|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 1  | Enhanced ductility in strongly textured magnesium produced by equal channel angular processing.<br>Scripta Materialia, 2004, 50, 377-381.                                                                                                | 5.2 | 546       |
| 2  | The role of annealing twins during recrystallization of Cu. Acta Materialia, 2007, 55, 4233-4241.                                                                                                                                        | 7.9 | 344       |
| 3  | Texture evolution of five wrought magnesium alloys during route A equal channel angular extrusion: Experiments and simulations. Acta Materialia, 2005, 53, 3135-3146.                                                                    | 7.9 | 289       |
| 4  | Crystallographic texture evolution of three wrought magnesium alloys during equal channel<br>angular extrusion. Materials Science & Engineering A: Structural Materials: Properties,<br>Microstructure and Processing, 2005, 408, 72-78. | 5.6 | 127       |
| 5  | Observation of twin boundary migration in copper during deformation. Materials Science &<br>Engineering A: Structural Materials: Properties, Microstructure and Processing, 2004, 372, 173-179.                                          | 5.6 | 64        |
| 6  | The flow stress behavior of OFHC polycrystalline copper. Acta Materialia, 2001, 49, 2065-2074.                                                                                                                                           | 7.9 | 62        |
| 7  | Thermal Conductivity in Nanocrystalline Ceria Thin Films. Journal of the American Ceramic Society, 2014, 97, 562-569.                                                                                                                    | 3.8 | 58        |
| 8  | Influence of Grain Boundary Character on Creep Void Formation in Alloy 617. Metallurgical and<br>Materials Transactions A: Physical Metallurgy and Materials Science, 2009, 40, 2803-2811.                                               | 2.2 | 55        |
| 9  | Threshold Stress Creep Behavior of Alloy 617 at Intermediate Temperatures. Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science, 2014, 45, 3010-3022.                                                   | 2.2 | 54        |
| 10 | Soft ferromagnetism in amorphous and nanocrystalline alloys. Journal of Magnetism and Magnetic Materials, 2004, 283, 223-230.                                                                                                            | 2.3 | 50        |
| 11 | Identification of silver and palladium in irradiated TRISO coated particles of the AGR-1 experiment.<br>Journal of Nuclear Materials, 2014, 446, 178-186.                                                                                | 2.7 | 50        |
| 12 | Enhancing ductility of AL6061+10wt.% B4C through equal-channel angular extrusion processing.<br>Materials Science & Engineering A: Structural Materials: Properties, Microstructure and<br>Processing, 2005, 410-411, 443-446.           | 5.6 | 47        |
| 13 | Precipitate Redistribution during Creep of Alloy 617. Metallurgical and Materials Transactions A:<br>Physical Metallurgy and Materials Science, 2009, 40, 2812-2823.                                                                     | 2.2 | 44        |
| 14 | Characterization of elevated temperature properties of heat exchanger and steam generator alloys.<br>Nuclear Engineering and Design, 2012, 251, 252-260.                                                                                 | 1.7 | 41        |
| 15 | Ductility enhancement of a heat-treatable magnesium alloy. Scripta Materialia, 2006, 55, 855-858.                                                                                                                                        | 5.2 | 40        |
| 16 | The role of shear stress in the formation of annealing twin boundaries in copper. Scripta Materialia, 2006, 54, 983-986.                                                                                                                 | 5.2 | 33        |
| 17 | Associations of Pd, U and Ag in the SiC layer of neutron-irradiated TRISO fuel. Journal of Nuclear<br>Materials, 2015, 460, 97-106.                                                                                                      | 2.7 | 29        |
| 18 | Creep and creep-rupture of Alloy 617. Nuclear Engineering and Design, 2018, 329, 142-146.                                                                                                                                                | 1.7 | 22        |

| #  | Article                                                                                                                                                                                                                                  | IF  | CITATIONS |
|----|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|-----------|
| 19 | Consolidation of nanocrystalline Fe-1.6 wt%C via low temperature hot isostatic pressing. Scripta<br>Materialia, 1998, 10, 35-43.                                                                                                         | 0.5 | 17        |
| 20 | On the establishment of a method for characterization of material microstructure through<br>laser-based resonant ultrasound spectroscopy. IEEE Transactions on Ultrasonics, Ferroelectrics, and<br>Frequency Control, 2008, 55, 770-777. | 3.0 | 17        |
| 21 | Influence of SiC grain boundary character on fission product transport in irradiated TRISO fuel.<br>Journal of Nuclear Materials, 2016, 473, 83-92.                                                                                      | 2.7 | 14        |
| 22 | In-Situ EBSD Investigation of Recrystallization in ECAE Processed Copper. Materials Science Forum, 2004, 467-470, 1401-1406.                                                                                                             | 0.3 | 12        |
| 23 | Effect of orientation on the tensile and creep properties of coarse-grained INCONEL alloy MA754.<br>Metallurgical and Materials Transactions A: Physical Metallurgy and Materials Science, 2005, 36,<br>785-795.                         | 2.2 | 11        |
| 24 | A Novel Dual-Step Nucleation Pathway in Crystalline Solids under Neutron Irradiation. Scientific Reports, 2018, 8, 98.                                                                                                                   | 3.3 | 9         |
| 25 | Silicon carbide grain boundary distributions, irradiation conditions, and silver retention in irradiated AGR-1 TRISO fuel particles. Nuclear Engineering and Design, 2018, 329, 46-52.                                                   | 1.7 | 9         |
| 26 | Diatomic substitutionals in superconducting Nb(1â^'x)B2. Physica C: Superconductivity and Its Applications, 2006, 449, 1-8.                                                                                                              | 1.2 | 6         |
| 27 | In-situ observations of intrinsic grain boundary structure during thermal cycling. Ultramicroscopy, 1989, 29, 257-265.                                                                                                                   | 1.9 | 5         |
| 28 | Production of carbide and nitride free Fe-0.78C-0.79N. Scripta Materialia, 1999, 40, 1321-1326.                                                                                                                                          | 5.2 | 5         |
| 29 | Local Orientation Gradient and Recrystallization of Deformed Copper. Solid State Phenomena, 2005, 105, 157-162.                                                                                                                          | 0.3 | 4         |
| 30 | Chromium-free nickel alloys for hot sulfuric and sulfur environments. International Journal of<br>Hydrogen Energy, 2011, 36, 4588-4594.                                                                                                  | 7.1 | 4         |
| 31 | Precession electron diffraction for SiC grain boundary characterization in unirradiated TRISO fuel.<br>Nuclear Engineering and Design, 2016, 305, 277-283.                                                                               | 1.7 | 4         |
| 32 | Direct observations of grain boundary dislocation motion due to thermal stresses. Scripta<br>Metallurgica Et Materialia, 1990, 24, 369-374.                                                                                              | 1.0 | 3         |
| 33 | On the origins of ghost boundaries during in situ strain-induced grain-boundary migration.<br>Ultramicroscopy, 1991, 37, 294-309.                                                                                                        | 1.9 | 3         |
| 34 | Edge instabilities in thin plates studied by in situ transmission electron microscopy. Ultramicroscopy, 1993, 51, 81-89.                                                                                                                 | 1.9 | 3         |
| 35 | Edge instabilities in thin plates with spatial variations in thickness. Scripta Metallurgica Et Materialia, 1993, 28, 269-274.                                                                                                           | 1.0 | 2         |
| 36 | Grain boundary structural disruption under thermal stress. Scripta Metallurgica Et Materialia, 1990,<br>24, 1653-1658.                                                                                                                   | 1.0 | 1         |
