#	ARTICLE	IF	CITATIONS
1	Promoting good and sustainable work in occupational health education. Occupational Medicine, 2023, 73, 61-65.	1.4	0
2	Unfairness and Stress—An Examination of Two Alternative Models: Organizational-Justice and Effort—Reward Imbalance. International Journal of Public Administration, 2023, 46, 602-612.	2.3	4
3	Adverse employment histories and allostatic load: associations over the working life. Journal of Epidemiology and Community Health, 2022, 76, 374-381.	3.7	11
4	Gender moderates the association between chronic academic stress with top-down and bottom-up attention. Attention, Perception, and Psychophysics, 2022, 84, 383-395.	1.3	6
5	Long-term trends in psychosocial working conditions in Europe—the role of labor market policies. European Journal of Public Health, 2022, 32, 384-391.	0.3	4
6	Comments to Moretti Anfossi <i>et al.</i> (2022) “Work Exposures and Development of Cardiovascular Diseases: A Systematic Review”: What Is Current Scientific Consensus?. Annals of Work Exposures and Health, 2022, , .	1.4	3
7	Stressful work in primary health care and mental health: The role of gender inequities in Brazil. American Journal of Industrial Medicine, 2022, 65, 604-612.	2.1	4
8	Work stress on rise? Comparative analysis of trends in work stressors using the European working conditions survey. International Archives of Occupational and Environmental Health, 2021, 94, 459-474.	2.3	40
9	The effect of exposure to long working hours on alcohol consumption, risky drinking and alcohol use disorder: A systematic review and meta-analysis from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. Environment International, 2021, 146, 106205.	10.0	36
10	Occupational Risks of Recurrent Coronary Heart Disease. Journal of the American College of Cardiology, 2021, 77, 1626-1628.	2.8	3
11	The effect of exposure to long working hours on depression: A systematic review and meta-analysis from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. Environment International, 2021, 155, 106629.	10.0	58
12	Adverse employment histories, work stress and self-reported depression in the French CONSTANCES study. European Journal of Public Health, 2021, 31, 1230-1236.	0.3	4
13	Effort—Reward Imbalance at Work and Drug Misuse: Evidence from a National Survey in the U.S.. International Journal of Environmental Research and Public Health, 2021, 18, 13334.	2.6	6
14	Does engagement in productive activities affect mental health and well-being in older adults with a chronic physical disability? Observational evidence from a Swiss cohort study. Aging and Mental Health, 2020, 24, 732-739.	2.8	12
15	Failed reciprocity in social exchange and wellbeing: evidence from a longitudinal dyadic study in the disability setting. Psychology and Health, 2020, 35, 1134-1150.	2.2	7
16	Social inequalities in the burden of care: a dyadic analysis in the caregiving partners of persons with a physical disability. International Journal for Equity in Health, 2020, 19, 3.	3.5	31
17	Factors associated with labor market participation of persons with traumatic SCI in Switzerland: analyzing the predictive power of social background, health, functional independence, and the environment. Spinal Cord, 2020, 58, 411-422.	1.9	4
18	Associations between change in labour market policies and work stressors: a comparative longitudinal survey data analysis from 27 European countries. BMC Public Health, 2020, 20, 1377.	2.9	5

#	ARTICLE	IF	CITATIONS
19	Systematic review and meta-analysis on exposure to long working hours and risk of ischaemic heart disease – Conclusions are supported by the evidence. Environment International, 2020, 144, 106118.	10.0	3
20	Cumulative Exposure to Long Working Hours and Occurrence of Ischemic Heart Disease: Evidence From the CONSTANCES Cohort at Inception. Journal of the American Heart Association, 2020, 9, e015753.	3.7	13
21	The effect of exposure to long working hours on ischaemic heart disease: A systematic review and meta-analysis from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. Environment International, 2020, 142, 105739.	10.0	95
22	The effect of exposure to long working hours on stroke: A systematic review and meta-analysis from the WHO/ILO Joint Estimates of the Work-related Burden of Disease and Injury. Environment International, 2020, 142, 105746.	10.0	78
23	Health inequalities: the role of work and employment. European Journal of Public Health, 2020, 30, 620-620.	0.3	2
24	Adverse Psychosocial Work Environments and Depression – A Narrative Review of Selected Theoretical Models. Frontiers in Psychiatry, 2020, 11, 66.	2.6	18
25	Social inequalities in medical rehabilitation outcomes – a registry-based study on 219 584 insured persons in Germany. European Journal of Public Health, 2020, 30, 421-426.	0.3	0
26	Cumulative disadvantage during employment careers – The link between employment histories and stressful working conditions. Advances in Life Course Research, 2020, 46, 100358.	1.4	6
27	Effort-Reward Imbalance and Occupational Health. , 2020, , 1-28.		0
28	Effort-Reward Imbalance and Occupational Health. Handbook Series in Occupational Health Sciences, 2020, , 355-382.	0.1	9
29	Concepts and Social Variations of Disability in Working-Age Populations. , 2020, , 53-69.		0
30	Arbeit und gesundheitliche Ungleichheit: Fazit aus einem europäischen Review. Public Health Forum, 2020, 28, 90-92.	0.2	0
31	Concepts and Social Variations of Disability in Working-Age Populations. , 2020, , 1-18.		0
32	Arbeit und Beschäftigung als Determinanten ungleicher Gesundheit. , 2020, , 235-251.		0
33	Siegrist, Johannes. , 2020, , 2038-2040.		0
34	Effort-reward imbalance at work is associated with hair cortisol concentrations: Prospective evidence from the Dresden Burnout Study. Psychoneuroendocrinology, 2019, 109, 104399.	2.7	26
35	Effort-Reward Imbalance, Over-Commitment and Depressive Episodes at Work: Evidence from the ELSA-Brasil Cohort Study. International Journal of Environmental Research and Public Health, 2019, 16, 3025.	2.6	20
36	Does well-being suffer when control in productive activities is low? A dyadic longitudinal analysis in the disability setting. Journal of Psychosomatic Research, 2019, 122, 13-23.	2.6	4

#	ARTICLE	IF	CITATIONS
37	Association Between Reported Long Working Hours and History of Stroke in the CONSTANCES Cohort. <i>Stroke</i> , 2019, 50, 1879-1882.	2.0	26
38	Intragenerational social mobility and depressive symptoms. Results from the French CONSTANCES cohort study. <i>SSM - Population Health</i> , 2019, 7, 100351.	2.7	6
39	Productive activities, mental health and quality of life in disability: exploring the role enhancement and the role strain hypotheses. <i>BMC Psychology</i> , 2019, 7, 1.	2.1	51
40	Effortâ€reward imbalance and long-term benzodiazepine use: longitudinal findings from the CONSTANCES cohort. <i>Journal of Epidemiology and Community Health</i> , 2019, 73, 993-1001.	3.7	6
41	Cost, Gain, and Health. <i>Journal of Occupational and Environmental Medicine</i> , 2019, 61, 898-904.	1.7	12
42	The Role of Leisure-Time Physical Activity in the Change of Work-Related Stress (ERI) over Time. <i>International Journal of Environmental Research and Public Health</i> , 2019, 16, 4839.	2.6	5
43	Adverse employment histories and health functioning: the CONSTANCES study. <i>International Journal of Epidemiology</i> , 2019, 48, 402-414.	1.9	29
44	Toward Screening for High-Risk Benzodiazepine Users in Working Populations. <i>American Journal of Public Health</i> , 2019, 109, 18-19.	2.7	0
45	Is effortâ€reward imbalance at work associated with different domains of health functioning? Baseline results from the French CONSTANCES study. <i>International Archives of Occupational and Environmental Health</i> , 2019, 92, 467-480.	2.3	16
46	Examining Effortâ€Reward Imbalance and Depressive Symptoms Among Turkish University Workers. <i>Workplace Health and Safety</i> , 2019, 67, 131-136.	1.4	9
47	Are there gender differences in associations of effortâ€reward imbalance at work with self-reported doctor-diagnosed depression? Prospective evidence from the German Socio-Economic Panel. <i>International Archives of Occupational and Environmental Health</i> , 2018, 91, 435-443.	2.3	39
48	The Factorial Structure and Psychometric Properties of the Persian Effort-Reward Imbalance Questionnaire. <i>Safety and Health at Work</i> , 2018, 9, 334-338.	0.6	6
49	Associations of work stress with hair cortisol concentrations â€ initial findings from a prospective study. <i>Psychoneuroendocrinology</i> , 2018, 89, 134-137.	2.7	15
50	The Authors Respond. <i>Epidemiology</i> , 2018, 29, e35-e36.	2.7	1
51	Unfair Pay and Health. <i>Management Science</i> , 2018, 64, 1477-1488.	4.1	42
52	Association between effort-reward imbalance and self-reported diabetes mellitus in older U.S. workers. <i>Journal of Psychosomatic Research</i> , 2018, 104, 61-64.	2.6	21
53	Elevated Psychosocial Stress at Work in Patients with Systemic Lupus Erythematosus and Rheumatoid Arthritis. <i>Journal of Rheumatology</i> , 2018, 45, 227-234.	2.0	10
54	Arbeit, Tauschgerechtigkeit und gesundheitliche Ungleichheit. <i>Public Health Forum</i> , 2018, 26, 319-321.	0.2	0

#	ARTICLE	IF	CITATIONS
55	The Authors Respond. <i>Epidemiology</i> , 2018, 29, e13.	2.7	3
56	The role of compensation in explaining harmful effects of overtime work on self-reported heart disease: Preliminary evidence from a Germany prospective cohort study. <i>American Journal of Industrial Medicine</i> , 2018, 61, 861-868.	2.1	2
57	Work Stress and the Development of Chronic Diseases. <i>International Journal of Environmental Research and Public Health</i> , 2018, 15, 536.	2.6	11
58	The impact of loneliness and relationship quality on life satisfaction: A longitudinal dyadic analysis in persons with physical disabilities and their partners. <i>Journal of Psychosomatic Research</i> , 2018, 110, 61-67.	2.6	15
59	WHO/ILO work-related burden of disease and injury: Protocol for systematic reviews of exposure to long working hours and of the effect of exposure to long working hours on ischaemic heart disease. <i>Environment International</i> , 2018, 119, 558-569.	10.0	39
60	Work stress and risk of death in men and women with and without cardiometabolic disease: a multicohort study. <i>Lancet Diabetes and Endocrinology</i> , 2018, 6, 705-713.	11.4	100
61	Stress and Emotions. , 2018, , 319-340.		1
62	Work and family conflicts in employees with spinal cord injury and their caregiving partners. <i>Spinal Cord</i> , 2018, 56, 63-70.	1.9	3
63	Long working hours and depressive symptoms: systematic review and meta-analysis of published studies and unpublished individual participant data. <i>Scandinavian Journal of Work, Environment and Health</i> , 2018, 44, 239-250.	3.4	135
64	Editorial: Challenging Demands in the Modern Workplace. <i>Management Revue</i> , 2018, 29, 1-4.	0.2	1
65	Soziale Stressoren und stressbedingte Erkrankungen. , 2018, , 79-92.		4
66	Student ERI: Psychometric properties of a new brief measure of effort-reward imbalance among university students. <i>Journal of Psychosomatic Research</i> , 2017, 94, 64-67.	2.6	35
67	Longitudinal study of social participation and well-being among persons with spinal cord injury and their partners (pro-WELL). <i>BMJ Open</i> , 2017, 7, e011597.	1.9	19
68	Nine-Year Longitudinal Psychosocial and Mental Outcomes of a Stress Management Intervention at Work Using Psychotherapeutic Principles. <i>Psychotherapy and Psychosomatics</i> , 2017, 86, 113-115.	8.8	10
69	Country differences of psychosocial working conditions in Europe: the role of health and safety management practices. <i>International Archives of Occupational and Environmental Health</i> , 2017, 90, 629-638.	2.3	8
