relaxation in response to distention of the duodenum. <i>American Journal of Physiology - Renal Physiology</i> , 1987, 252, G595-G601.	1.6	32
106	Intestinal tone and gas motion. <i>Neurogastroenterology and Motility</i> , 2006, 18, 905-910.	1.6	32
107	Nitrgergic and purinergic mechanisms evoke inhibitory neuromuscular transmission in the human small intestine. <i>Neurogastroenterology and Motility</i> , 2014, 26, 419-429.	1.6	32
108	High-resolution manometry in patients with idiopathic inflammatory myopathy: Elevated prevalence of esophageal involvement and differences according to autoantibody status and clinical subset. <i>Muscle and Nerve</i> , 2017, 56, 386-392.	1.0	32

#	ARTICLE	IF	CITATIONS
109	Differential Effects of Western and Mediterranean-Type Diets on Gut Microbiota: A Metagenomics and Metabolomics Approach. <i>Nutrients</i> , 2021, 13, 2638.	1.7	32
110	Classification of functional bowel disorders by objective physiological criteria based on endoluminal image analysis. <i>American Journal of Physiology - Renal Physiology</i> , 2015, 309, G413-G419.	1.6	31
111	Intestinal gas content and distribution in health and in patients with functional gut symptoms. <i>Neurogastroenterology and Motility</i> , 2015, 27, 1249-1257.	1.6	30
112	Colonic content: effect of diet, meals, and defecation. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12930.	1.6	30
113	Hypersensitivity in functional gastrointestinal disorders. <i>Gut</i> , 2002, 51, i25-i28.	6.1	29
