#	ARTICLE	IF	CITATIONS
1	Plane stress yield function for aluminum alloy sheetsâ€”part 1: theory. International Journal of Plasticity, 2003, 19, 1297-1319.	8.8	1,405
2	Linear transformation-based anisotropic yield functions. International Journal of Plasticity, 2005, 21, 1009-1039.	8.8	824
3	Modeling of shear ductile fracture considering a changeable cut-off value for stress triaxiality. International Journal of Plasticity, 2014, 54, 56-80.	8.8	324
4	Prediction of six or eight ears in a drawn cup based on a new anisotropic yield function. International Journal of Plasticity, 2006, 22, 174-193.	8.8	270
5	Plane stress yield function for aluminum alloy sheetsâ€”part II: FE formulation and its implementation. International Journal of Plasticity, 2004, 20, 495-522.	8.8	253
6	Anisotropic hardening and non-associated flow in proportional loading of sheet metals. International Journal of Plasticity, 2009, 25, 1777-1817.	8.8	227
7	Asymmetric yield function based on the stress invariants for pressure sensitive metals. International Journal of Plasticity, 2014, 56, 184-202.	8.8	203
8	On linear transformations of stress tensors for the description of plastic anisotropy. International Journal of Plasticity, 2007, 23, 876-896.	8.8	201
9	A pressure-sensitive yield criterion under a non-associated flow rule for sheet metal forming. International Journal of Plasticity, 2004, 20, 705-731.	8.8	189
10	Modeling of ductile fracture from shear to balanced biaxial tension for sheet metals. International Journal of Solids and Structures, 2017, 112, 169-184.	2.7	179
11	A new approach for failure criterion for sheet metals. International Journal of Plasticity, 2011, 27, 440-459.	8.8	171
12	Enhanced assumed strain (EAS) and assumed natural strain (ANS) methods for oneâ€”point quadrature solidâ€”shell elements. International Journal for Numerical Methods in Engineering, 2008, 75, 156-187.	2.8	144
13	Anisotropic yield function based on stress invariants for BCC and FCC metals and its extension to ductile fracture criterion. International Journal of Plasticity, 2018, 101, 125-155.	8.8	137
14	Elasto-plastic finite element method based on incremental deformation theory and continuum based shell elements for planar anisotropic sheet materials. Computer Methods in Applied Mechanics and Engineering, 1999, 174, 23-56.	6.6	134
15	Earing predictions based on asymmetric nonquadratic yield function. International Journal of Plasticity, 2000, 16, 1075-1104.	8.8	127
16	Crushing response of square aluminium tubes filled with polyurethane foam and aluminium honeycomb. Thin-Walled Structures, 2017, 110, 140-154.	5.3	123
17	Effect of anisotropic yield functions on the accuracy of hole expansion simulations. Journal of Materials Processing Technology, 2011, 211, 475-481.	6.3	112
18	Path independent forming limits in strain and stress spaces. International Journal of Solids and Structures, 2012, 49, 3616-3625.	2.7	112

#	ARTICLE	IF	CITATIONS
19	A yield criterion through coupling of quadratic and non-quadratic functions for anisotropic hardening with non-associated flow rule. International Journal of Plasticity, 2017, 99, 120-143.	8.8	109
20	On the use of homogeneous polynomials to develop anisotropic yield functions with applications to sheet forming. International Journal of Plasticity, 2008, 24, 915-944.	8.8	106
21	Anisotropic ductile fracture criterion based on linear transformation. International Journal of Plasticity, 2017, 93, 3-25.	8.8	100
22	A new one-point quadrature enhanced assumed strain (EAS) solid-shell element with multiple integration points along thickness—part II: nonlinear applications. International Journal for Numerical Methods in Engineering, 2006, 67, 160-188.	2.8	97
23	A general elasto-plastic finite element formulation based on incremental deformation theory for planar anisotropy and its application to sheet metal forming. International Journal of Plasticity, 1999, 15, 35-67.	8.8	96
24	Strain rate effect of high purity aluminum single crystals: Experiments and simulations. International Journal of Plasticity, 2015, 67, 39-52.	8.8	88
25	Optimum blank design in sheet metal forming by the deformation path iteration method. International Journal of Mechanical Sciences, 1999, 41, 1217-1232.	6.7	87
26	A new one-point quadrature enhanced assumed strain (EAS) solid-shell element with multiple integration points along thickness: Part I-geometrically linear applications. International Journal for Numerical Methods in Engineering, 2005, 62, 952-977.	2.8	87
27	A non-associated constitutive model with mixed iso-kinematic hardening for finite element simulation of sheet metal forming. International Journal of Plasticity, 2010, 26, 288-309.	8.8	86
28	Anisotropic strain hardening behavior in simple shear for cube textured aluminum alloy sheets. International Journal of Plasticity, 2005, 21, 2426-2447.	8.8	85
29	Review of Drucker's postulate and the issue of plastic stability in metal forming. International Journal of Plasticity, 2006, 22, 391-433.	8.8	82
30	Sheet metal formability analysis for anisotropic materials under non-proportional loading. International Journal of Mechanical Sciences, 2005, 47, 1972-2002.	6.7	81
31	A new analytical theory for earing generated from anisotropic plasticity. International Journal of Plasticity, 2011, 27, 1165-1184.	8.8	78
32	On the use of a reduced enhanced solid-shell (RESS) element for sheet forming simulations. International Journal of Plasticity, 2007, 23, 490-515.	8.8	77
33	A criterion for general description of anisotropic hardening considering strength differential effect with non-associated flow rule. International Journal of Plasticity, 2019, 121, 76-100.	8.8	77
34	Earing predictions for strongly textured aluminum sheets. International Journal of Mechanical Sciences, 2010, 52, 1563-1578.	6.7	72
35	Consideration of strength differential effect in sheet metals with symmetric yield functions. International Journal of Mechanical Sciences, 2013, 66, 214-223.	6.7	68
36	Biaxial deformation behaviour of AZ31 magnesium alloy: Crystal-plasticity-based prediction and experimental validation. International Journal of Solids and Structures, 2012, 49, 3551-3561.	2.7	66

#	ARTICLE	IF	CITATIONS
37	Study on the definition of equivalent plastic strain under non-associated flow rule for finite element formulation. <i>International Journal of Plasticity</i> , 2014, 58, 219-238.	8.8	62
38	A novel approach for anisotropic hardening modeling. Part I: Theory and its application to finite element analysis of deep drawing. <i>International Journal of Plasticity</i> , 2009, 25, 2383-2409.	8.8	60
39	Correlation of the maximum shear stress with micro-mechanisms of ductile fracture for metals with high strength-to-weight ratio. <i>International Journal of Mechanical Sciences</i> , 2018, 146-147, 583-601.	6.7	60
40	Finite element method for sheet forming based on an anisotropic strain-rate potential and the convected coordinate system. <i>International Journal of Mechanical Sciences</i> , 1995, 37, 733-752.	6.7	59
41	Orthotropic strain rate potential for the description of anisotropy in tension and compression of metals. <i>International Journal of Plasticity</i> , 2010, 26, 887-904.	8.8	58
42	Evaluation of advanced anisotropic models with mixed hardening for general associated and non-associated flow metal plasticity. <i>International Journal of Plasticity</i> , 2011, 27, 1781-1802.	8.8	58
43	Development of a one point quadrature shell element for nonlinear applications with contact and anisotropy. <i>Computer Methods in Applied Mechanics and Engineering</i> , 2002, 191, 5177-5206.	6.6	57
44	Necking behavior of AA 6022-T4 based on the crystal plasticity and damage models. <i>International Journal of Plasticity</i> , 2015, 73, 3-23.	8.8	55
45	Anisotropic fracture forming limit diagram considering non-directionality of the equi-biaxial fracture strain. <i>International Journal of Solids and Structures</i> , 2018, 151, 181-194.	2.7	55
46	Strength modeling of sheet metals from shear to plane strain tension. <i>International Journal of Plasticity</i> , 2020, 134, 102813.	8.8	55
47	Machine learning-based constitutive model for J2- plasticity. <i>International Journal of Plasticity</i> , 2021, 138, 102919.	8.8	55
48	Stress integration method for a nonlinear kinematic/isotropic hardening model and its characterization based on polycrystal plasticity. <i>International Journal of Plasticity</i> , 2009, 25, 1684-1710.	8.8	52
49	Suppression of necking in incremental sheet forming. <i>International Journal of Solids and Structures</i> , 2014, 51, 2840-2849.	2.7	49
50	On the existence of indeterminate solutions to the equations of motion under non-associated flow. <i>International Journal of Plasticity</i> , 2008, 24, 583-613.	8.8	47
51	Springback prediction for sheet metal forming process using a 3D hybrid membrane/shell method. <i>International Journal of Mechanical Sciences</i> , 2002, 44, 2133-2153.	6.7	46
52	A new approach to reduce membrane and transverse shear locking for one-point quadrature shell elements: linear formulation. <i>International Journal for Numerical Methods in Engineering</i> , 2006, 66, 214-249.	2.8	46
53	Failure prediction in the hole-flanging process of aluminium alloys. <i>Engineering Fracture Mechanics</i> , 2013, 99, 251-265.	4.3	45
54	A coupled yield criterion for anisotropic hardening with analytical description under associated flow rule: Modeling and validation. <i>International Journal of Plasticity</i> , 2021, 136, 102882.	8.8	45

#	ARTICLE	IF	CITATIONS
55	One point quadrature shell element with through-thickness stretch. Computer Methods in Applied Mechanics and Engineering, 2005, 194, 1161-1199.	6.6	44
56	Kinematics of Portevin-Le Chatelier bands in simple shear. International Journal of Plasticity, 2014, 58, 66-83.	8.8	44
57	The effect of plastic anisotropy on compressive instability in sheet metal forming. International Journal of Plasticity, 2000, 16, 649-676.	8.8	43
58	Combined anisotropic and distortion hardening to describe directional response with Bauschinger effect. International Journal of Plasticity, 2019, 122, 73-88.	8.8	43
59	Phospholipase D1 Drives a Positive Feedback Loop to Reinforce the Wnt/ β ² -Catenin/TCF Signaling Axis. Cancer Research, 2010, 70, 4233-4242.	0.9	42
60	Stress integration-based on finite difference method and its application for anisotropic plasticity and distortional hardening under associated and non-associated flow rules. Computer Methods in Applied Mechanics and Engineering, 2019, 345, 123-160.	6.6	41
61	A new approach for fracture prediction considering general anisotropy of metal sheets. International Journal of Plasticity, 2020, 124, 199-225.	8.8	40
62	Analytical description of an asymmetric yield function (Yoon2014) by considering anisotropic hardening under non-associated flow rule. International Journal of Plasticity, 2021, 140, 102978.	8.8	39
63	Ideal sheet forming with frictional constraints. International Journal of Plasticity, 2000, 16, 595-610.	8.8	38
64	Buckling analysis for an integrally stiffened panel structure with a friction stir weld. Thin-Walled Structures, 2009, 47, 1608-1622.	5.3	38
65	A novel approach for anisotropic hardening modeling. Part II: Anisotropic hardening in proportional and non-proportional loadings, application to initially isotropic material. International Journal of Plasticity, 2010, 26, 1029-1049.	8.8	38
66	Mechanical behavior of an asymmetrically rolled and annealed 1050-O sheet. International Journal of Mechanical Sciences, 2008, 50, 1372-1380.	6.7	37
67	Wrinkling initiation and growth in modified Yoshida buckling test: Finite element analysis and experimental comparison. International Journal of Mechanical Sciences, 2000, 42, 1683-1714.	6.7	36
68	Alternative approach to model ductile fracture by incorporating anisotropic yield function. International Journal of Solids and Structures, 2019, 164, 12-24.	2.7	36
69	Kinematic hardening model considering directional hardening response. International Journal of Plasticity, 2018, 110, 145-165.	8.8	35
70	Investigation into wrinkling behavior in the elliptical cup deep drawing process by finite element analysis using bifurcation theory. Journal of Materials Processing Technology, 2001, 111, 170-174.	6.3	28
71	Investigation into the wrinkling behaviour of thin sheets in the cylindrical cup deep drawing process using bifurcation theory. International Journal for Numerical Methods in Engineering, 2003, 56, 1673-1705.	2.8	28
72	Microstructural evolution and its effect on mechanical properties of commercially pure aluminum deformed by ECAE (Equal Channel Angular Extrusion) via routes A and C. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2010, 527, 7927-7930.	5.6	26

#	ARTICLE	IF	CITATIONS
73	Analytical determination of anisotropic parameters for Poly6 yield function. International Journal of Mechanical Sciences, 2021, 201, 106467.	6.7	26
74	Effect of Anisotropic Yield Functions on the Accuracy of Hole Expansion Simulations for 590 MPa Grade Steel Sheet. Tetsu-To-Hagane/Journal of the Iron and Steel Institute of Japan, 2010, 96, 557-563.	0.4	25
75	On the elasto-plastic buckling of Integrally Stiffened Panels (ISP) joined by Friction Stir Welding (FSW): Numerical simulation and optimization algorithms. International Journal of Mechanical Sciences, 2013, 76, 49-59.	6.7	25
76	A non-associated plasticity model with anisotropic and nonlinear kinematic hardening for simulation of sheet metal forming. International Journal of Solids and Structures, 2015, 69-70, 370-382.	2.7	25
77	Influence of initial back stress on the earing prediction of drawn cups for planar anisotropic aluminum sheets. Journal of Materials Processing Technology, 1998, 80-81, 433-437.	6.3	24
78	Numerical modeling and analysis for forming process of dual-phase 980 steel exposed to infrared local heating. International Journal of Solids and Structures, 2015, 75-76, 211-224.	2.7	24
79	Prediction of failure in bending of an aluminium sheet alloy. International Journal of Mechanical Sciences, 2016, 119, 23-35.	6.7	23
80	A new strategy to describe nonlinear elastic and asymmetric plastic behaviors with one yield surface. International Journal of Plasticity, 2017, 98, 217-238.	8.8	23
81	Investigation of microstructure characteristics of commercially pure aluminum during equal channel angular extrusion. Materials Science & Engineering A: Structural Materials: Properties, Microstructure and Processing, 2008, 485, 621-626.	5.6	22
82	A reduced Yld2004 function for modeling of anisotropic plastic deformation of metals under triaxial loading. International Journal of Mechanical Sciences, 2019, 161-162, 105027.	6.7	22
83	Incorporation of Sheet-Forming Effects in Crash Simulations Using Ideal Forming Theory and Hybrid Membrane and Shell Method. Journal of Manufacturing Science and Engineering, Transactions of the ASME, 2005, 127, 182-192.	2.2	20
84	Enhanced one-point quadrature shell element for nonlinear applications. International Journal for Numerical Methods in Engineering, 2007, 69, 627-663.	2.8	20
85	Plastic anisotropy and failure in thin metal: Material characterization and fracture prediction with an advanced constitutive model and polar EPS (effective plastic strain) fracture diagram for AA 3014-H19. International Journal of Solids and Structures, 2018, 151, 195-213.	2.7	20
86	A stress integration algorithm for plane stress elastoplasticity and its applications to explicit finite element analysis of sheet metal forming processes. Computers and Structures, 1998, 66, 301-311.	4.4	19
87	Modeling of anisotropic plastic behavior of ferritic stainless steel sheet. International Journal of Mechanical Sciences, 2009, 51, 718-725.	6.7	18
88	Anisotropic Behavior in Plasticity and Ductile Fracture of an Aluminum Alloy. Key Engineering Materials, 0, 651-653, 163-168.	0.4	18
89	Anisotropic distortional hardening based on deviatoric stress invariants under non-associated flow rule. International Journal of Plasticity, 2022, 151, 103214.	8.8	18
90	One point quadrature shell elements for sheet metal forming analysis. Archives of Computational Methods in Engineering, 2005, 12, 3-66.	10.2	17

#	ARTICLE	IF	CITATIONS
91	A user-friendly anisotropic ductile fracture criterion for sheet metal under proportional loading. International Journal of Solids and Structures, 2021, 217-218, 48-59.	2.7	17
92	A new asymmetric yield criterion based on Yld 2000-2d under both associated and non-associated flow rules: Modeling and validation. Mechanics of Materials, 2022, 167, 104245.	3.2	17
93	One point quadrature shell elements: a study on convergence and patch tests. Computational Mechanics, 2007, 40, 871-883.	4.0	16
94	Puncture fracture in an aluminum beverage can. International Journal of Impact Engineering, 2010, 37, 150-160.	5.0	16
95	Benchmark 3 - Incremental sheet forming. AIP Conference Proceedings, 2013, , .	0.4	16
96	Sheet Metal Forming Simulation for Aluminum Alloy Sheets. , 0, , .		13
97	Modeling of aluminum alloy sheets based on new anisotropic yield functions. Journal of Materials Processing Technology, 2006, 177, 134-137.	6.3	13
98	Elasto-plastic buckling of integrally stiffened panels (ISP): An optimization approach for the design of cross-section profiles. Thin-Walled Structures, 2011, 49, 864-873.	5.3	13
99	An Experimental Study of Square Aluminium Tubes with Honeycomb Core Subjected to Quasi-Static Compressive Loads. Key Engineering Materials, 0, 626, 91-96.	0.4	13
100	A manufacturing process using the infrared ray local heating method for seat cross members. International Journal of Advanced Manufacturing Technology, 2017, 89, 3299-3305.	3.0	13
101	Study on springback from thermal-mechanical boundary condition imposed to V-bending and L-bending processes coupled with infrared rays local heating. International Journal of Material Forming, 2018, 11, 417-433.	2.0	13
102	Stress based prediction of formability and failure in incremental sheet forming. International Journal of Material Forming, 2016, 9, 413-421.	2.0	12
103	Prediction of ballooning and burst for nuclear fuel cladding with anisotropic creep modeling during Loss of Coolant Accident (LOCA). Nuclear Engineering and Technology, 2021, 53, 3379-3397.	2.3	12
104	Hole expansion simulation of high strength steel sheet. International Journal of Material Forming, 2010, 3, 259-262.	2.0	11
105	Material characterizations for Benchmark 1 and Benchmark 2. , 2013, , .		11
106	Benchmark 3 - Springback of an Al-Mg alloy in warm forming conditions. Journal of Physics: Conference Series, 2016, 734, 022003.	0.4	11
107	A multiplicative plastic hardening model in consideration of strain softening and strain rate: Theoretical derivation and characterization of model parameters with simple tension and creep test. International Journal of Mechanical Sciences, 2020, 187, 105913.	6.7	11
108	Characterizations of Aluminum Alloy Sheet Materials Numisheet 2005. AIP Conference Proceedings, 2005, , .	0.4	10
