DETED R C.DANT

#	Article	IF	CITATIONS
1	Rapid adaptive radiation of Darwin's finches depends on ancestral genetic modules. Science Advances, 2022, 8, .	10.3	18
2	Morphological ghosts of introgression in Darwin's finch populations. Proceedings of the National Academy of Sciences of the United States of America, 2021, 118, .	7.1	9
3	A multispecies BCO2 beak color polymorphism in the Darwin's finch radiation. Current Biology, 2021, 31, 5597-5604.e7.	3.9	14
4	Female-biased gene flow between two species of Darwin's finches. Nature Ecology and Evolution, 2020, 4, 979-986.	7.8	21
5	Lizards, toepads, and the ghost of hurricanes past. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 11194-11196.	7.1	5
6	Triad hybridization via a conduit species. Proceedings of the National Academy of Sciences of the United States of America, 2020, 117, 7888-7896.	7.1	23
7	Hybridization increases population variation during adaptive radiation. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 23216-23224.	7.1	87
8	Hybridization in human evolution: Insights from other organisms. Evolutionary Anthropology, 2019, 28, 189-209.	3.4	57
9	Adult sex ratio influences mate choice in Darwin's finches. Proceedings of the National Academy of Sciences of the United States of America, 2019, 116, 12373-12382.	7.1	29
10	John Tyler Bonner: Remembering a scientific pioneer. Journal of Experimental Zoology Part B: Molecular and Developmental Evolution, 2019, 332, 365-370.	1.3	2
11	Rapid hybrid speciation in Darwin's finches. Science, 2018, 359, 224-228.	12.6	327
12	Role of sexual imprinting in assortative mating and premating isolation in Darwin's finches. Proceedings of the National Academy of Sciences of the United States of America, 2018, 115, E10879-E10887.	7.1	30
13	Watching speciation in action. Science, 2017, 355, 910-911.	12.6	18
14	Evolution caused by extreme events. Philosophical Transactions of the Royal Society B: Biological Sciences, 2017, 372, 20160146.	4.0	170
15	Gene flow, ancient polymorphism, and ecological adaptation shape the genomic landscape of divergence among Darwin's finches. Genome Research, 2017, 27, 1004-1015.	5.5	152
16	Evolution, climate change, and extreme events. Science, 2017, 357, 451-452.	12.6	32
17	Ecology and Evolution of Darwin's Finches (Princeton Science Library Edition). , 2017, , .		34
18	Introgressive hybridization and natural selection in Darwin's finches. Biological Journal of the Linnean Society, 2016, 117, 812-822.	1.6	45

#	Article	IF	CITATIONS
19	Demographic routes to variability and regulation in bird populations. Nature Communications, 2016, 7, 12001.	12.8	74
20	A beak size locus in Darwin's finches facilitated character displacement during a drought. Science, 2016, 352, 470-474.	12.6	206
21	Adaptive radiation of Darwin's finches revisited using whole genome sequencing. BioEssays, 2016, 38, 14-20.	2.5	30
22	Solutions for Archiving Data in Long-Term Studies: A Reply to Whitlock et al Trends in Ecology and Evolution, 2016, 31, 85-87.	8.7	10
23	Evolution of Darwin's finches and their beaks revealed by genome sequencing. Nature, 2015, 518, 371-375.	27.8	766
24	Archiving Primary Data: Solutions for Long-Term Studies. Trends in Ecology and Evolution, 2015, 30, 581-589.	8.7	98
25	Speciation undone. Nature, 2014, 507, 178-179.	27.8	24
26	Synergism of Natural Selection and Introgression in the Origin of a New Species. American Naturalist, 2014, 183, 671-681.	2.1	27
27	Hybrid ancestry of an island subspecies of Galápagos mockingbird explains discordant gene trees. Molecular Phylogenetics and Evolution, 2013, 69, 581-592.	2.7	14
28	Causes of lifetime fitness of Darwin's finches in a fluctuating environment. Proceedings of the National Academy of Sciences of the United States of America, 2011, 108, 674-679.	7.1	65
29	Multilocus genotypes from Charles Darwin's finches: biodiversity lost since the voyage of the <i>Beagle</i> . Philosophical Transactions of the Royal Society B: Biological Sciences, 2010, 365, 1009-1018.	4.0	14
30	Songs of Darwin's finches diverge when a new species enters the community. Proceedings of the National Academy of Sciences of the United States of America, 2010, 107, 20156-20163.	7.1	126
31	Conspecific versus heterospecific gene exchange between populations of Darwin's finches. Philosophical Transactions of the Royal Society B: Biological Sciences, 2010, 365, 1065-1076.	4.0	64
32	Sympatric Speciation, Immigration, and Hybridization in Island Birds. , 2009, , 326-357.		8
33	The secondary contact phase of allopatric speciation in Darwin's finches. Proceedings of the National Academy of Sciences of the United States of America, 2009, 106, 20141-20148.	7.1	116
34	Fission and fusion of Darwin's finches populations. Philosophical Transactions of the Royal Society B: Biological Sciences, 2008, 363, 2821-2829.	4.0	133
35	Pedigrees, assortative mating and speciation in Darwin's finches. Proceedings of the Royal Society B: Biological Sciences, 2008, 275, 661-668.	2.6	36
36	Evolution of Character Displacement in Darwin's Finches. Science, 2006, 313, 224-226.	12.6	763

#	Article	IF	CITATIONS
37	THE ORIGIN AND DIVERSIFICATION OF GALAPAGOS MOCKINGBIRDS. Evolution; International Journal of Organic Evolution, 2006, 60, 370-382.	2.3	128
38	The calmodulin pathway and evolution of elongated beak morphology in Darwin's finches. Nature, 2006, 442, 563-567.	27.8	564
39	Possible human impacts on adaptive radiation: beak size bimodality in Darwin's finches. Proceedings of the Royal Society B: Biological Sciences, 2006, 273, 1887-1894.	2.6	122
40	Opportunistic predation and offspring sex ratios of cicada-killer wasps (Sphecius speciosus Drury). Ecological Entomology, 2006, 31, 539-547.	2.2	19
41	Darwin's finches. Current Biology, 2005, 15, R614-R615.	3.9	8
42	The priming of periodical cicada life cycles. Trends in Ecology and Evolution, 2005, 20, 169-174.	8.7	33
43	Hybridization in the Recent Past. American Naturalist, 2005, 166, 56-67.	2.1	163
44	CONVERGENT EVOLUTION OF DARWIN'S FINCHES CAUSED BY INTROGRESSIVE HYBRIDIZATION AND SELECTION. Evolution; International Journal of Organic Evolution, 2004, 58, 1588.	2.3	15
45	<i>Bmp4</i> and Morphological Variation of Beaks in Darwin's Finches. Science, 2004, 305, 1462-1465.	12.6	706
46	CONVERGENT EVOLUTION OF DARWIN'S FINCHES CAUSED BY INTROGRESSIVE HYBRIDIZATION AND SELECTION. Evolution; International Journal of Organic Evolution, 2004, 58, 1588-1599.	2.3	174
47	Reversed sexual dimorphism in the beak of a finch. Ibis, 2003, 145, 341-343.	1.9	10
48	INBREEDING AND INTERBREEDING IN DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 2003, 57, 2911-2916.	2.3	32
49	Founder effects and silvereyes. Proceedings of the National Academy of Sciences of the United States of America, 2002, 99, 7818-7820.	7.1	15
50	ENVIRONMENTAL CONDITIONS AFFECT THE MAGNITUDE OF INBREEDING DEPRESSION IN SURVIVAL OF DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 2002, 56, 1229.	2.3	16
51	Unpredictable Evolution in a 30-Year Study of Darwin's Finches. Science, 2002, 296, 707-711.	12.6	1,068
52	Simulating secondary contact in allopatric speciation: an empirical test of premating isolation. Biological Journal of the Linnean Society, 2002, 76, 545-556.	1.6	59
53	ENVIRONMENTAL CONDITIONS AFFECT THE MAGNITUDE OF INBREEDING DEPRESSION IN SURVIVAL OF DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 2002, 56, 1229-1239.	2.3	190
54	William D. Hamilton, 1 August 1936 - 7 March 2000. Proceedings of the American Philosophical Society, 2002, 146, 387-94.	0.5	0

#	Article	IF	CITATIONS
55	On the Origin of Darwin's Finches. Molecular Biology and Evolution, 2001, 18, 299-311.	8.9	179
56	Evolution of Mhc classÂll B genes in Darwin's finches and their closest relatives: birth of a new gene. Immunogenetics, 2001, 53, 792-801.	2.4	24
57	Heritability of morphological traits in Darwin's Finches: misidentified paternity and maternal effects. Heredity, 2001, 87, 325-336.	2.6	127
58	A population founded by a single pair of individuals: establishment, expansion, and evolution. Genetica, 2001, 112/113, 359-382.	1.1	70
59	R.C.L. Perkins and evolutionary radiations on islands. Oikos, 2000, 89, 195-201.	2.7	6
60	The allopatric phase of speciation: the sharp-beaked ground finch (Geospiza difficilis) on the Galápagos islands. Biological Journal of the Linnean Society, 2000, 69, 287-317.	1.6	63
61	EFFECTS OF EL NINÌ£O EVENTS ON DARWIN'S FINCH PRODUCTIVITY. Ecology, 2000, 81, 2442-2457.	3.2	62
62	Non–random fitness variation in two populations of Darwin's finches. Proceedings of the Royal Society B: Biological Sciences, 2000, 267, 131-138.	2.6	63
63	Effects of El Nino Events on Darwin's Finch Productivity. Ecology, 2000, 81, 2442.	3.2	102
64	Vocalizations of Darwin's Finch relatives. Ibis, 2000, 142, 680-682.	1.9	1
65	Low Extrapair Paternity in the Cactus Finch (Geospiza scandens). Auk, 1999, 116, 252-256.	1.4	51
66	A phylogeny of Darwin's finches based on microsatellite DNA length variation. Proceedings of the Royal Society B: Biological Sciences, 1999, 266, 321-329.	2.6	181
67	Competition exposed by knight?. Nature, 1998, 396, 216-217.	27.8	2
68	Hybridization, Sexual Imprinting, and Mate Choice. American Naturalist, 1997, 149, 1-28.	2.1	246
69	Mating patterns of Darwin's Finch hybrids determined by song and morphology. Biological Journal of the Linnean Society, 1997, 60, 317-343.	1.6	58
70	The Rarest of Darwin's Finches. La Especie Mas Rara de los Pinzones de Darwin. Conservation Biology, 1997, 11, 119-126.	4.7	26
71	Mating patterns of Darwin's Finch hybrids determined by song and morphology. Biological Journal of the Linnean Society, 1997, 60, 317-343.	1.6	10
72	Cultural Inheritance of Song and Its Role in the Evolution of Darwin's Finches. Evolution; International Journal of Organic Evolution, 1996, 50, 2471.	2.3	157

#	Article	IF	CITATIONS
73	High Survival of Darwin's Finch Hybrids: Effects of Beak Morphology and Diets. Ecology, 1996, 77, 500-509.	3.2	176
74	CULTURAL INHERITANCE OF SONG AND ITS ROLE IN THE EVOLUTION OF DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 1996, 50, 2471-2487.	2.3	337
75	The Founding of a New Population of Darwin's Finches. Evolution; International Journal of Organic Evolution, 1995, 49, 229.	2.3	20
76	THE FOUNDING OF A NEW POPULATION OF DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 1995, 49, 229-240.	2.3	44
77	PREDICTING MICROEVOLUTIONARY RESPONSES TO DIRECTIONAL SELECTION ON HERITABLE VARIATION. Evolution; International Journal of Organic Evolution, 1995, 49, 241-251.	2.3	247
78	Population variation and hybridization: Comparison of finches from two archipelagos. Evolutionary Ecology, 1994, 8, 598-617.	1.2	56
79	Phenotypic and Genetic Effects of Hybridization in Darwin's Finches. Evolution; International Journal of Organic Evolution, 1994, 48, 297.	2.3	191
80	PHENOTYPIC AND GENETIC EFFECTS OF HYBRIDIZATION IN DARWIN'S FINCHES. Evolution; International Journal of Organic Evolution, 1994, 48, 297-316.	2.3	212
81	Demography and the Genetically Effective sizes of Two Populations of Darwin's Finches. Ecology, 1992, 73, 766-784.	3.2	129
82	INBREEDING IN DARWIN'S MEDIUM GROUND FINCHES (<i>GEOSPIZA FORTIS</i>). Evolution; International Journal of Organic Evolution, 1989, 43, 1273-1284.	2.3	69
83	Ecological Consequences of an Exceptionally Strong El Nino Event on Darwin's Finches. Ecology, 1987, 68, 1735-1746.	3.2	94
84	Adult Survivorship in Darwin's Ground Finch (Geospiza) Populations in a Variable Environment. Journal of Animal Ecology, 1987, 56, 797.	2.8	30
85	Oscillating selection on Darwin's finches. Nature, 1987, 327, 511-513.	27.8	282
86	Species recognition in Darwin's finches (Geospiza, Gould). III. Male responses to playback of different song types, dialects and heterospecific songs. Animal Behaviour, 1985, 33, 290-307.	1.9	115
87	Determinants of Morphological Patterns in Communities of Darwin's Finches. American Naturalist, 1984, 123, 175-196.	2.1	253
88	Darwin's Finches (Geospiza) On Isla Daphne Major, Galapagos: Breeding and Feeding Ecology in a Climatically Variable Environment. Ecological Monographs, 1984, 54, 463-489.	5.4	159
89	Recurrent patterns of natural selection in a population of Darwin's finches. Nature, 1984, 309, 787-789.	27.8	214
90	Species recognition in Darwin's finches (Geospiza, Gould) I. Discrimination by morphological cues. Animal Behaviour, 1983, 31, 1139-1153.	1.9	104

#	Article	IF	CITATIONS
91	Species recognition in Darwin's finches (Geospiza, Gould). II. Geographic variation in mate preference. Animal Behaviour, 1983, 31, 1154-1165.	1.9	48
