#	ARTICLE	IF	CITATIONS
1	The Intestinal Gas Questionnaire (IGQ): Psychometric validation of a new instrument for measuring gas-related symptoms and their impact on daily life among general population and irritable bowel syndrome. <i>Neurogastroenterology and Motility</i> , 2022, 34, e14202.	1.6	5
2	Quantitative GCâ€“TCD Measurements of Major Flatus Components: A Preliminary Analysis of the Diet Effect. <i>Sensors</i> , 2022, 22, 838.	2.1	7
3	Human gut metatranscriptome changes induced by a fermented milk product are associated with improved tolerance to a flatulogenic diet. <i>Computational and Structural Biotechnology Journal</i> , 2022, 20, 1632-1641.	1.9	0
4	Effect of colonic distension on small bowel motility measured by jejunal high-resolution manometry. <i>Neurogastroenterology and Motility</i> , 2022, , e14351.	1.6	6
5	Mucosal Plasma Cell Activation and Proximity to Nerve Fibres Are Associated with Glycocalyx Reduction in Diarrhoea-Predominant Irritable Bowel Syndrome: Jejunal Barrier Alterations Underlying Clinical Manifestations. <i>Cells</i> , 2022, 11, 2046.	1.8	4
6	Abdominothoracic Postural Tone Influences the Sensations Induced by Meal Ingestion. <i>Nutrients</i> , 2021, 13, 658.	1.7	9
7	Gastrointestinal Contributions to the Postprandial Experience. <i>Nutrients</i> , 2021, 13, 893.	1.7	6
8	Differential Effects of Western and Mediterranean-Type Diets on Gut Microbiota: A Metagenomics and Metabolomics Approach. <i>Nutrients</i> , 2021, 13, 2638.	1.7	32
9	Propagation patterns of jejunal motor activity measured by high-resolution water-perfused manometry. <i>Neurogastroenterology and Motility</i> , 2021, 33, e14240.	1.6	7
10	A Fermented Milk Product Containing <i>B. lactis</i> CNCM I-2494 Improves the Tolerance of a Plant-Based Diet in Patients with Disorders of Gut-Brain Interactions. <i>Nutrients</i> , 2021, 13, 4542.	1.7	1
11	Correction of Dyssynergic Defecation, but Not Fiber Supplementation, Reduces Symptoms of Functional Dyspepsia in Patients With Constipation in a Randomized Trial. <i>Clinical Gastroenterology and Hepatology</i> , 2020, 18, 2463-2470.e1.	2.4	7
12	European society of neurogastroenterology and motility guidelines on functional constipation in adults. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13762.	1.6	110
13	WCE polyp detection with triplet based embeddings. <i>Computerized Medical Imaging and Graphics</i> , 2020, 86, 101794.	3.5	16
14	Responses to the Letter to the Editor by Bruscianno et al.. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13981.	1.6	1
15	Overexpression of corticotropin-releasing factor in intestinal mucosal eosinophils is associated with clinical severity in Diarrhea-Predominant Irritable Bowel Syndrome. <i>Scientific Reports</i> , 2020, 10, 20706.	1.6	21
16	Motor dysfunction of the gut in cystic fibrosis. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13883.	1.6	16
17	European Society for Neurogastroenterology and Motility recommendations for conducting gastrointestinal motility and function testing in the recovery phase of the COVID-19 pandemic. <i>Neurogastroenterology and Motility</i> , 2020, 32, e13930.	1.6	15
18	Sex Differences and Commonalities in the Impact of a Palatable Meal on Thalamic and Insular Connectivity. <i>Nutrients</i> , 2020, 12, 1627.	1.7	3

#	ARTICLE	IF	CITATIONS
19	A Fermented Milk Product with <i>B. lactis</i> CNCM I-2494 and Lactic Acid Bacteria Improves Gastrointestinal Comfort in Response to a Challenge Diet Rich in Fermentable Residues in Healthy Subjects. <i>Nutrients</i> , 2020, 12, 320.	1.7	7
20	Food, Eating, and the Gastrointestinal Tract. <i>Nutrients</i> , 2020, 12, 986.	1.7	29
21	A scalable approach to T2-MRI colon segmentation. <i>Medical Image Analysis</i> , 2020, 63, 101697.	7.0	8
22	Peripheral Corticotropin-Releasing Factor Triggers Jejunal Mast Cell Activation and Abdominal Pain in Patients With Diarrhea-Predominant Irritable Bowel Syndrome. <i>American Journal of Gastroenterology</i> , 2020, 115, 2047-2059.	0.2	16
23	Barostat Measurement and Other Tests of Gastrointestinal Sensitivity. , 2020, , 244-247.		0
24	Testing the Food Experience in Healthy Human Volunteers: a Proof-of-Concept Study. <i>Journal of Gastrointestinal and Liver Diseases</i> , 2020, 29, 65-68.	0.5	0
25	Enteric neuron density correlates with clinical features of severe gut dysmotility. <i>American Journal of Physiology - Renal Physiology</i> , 2019, 317, G793-G801.	1.6	15
26	Abdominal distension after eating lettuce: The role of intestinal gas evaluated in vitro and by abdominal CT imaging. <i>Neurogastroenterology and Motility</i> , 2019, 31, e13703.	1.6	11
27	Gut epithelial and vascular barrier abnormalities in patients with chronic intestinal pseudo-obstruction. <i>Neurogastroenterology and Motility</i> , 2019, 31, e13652.	1.6	6
28	Biological Response to Meal Ingestion: Gender Differences. <i>Nutrients</i> , 2019, 11, 702.	1.7	18
29	Reply. <i>Gastroenterology</i> , 2019, 156, 1223.	0.6	0
30	Meal Enjoyment and Tolerance in Women and Men. <i>Nutrients</i> , 2019, 11, 119.	1.7	13
31	Influence of Eating Schedule on the Postprandial Response: Gender Differences. <i>Nutrients</i> , 2019, 11, 401.	1.7	8
32	Meal composition influences postprandial sensations independently of valence and gustation. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13337.	1.6	6
33	Biogastronomy: Factors that determine the biological response to meal ingestion. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13309.	1.6	10
34	Decreased TESK1-mediated cofilin 1 phosphorylation in the jejunum of IBS-D patients may explain increased female predisposition to epithelial dysfunction. <i>Scientific Reports</i> , 2018, 8, 2255.	1.6	18
35	Education of the postprandial experience by a sensory-cognitive intervention. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13197.	1.6	8
36	Comparison between small bowel manometric patterns and full-thickness biopsy histopathology in severe intestinal dysmotility. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13219.	1.6	27

#	ARTICLE	IF	CITATIONS
37	Effects of meal palatability on postprandial sensations. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13248.	1.6	8
38	Probiotics in irritable bowel syndrome: Where are we?. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13513.	1.6	28
39	Postinfectious IBS: Defining its clinical features and prognosis using an internet-based survey. <i>United European Gastroenterology Journal</i> , 2018, 6, 1245-1253.	1.6	40
40	Quasi-automatic Colon Segmentation on T2-MRI Images with Low User Effort. <i>Lecture Notes in Computer Science</i> , 2018, , 638-647.	1.0	2
41	Functional neuromuscular impairment in severe intestinal dysmotility. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13458.	1.6	9
42	Effects of Prebiotics vs a Diet Low in FODMAPs in Patients With Functional Gut Disorders. <i>Gastroenterology</i> , 2018, 155, 1004-1007.	0.6	88
43	Metabolomic signature of the postprandial experience. <i>Neurogastroenterology and Motility</i> , 2018, 30, e13447.	1.6	7
44	Effect of prucalopride on intestinal gas tolerance in patients with functional bowel disorders and constipation. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2017, 32, 1457-1462.	1.4	12
45	Metabolic adaptation of colonic microbiota to galactooligosaccharides: a proof-of-concept study. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 45, 670-680.	1.9	39
46	Relation between cognitive and hedonic responses to a meal. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13011.	1.6	10
47	Brain networks associated with cognitive and hedonic responses to a meal. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13031.	1.6	15
48	Deep Learning Features for Wireless Capsule Endoscopy Analysis. <i>Lecture Notes in Computer Science</i> , 2017, , 326-333.	1.0	1
49	miR-16 and miR-125b are involved in barrier function dysregulation through the modulation of claudin-2 and cingulin expression in the jejunum in IBS with diarrhoea. <i>Gut</i> , 2017, 66, 1537.1-1538.	6.1	105
50	Randomised clinical trial: the analgesic properties of dietary supplementation with palmitoylethanolamide and polydatin in irritable bowel syndrome. <i>Alimentary Pharmacology and Therapeutics</i> , 2017, 45, 909-922.	1.9	81
51	Colonic gas homeostasis: Mechanisms of adaptation following HOSTG904 galactooligosaccharide use in humans. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13080.	1.6	27
52	Effect of Chicory-derived Inulin on Abdominal Sensations and Bowel Motor Function. <i>Journal of Clinical Gastroenterology</i> , 2017, 51, 619-625.	1.1	25
53	Bloating and Abdominal Distension: Old Misconceptions and Current Knowledge. <i>American Journal of Gastroenterology</i> , 2017, 112, 1221-1231.	0.2	63
54	The role of incongruence between the perceived functioning by patients and clinicians in the detection of psychological distress among functional and motor digestive disorders. <i>Journal of Psychosomatic Research</i> , 2017, 99, 112-119.	1.2	4

#	ARTICLE	IF	CITATIONS
55	Appetite influences the responses to meal ingestion. <i>Neurogastroenterology and Motility</i> , 2017, 29, e13072.	1.6	12
56	High-resolution manometry in patients with idiopathic inflammatory myopathy: Elevated prevalence of esophageal involvement and differences according to autoantibody status and clinical subset. <i>Muscle and Nerve</i> , 2017, 56, 386-392.	1.0	32
57	Downregulation of mucosal mast cell activation and immune response in diarrhoea-irritable bowel syndrome by oral disodium cromoglycate: A pilot study. <i>United European Gastroenterology Journal</i> , 2017, 5, 887-897.	1.6	40
58	Irritable bowel syndrome diagnosis and management: A simplified algorithm for clinical practice. <i>United European Gastroenterology Journal</i> , 2017, 5, 773-788.	1.6	81
59	5. Klinik., 2017, , .		0
60	Correction of Abdominal Distention by Biofeedback-Guided Control of Abdominothoracic Muscular Activity in a Randomized, Placebo-Controlled Trial. <i>Clinical Gastroenterology and Hepatology</i> , 2017, 15, 1922-1929.	2.4	15
61	Functional dyspepsia. <i>Nature Reviews Disease Primers</i> , 2017, 3, 17081.	18.1	226
62	Effects of sc<scp>FOS</scp> on the composition of fecal microbiota and anxiety in patients with irritable bowel syndrome: a randomized, double blind, placebo controlled study. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12911.	1.6	95
63	Colonic content: effect of diet, meals, and defecation. <i>Neurogastroenterology and Motility</i> , 2017, 29, e12930.	1.6	30
64	Cognitive and hedonic responses to meal ingestion correlate with changes in circulating metabolites. <i>Neurogastroenterology and Motility</i> , 2016, 28, 1806-1814.	1.6	27
65	Colonic content in health and its relation to functional gut symptoms. <i>Neurogastroenterology and Motility</i> , 2016, 28, 849-854.	1.6	13
66	333 Impact of a Pleasant Meal on Reward and Gustatory-Related Brain Networks. <i>Gastroenterology</i> , 2016, 150, S78.	0.6	3
67	Randomized, Placebo-Controlled Trial of Biofeedback for the Treatment of Rumination. <i>American Journal of Gastroenterology</i> , 2016, 111, 1007-1013.	0.2	48
68	Fundamentals of Neurogastroenterology: Physiology/Motility â€“ Sensation. <i>Gastroenterology</i> , 2016, 150, 1292-1304.e2.	0.6	103
69	Incongruence between Clinicians' Assessment and Self-Reported Functioning Is Related to Psychopathology among Patients Diagnosed with Gastrointestinal Disorders. <i>Psychotherapy and Psychosomatics</i> , 2016, 85, 244-245.	4.0	5
70	MetaTrans: an open-source pipeline for metatranscriptomics. <i>Scientific Reports</i> , 2016, 6, 26447.	1.6	87
71	Generic feature learning for wireless capsule endoscopy analysis. <i>Computers in Biology and Medicine</i> , 2016, 79, 163-172.	3.9	84
72	Effect of selective CCK<sub>1</sub> receptor antagonism on accommodation and tolerance of intestinal gas in functional gut disorders. <i>Journal of Gastroenterology and Hepatology (Australia)</i> , 2016, 31, 288-293.	1.4	8

#	ARTICLE	IF	CITATIONS
73	Diabetic neuropathy in the gut: pathogenesis and diagnosis. <i>Diabetologia</i> , 2016, 59, 404-408.	2.9	55
74	An exploratory study comparing psychological profiles and its congruence with clinical performance among patients with functional or motility digestive disorders. <i>Journal of Health Psychology</i> , 2016, 21, 2590-2599.	1.3	4
75	High Resolution Esophageal Manometry in Patients with Chagas Disease: A Cross-Sectional Evaluation. <i>PLoS Neglected Tropical Diseases</i> , 2016, 10, e0004416.	1.3	23
76	Digestive Symptoms in Healthy People and Subjects With Irritable Bowel Syndrome. <i>Journal of Clinical Gastroenterology</i> , 2015, 49, e64-e70.	1.1	21
77	Reduction of butyrate- and methane-producing microorganisms in patients with Irritable Bowel Syndrome. <i>Scientific Reports</i> , 2015, 5, 12693.	1.6	248
78	The Intestinal Gas Questionnaire: development of a new instrument for measuring gas-related symptoms and their impact on daily life. <i>Neurogastroenterology and Motility</i> , 2015, 27, 885-898.	1.6	9
79	Intestinal gas content and distribution in health and in patients with functional gut symptoms. <i>Neurogastroenterology and Motility</i> , 2015, 27, 1249-1257.	1.6	30
80	Accumulative effect of food residues on intestinal gas production. <i>Neurogastroenterology and Motility</i> , 2015, 27, 1621-1628.	1.6	19
81	Digestive, cognitive and hedonic responses to a meal. <i>Neurogastroenterology and Motility</i> , 2015, 27, 389-396.	1.6	22
82	Intestinal gas homeostasis: disposal pathways. <i>Neurogastroenterology and Motility</i> , 2015, 27, 363-369.	1.6	17
83	Abdominothoracic Mechanisms of Functional Abdominal Distension and Correction by Biofeedback. <i>Gastroenterology</i> , 2015, 148, 732-739.	0.6	53
84	Motility bar: A new tool for motility analysis of endoluminal videos. <i>Computers in Biology and Medicine</i> , 2015, 65, 320-330.	3.9	5
85	Assessment of Rectocolonic Morphology and Function in Patients with Chagas Disease in Barcelona (Spain). <i>American Journal of Tropical Medicine and Hygiene</i> , 2015, 92, 898-902.	0.6	8
86	Classification of functional bowel disorders by objective physiological criteria based on endoluminal image analysis. <i>American Journal of Physiology - Renal Physiology</i> , 2015, 309, G413-G419.	1.6	31
87	Biofeedback-Guided Control of Abdominothoracic Muscular Activity Reduces Regurgitation Episodes in Patients With Rumination. <i>Clinical Gastroenterology and Hepatology</i> , 2015, 13, 100-106.e1.	2.4	54
88	Increased humoral immunity in the jejunum of diarrhoea-predominant irritable bowel syndrome associated with clinical manifestations. <i>Gut</i> , 2015, 64, 1379-1388.	6.1	94
89	Anal gas evacuation and colonic microbiota in patients with flatulence: effect of diet. <i>Gut</i> , 2014, 63, 401-408.	6.1	104
90	Intestinal event segmentation for endoluminal video analysis. , 2014, , .		2

#	ARTICLE	IF	CITATIONS
91	Nitrgergic and purinergic mechanisms evoke inhibitory neuromuscular transmission in the human small intestine. <i>Neurogastroenterology and Motility</i> , 2014, 26, 419-429.	1.6	32
92	Effect of a low- $\epsilon$ flatulogenic diet in patients with flatulence and functional digestive symptoms. <i>Neurogastroenterology and Motility</i> , 2014, 26, 779-785.	1.6	24
93	Gastric sensitivity and reflexes: basic mechanisms underlying clinical problems. <i>Journal of Gastroenterology</i> , 2014, 49, 206-218.	2.3	37
94	Mechanisms of postprandial abdominal bloating and distension in functional dyspepsia. <i>Gut</i> , 2014, 63, 395-400.	6.1	62
95	Processing faecal samples: a step forward for standards in microbial community analysis. <i>BMC Microbiology</i> , 2014, 14, 112.	1.3	134
96	Detection of Wrinkle Frames in Endoluminal Videos Using Betweenness Centrality Measures for Images. <i>IEEE Journal of Biomedical and Health Informatics</i> , 2014, 18, 1831-1838.	3.9	11
97	Vitamin E and Vitamin E Acetate Absorption from Self-assembly Systems under Pancreas Insufficiency Conditions. <i>Chimia</i> , 2014, 68, 129.	0.3	9
98	Dietary and lifestyle factors in functional dyspepsia. <i>Nature Reviews Gastroenterology and Hepatology</i> , 2013, 10, 150-157.	8.2	94
99	Adaptable image cuts for motility inspection using WCE. <i>Computerized Medical Imaging and Graphics</i> , 2013, 37, 72-80.	3.5	16
100	Dietary Lipids and Functional Gastrointestinal Disorders. <i>American Journal of Gastroenterology</i> , 2013, 108, 737-747.	0.2	75
101	Diarrhoea-predominant irritable bowel syndrome: an organic disorder with structural abnormalities in the jejunal epithelial barrier. <i>Gut</i> , 2013, 62, 1160-1168.	6.1	229
102	Double-balloon jejunal perfusion to compare absorption of vitamin E and vitamin E acetate in healthy volunteers under maldigestion conditions. <i>European Journal of Clinical Nutrition</i> , 2013, 67, 202-206.	1.3	20
103	Abdominal accommodation induced by meal ingestion: differential responses to gastric and colonic volume loads. <i>Neurogastroenterology and Motility</i> , 2013, 25, 339.	1.6	19
104	Mechanisms of abdominal distension in severe intestinal dysmotility: abdomino $\epsilon$ thoracic response to gut retention. <i>Neurogastroenterology and Motility</i> , 2013, 25, e389-94.	1.6	23
105	An Application for Efficient Error-Free Labeling of Medical Images. <i>Intelligent Systems Reference Library</i> , 2013, , 1-16.	1.0	0
106	The Jejunum of Diarrhea-Predominant Irritable Bowel Syndrome Shows Molecular Alterations in the Tight Junction Signaling Pathway That Are Associated With Mucosal Pathobiology and Clinical Manifestations. <i>American Journal of Gastroenterology</i> , 2012, 107, 736-746.	0.2	169
107	Categorization and Segmentation of Intestinal Content Frames for Wireless Capsule Endoscopy. <i>IEEE Transactions on Information Technology in Biomedicine</i> , 2012, 16, 1341-1352.	3.6	39
108	Mo1170 Flatulence: Is it What it Seems? Clinical, Physiological and Microbiological Features. <i>Gastroenterology</i> , 2012, 142, S-611-S-612.	0.6	5
