#	ARTICLE	IF	CITATIONS
1	Temporal Scaling of Streamflow Elasticity to Precipitation: A Global Analysis. <i>Water Resources Research</i> , 2022, 58, .	4.2	8
2	Correlation between climate and flood indices in Northwestern Italy at different temporal scales. <i>Journal of Hydrology and Hydromechanics</i> , 2022, 70, 178-194.	2.0	2
3	Understanding Heavy Tails of Flood Peak Distributions. <i>Water Resources Research</i> , 2022, 58, .	4.2	23
4	A comparative analysis of the relationship between flood experience and private flood mitigation behaviour in the regions of England. <i>Journal of Flood Risk Management</i> , 2021, 14, e12700.	3.3	5
5	A comparison between generalized least squares regression and top-kriging for homogeneous cross-correlated flood regions. <i>Hydrological Sciences Journal</i> , 2021, 66, 565-579.	2.6	5
6	Do small and large floods have the same drivers of change? A regional attribution analysis in Europe. <i>Hydrology and Earth System Sciences</i> , 2021, 25, 1347-1364.	4.9	39
7	Technical note: Hydrology modelling R packages – a unified analysis of models and practicalities from a user perspective. <i>Hydrology and Earth System Sciences</i> , 2021, 25, 3937-3973.	4.9	17
8	Characteristics and process controls of statistical flood moments in Europe – a data-based analysis. <i>Hydrology and Earth System Sciences</i> , 2021, 25, 5535-5560.	4.9	10
9	Current European flood-rich period exceptional compared with past 500 years. <i>Nature</i> , 2020, 583, 560-566.	27.8	154
10	Impact of Climate and Geology on Event Runoff Characteristics at the Regional Scale. <i>Water (Switzerland)</i> , 2020, 12, 3457.	2.7	7
11	Invigorating Hydrological Research Through Journal Publications. <i>Water Resources Research</i> , 2020, 56, .	4.2	5
12	Assessment of past flood changes across Europe based on flood-generating processes. <i>Hydrological Sciences Journal</i> , 2020, 65, 1830-1847.	2.6	9
13	Flood trends in Europe: are changes in small and big floods different?. <i>Hydrology and Earth System Sciences</i> , 2020, 24, 1805-1822.	4.9	54
14	A Process-Based Framework to Characterize and Classify Runoff Events: The Event Typology of Germany. <i>Water Resources Research</i> , 2020, 56, e2019WR026951.	4.2	37
15	Detecting Flood-Rich and Flood-Poor Periods in Annual Peak Discharges Across Europe. <i>Water Resources Research</i> , 2020, 56, e2019WR026575.	4.2	21
16	The role of flood wave superposition in the severity of large floods. <i>Hydrology and Earth System Sciences</i> , 2020, 24, 1633-1648.	4.9	17
17	Informed attribution of flood changes to decadal variation of atmospheric, catchment and river drivers in Upper Austria. <i>Journal of Hydrology</i> , 2019, 577, 123919.	5.4	26
18	Sociohydrology: Scientific Challenges in Addressing the Sustainable Development Goals. <i>Water Resources Research</i> , 2019, 55, 6327-6355.	4.2	226

#	ARTICLE	IF	CITATIONS
19	Causative classification of river flood events. Wiley Interdisciplinary Reviews: Water, 2019, 6, e1353.	6.5	86
20	Changing climate both increases and decreases European river floods. Nature, 2019, 573, 108-111.	27.8	639
21	The Value of Empirical Data for Estimating the Parameters of a Sociohydrological Flood Risk Model. Water Resources Research, 2019, 55, 1312-1336.	4.2	43
22	Twenty-three unsolved problems in hydrology (UPH) – a community perspective. Hydrological Sciences Journal, 2019, 64, 1141-1158.	2.6	474
23	Learning from the Ancient Maya: Exploring the Impact of Drought on Population Dynamics. Ecological Economics, 2019, 157, 1-16.	5.7	24
24	Floods in Austria. , 2019, , 169-177.		18
25	Modis Snowline Elevation Changes During Snowmelt Runoff Events in Europe. Journal of Hydrology and Hydromechanics, 2019, 67, 101-109.	2.0	14
26	Detection of trends in magnitude and frequency of flood peaks across Europe. Hydrological Sciences Journal, 2018, 63, 493-512.	2.6	68
27	Evolutionary leap in large-scale flood risk assessment needed. Wiley Interdisciplinary Reviews: Water, 2018, 5, e1266.	6.5	50
28	Joint Editorial: Invigorating hydrological research through journal publications. Hydrology Research, 2018, 49, iii-ix.	2.7	0
29	Reservoir Effects on Flood Peak Discharge at the Catchment Scale. Water Resources Research, 2018, 54, 9623-9636.	4.2	46
30	Hess Opinions: An interdisciplinary research agenda to explore the unintended consequences of structural flood protection. Hydrology and Earth System Sciences, 2018, 22, 5629-5637.	4.9	67
31	Joint editorial: Invigorating hydrological research through journal publications. Hydrology and Earth System Sciences, 2018, 22, 5735-5739.	4.9	3
32	Invigorating Hydrological Research through Journal Publications. Journal of Hydrometeorology, 2018, 19, 1713-1719.	1.9	0
33	Joint Editorial: Invigorating Hydrological Research through Journal Publications. Vadose Zone Journal, 2018, 17, 180001ed.	2.2	0
34	Invigorating hydrological research through journal publications. Ecohydrology, 2018, 11, e2016.	2.4	0
35	Invigorating hydrological research through journal publications. Hydrological Sciences Journal, 2018, 63, 1113-1117.	2.6	4
36	Conceptual model building inspired by field-mapped runoff generation mechanisms. Journal of Hydrology and Hydromechanics, 2018, 66, 303-315.	2.0	9

#	ARTICLE	IF	CITATIONS
37	Joint Editorial Invigorating Hydrological Research through Journal Publications. Journal of Hydrology and Hydromechanics, 2018, 66, 257-260.	2.0	1
38	Land use change impacts on floods at the catchment scale: Challenges and opportunities for future research. Water Resources Research, 2017, 53, 5209-5219.	4.2	269
39	Characterization of regional variability of seasonal water balance within Omo-Ghibe River Basin, Ethiopia. Hydrological Sciences Journal, 2017, 62, 1200-1215.	2.6	21
40	A dynamic framework for flood risk. Water Security, 2017, 1, 3-11.	2.5	37
41	Socio-hydrological modelling of flood-risk dynamics: comparing the resilience of green and technological systems. Hydrological Sciences Journal, 2017, 62, 880-891.	2.6	72
42	Changing climate shifts timing of European floods. Science, 2017, 357, 588-590.	12.6	584
43	Drought and flood in the Anthropocene: feedback mechanisms in reservoir operation. Earth System Dynamics, 2017, 8, 225-233.	7.1	122
44	A three-pillar approach to assessing climate impacts on low flows. Hydrology and Earth System Sciences, 2016, 20, 3967-3985.	4.9	20
45	Uncertainty contributions to low-flow projections in Austria. Hydrology and Earth System Sciences, 2016, 20, 2085-2101.	4.9	34
46	Adaptation of water resources systems to changing society and environment: a statement by the International Association of Hydrological Sciences. Hydrological Sciences Journal, 2016, 61, 2803-2817.	2.6	57
47	A fuzzy Bayesian approach to flood frequency estimation with imprecise historical information. Water Resources Research, 2016, 52, 6730-6750.	4.2	21
48	Modeling the interaction between flooding events and economic growth. Ecological Economics, 2016, 129, 193-209.	5.7	47
49	Conceptualizing socio-hydrological drought processes: The case of the Maya collapse. Water Resources Research, 2016, 52, 6222-6242.	4.2	73
50	Fragmented patterns of flood change across the United States. Geophysical Research Letters, 2016, 43, 10232-10239.	4.0	123
51	The influence of non-stationarity in extreme hydrological events on flood frequency estimation. Journal of Hydrology and Hydromechanics, 2016, 64, 426-437.	2.0	88
52	Attribution of regional flood changes based on scaling fingerprints. Water Resources Research, 2016, 52, 5322-5340.	4.2	75
53	Increasing river floods: fiction or reality?. Wiley Interdisciplinary Reviews: Water, 2015, 2, 329-344.	6.5	123
54	Accelerating advances in continental domain hydrologic modeling. Water Resources Research, 2015, 51, 10078-10091.	4.2	102

#	ARTICLE	IF	CITATIONS
55	Debatesâ€”Perspectives on socioâ€”hydrology: Capturing feedbacks between physical and social processes. <i>Water Resources Research</i> , 2015, 51, 4770-4781.	4.2	337
56	Charting unknown watersâ€”On the role of surprise in flood risk assessment and management. <i>Water Resources Research</i> , 2015, 51, 6399-6416.	4.2	83
57	Virtual laboratories: new opportunities for collaborative water science. <i>Hydrology and Earth System Sciences</i> , 2015, 19, 2101-2117.	4.9	63
58	Dependence between flood peaks and volumes: a case study on climate and hydrological controls. <i>Hydrological Sciences Journal</i> , 2015, 60, 968-984.	2.6	67
59	Impact of reduced anthropogenic emissions and century flood on the phosphorus stock, concentrations and loads in the Upper Danube. <i>Science of the Total Environment</i> , 2015, 518-519, 117-129.	8.0	17
60	Flood Processes and Hazards. , 2015, , 3-33.		5
61	The role of station density for predicting daily runoff by top-kriging interpolation in Austria. <i>Journal of Hydrology and Hydromechanics</i> , 2015, 63, 228-234.	2.0	27
62	Floods and climate: emerging perspectives for flood risk assessment and management. <i>Natural Hazards and Earth System Sciences</i> , 2014, 14, 1921-1942.	3.6	239
63	Regional parent flood frequency distributions in Europe â€” Part 1: Is the GEV model suitable as a pan-European parent?. <i>Hydrology and Earth System Sciences</i> , 2014, 18, 4381-4389.	4.9	59
64	Understanding flood regime changes in Europe: a state-of-the-art assessment. <i>Hydrology and Earth System Sciences</i> , 2014, 18, 2735-2772.	4.9	423
65	Insights from socio-hydrology modelling on dealing with flood risk â€” Roles of collective memory, risk-taking attitude and trust. <i>Journal of Hydrology</i> , 2014, 518, 71-82.	5.4	223
66	rtop: An R package for interpolation of data with a variable spatial support, with an example from river networks. <i>Computers and Geosciences</i> , 2014, 67, 180-190.	4.2	43
67	Emerging Approaches to Hydrological Risk Management in a Changing World. , 2013, , 3-10.		30
68	â€œPanta Rheiâ€”Everything Flowsâ€” Change in hydrology and societyâ€”The IAHS Scientific Decade 2013â€”2022. <i>Hydrological Sciences Journal</i> , 2013, 58, 1256-1275.	2.6	569
69	Flood frequency hydrology: 3. A Bayesian analysis. <i>Water Resources Research</i> , 2013, 49, 675-692.	4.2	137
70	Comparative assessment of predictions in ungauged basins â€” Part 2: Flood and low flow studies. <i>Hydrology and Earth System Sciences</i> , 2013, 17, 2637-2652.	4.9	95
71	Quantifying effects of catchments storage thresholds on step changes in the flood frequency curve. <i>Water Resources Research</i> , 2013, 49, 6946-6958.	4.2	41
72	Comparative assessment of predictions in ungauged basins â€” Part 3: Runoff signatures in Austria. <i>Hydrology and Earth System Sciences</i> , 2013, 17, 2263-2279.	4.9	93

#	ARTICLE	IF	CITATIONS
73	Comparative assessment of predictions in ungauged basins â€œ Part 1: Runoff-hydrograph studies. Hydrology and Earth System Sciences, 2013, 17, 1783-1795.	4.9	186
74	Socio-hydrology: conceptualising human-flood interactions. Hydrology and Earth System Sciences, 2013, 17, 3295-3303.	4.9	403
75	Runoff Prediction in Ungauged Basins. , 2013, , .		432
76	Extreme rainstorms: Comparing regional envelope curves to stochastically generated events. Water Resources Research, 2012, 48, .	4.2	23
77	Step changes in the flood frequency curve: Process controls. Water Resources Research, 2012, 48, .	4.2	63
78	Flood timescales: Understanding the interplay of climate and catchment processes through comparative hydrology. Water Resources Research, 2012, 48, .	4.2	156
79	Flood forecast errors and ensemble spreadâ€”A case study. Water Resources Research, 2012, 48, .	4.2	39
80	Estimating the flood frequency distribution at seasonal and annual time scales. Hydrology and Earth System Sciences, 2012, 16, 4651-4660.	4.9	37
81	Corrigendum to "Spatial moments of catchment rainfall: rainfall spatial organisation, basin morphology, and flood response" published in Hydrol. Earth Syst. Sci., 15, 3767â€”3783, 2011. Hydrology and Earth System Sciences, 2012, 16, 1237-1237.	4.9	0
82	Exploring the physical controls of regional patterns of flow duration curves â€œ Part 1: Insights from statistical analyses. Hydrology and Earth System Sciences, 2012, 16, 4435-4446.	4.9	102
83	Exploring the physical controls of regional patterns of flow duration curves â€œ Part 4: A synthesis of empirical analysis, process modeling and catchment classification. Hydrology and Earth System Sciences, 2012, 16, 4483-4498.	4.9	87
84	Runoff models and flood frequency statistics for design flood estimation in Austria â€œ Do they tell a consistent story?. Journal of Hydrology, 2012, 456-457, 30-43.	5.4	84
85	Statistical Hydrology. , 2011, , 479-517.		29
86	Spatial moments of catchment rainfall: rainfall spatial organisation, basin morphology, and flood response. Hydrology and Earth System Sciences, 2011, 15, 3767-3783.	4.9	83
87	Inclusion of historical information in flood frequency analysis using a Bayesian MCMC technique: a case study for the power dam OrÃ¡k, Czech Republic. Contributions To Geophysics and Geodesy, 2010, 40, .	0.6	21
88	Low Flows Regionalization in North-Western Italy. Water Resources Management, 2010, 24, 4049-4074.	3.9	58
89	Bayesian MCMC approach to regional flood frequency analyses involving extraordinary flood events at ungauged sites. Journal of Hydrology, 2010, 394, 101-117.	5.4	129
90	Barriers to the exchange of hydrometeorological data in Europe: Results from a survey and implications for data policy. Journal of Hydrology, 2010, 394, 63-77.	5.4	62

#	ARTICLE	IF	CITATIONS
91	Quantifying space-time dynamics of flood event types. <i>Journal of Hydrology</i> , 2010, 394, 213-229.	5.4	82
92	Generalised synthesis of space-time variability in flood response: An analytical framework. <i>Journal of Hydrology</i> , 2010, 394, 198-212.	5.4	67
93	Confidence intervals for the coefficient of L-variation in hydrological applications. <i>Hydrology and Earth System Sciences</i> , 2010, 14, 2229-2242.	4.9	7
94	On the role of storm duration in the mapping of rainfall to flood return periods. <i>Hydrology and Earth System Sciences</i> , 2009, 13, 205-216.	4.9	86
95	On the role of the runoff coefficient in the mapping of rainfall to flood return periods. <i>Hydrology and Earth System Sciences</i> , 2009, 13, 577-593.	4.9	76
96	A compilation of data on European flash floods. <i>Journal of Hydrology</i> , 2009, 367, 70-78.	5.4	623
97	An approach to estimate nonparametric flow duration curves in ungauged basins. <i>Water Resources Research</i> , 2009, 45, .	4.2	73
98	The Influence of Soil Characteristics in Low Flows Regionalization. <i>American Journal of Environmental Sciences</i> , 2009, 5, 535-545.	0.5	0
99	A comparison of homogeneity tests for regional frequency analysis. <i>Water Resources Research</i> , 2007, 43, .	4.2	127
100	Panta Rhei 2013-2015: global perspectives on hydrology, society and change. <i>Hydrological Sciences Journal</i> , 0, , 1-18.	2.6	53
101	A European Flood Database: facilitating comprehensive flood research beyond administrative boundaries. <i>Proceedings of the International Association of Hydrological Sciences</i> , 0, 370, 89-95.	1.0	32
102	Preface: Extreme Hydrological Events. <i>Proceedings of the International Association of Hydrological Sciences</i> , 0, 369, 1-2.	1.0	0
103	Human signatures derived from nighttime lights along the Eastern Alpine river network in Austria and Italy. <i>Proceedings of the International Association of Hydrological Sciences</i> , 0, 373, 131-136.	1.0	1
104	Estimating parameter values of a socio-hydrological flood model. <i>Proceedings of the International Association of Hydrological Sciences</i> , 0, 379, 193-198.	1.0	0
105	Joint editorial: Invigorating hydrological research through journal publications. <i>Proceedings of the International Association of Hydrological Sciences</i> , 0, 380, 3-8.	1.0	0
