#	ARTICLE	IF	CITATIONS
1	CONSIDERATIONS UPON A NEW TRIPOD JOINT SOLUTION. <i>Mechanika</i> , 2013, 19, .	0.5	11
2	A method for the determination of the coefficient of rolling friction using cycloidal pendulum. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017, 227, 012027.	0.6	9
3	Valuation of coefficient of rolling friction by the inclined plane method. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017, 200, 012006.	0.6	8
4	Estimation of coefficient of rolling friction by the evolvent pendulum method. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017, 200, 012005.	0.6	6
5	Method and device for measurement of dynamic viscosity. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017, 174, 012041.	0.6	5
6	Finding the coefficient of rolling friction using a pericycloidal pendulum. <i>IOP Conference Series: Materials Science and Engineering</i> , 2018, 444, 022015.	0.6	4
7	Scuffing analysis of roller-shoe mechanism after an aggressive test. <i>IOP Conference Series: Materials Science and Engineering</i> , 2019, 591, 012020.	0.6	4
8	The effect of transport velocity upon spin torque. <i>IOP Conference Series: Materials Science and Engineering</i> , 2017, 174, 012008.	0.6	3
9	Upon the relationship between rolling friction and sliding friction. <i>IOP Conference Series: Materials Science and Engineering</i> , 2018, 400, 042002.	0.6	3
10	Use of dual numbers in kinematical analysis of spatial mechanisms. Part I: principle of the method. <i>IOP Conference Series: Materials Science and Engineering</i> , 2019, 568, 012033.	0.6	3
11	Experimental Highlight of Hysteresis Phenomenon in Rolling Contact. <i>Journal of Physics: Conference Series</i> , 2015, 585, 012010.	0.4	2
12	Method of Integration for Equation of Two Balls in Dumped Collision. <i>Journal of Physics: Conference Series</i> , 2015, 585, 012008.	0.4	2
13	Considerations upon applying tripod coupling in artificial hip joint. <i>IOP Conference Series: Materials Science and Engineering</i> , 2016, 147, 012074.	0.6	2
14	The importance of correct specification of tribological parameters in dynamical systems modelling. <i>IOP Conference Series: Materials Science and Engineering</i> , 2018, 294, 012039.	0.6	2
15	Analytical kinematics for direct coupled shafts using a point-surface contact. <i>IOP Conference Series: Materials Science and Engineering</i> , 2018, 444, 052002.	0.6	2
16	Aspects concerning the friction for the motion on an inclined plane of an axisymmetric body. <i>IOP Conference Series: Materials Science and Engineering</i> , 2019, 477, 012036.	0.6	2
17	Kinematical analysis of a generalized Cardanic joint. <i>IOP Conference Series: Materials Science and Engineering</i> , 2019, 477, 012037.	0.6	2
18	An improved technique of finding the coefficient of rolling friction by inclined plane method. <i>IOP Conference Series: Materials Science and Engineering</i> , 2019, 514, 012004.	0.6	2

#	ARTICLE	IF	CITATIONS
19	Use of dual numbers in kinematical analysis of spatial mechanisms. Part II: applying the method for the generalised Cardan mechanism. IOP Conference Series: Materials Science and Engineering, 2019, 568, 012032.	0.6	2
20	An Analytical Solution for Non-Linear Viscoelastic Impact. Mathematics, 2021, 9, 1849.	2.2	2
21	Validation of Nonlinear Dependence of Rolling Friction Moment on the Normal Force for Elastic Materials. Materials, 2022, 15, 2518.	2.9	2
22	Some Consideration Regarding the Models for Collisions with Plastic Indentation. Applied Mechanics and Materials, 0, 658, 161-166.	0.2	1
23	Determination of the coefficient of friction using spinning motion. IOP Conference Series: Materials Science and Engineering, 2016, 147, 012024.	0.6	1
24	Testing the assumption of linear dependence between the rolling friction torque and normal force. MATEC Web of Conferences, 2017, 112, 07002.	0.2	1
25	Dynamical analysis of a 2-degrees of freedom spatial pendulum. MATEC Web of Conferences, 2018, 184, 01003.	0.2	1
26	Graphical-analytical analysis of the mechanism with rotating cam and flat-face follower. MATEC Web of Conferences, 2018, 184, 01010.	0.2	1
27	Proposed parameter for the characterization of friction in cylindrical gears teeth contact. IOP Conference Series: Materials Science and Engineering, 2020, 724, 012008.	0.6	1
28	Indetermination versus incompatibility in dynamic systems with dry friction. Journal of Physics: Conference Series, 2020, 1426, 012011.	0.4	1
29	Method and device for dynamic modelling of rubbery materials applied to human soft tissues. Part I: determination of mechanical characteristics and dynamic model proposal. IOP Conference Series: Materials Science and Engineering, 2016, 161, 012056.	0.6	0
30	Method and device for dynamic modelling of rubbery materials applied to human soft tissues. Part II: device and experimental results. IOP Conference Series: Materials Science and Engineering, 2016, 161, 012057.	0.6	0
31	Use of loading-unloading compression curves in medical device design. IOP Conference Series: Materials Science and Engineering, 2017, 227, 012026.	0.6	0
32	Damped periodic motions used in the study of the drag coefficient. MATEC Web of Conferences, 2017, 112, 07003.	0.2	0
33	Rigidity versus deformability hypothesis in impact dynamics. MATEC Web of Conferences, 2017, 112, 07005.	0.2	0
34	Determining the coefficient of rolling friction using hypocycloidal oscillations. IOP Conference Series: Materials Science and Engineering, 2018, 444, 022017.	0.6	0
35	Grapho-analytical kinematic analysis for plane cam mechanisms and follower with finite curvature. IOP Conference Series: Materials Science and Engineering, 2018, 444, 052001.	0.6	0
36	An improved model for the damped impact of composite materials applicable to wind turbine blades. MATEC Web of Conferences, 2018, 184, 01008.	0.2	0

#	ARTICLE	IF	CITATIONS
37	Identification of exponent from load-deformation relation for soft materials from impact tests. IOP Conference Series: Materials Science and Engineering, 2018, 294, 012041.	0.6	0
38	Considerations on finding the rolling and spinning friction coefficients. MATEC Web of Conferences, 2018, 184, 01009.	0.2	0
39	Method for simultaneous estimation of rolling and spinning friction in a higher pair. IOP Conference Series: Materials Science and Engineering, 2019, 514, 012005.	0.6	0
40	Employment of hyper-cycloidal oscillatory motion for finding the coefficient of rolling friction. Part 2: Experimental investigation. IOP Conference Series: Materials Science and Engineering, 2019, 514, 012003.	0.6	0
41	Upon the efficiency of gear transmissions. Journal of Physics: Conference Series, 2020, 1426, 012012.	0.4	0
42	Experimental Aspects Concerning Self-locking Angle. , 2010, , 479-493.		0
43	The effect of mass eccentricity upon tribological test results. IOP Conference Series: Materials Science and Engineering, 0, 444, 022016.	0.6	0
44	Theoretical and Experimental Aspects Regarding Nonlinear Effects of Dry Friction and Unbalanced Rotational Mass in a Dynamical System. Mechanika, 2019, 24, .	0.5	0
45	Employment of hyper-cycloidal oscillatory motion for finding the coefficient of rolling friction. Part 1: Theoretical model. IOP Conference Series: Materials Science and Engineering, 0, 514, 012002.	0.6	0
46	A Numerical Procedure for Position Analysis of a Robotic Structure. Part I: General Methodology. Mechanisms and Machine Science, 2021, , 23-32.	0.5	0
